 Run Simple

Feature at a Glance

Introducing: Manufacturing type field to filter forecast and build priority views

Ease of implementation  Low-touch/simple

Geographic relevance  Global

Customer challenge

Ariba Network should allow buyers and suppliers to filter forecast and inventory data based on a selection by 'Manufacturing Type'

Meet that challenge with SAP Ariba

The feature provides additional product attribute named 'Manufacturing Type' to filter materials in the forecast and SMI Screens. In the Excel Upload/Download menu the field is added as a selection/filter option for job types: Forecast, Build priority and Inventory. In the Excel file itself the 'Manufacturing Type' is displayed as a column.

Experience key benefits

Sharing relevant material related attributes to forecast and inventory with suppliers.
Usability improvement for suppliers.

Solution area

SAP Ariba Supply Chain Collaboration

Implementation information

This feature is "on" by default. No action is required to utilize this feature.

Prerequisites and Limitations
