

SAP Ariba 

2102 Release

Feature Overview and Q&A – SAP Ariba Cloud Integration Gateway

Presenters: Rob Jones, Kalyan Valluri, Rajib Shome, Vick Ramburrun, Sripriya Kitambi

Panelists : Mamatha Vittalkar, Satheesh Gannamraju, Lovein Khullar, Kanwaljit Singh, Digvijaysinh Jadeja

16 February 2020

PUBLIC

Important notice

The information in this presentation is confidential and proprietary to SAP and may not be disclosed without the permission of SAP. Except for your obligation to protect confidential information, this presentation is not subject to your license agreement or any other service or subscription agreement with SAP. SAP has no obligation to pursue any course of business outlined in this presentation or any related document, or to develop or release any functionality mentioned therein.

This presentation, or any related document and SAP's strategy and possible future developments, products and or platforms directions and functionality are all subject to change and may be changed by SAP at any time for any reason without notice. The information in this presentation is not a commitment, promise or legal obligation to deliver any material, code or functionality. This presentation is provided without a warranty of any kind, either express or implied, including but not limited to, the implied warranties of merchantability, fitness for a particular purpose, or non-infringement. This presentation is for informational purposes and may not be incorporated into a contract. SAP assumes no responsibility for errors or omissions in this presentation, except if such damages were caused by SAP's intentional or gross negligence.

All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates, and they should not be relied upon in making purchasing decisions.

Agenda

Logistics

General Release Information

Key Feature Discussions

- Cloud Integration Gateway

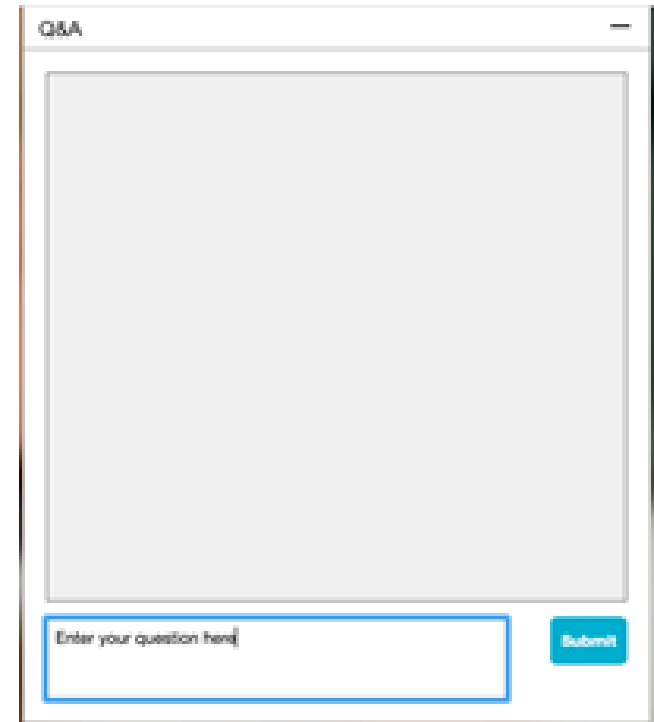

Reminders

Logistics

To Ask a Question, please use the ON24 Q & A Panel

- If not already visible, click the Q&A button at the bottom of the screen.
- Type your question in the “Enter your question here” area.
- Click Submit.

The Presenter and/or Panelists will attempt to answer your question online or via the audio feed as close to the time the question is asked as possible.

