

Webcast Q&A

Central Invoice Management	Question	Answer
	RE: #6 - Seems like Ariba already does this. If GR is missing, it throws an exception, and IR goes into 'Awaiting Processing'. Is this changing?	This change is applicable to SAP Ariba Central Invoice Management. SAP Ariba Invoice Management is not impacted by this.
	None of the CIM numbers are in that table. Where can I find more information about them?	Please visit SAP Ariba Central Invoice Management help site https://help.sap.com/docs/CENTRAL_INVOICE_MANAGEMENT
	Are these new features available in Test? If not, when will they be in Test?	As mentioned in the call, CIM releases were part of 2411, 2412, and 2501 releases
	Hello, Grateful for the session on CIM as I am currently part of Team about to deploy it as an Automate Solution to AP / Vendor Invoice Management solution for its S4 Public Cloud Implementation Question - How do we go about obtaining a Starter or Demo system suitable for a Fit-2-Standard Design WKS.	Please reach out to the SAP Partner manager HCL works with.
	We see SAP has put up two SKU / Licenses for said product CIM: Cloud test, demo, and development for SAP Central Invoice Management (SKU #8016009). Note: Cloud test, demo, and development for SAP Central Invoice Management license is a prerequisite to purchase this item. Cloud test, demo, and development for SAP Central Invoice Management, inbound processing (SKU #8016068), how do these differ?	Please reach out to the SAP Partner manager HCL works with.
	CIM-657 isn't in "What's New in SAP Procurement and SAP Business Network"	That was part of November 2024 release. Here is the link in SAP Help https://help.sap.com/docs/CENTRAL_INVOICE_MANAGEMENT/2d22ad0ea68d496fb12869ecf4761972/c45b2f76f8c64865add2b0c82fde0e1f.html?parentHref=/whats-new/536808e222074ef4a62bfdc5a48ec66a?locale=en-US&parentName=What%27s+New+in+SAP+Ariba+Central+Invoice+Management

GB-24673	Question	Answer
	Which pre-requisition is needed to have the min. order qty? Punsh Out Level 2?	There are no prerequisites, minimum order quantity can be added on any material items assuming information is added in the catalogs
	Slide 17 - if there is no hazardous material information, does the new display show the field value as blank or is it removed fromt the screen?	The field value will be shown as blank
	Do GB-24673 enhancements require CMS catalogs?	The catalogs can come from CIF, excel , Bmecat
	Slide 17 - we use the CMS excel catalog file - does the hazardous material information added to the upload file?	Cclassification codes (GHS01, GHS02 etc) will have to be maintained in the catalog files
	I believe qty price break is not supported in CIF file without CMS enabled. So will be helpful to know pre-requisite.	'Tiered Pricing' or 'Date and Quantity-Dependent Price' are both supported. Tiered Pricing is exclusively supported in the BMECat format, while Date/Quantity-dependent pricing is supported in CIF as well. Both methods require CMS to be enabled. The following link provides additional information about 'Date and Quantity-Dependent Price': https://help.sap.com/docs/buying-invoicing/catalog-format-reference/date-and-quantity-dependent-price-configuration-in-cif-catalogs-f3ef78086906494ab0f8c7688e52300f .

Release Readiness Materials	Question	Answer
	Will the slides presented today would also be made available in the Release Readiness portal? I've missed the 2 first announcements tied to SLP	Yes.

SC-22524	Question	Answer
	SC-22524 - does this require the user to have a Supplier Risk User/Manager license as well as their Contract module license?	Yes, indeed. To display data from Supplier Risk you do need the respective license as well as the Contract license, where you display the info
