Ease of implementation  Low touch / simple
Geographic relevance  Global

Customer challenge

There is currently no simple method to export Bid History from an event so that it can be evaluated offline in MS Excel.

Meet that challenge with SAP Ariba

This feature allows you to export a bid history report to Excel. This report can be useful to buyers who would like to understand how their suppliers' bids have progressed throughout an event. For example, if a buyer chooses to negotiate with suppliers after they've placed initial bids, the buyer might want to understand how the subsequent bids changed as a result of these negotiations.

Experience key benefits

For each line item in an RFP Event, the report includes all bids that each supplier placed during the event, including the date and time of each bid. All terms appear in the report. The report shows the rankings of the most recent bids, and the percentage differences between the lower-ranked bids and the best bid.

SAP Ariba Sourcing

Implementation information

This feature is automatically on for all customers with the applicable solutions and is ready for immediate use.

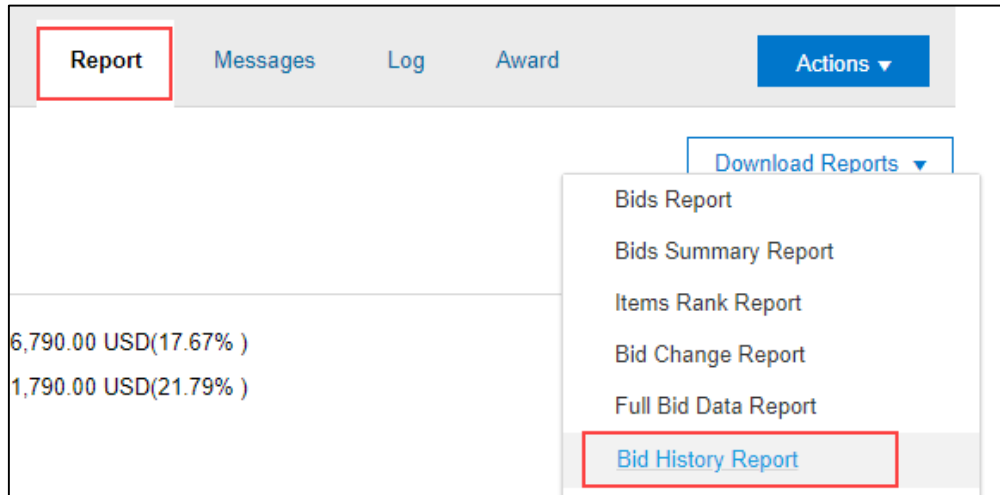

Prerequisites and Limitations

Limitation: This report will only work for events created after this feature has been released (GA). It will not work for events created prior to the GA date.
