SAP Run Simple

Feature at a Glance
Introducing: Ability to mark PR custom fields as Internal

Customer challenge

Currently there is no option to mark custom fields on a PR as internal.
When certain custom fields are modified during a Change PO, there is often no change in the PO that needs to be transmitted to the supplier. These kind of Change POs can therefore cause confusion to the supplier.

Meet that challenge with SAP Ariba

This feature allows custom fields on a Requisition to be marked as internal. If such a custom field marked as internal is modified when doing a Change PO, the PO version will be internal and will not be transmitted to the supplier.

Experience key benefits

Custom fields added on a Requisition for internal tracking purposes can be modified without the new PO version being transmitted to the Supplier, avoiding the confusion caused by the same.

Solution area

- SAP Ariba Buying
- SAP Ariba Buying and Invoicing

Implementation information

This feature is "off" by default. To enable this feature, please submit a Service Request to indicate which fields should be marked as internal.