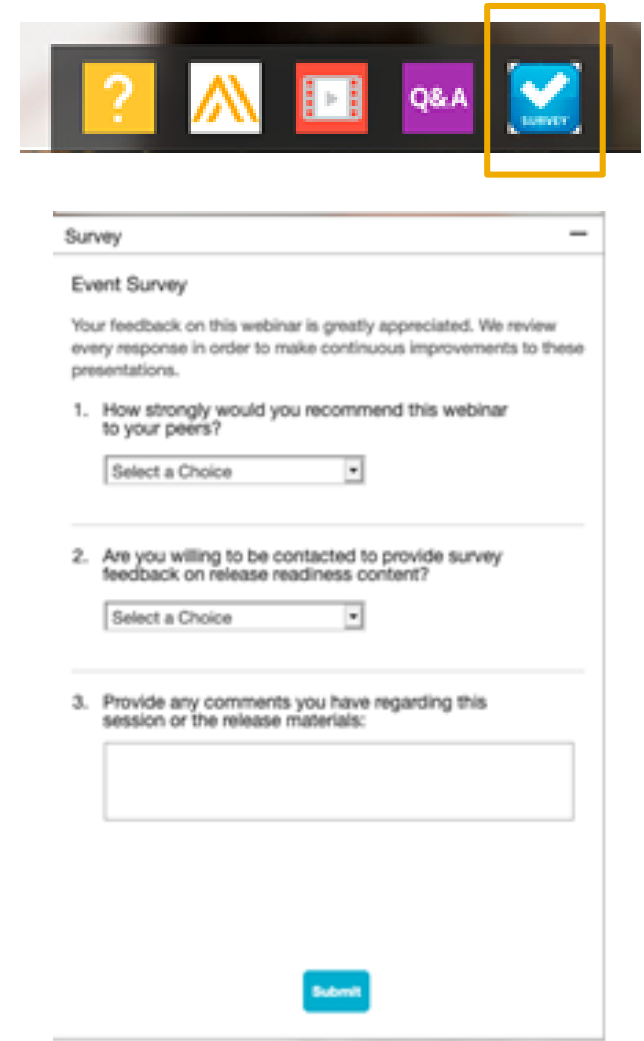

Logistics

At the end of the session, provide Survey feedback

- If not already visible, click the Survey button at the bottom of the screen.
- Answer the 3 questions posed.
- Click Submit.

Your feedback is used to continually improve our customer engagement activities for our quarterly product releases.

Thank you for taking the time to share your thoughts with our team!

The image shows a webinar control bar at the top with five icons: a question mark, a logo, a document, 'Q&A', and a 'SURVEY' button with a checkmark. The 'SURVEY' button is highlighted with a yellow box. Below the bar is a survey form titled 'Survey' with a close button. The form content includes:

Event Survey
Your feedback on this webinar is greatly appreciated. We review every response in order to make continuous improvements to these presentations.

1. How strongly would you recommend this webinar to your peers?
2. Are you willing to be contacted to provide survey feedback on release readiness content?
3. Provide any comments you have regarding this session or the release materials:

General Information **Session Materials**

- SAP Ariba Connect user interface
- Multiple routes for launching the Release Readiness page
- Access to product announcements also available

General Information **Session Materials**

Recordings and presentations will be posted on the Release Readiness tab/tile in SAP Ariba Connect. See the Release Feature List and What's New links on the left side of the page for detailed information. Note naming convention update and visit the Previous Releases Archive and Roadmap tiles at bottom right of page.

The screenshot shows the SAP Ariba Connect interface for the Release Readiness section. The top navigation bar includes 'Home', 'Answers', 'Incidents & Service Requests', 'Release information', and 'Administration & more'. The main content area is titled 'Release Readiness' and contains several key sections:

- Release Feature Content:** A central area with four main tiles:
 - Release Information:** Details of innovation included in the 2102 release. Includes links for [Feature List: 2102 Release](#), [Release Highlights](#), and [What's New guide](#).
 - Feature Overview Webcasts:** Use the multi-registration to attend multiple sessions. Includes a link for [Register: 2102 Sessions](#).
 - Looking for features from previous releases?:** Includes a link for [Feature Archive](#).
 - Looking for webcasts from previous releases?:** Includes a link for [Webcasts archive](#).
- Features Becoming Mandatory:** A section with a dropdown arrow and a title 'Features Becoming Mandatory'. It contains two informational boxes:
 - Features Becoming Mandatory:** Explains that features made available in previous releases are now becoming mandatory.
 - What should you do before features are Automatically On in your Production site?:** Provides instructions to review feature Knowledge Transfer (KT) material and explore features in the Test site.
- Automatically On Features:** Two sections at the bottom:
 - Features that will become Automatically On with the SAP Ariba 2102 Release:** Includes tiles for 'New supplier 360 profile [SM-14322]', 'Enhancements to the internal supplier request [SM-15774]', and 'Resources Page'.
 - Features that will become Automatically On with the SAP Ariba 2108 Release:** Includes tiles for 'Support for questions based on additional types of master data [SM-3049]', 'Syntax validation for supplier bank account information [SM-9656]', and 'KT Presentation'.
- Release Calendar:** A table on the right side showing release activities and dates.

