

Source to Pay Transformation Project

Dear Valued Supplier,

Baker Hughes uses SAP Business Network (Ariba) to manage its sourcing and procurement processes and to collaborate with suppliers.

SAP Business Network creates efficiencies, benefits and opportunities for both Baker Hughes and you, and will allow us to transact more seamlessly.

➤ **What does this mean for you?**

Interacting with and transmitting invoices through the Ariba Network is the preferred way to conduct business with Baker Hughes.

➤ **Why join the Ariba Network?**

The benefits of joining the network include real-time PO delivery, use of online catalogs, invoice automation and tracking of orders.

Also, there are several benefits of using Ariba Network e-invoicing for your business which include (but are not limited to):

- **Greater visibility of your invoice status** – check the status of your invoice at any stage
- **Fast, guaranteed invoice delivery** – Invoices are processed faster through a more streamlined process than when they were emailed into Baker Hughes
- **Early invoice data validation** – Invoices will be in the perfect Baker Hughes format, so the chance of an invoice going on hold due to inaccuracies is reduced
- **Cost** – Reduction to your AR processing cost
- **Environmentally sustainable solution** – Completely paperless invoicing

➤ **How can I learn more about this initiative?**

To learn more about this effort, you can:

- Listen to a previously recorded Summit/Training by [Clicking here](#)

Thank you in advance for your support.

Sincerely,
The Supplier Enablement Team,
