Specify award currency while awarding a bid

Current Problem

Regional requirements dictate that despite the bid being from a different country the PO needs to be generated in the currency from where the goods are shipped (the buyer's local event currency).

Solution

The buyer can enable a rule that will allow the user to be able to switch the currency from the supplier to the event currency. We allow the award to be made in the supplier's bid currency only not in the PO. The PO needs to be generated in the currency from where the goods are shipped (the buyer's local event currency).

Specify award currency while awarding a bid

If the rule is turned as part of the template configuration, the buyer user will see the option to Award in

- Bid Currency – the currency that was chosen by the supplier for award
- Event Currency – the currency of the event and the PO will be generated in this currency

Specify award currency while awarding a bid

Applicable to the Following:

- Quote Automation

Change Management for GA:

- None

Using this Feature:

Enabling
- This feature is 'on' if configured in the template

Prerequisites
- "Quote Automation" must be turned on for the Buyer on the Admin App by Ariba Support

Thank you