Activity	Date*
cXML 1.2.049 Pre-Release	01/29/2021
SAP Ariba 2102 Release	02/19/2021
March Service Pack	03/19/2021
April Service Pack	04/16/2021
cXML 1.2.050 Pre-Release	04/30/2021
SAP Ariba 2105 Release	05/21/2021
2021 Release Calendar	view

*Disclaimer: The release dates above reflect current SAP Ariba planning. A notice confirming the [quarterly release](#) dates will be sent 3-weeks prior to each release. A notice confirming the [monthly deployment](#) dates will be sent 2-weeks prior to each deployment. SAP Ariba may change the schedule at any time without notice and assumes no responsibility for errors or omissions. Last updated: Jan 28, 2021
- Additional Readiness Resources:** A section titled '2102 Release Feature Updates' with the text: 'Any changes/updates to the 2102 release, when available, will be communicated here.' Below this are links for:
 - cXML version 1.2.049 - Pre-Release:** [Learn More](#)

CIG Platform & Portal Enhancements

IG-9425 / IG-18439: Integration Gateway routing based on data center location

Customer Challenge

- CIG Customers based in North/Central/South/Latin America had to use Europe Data Center since CIG did not have a US Data Center.

Solution

- New Customers: When customers enable CIG, based on their Company Profile on their ANID, it will point to the corresponding Data Center
- Existing Customers: Customer already pointing to Europe Data Center and who are based in North/Central/South/Latin America will see an option to switch to US Data Center.
- Note for existing customers: It is not mandatory to switch to US Data Center, and they can continue to use Europe Data Center. But if they decide to switch, then customer will need to recreate the integration project, Mappings, connection and configuration on the new Data Center.

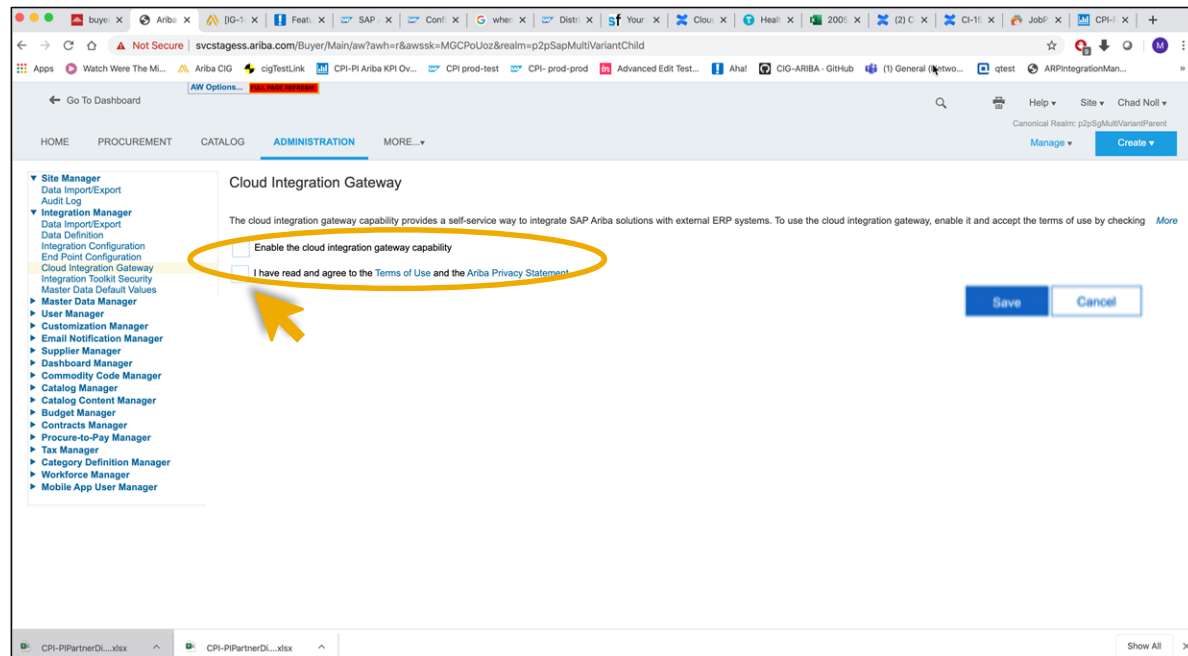

Key Benefits

- New and existing customers based in North/Central/South/Latin America can now use CIG US Data Center

