

Feature at a Glance

Enhancements to Notice Search Capabilities in the Public Procurement Notices Export API | ET-1348

Target GA: February 2024

Enhancements to Notice Search Capabilities in the Public Procurement Notices Export API

Description

- This feature enhances the Public Procurement Notices Export API to search for notices by notice metadata such as the notice publication date, submission date, or the project ID.
- Previously, to search a notice the corresponding event ID had to be known in order to find a notice.

Customer benefit

- This API eases the process of retrieving sourcing event notices. In order to define the API query, a certain metadata can now be used such as the notice creation date in order to search for all notices created on the same date.

User

- Buyer

Enablement model

- Automatically on

Applicable solutions:

- SAP Ariba APIs
- SAP Ariba developer portal
- SAP Ariba Strategic Sourcing Suite

Prerequisites, Restrictions, Cautions

Prerequisites

- The feature [ET-9: Support for Publishing Public Procurement Notices on the Tenders Electronic Daily \(TED\) Portal](#) must be enabled for your site.
- To create an application and request access to use the SAP Ariba APIs relevant to this feature, you must have access to the SAP Ariba developer portal. For details refer to [Steps to Start Using the SAP Ariba APIs](#) in [Help for the SAP Ariba Developer Portal](#).
- All queries made to this API must be authenticated using OAuth authentication. For details refer to [SAP Ariba Developer Portal Authentication](#) in [Help for the SAP Ariba Developer Portal](#).
- The user whose credentials are passed in the API call must be a project owner or a team member.

Feature details

The following endpoint is added to the Public Procurement Notices Export API:

“GET /Sourcing/sourcing-event-public-notice/v2/events/notices/search”

This endpoint returns the notices for the specified search query parameters.

It enables buyer users to search for public procurement notices by providing one or more of the following parameters:

- PublicationDateFrom
- PublicationDateTo
- SubmissionDateFrom
- SubmissionDateTo
- ProjectID

In addition to these parameters, they can filter the search results by providing the following optional parameters:

- PortalType
- Notice Type

For example, if publicationDateFrom is November 01, 2023 and Notice Type is Contract Notice, then the API returns information about all Contract Notices published on or after November 01, 2023. However, if you provide a value only for the parameter NoticeType or PortalType, then the API returns an error message.

Thank you.
