Introducing: Changing the sequence of execution of catalog content rule types

Customer challenge

Currently it is not possible to change the sequence in which catalog content rule types are executed.

Meet that challenge with SAP Ariba

This feature allows to configure the sequence in which catalog content rule types are executed. Rule types can be moved by dragging and dropping them to rearrange the order in which they are executed.

- A Reorder button in the Content Rules page now includes the Rule Types and Rules options.
- A new Reorder Content Rule Types page enables users to rearrange the order in which catalog content rule types are executed

Experience key benefits

This provides flexibility in execution of the catalog content rules, which can further enhance the catalog validation and enrichment process.

Solution area

SAP Ariba Catalogs
SAP Ariba Buying
SAP Ariba Buying and Invoicing

Implementation information

This feature is **automatically on** for all customers with the applicable solutions and is ready for immediate use.

Prerequisites and Restrictions

Your site must be enabled for managing catalogs using the content management system (CMS).

Reorder Content Rules

You can drag rules to change their order within a type but not between types. Rules are applied by type in the order they are listed. You cannot change the order of the rule types.
