

# Feature at a Glance

## Supplier Risk Engagements API (ARI-17708)

Target GA: February 2023

Public

# Supplier risk engagements API

## Description

- The supplier risk engagements API enables you to export control-based engagement risk assessment project data for engagements, issues, and modular questionnaires.
- Additional configuration options include retrieving paginated details for the engagements, issues, and modular questionnaires based on the limits configured in your system.
- Additional filter parameters can be used to retrieve only a subset of engagement projects, issues, and modular questionnaires.

## Customer benefit

- This feature enables buyers to have even more flexibility and creativity in defining their SAP Ariba Supplier Risk implementations by extending it with the Supplier Risk Engagements API for external data retrieval.

## User

- Buyer

## Enablement model

- Automatically on

## Applicable solutions:

- SAP Ariba Supplier Risk
- SAP Ariba APIs
- SAP Ariba Developer Portal

# Prerequisites, restrictions, cautions

## Prerequisites

Your site must be configured for use of control-based engagement risk assessment projects.

To create an application and request access to use the SAP Ariba APIs relevant to this feature, you must have access to the SAP Ariba developer portal. For details refer to [Steps to start using the SAP Ariba APIs](#) in [Help for the SAP Ariba developer portal](#).

All queries made to this API must be authenticated using OAuth authentication. For details refer to “Developer Portal Authentication” in the help for *The SAP Ariba developer portal*.

# Feature details

The API gets the details of the engagement projects, issue projects, and modular questionnaire projects, including the questionnaires used as engagement risk assessments, using the project ID for the engagement project (workspace ID), project ID for the issue project (workspace ID), and project ID for the modular questionnaire project (workspace ID).

The API searches for engagement projects, issues, and modular questionnaires by **Last updated** date. You can use a date range between two last updated dates, or you can get all engagement projects, issues, and modular questionnaires up to a specific last updated date.

This API includes the following endpoints:

GET /engagements - This endpoint searches for the engagement projects.

GET /engagements/{workspaceId} - This endpoint gets the details for the engagement projects.

GET /issues - This endpoint searches for the engagement issues.

GET /issues/{workspaceId} - This endpoint gets the details for the engagement issues.

GET /questionnaires - This endpoint searches for the modular questionnaires.

GET /questionnaires/{workspaceId} - This endpoint gets the details for the modular questionnaires.