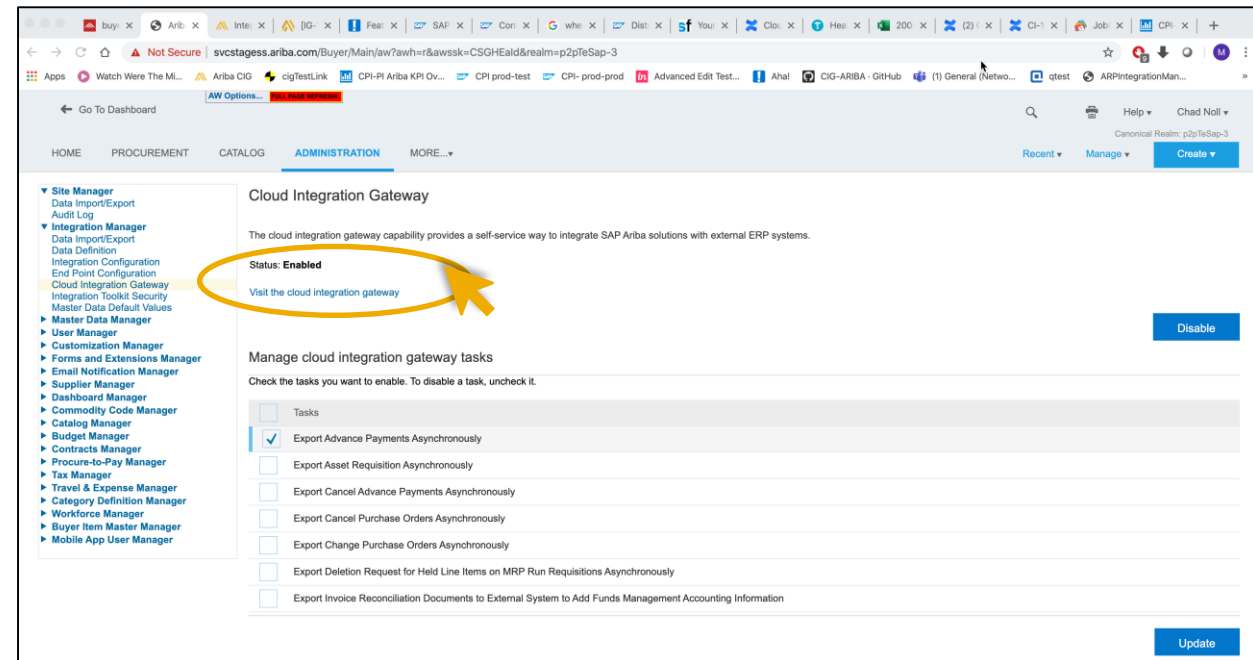

Scenario 1 – New/Existing Customer on APPS

- New User with country= Canada under her Company Profile

How can I switch the data center to the US on my production account?

If you prefer to route your documents through the US Data Center instead of the Europe Data Center, please use the following steps:

1. In your test account, enable/switch your data center to the US on the Configure Cloud Integration Gateway page. To do this, click the Open test account button below and go to > Administration > Configurations > Cloud Integration Gateway Setup.
2. Change and test your integration on your test account.
3. Come back to this page to make the change on the production account.

New Feature Innovations: Ariba Network Buy Side

- Commerce Automation
- Supply Chain Collaboration (SCC)

New Feature Innovations: Ariba Network Buy Side

- **IG-16514/
IG-16515/
IG-24014** **Integration to support stock transfer using a Stock Transport Order**
- IG-23597 Support for multi-tier scheduling agreements and scheduling agreement releases
- IG-23899 Enhancements to the support for attachments in quality notification, order confirmation approval, and purchase orders
- IG-20613 Enhancement to the integration of comments in the outbound transactions to Ariba Network using SAP Ariba Cloud Integration Gateway
- IG-20780 Enhancements in addressing the failed inbound transactions from Ariba Network and SAP Ariba Strategic Sourcing solutions
- IG-18058 Enhancements to support maintaining of additional transactions for specific vendors and company codes and determine change purchase orders output based on print-relevant field settings

