# SAP Business Network – Login Using Generic or other Credentials

SAP

Open the SAP Business Network Supplier Login https://supplier.ariba.com

→

Enter Username you have been provided or other credentials

→

Enter the **Password**

→

Click on **Login**

↓

The SAP Business Network **Home Page** Screen will be displayed

---

QUICK TIPS

There is only one System Administrator for an SAP Business Network Account.

Generic logins provide teams with a single login however, logins should be kept secure as it provides access to business Information

Did you know?

When using a "generic" account, note that making changes to the Home Page Widgets or the Workbench will be visible for all users on that account.

Usernames and passwords provide information to the SAP Business Network and may also be used for accessing Sourcing - "Proposals & Questionnaires"

QUICK TIPS

Some Businesses may add Multi-Factor Authentication to logins providing extra security. For more information on Multi-factor authentication, visit the Help Portal - Multifactor Authentication | SAP Help Portal
