The Catalog Upload **Process**

Introduction

[Return To Contents](#)

- Your customer is using an SAP Ariba Procurement solution to help streamline their purchasing processes. As part of this initiative, your organization has been identified as a candidate to provide, manage, and maintain a PunchOut catalog for them.
- At this stage, you should have setup your SAP Business Network (SBN) account, created a test account and completed your PunchOut Configuration.
- For this project, there is a requirement or you have chosen to use this guide to understand and manually populate a customer specific PunchOut Index File, rather than using the wizard. This guide will assist you to understand each field within the Punchout Index File so you may populate it.

Catalog Validation Flow

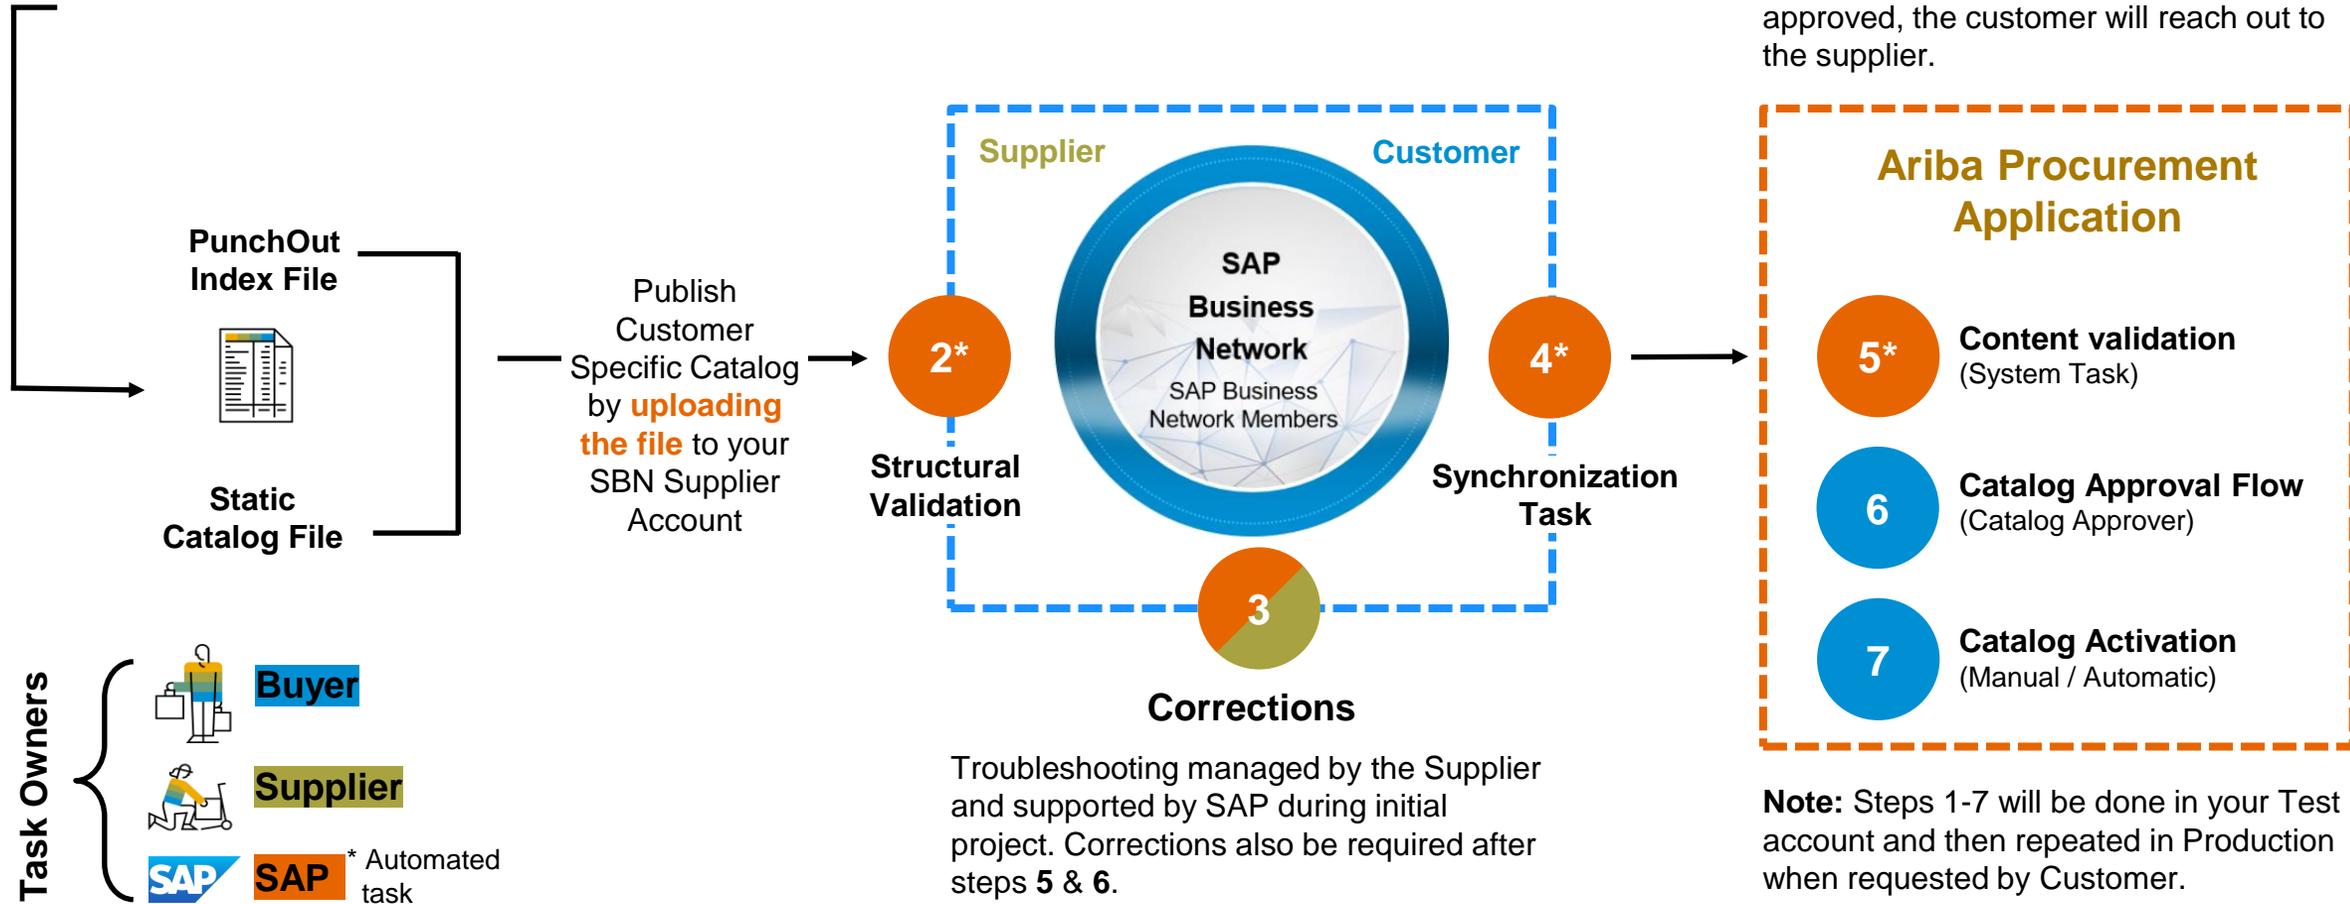

1 Suppliers
Supplier populates the Level 1 Index File Template Form.

SAP Business Network (SBN)

Structural Validation happens on the SBN. If any errors are detected, they will be displayed in the Supplier SBN account.