IG-16514 / IG-16515 / IG-24014: Integration to support stock transfer using a Stock Transport Order

Customer Challenge

- Stock transport order (STO) collaboration is not supported in Ariba Network. Currently it is not possible for the buyer and supplier to collaborate on the transfer of buyer owned stock between two plants

Solution

- End to End integration between buyers' ERP system and Ariba Network to collaborate with trading partners for plant-to-plant stock transfer using stock transport orders and subsequent delivery functions
- STO integration supports stock transfers between Original Equipment Manufacturer (OEM) and Contract Manufacturers (CM), with the following scenarios
 - Stock transfer from OEM to CM
 - Stock transfer from CM to OEM / Distribution Center (DC)
 - Stock transfer from one CM to another CM **with copy partner** functionality
 - Stock transfer from one CM to another CM **without copy partner** functionality

IG-16514 / IG-16515 / IG-24014: Integration to support stock transfer using a Stock Transport Order

Solution

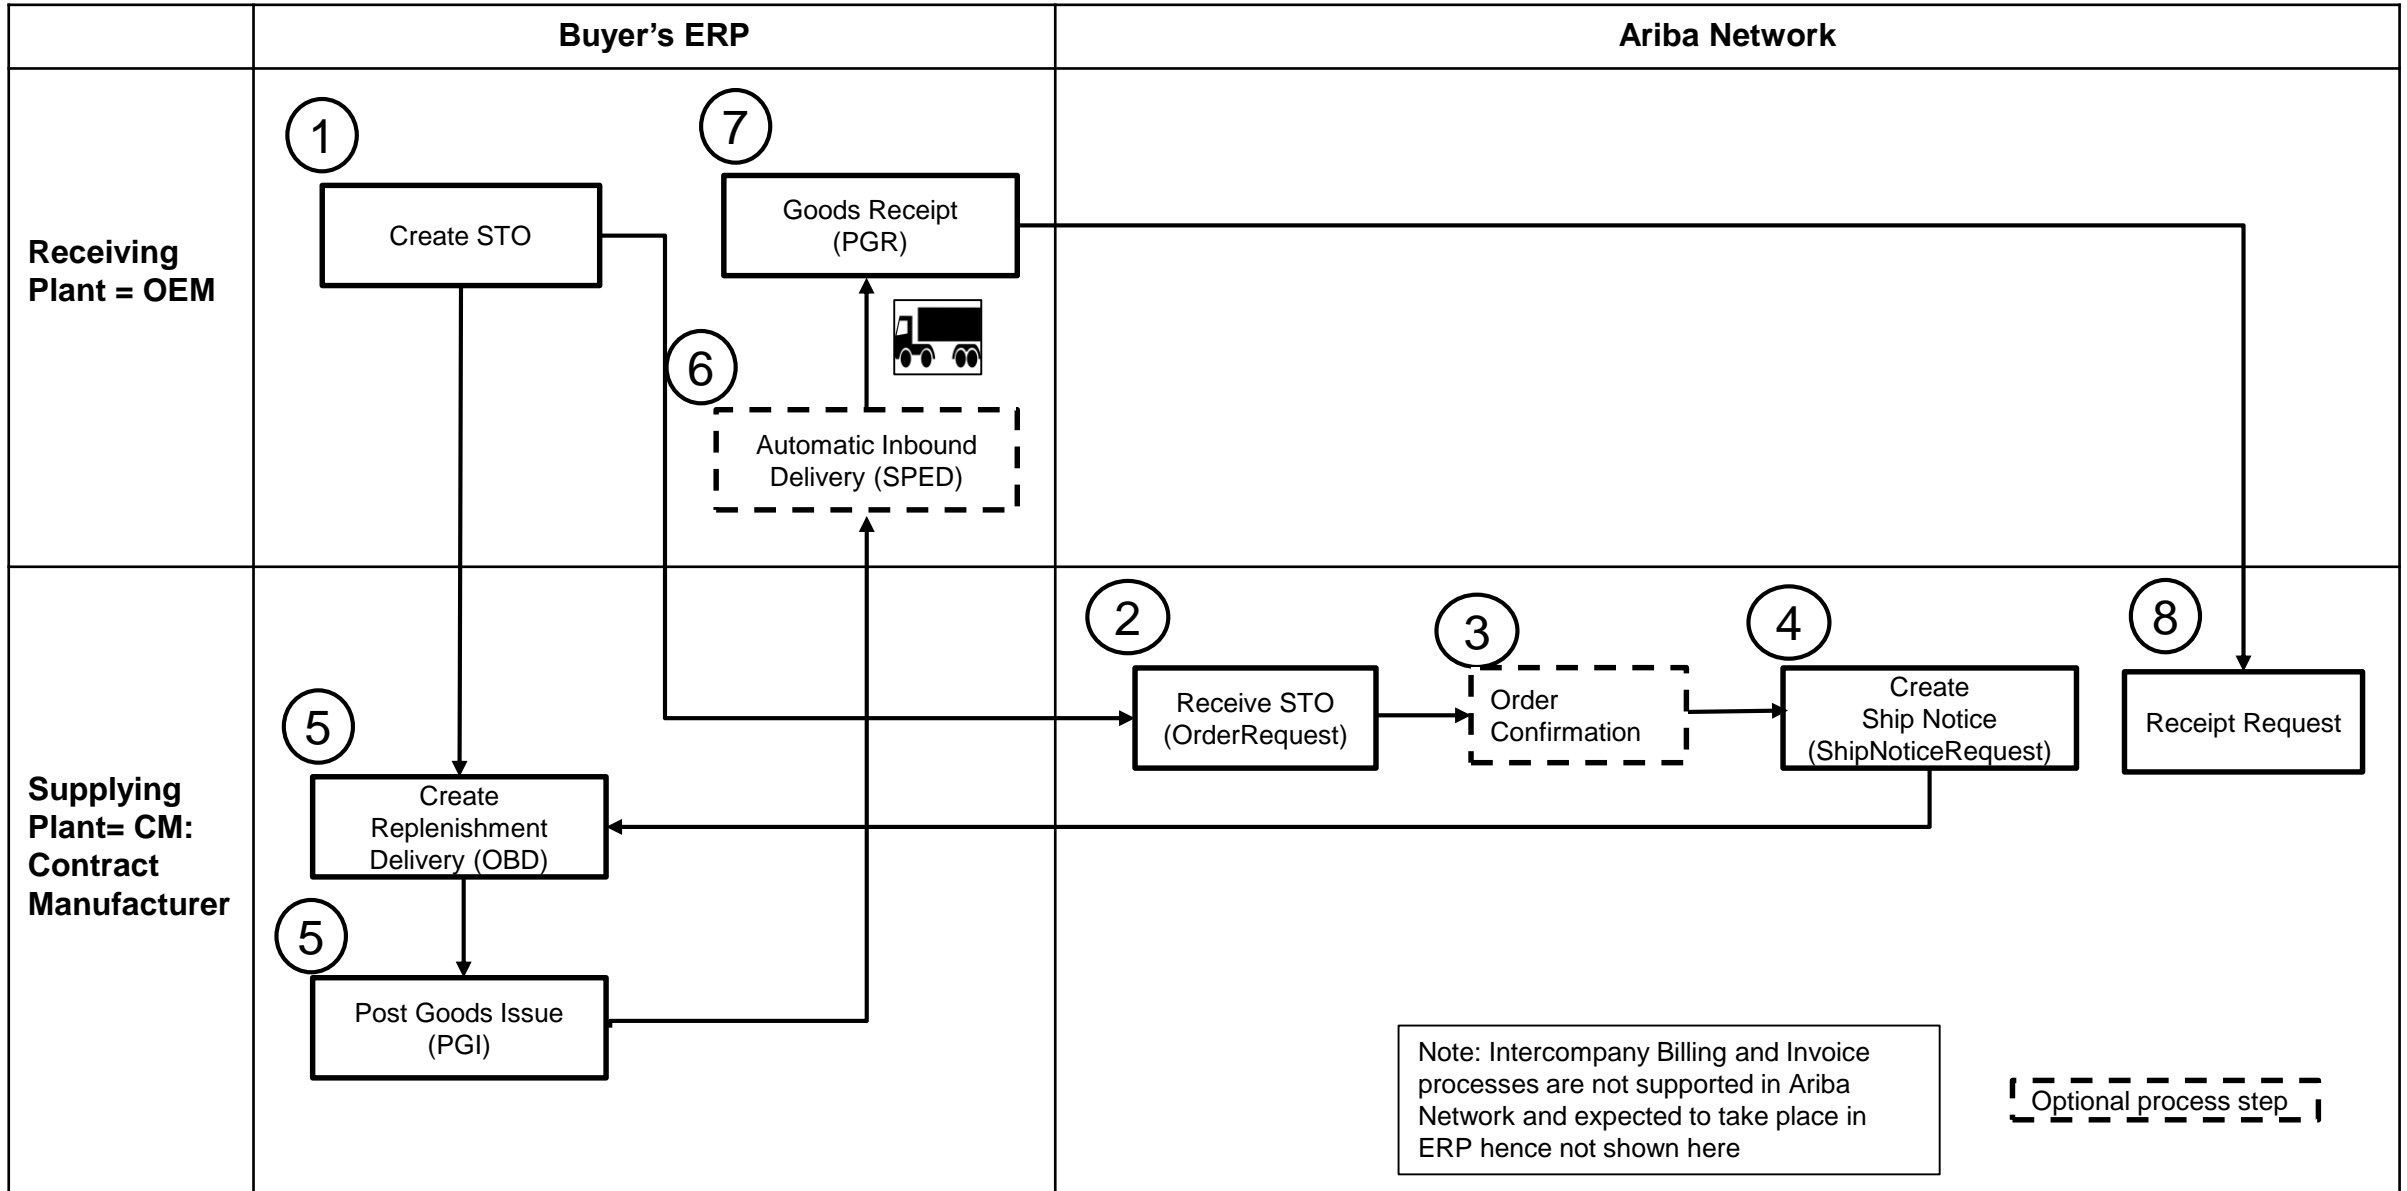

- Supports both Intracompany and Inter-company stock transport orders
