Feature at a Glance
Sending requisition line-level attachments to SAP S/4HANA Cloud

Jaideep Tungare, SAP Ariba
Target GA: May 2020

THE BEST RUN **SAP**

Feature at a Glance

Introducing: **Sending requisition line-level attachments to SAP S/4HANA Cloud**

Customer challenge

Currently it is not possible to transfer line item attachments from guided buying requests to S/4HANA requisitions.

Meet that challenge with
SAP Ariba

This feature allows attachments added to line items on requisitions to be sent to S/4HANA Cloud when submitting requisitions for approval or even after attachments are added during the approval phase.

Experience key benefits

Attachments added to line items in requests created via guided buying may always be visible in requisitions created in S/4HANA as part of Integration.

Solution area

- SAP Ariba Buying with guided buying capability
- SAP Ariba Buying and Invoicing with guided buying capability

Implementation information

To have this feature enabled, please have your Designated Support Contact (DSC) submit a Service Request (SR).

This feature is applicable to both 2NV and 3EN S/4HANA Cloud integration scenarios with guided buying.

In addition to SAP Ariba support enabling the feature the following Guided buying parameter needs to be enabled:

PARAM_ENABLE_PR_ATTACHMENTS_FOR_S4HANA

Prerequisites and Restrictions

- The maximum file size for a single attachment for a line item can be 35MB.
- File type extensions used must be supported in SAP Ariba Buying solution.
- As a default, five attempts are made at five minute intervals for failed transfers. This can be configured with the help of SAP Ariba support.
- Header level attachments are not supported.
- Line item attachments cannot be edited, but need to be deleted and added again.
- Duplicate attachments can be sent and will not trigger any errors or warnings.

Feature at a Glance
Introducing: **Sending requisition line-level attachments to SAP S/4HANA Cloud**

Detailed feature information

- There will be a new status named 'Submitting' for requisitions in guided buying when attachments are associated with the requisition.

- The Status of the requisition changes to 'Submitted' when either of the following conditions is met:

    - All attachments are successfully sent to S/4Hana Cloud

    - One or more attachments failed to transfer to S/4Hana Cloud after the maximum no. of attempts configured for the site.

        - In such case, requester in guided buying would get an email notification

        - By manual intervention, the requester may delete the failed attachment and resubmit the requisition.