Customer

Validation #2 happens in the SAP Procurement Application. If any errors are detected or the catalog is not approved, the customer will reach out to the supplier.

Troubleshooting managed by the Supplier and supported by SAP during initial project. Corrections also be required after steps 5 & 6.

Note: Steps 1-7 will be done in your Test account and then repeated in Production when requested by Customer.

PunchOut Catalog **Template**

PunchOut Catalog Template

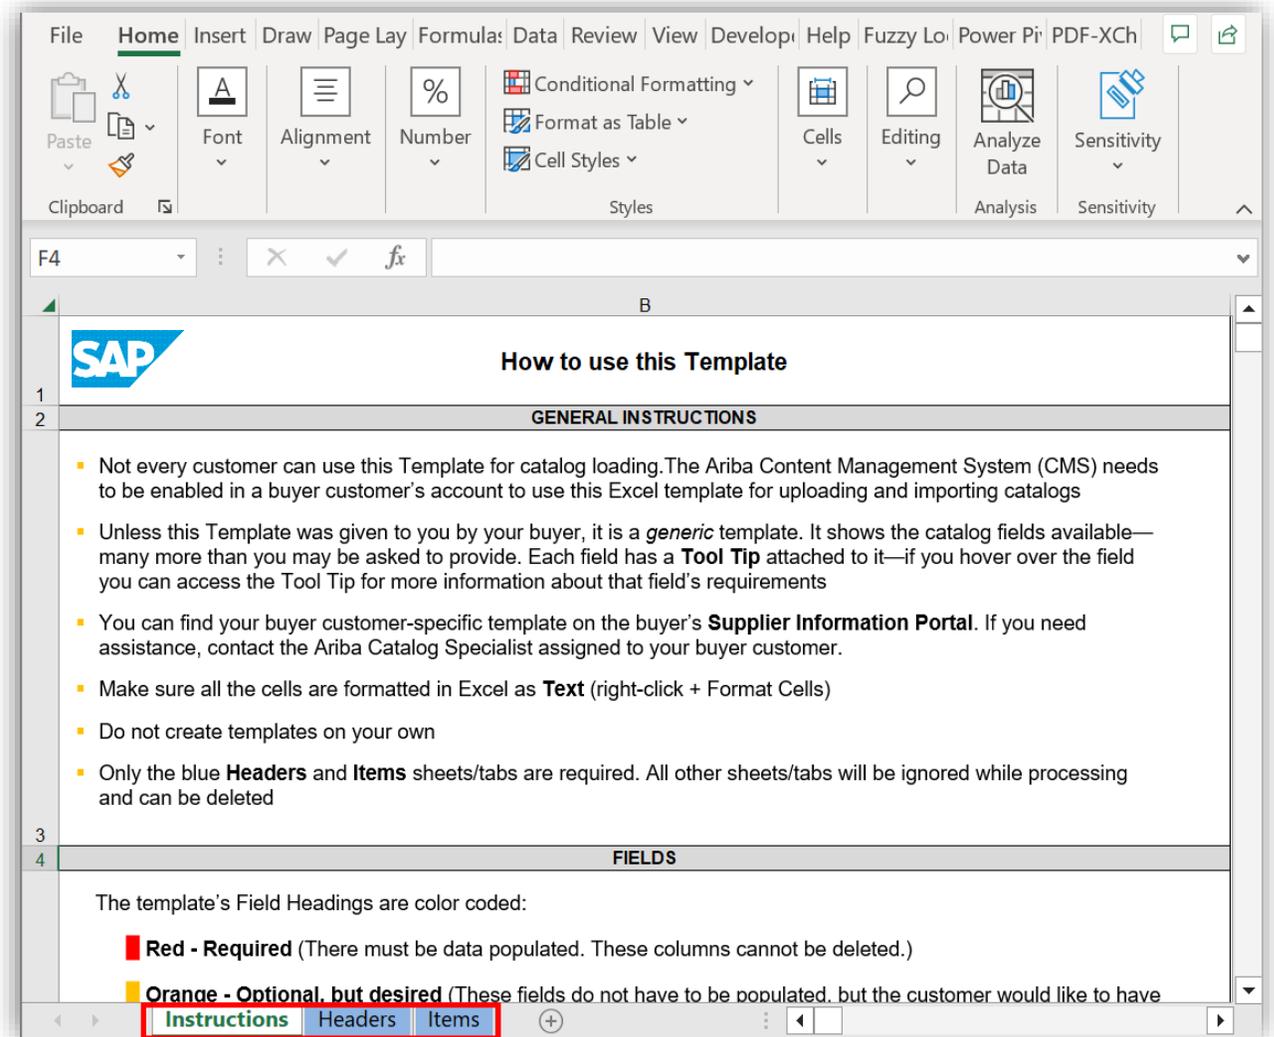

- PunchOut Index File** is a Catalog Excel template with an additional field(s). Once activated, this catalog will create a **"Buy From Supplier"** button in the customer's **Procurement Application**, which is used by your customer to access the **Punchout Catalog**.
- Here is a sample **PunchOut Index File** in Excel format. For both PunchOut catalogs (L1 & L2), you will see the **"PunchOut Enabled"** field. For PunchOut L2 catalog, you will also see the **"PunchOut Level"** field.

													L1	L2

- The Template is color coded and has Tool Tips that provide information about how to treat each field. Each Template includes specific instructions, including custom fields or other requirements set by your Customer.