- Intracompany stock transport order involves stock transfer **with delivery and without billing** between two plants within the same company code
- Inter-company stock transport orders involves stock transfer **with delivery and billing** between two plants from different company codes
- With STO integration,
 - STO is sent from Buyer's ERP to Ariba Network
 - Trading partner can confirm the order and submit Ship Notice on Ariba Network
 - to create Replenishment delivery, which in turn posts Goods Issue (PGI) in Supplying plant
 - followed by Goods Receipt (PGR) in receiving plant in Buyer's ERP system
 - Billing and Invoicing processes are expected within ERP

IG-16514 / IG-16515 / IG-24014: Integration to support stock transfer using a Stock Transport Order

Key Benefits

- Buyer and Supplier (Contract Manufacturer) can collaborate to plan and monitor stock transfers across manufacturing plants / Distribution Centers
- Provides visibility for stock transfers across supply chain

STO with Delivery via Shipping (and Billing / Invoice): CM to OEM

New Feature Innovations: Ariba Network Sell Side

IG-24720: Enhancement to product activity message for translating to EDI ANSI X12 846 or EDI ANSI X12 830

Customer Challenge

- Currently, cXML SMIPProductActivityMessages (PROAs) that contain time-series information are being translated to EDI ANSI X12 846 messages. The EDI846 message type is not intended for time series information, and therefore the time series data is being **dropped**.

Solution

- Updated current translation logic: IF ConsignmentInventory, ConsignmentMovement, or Inventory exist AND TimeSeries, PlanningTimeSeries, or InventoryTimeSeries does not exist
- THEN EDI846
- ELSE EDI830

Key Benefits

- If TimeSeries and inventory data are sent we will map to 830 in the future.

New Feature Innovations: Ariba Applications

- Buying & Invoicing
- Sourcing
- Contracts

New Feature Innovations: Ariba Applications

- **IG-20158** **Support for extracting product master data from SAP ERP to MDNI using SAP Ariba Cloud Integration Gateway**

- **IG-20839** **Support for sending engineering change order from SAP ERP or SAP S/4HANA to SAP Ariba Strategic Sourcing Suite**

IG-20158 : Support for extracting product master data from SAP ERP to MDNI in CIG

Customer Challenge

- Material master export from ECC is available only to limited Ariba applications. Ariba MDS does not have the support of integrated Product master so cater to other/more applications.

