Extension of Delivery Date Tolerance rule for Order Confirmation to regular suppliers

Saeed Rezavi, Solution Management, SAP Ariba
Vanessa Castro, Product Management, SAP Ariba

SAP Run Simple

Feature at a Glance

Introducing: **Extension of Delivery Date Tolerance rule for Order Confirmation to regular suppliers**

Customer challenge

The business rule "Apply line item delivery date tolerance to order confirmations" was implemented only for CSC suppliers. This resulted in some confusion on the buyer side because the rule appears as a general configuration which makes the buyer administrator think that it's being applied to all suppliers related to that account.

Meet that challenge with **SAP** Ariba

Extend the Order Confirmation delivery date tolerance business rule to all suppliers. Validation will apply to hosted and integrated transactions.

Experience key benefits

Consistency across all suppliers and alignment with CSC behavior for the business rule.

Solution area

Operational Procurement / Network Transactions

Enablement information

A member of the buyer's Customer Administrator group can enable this business rule.
This is an optional feature.

Value measure	◑	low
Ease of implementation	◑	simple
Regional limitations	⬤	global

Feature at a Glance
