# Feature at a Glance

## Introducing: Data routing based on data center location

Ease of implementation

High touch

Geographic relevance

Global

### Customer challenge

SAP Ariba Cloud Integration Gateway thus far is only available EU (European Data Center). Americas/US Data Center is not option for Americas customers.

### Meet that challenge with SAP Ariba

With 2102 release, CIG is available in US Data Center.

USDC for customers with a country in North, Central or South America set in their Ariba Network company profile or customers on SAP Ariba applications in USDC.

USDC will be available for both Test and Production environments.

### Experience key benefits

CIG Buyers can deploy integration solutions for both Test and Production in US Data Center.

CIG Suppliers can deploy integration solutions for both Test and Production in US Data Center.

Ability to deploy in a local data center and not relying on EU Data Center.

### Solution area

SAP Ariba Network  
SAP Ariba Procurement Solutions  
SAP Ariba Cloud Integration Gateway

### Implementation information

To have this feature enabled, please have your Designated Support Contact (DSC) submit a **Service Request (SR)**.

This feature applies to both Buyers and Suppliers

### Prerequisites and Restrictions

For Prerequisite, please check the online documentation.

- Ariba Network and Applications should be available in US Data Center both for Test and Production

Following restrictions apply:

- US Data Center is targeted for North, South or Central America and LATAM. EU and China can not be deployed on US Data Center.
- Test and Production be available in the same data center.