Solution

- Along with existing material master export, provide enable Product master data via master data native interface (MDNI). From MDNI, product master is integrated with SAP Ariba master data service. SAP Ariba applications can import product master data from SAP Ariba master data service.
- Configure validity period for retaining changed material documents to use existing material master export
- Filtering Product master - Material Descriptions, General Material Data, Plant Data for Material
 - ✓ Identified by 'MDNIProductExport' document type in Transaction Tracker in CIG for monitoring
 - ✓ Enhance product master prior to export using BAdI
 - ✓ Export in batches for huge volume
 - ✓ Schedule a job for Product Master export

Key Benefits

- Product Master data prerequisite for integration in various scenarios.
- Supports incremental export option to fetch the added/changed product master records

IG-20839 : Support for sending engineering change order to SAP Ariba Strategic Sourcing

Customer Challenge

- Materials/BOMs typically go through several revisions. PLM systems and ERP systems are capable of tracking these revision or "Engineering Change Orders". This revision data is not available on Direct Material Sourcing.

Solution

- By enhancing existing Material Master data interface, Bill of material interface - send revision levels and change number records for corresponding material/BOMs to DMS
- Send Change master data using a new SOAP web service - change number, change valid from date, change reason, and change description.

Key Benefits

- This integration will allow sourcing managers / users to:
 - Select change number in advance search
 - Search for BOM and materials using change number
 - View changes of a BOM for selected change number.
 - Compare prices of item across revision level

IG-20839 : Support for sending engineering change order to SAP Ariba Strategic Sourcing

Logistics

At the end of the session, provide Survey feedback

- If not already visible, click the Survey button at the bottom of the screen.
- Answer the 3 questions posed.
- Click Submit.

Your feedback is used to continually improve our customer engagement activities for our quarterly product releases.

Thank you for taking the time to share your thoughts with our team!

The image shows a webinar control bar at the top with five icons: a question mark, a logo, a document, 'Q&A', and a 'SURVEY' button with a checkmark. The 'SURVEY' button is highlighted with a yellow box. Below the bar is a survey form titled 'Survey' with a close button. The form contains the following text and questions:

Event Survey

Your feedback on this webinar is greatly appreciated. We review every response in order to make continuous improvements to these presentations.

1. How strongly would you recommend this webinar to your peers?
2. Are you willing to be contacted to provide survey feedback on release readiness content?
3. Provide any comments you have regarding this session or the release materials:

Submit

General Information **Session Materials**

Recordings and presentations will be posted on the Release Readiness tab/tile in SAP Ariba Connect. See the Release Feature List and What's New links on the left side of the page for detailed information. Note naming convention update and visit the Previous Releases Archive and Roadmap tiles at bottom right of page.

The screenshot shows the SAP Ariba Connect interface for the Release Readiness section. The top navigation bar includes 'Home', 'Answers', 'Incidents & Service Requests', 'Release information', and 'Administration & more'. The main content area is titled 'Release Readiness' and contains several key sections:

- Release Feature Content:**
 - Release Information:** Details of innovation included in the 2102 release. Includes links for [Feature List: 2102 Release](#), [Release Highlights](#), and [What's New guide](#).
 - Looking for features from previous releases?** Includes a link for [Feature Archive](#).
 - Feature Overview Webcasts:** Use the multi-registration to attend multiple sessions. Includes a link for [Register: 2102 Sessions](#).
 - Looking for webcasts from previous releases?** Includes a link for [Webcasts archive](#).
- Features Becoming Mandatory:**
 - Features Becoming Mandatory:** These features were made available in a previous SAP Ariba Releases. At the time of their release they were optional, meaning they required contact with SAP Ariba to enable. These features will now become mandatory and will be Automatically On for all customers, in both production and test sites, with the release indicated.
 - What should you do before features are Automatically On in your Production site?**
 - Review feature Knowledge Transfer (KT) material and the Release Guide.
 - Explore these features in your Test site to verify compatibility with your customizations.
- Features that will become Automatically On with the SAP Ariba 2102 Release:**
 - [New supplier 360 profile \[SM-14322\]](#)
 - [Enhancements to the internal supplier request \[SM-15774\]](#)
 - [Resources Page](#)
- Features that will become Automatically On with the SAP Ariba 2108 Release:**
 - [Support for questions based on additional types of master data \[SM-3049\]](#)
 - [Syntax validation for supplier bank account information \[SM-9656\]](#)
 - [KT Presentation](#)
 - [What's New Guide](#)