PunchOut Catalog Template

- The Template has 3 tabs-2 data tabs for **Header** and **Items**, and 1 tab for **Instructions**.
- Only the **Header** and **Items** tabs will be processed-the other tab will be ignored by the system. This tab can be deleted.

PunchOut Catalog Template

The Items Tab

Supplier ID	Supplier Part ID	Unit Price	Unit of Measure
AN01000234567	AAA	1	EA

- Fields in the Items tab can be **simple** or **compound**

These are samples of simple fields with a single data element at the **Header** level

Classification Codes-1	
Domain	Value
UNSPSC	43000000

These are samples of compound fields-they have data elements at the **Header** and **Detail** level

PunchOut Catalog Template

Supplier ID	Supplier Part ID	Unit Price	Unit of Measure
AN01000234567	AAA	1	EA

- **Simple** fields are color coded as to their requirements designation

Classification Codes-1	
Domain	Value
UNSPSC	43000000

Header

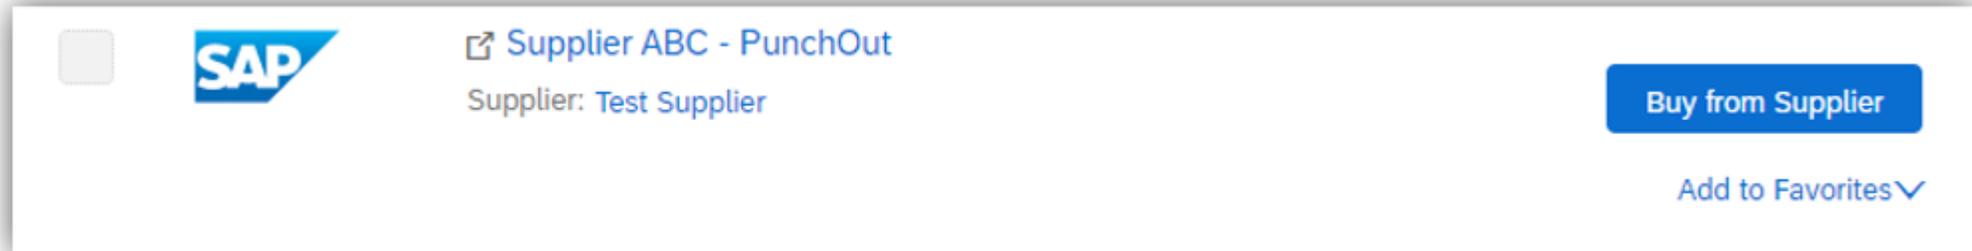

Detail

- For **Compound** fields, the designation for whether or not the field is required is at **both** the **Header** and **Detail** level of the field

Level 1 Template and Catalog File Creation

What is A Level 1 PunchOut Catalog?

