Feature at a Glance
Exclude taxes and charges from used amount accumulation

Sunny Bhambhwani , Roberto Valdovinos, SAP Ariba
Target GA: May, 2020

THE BEST RUN **SAP**

Feature at a Glance
Introducing: Exclude taxes and charges from used amount accumulation

Customer challenge

Currently, contracts accumulate amounts from the Purchase Requisition / Purchase Order including taxes and charges.

In some regions the tax policy changes frequently and results in frequent contract changes. Each time tax policy changes, the amount in the contract needs to be amended to adopt the tax rate change.

Meet that challenge with
SAP Ariba

With this feature, sites may be configured such that contract creators may specify whether to exclude taxes and charges from used amount accumulation in release order contracts.

Experience key benefits

Customers will have more flexibility on how they want to consider contract accumulation with regards to applicable taxes and charges.

Solution area

SAP Ariba Buying
SAP Ariba Buying and Invoicing
SAP Ariba Catalog

Implementation information

This feature is automatically on for all customers with the applicable solutions but requires **customer configuration.**

Prerequisites and Restrictions

Users may not change these flags for contracts that exist prior to the release of this feature. Therefore, the behavior is applicable only for the new contracts created after the feature is released.

Feature at a Glance

Introducing: **Exclude taxes and charges from used amount accumulation**

When configured, **Exclude taxes** and **Exclude charges** check boxes are displayed in the **Limits** page when creating release order contracts.

Specifies if the maximum limit amount includes or excludes taxes and charges. If set to "Yes", the contract's available amount is calculated excluding taxes and charges.
