Introducing: **Using a mobile device's screen lock or passcode to unlock the SAP Ariba Procurement mobile app**

Customer challenge

Users want mobile experiences to be as easy as possible. Today, the SAP Ariba Procurement mobile app requires users to create and enter a separate PIN number.

Meet that challenge with SAP Ariba

This feature introduces a security measure that ensures that the mobile device's screen lock or passcode is used to unlock the SAP Ariba Procurement mobile app. Users can unlock the app only by using the same screen lock (PIN, pattern, password, or finger print for android devices) or passcode (code, fingerprint, or facial recognition for apple devices) that they've setup to unlock the device.

Experience key benefits

Customer users can now use their device PIN/passcode or biometrics to unlock/sign in to the SAP Ariba Procurement mobile app.

Removing the need for a separate PIN reduces friction for end users, puts the app in line with other top tier apps, and is generally a better user experience for mobile app users.

Solution area

- SAP Ariba Buying
- SAP Ariba Buying and Invoicing
- SAP Ariba Sourcing
- SAP Ariba Contracts

Implementation information

This feature is **automatically on** for all customers with the applicable solutions and is ready for immediate use.
