

A New Way to See Your Proposals, Questionnaires and Contracts

Network Centric View | SAP Business Network

What's Changing for Your Business Network Account

For: Suppliers

Rollout: Phased — no action required by you

One page. All your work. Sorted by what needs your attention.

The Proposals, Questionnaires and Contracts area of your SAP Business Network account is being redesigned around your daily work — not around your customer list. Every proposal, questionnaire, contract, RFP, RFQ, RFI, auction and profile request your customers send you now appears in a single list, grouped by what needs your attention first.

What's new:

- **Status at the top:** cards for each of the seven work states — Response Needed, Responded – Editable, In Review, Upcoming, Complete, Paused, and Discontinued — with an All-tab covering everything. Click a card to focus your list.
- **One list for every customer:** no more customer picker before your work appears.
- **Advanced view for teams:** add filters for Assignees, Customer ID and Document ID; save filters you use most.
- **Respond in one place:** bid on events, review contracts, submit questionnaires, and message your customer.
- **Your language, automatically:** content is served in your account language when your customer publishes a translation.

At a Glance

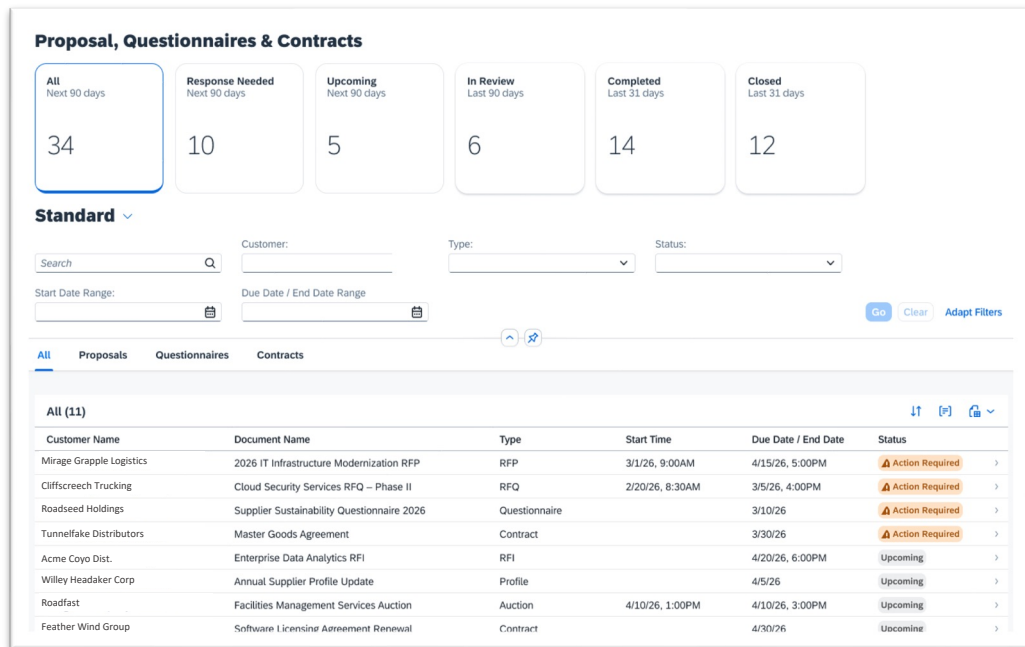

For: Suppliers

What it's for: Managing your proposals, questionnaires and contracts

Who uses it: Anyone with the "Access proposals and contracts" permission

Why you'll like it:

- See what needs your attention as soon as you sign in.
- Work across every customer in one list.
- Filter, save your favorite filters, and switch views.
- Content served in your account language.

Your New Landing Page

2 things change at once: The customer picker gives way to status cards for the seven work states, and separate sections collapse into one filterable list.

Focusing on One Customer, When You Need To

Before, the customer picker was a stacked list you always saw first. Now, one Customer filter lets you drill in when you want to.

Focused List

Status buckets at the top of the page, and an advanced view for teams working the same customers.

Cards across the top of the page for each of the seven work states — Response Needed, Responded – Editable, In Review, Upcoming, Complete, Paused, Discontinued. Click any card to focus the list. A Status filter in the filter row lists every status a buyer event can hold.

What Stays the Same, What Changes

Guaranteed compatibility for existing suppliers, integrations, and buyer notifications.

Stays the Same

Deep links: existing links from customer emails and in-app notifications continue to work.

Bookmarks: browser bookmarks to specific events are preserved.

Permissions: the Access proposals and contracts permission is unchanged.

Customer relationships: all existing customer relationships carry over.

Historical events: every prior proposal, questionnaire and contract is preserved.

Data model: document IDs, contract IDs, review-round numbers unchanged.

Integrations: third-party tools remain unaffected.

Changes

Landing behavior: page opens with seven status cards instead of customer picker.

Filter bar: one unified filter row across proposals, questionnaires and contracts.

Views: Standard and Advanced variants replace the fixed filter row.

Frequently Asked Questions

Do I need to do anything to get this? No. It is enabled automatically on your account in the wave that covers your account.

Where did the customer picker go? It is now a Customer filter on the filter row.

Will deep links from customer emails still work? Yes. Existing links route to the correct event.

Will I lose historical events? No. Every prior proposal, questionnaire and contract is preserved.

Are my saved filters preserved? The new variant system replaces older browser-stored filters. Re-create your filter and use Save As.

Can I switch back to the old view? No. The Network Centric View replaces the previous experience.

Who on my account can see this? Users with the "Access proposals and contracts" permission on their role.

What if I don't see the new experience yet? You might not be picked for the enablement yet, we will be completing the full enablement by Mid December 2026.

Is training required? No. The layout is intuitive; a help topic and a short walkthrough are linked from the page.

Thank you.
