# Feature at a Glance

## Introducing: Enhancements to the SAP Ariba Cloud Integration Gateway portal to support SAP S/4HANA integration

Ease of implementation  High touch  
Geographic relevance  Global

### Customer challenge

SAP Ariba Cloud Integration Gateway integrates S/4 HANA On-premise ERP systems using CIG Add-on for Buyers; there is no option available for Suppliers. CIG Currently does not support API based integration for S/4 HANA on-premise systems or co-existence with CIG Add-on & API, when Add-on is available.

### Meet that challenge with SAP Ariba

Aligned with IES strategy to provide API based integration, starting with S/4 HANA On-premise 2020 release, native APIs are available for some S2P sub-processes. Wherever APIs are available, CIG supports integration via all 3 – CIG Add-on (available for Buyers), S/4 HANA APIs, CIG Add-on & S/4H API in co-existence mode.

### Experience key benefits

CIG Add-on Buyers will be able to leverage API as well as Add-on functionality to integrate S/4 HANA with Ariba solutions.

CIG Suppliers will be able to use API to integrate S/4 HANA with Ariba Solutions.

### Solution area

SAP S/4HANA 2020 On-premise  
SAP Ariba Procurement Solutions  
SAP Ariba Cloud Integration Gateway

### Implementation information

This feature is automatically on for all customers with the applicable solutions but requires **customer configuration**

### Prerequisites and Restrictions

For Prerequisites, For co-existence scenarios, CIG Add-on installation and configuration is required. For further information please check the online feature documentation

Following restrictions apply:

- APIs should be available for the scope items.
- Applicable to new S/4 HANA 2020 customers.
