SAP Ariba

Feature at a Glance
Enhanced Approvable Edit Rules

Johan Holm, SAP Ariba
Target GA: June, 2018

SAP Run Simple

Feature at a Glance
Introducing: **Enhanced Approvable Edit Rules**

Customer challenge

Today, while triggering the approval flow for requisitions based on change to cost, the SAP Ariba solutions does not differentiate whether the total cost has increased from the initial amount specified by the preparer/requester. Decreasing the total cost often does not require re-approval. This is painful and could potentially delay the purchase delivery for no reason.

Meet that challenge with
SAP Ariba

This feature introduce additional Edit Rule conditions that let's you define under which circumstances the approval workflow should be redrawn or re-triggered;

- Total Cost is Increased (in addition to the existing 'Total Cost is Changed')
- At Least One Line Item has Increased Amount
- At Lease One Line Item is changed

SAP Ariba also supports the ability to specify absolute and percentage tolerances for the change/increase in Total or Line item amount.
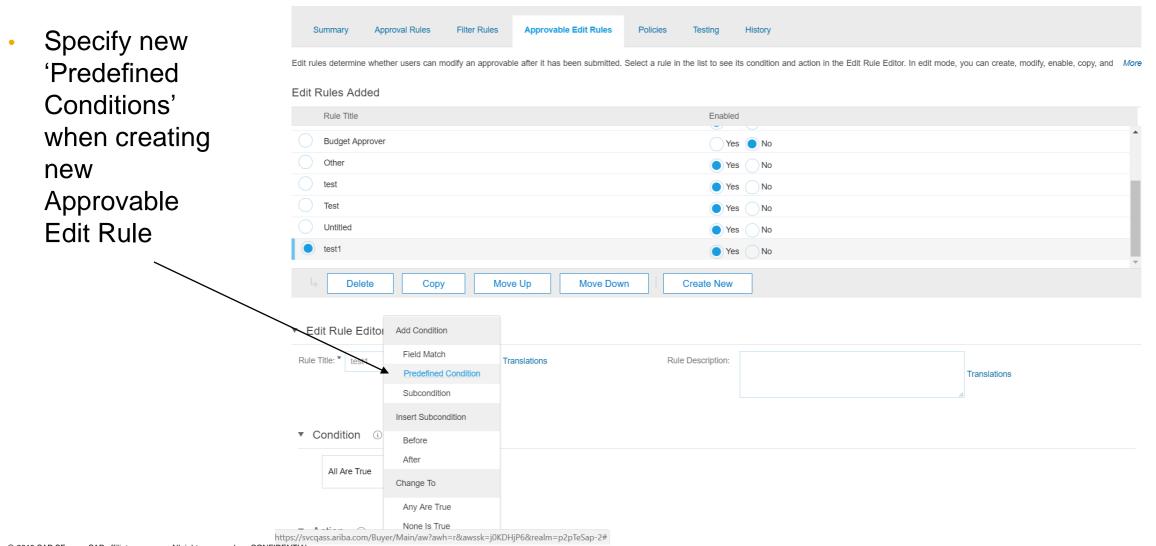

Experience key benefits

This feature introduce new advanced Edit Rules that allows approvals to only be re-triggered when necessary, such as the amount has been increased with a certain value or percentage.

Solution area

- SAP Ariba Buying
- SAP Ariba Buying and Invoicing

Implementation information

This feature is "On" by default.

Prerequisites and Limitations

N/A

Feature at a Glance
Using: **Enhanced Approvable Edit Rules**

- Specify new 'Predefined Conditions' when creating new Approvable Edit Rule

Edit Mode

| Summary | Approval Rules | Filter Rules | **Approvable Edit Rules** | Policies | Testing | History |

Edit rules determine whether users can modify an approvable after it has been submitted. Select a rule in the list to see its condition and action in the Edit Rule Editor. In edit mode, you can create, modify, enable, copy, and *More*

Edit Rules Added
