

## VELUX A/S goes live on SAP Ariba Network!

**Dear supplier,**

As part of developing our procurement set up – VELUX has joined the Ariba Network. VELUX A/S works globally with sales and operations in more than 40 countries. SAP Ariba network enables VELUX A/S to stay connected with all units.

Ariba Network is a digital marketplace where millions of transactions are being traded. The network operates in more than 190 countries and trades more than USD 1 trillion in goods and services each year. The network makes it easy for buyers and suppliers to collaborate on transactions and strengthen relationships. SAP Ariba network allows you to trade with VELUX A/S and all of your other customers who are present in the portal.

Furthermore, the network will bring you better visibility towards requisitions of your items, less errors in orders, a reduction in manual processing errors and lower operating costs.

Please watch the video below to get more information about the SAP Ariba network.

**So what's next?**

We are inviting you to a summit on 4 April in which you will learn more about the Ariba Network and how to utilize its features. Please register by clicking [here](#).

In the very near future we will contact you regarding registration to the SAP Ariba network. We will instruct you precisely how to register and invite you to an introduction to the VELUX Ariba set up.

If you have any comments or questions, feel free to reach out to either [Mikael Hansen](#) or [Mateusz Forlita](#).

We thank you for your collaboration.

Best regards,

*Bringing light to life™*

Yours sincerely