- Once you have worked through the PunchOut Catalog project, your customer will be able to access your PunchOut catalog via the generated Catalog file.
- Your customer will be able to see your company name and logo within their system.

- Clicking on the 'Buy From Supplier' button will take them to your interactive website.

The Level 1 Punchout Index File Template

- The Index file is color coded and has Tool Tips that provide information about how to treat each field.
- Each column includes specific instructions, including custom fields or other requirements set by your Customer.

A	B	C	D	E	F	G	H	I	J	K
Supplier ID	Supplier Part ID	Item Description	Unit Price	Unit of Measure	Short Name	Required				
AN019999999	AAA	pen, computer, printer, phone, folder	1	EA	SupplierABC Catalog	Short title for the item. Do not use duplicate information in Short Name and Item Description . Instead, use Short Name to name the product, and Item Description to describe product details. Type: String Length: 80 characters				
						Detailed				
						www.1.com/2772900/img.gif				

FIELD COLOR CODES	
	Required
	Optional but preferred
	Optional
	Do Not Use

- The template and instructions are provided to Suppliers and can also be found on your Customer's Supplier Portal page on the SBN.

Catalog Creation – L1 PunchOut Index File - The Header Tab

A	B
CHARSET	UTF-8
LOADMODE:	F
SUPPLIERID_DOMAIN:	NetworkID
UNUOM:	TRUE
CURRENCY:	AUD
COMMENTS:	Any comments can go here.

Note: The **Header** contains information that applies to the entire file. You can see that the only required fields are the **LOADMODE** and **SUPPLIERID_DOMAIN**.

You can set **UNUOM** and **CURRENCY** at the item level in the file and they will override the values in the Header for that particular item.

- **LOADMODE** - F (Full) or I (Incremental) The tool tip explains how Incremental loads work
- **SUPPLIERID_DOMAIN** - Specifies the Domain used. The preferred value is the Supplier's Ariba Network ID Number-"NetworkID". Other values include "DUNS", "internalsupplierid" or custom values
- **UNUOM** - If set to "TRUE", the Unit Of Measure is set to UNUOM (United Nations Unit of Measure); if set to "FALSE", the value is set to ANSI. (Ariba recommends UNUOM)
- **CURRENCY** - Specifies the currency used for the prices. The value "USD" (United States Dollar) is here by default and can be changed to a different currency
- **COMMENTS** - This field can be used for comments related to your catalog. It is a good place to enter the Supplier Name, the Customer Name and Catalog Name

Catalog Creation – L1 PunchOut Index File - The Items Tab

Supplier ID	Supplier Part ID	Item Description
AN01000258741	12345	This catalog includes the following items Pens, Paper..

Supplier ID - Required

Description: If the Header is set to “NetworkID”, then enter the Supplier’s Ariba Network ID, otherwise the appropriate value for the Domain used- DUNS, internalsystem, etc. Ask your Catalog Advisor if you have questions

Type of data: String

Maximum length: 255

Example: AN09067477712

Note: If you publish the Catalog in your test account, add a suffix –T to your ANID or DUNS number like this: AN09067477712-T

Supplier Part ID - Required

Description: In L1 PunchOut this can be any value. It is required to be populated. You could set a keyword for the Supplier to evaluate here if you wish

Type of data: String

Maximum length: 255

Example: 2772882

Item Description - Required

Description: In L1 PunchOut, use keywords from product categories and services available on the Supplier’s site. These keywords are searched and display the Supplier’s PunchOut link when matched

Type of data: String

Maximum length: 2000

Example: Printer, Laser, Inkjet, laptop, tablet, mouse, HP, Apple, Microsoft, Software

