Guided Integration for Trading Partners
GITP One Pager - External

SAP Business Network

1. Q&A for Trading Partners

What is Guided Integration for Trading Partners?

This feature streamlines and expedites the tasks required for a trading partner (supplier) to integrate with both **new** and **existing** buyers on the SAP Business Network.

Who has this feature enabled?

All trading partners with Platinum and Gold subscription levels on the SBN. Suppliers must upgrade to these subscription levels to gain automatic access to the GITP feature! Upgrade your ANID to have -T TEST and PROD access.

What are the key benefits?

Guided Integration for Trading Partners empowers suppliers to take the lead and start integrations independently, adopting a more self-initiated approach. With access to new tools and insights, a supplier can identify scope, compare capabilities to buyer requirements, and create mapping templates.

Guided Integration Support - who to ask?

For additional support refer to SAP Help here or column **3**. **If you still have questions**, please consult your **Account Manager** (if applicable), Network Engagement and Adoption Team, **current Integration Specialist**, or search for Guided Integration in the Knowledge base at kaa.ariba.com

INTERNAL | SAP AND CUSTOMER USE ONLY

2. Capabilities and Compatibility

Prerequisites and Restrictions

To access the Guided Integration for Trading Partners tool, you will need one of the following **user permissions**:

✓ Integration Management Full Access
✓ Integration Management Read-Only Access

Only **SBN Enterprise Gold** or **Platinum** accounts are enabled!

Templates for PO, OC, ASN, and Invoice

GITP provides choices for mapping Buyer Specific Requirements. Choices for the **Source Template** include:

✓ **SAP Supplier Super Template** – Customized for your buyers in the SBN.
✓ **SAP Golden Template** – Standard for most of the fields in the SBN.
✓ **Buyer Template** – Buyer specific for a specific document type.
✓ **DTD Template** – Standard cXML to define the document type.

My Workspace

✓ **Compare Mapping** – Expand only the cXML differences.
✓ **Save Template** – Name according to buyer and document type
✓ **Download** - The format of the downloaded file is **XSD**
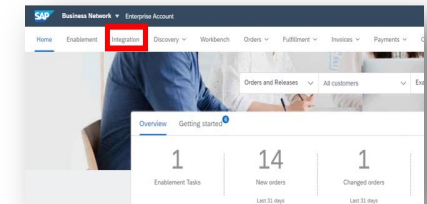

Buyer Visibility

Completing the Integration Overview and Compatibility Dashboard questions with all supported documents, offers valuable benefits to the suppliers! **In 2025**, once a **TRR is approved**, Buyers will be able to access your responses as part of a potential integration project. Buyers will see compatibility as percentage breakdown by document type, indicating the alignment between their transaction rules and your responses!

3. Integration Documentation

Prior to starting with Integration, be sure to review these helpful videos, links, and notes:
