CIG Release 2208 Agenda

- **CIG Release 2208: CIG AddOn Support Packs**
- **New Features: CIG Core (Platform & Portal)**
- **New Features: Ariba Application Integration**
- **New Features: IES S2P Integrations**

CIG Release & CIG AddOn Support Packs

CIG Release 2208: AddOn Components & Support Packs

*** No change from previous CIG AddOn SP**

CIG Add-on SP release cadence is changed to twice a year starting 2205 release hence CIG AddOn SP will remain the same in 2208 release

CIG Buyer AddOn for SAP ERP	
ABAP component	Support Pack
ARBCI1 100	SP17
ARBCI2 100	SP11*
ARBCIGR 100	SP1*

CIG Supplier AddOn for SAP ERP	
ABAP component	Support Pack
ARBCIS 100	SP04*

CIG Buyer AddOn for S/4 HANA	
ABAP component	Support Pack
ARBCI1 10S	SP17
ARBCI2 10S	SP11*
ARBCIGR 10S	SP1*

New Features: CIG Core (Platform & Portal)

New Features: CIG Core (Platform & Portal)

- IG-30121 Support for the United Arab Emirates data center in SAP Ariba Cloud Integration Gateway
- IG-35758 Enhancements to the buyer regression functionality using Test Central

IG-30121 Support for the United Arab Emirates data center in SAP Ariba Cloud Integration Gateway

Customer Challenge

- Currently, CIG has 4 data centers based in Europe, US, China (CN), Kingdom of Saudi Arabia (KSA) . Europe data center is the CIG default data center for all customers outside of US regions, CN and KSA. CIG customers based in the United Arab Emirates (UAE) are required to use the Europe data center since CIG does not have stand-alone data center and this conflicts with data residency requirement wherein sensitive data cannot leave the country's boundaries.

Solution

- CIG deployment at UAE Data Center
- Provision to connect SAP Ariba Cloud Integration Gateway account to the United Arab Emirates data center for hosting the business data of Ariba Network and SAP Ariba solutions.

Key Benefits

- With this feature, customer's sensitive business data remains within country's boundaries, meeting data residency requirement from their cybersecurity laws.

IG-30121 Support for the United Arab Emirates data center in SAP Ariba Cloud Integration Gateway

Technical Overview

As a new buyer or a supplier, you can consider the following points:

- Choose UAE data center in the drop-down list and send the data synchronization request from SAP Ariba applications to SAP Ariba Cloud Integration Gateway data center.
- Point single sign-on (SSO) from SAP Ariba applications to SAP Ariba Cloud Integration Gateway data center chosen from the drop-down list

Existing buyer/supplier switching to the UAE Data Center

- Existing customers using SAP Ariba Cloud Integration Gateway configured on a data center other than the UAE data center can switch to the UAE data center

IG-30121 Support for the United Arab Emirates data center in SAP Ariba Cloud Integration Gateway

SAP Ariba Network **TEST MODE** [← Back to classic view](#)

Configure Cloud Integration Gateway

SAP Ariba Cloud Integration Gateway provides an easy way to integrate non-cXML external systems with Ariba Network. Before you can start accessing it, we will need to set up your account.

With Cloud Integration Gateway, you can:

- [Log in to SAP Ariba Cloud Integration Gateway](#) with your Ariba Network username and password.
- Configure the SAP Ariba Cloud Integration Gateway for supported document types on the [Configure Document Routing](#) page.
- Add additional users with specific permissions to access the SAP Ariba Cloud Integration Gateway.

CURRENT & PLANNED

IG-35758 Enhancements to the buyer regression functionality using Test Central

Customer Challenge

- With the existing Test Central buyer regression functionality, buyers have a provision to create test suites which don't require any manual intervention, where the test cases would be sequentially executed based on follow on documents. But when the customer has a scenario where manual step is required to proceed in the execution, they do not have an option with the current solution.

Solution

- This feature enhances the buyer regression functionality in the Test Central framework to include manual steps in test cases while creating and running test suites.

Key Benefits

- Customers can now add manual steps as a Testcase while creating or rerunning an existing test suite. They can perform manual steps outside of the test central application. Test Central holds the step until the buyer completes the manual activity.
- This enables buyers to perform a manual activity outside Test Central, which is an essential part of running a test case.

New Features: Ariba Application Integration

New Features: Ariba Application Integration

- **IG-32939** Enhancements to inventory reservation integration with SAP Ariba Buying

IG-32939 Enhancements to inventory reservation integration with SAP Ariba Buying

Customer Challenge

- Currently, the inventory reservation document that is sent from SAP Ariba Buying to SAP ERP or SAP S/4HANA using SAP Ariba Cloud Integration Gateway doesn't contain enough information such as (requester, recipient, recipient plant) to retrieve the reservation from stock and send it to the requester.
- This restricts the delivery of goods to the requester.

Solution

- This feature enables buyers to include below additional information while creating the inventory reservation document that is sent from SAP Ariba Buying to SAP ERP or SAP S/4HANA using SAP Ariba Cloud Integration Gateway:
 - ✓ Created by – user name
 - ✓ Unloading Point
 - ✓ Goods Recipient/ Ship to Party
 - ✓ Item Text

Key Benefits

- With this feature , buyers will be able to add the additional details in the reservation document to retrieve the reservation from the stock and send it to requester.

IG-32939 Enhancements to inventory reservation integration with SAP Ariba Buying

Fields enhanced for reservation item at ERP side:

- Requester - Name

Base date	09.02.2022	<input checked="" type="checkbox"/> Check against cal.
Name	NATARAJUS	

Acct.assgt	
Movement Type	221 GI for project
WBS Element	WBS-1

IG-32939 Enhancements to inventory reservation integration with SAP Ariba Buying

Fields enhanced for reservation item at ERP side:

- Ship-To - Recipient
- Deliver-To – Unloading Point
- Comments - Text

The screenshot displays the SAP 'Create Reservation: Details 0001 / 0001' form. The form is divided into several sections:

- Movement Type:** 261
- Plant:** 0001
- Material:** 19787
- Storage Location:** (highlighted with a yellow box)
- GI for order:** Werk 0001_test, Window Keyboard234-test
- Quantity in:** Unit of Entry: 1 EA, Stockkeepg Unit: 1 EA, Qty is Fixed (checkbox)
- Further Information:** Reqmt Date: 09.02.2022, Mvt Allowed: AdvCd: , Cost Center: SAP-DUMMY SAP dummy-test-1, Order: 100080 test, G/L Account: 400000
- Enhanced Fields (highlighted with a red box):** Recipient, Unl. Point, and Text.

A 'More' button is visible in the bottom right corner of the 'Further Information' section.

New Features: IES S2P Integrations

New Features: IES S2P Integrations (SAP S/4 HANA)

- IG-32817 Ability to receive goods in GB and transfer the same information to S/4HANA
- IG-34950 Integration support for attachments at the line-item level in purchase orders sent from SAP S/4HANA Cloud in the 42K integration scenario
- IG-34952 Integration support to add manufacturer details for line items in purchase orders sent from SAP S/4HANA Cloud in the 42K integration scenario
- IG-36735 Integration support for quick enablement of suppliers on Ariba Network based on the fax number provided in purchase orders sent from SAP S/4HANA Cloud in the 42K integration scenario