Note: To use a special character as a literal value, you need to “escape” it by putting a backslash (\) in front of it. For example, \” lets a double quote be seen as a quote instead of a delimiter for an entry. To escape a quote (”) within a quoted field, use two quotes (””)

Catalog Creation – L1 PunchOut Index File - The Items Tab

Unit Price	Unit of Measure	Short Name	Classification Code-1	
			Domain	Value
1	EA	SupplierABC Catalog	UNSPSC	45678900

■ Unit Price - Required

Description: In Level 1 PunchOut, the price is not used, but must be populated. It is suggested that you set the value to 1.00

Type of data: Decimal

Example: 1.00

Note: To separate the integer from the decimal, you must use a 'dot' and not a comma. Also, do not use a comma to indicate 'thousands'. Do not include any currency symbols such as \$, £ or ¥.

■ Unit of Measure - Required

Description: For L1 PunchOut, this is just populated to meet the system requirement-UOM is not used. It is suggested that you use EA

Type of data: String

Maximum length: 32

Example: EA

■ Short Name - Required

Description: In L1 PunchOut, this is what will actually display to the User on the UI

Type of data: String

Example: <SupplierName> PunchOut

Maximum length: 80 characters

■ Classification Code-1 – Required

Description: Classification of the main product or service you sell. For L1 PunchOut, this will only determine where the Supplier link appears in the catalog hierarchy-not what the actual items are. For this required field, the detail sub-fields Domain and Value are required to be populated.

■ Domain – Required

Description: Use 'UNSPSC'

Type of data: String

Maximum length: 40

Example: Custom

■ Value – Required

Description: The classification code that corresponds to your main product or service.

Type of data: String

Maximum length: 40

Example: 45678900 (level 3) and 45678923 (level 4)

Note: Ariba supports UNSPSC Version 13.5. A code list is available in your Customer's Supplier Information Portal.

587.jpg		https://www.1.com/587.Jpg	A100-BLK
http://www.1.36.jpg		https://www.1.36.jpg	

Manufacturer Part ID – Do Not Use

Description: A Part Number that a Manufacturer uses

Type of data: String

Maximum length: 255

Example: TTSIBM412CID

Image – Required

Description: URL of the item’s image (preferred), or filename of the image (sent in a zip file)

Supported image formats: JPG, JPEG, GIF, PNG, BMP—(JPG preferred)

- Detail: **Thumbnail – Optional** (If **Image** is used, at least one Detail is required)

Description: URL of an Icon-size image of the item, or filename of the image (sent in the zip file)—can be different from the product’s full-size Image

Type of data: String

Maximum length: 255

Recommended Size: 85 x 85 pixels

Note: If the “Thumbnail” field is left blank, the file in the “Image” field will be resized and populate the Thumbnail

- Detail: **Normal - Required** (If **Image** is used, at least one Detail is required)

Description: URL of an image of the item, or filename of the image (sent in the zip file)

Type of data: String

Maximum length: 255

Recommended Size: 250 x 250 pixels

- Detail: **Detailed - Optional** (If **Image** is used, at least one Detail is required)

Description: URL of an image of the item, or filename of the image (sent in the zip file)

Type of data: String

Maximum length: 255

Recommended Size: 250 x 250 pixels

Catalog Creation – L1 PunchOut Index File - The Items Tab

Special Notes for Images

- In the Catalog file, you can refer to a Remote Image-using a URL-or you can refer to a Local Image, and send that image to your Customer to store
- Using Remote Images is preferred
 - Be sure the URL in the Template is *complete* (including https://) *Example:*
https://server/directory/imagefilename.jpg
 - Point to the image itself-not a program that serves up images
- If you use Local Images
 - Be sure the filename in the Template is *exact*-including upper and lower case
Example: FileName.jpg -or- lowercasename.jpg
 - Place all catalog images into a zipped folder and load on the SBN

Catalog Creation – L1 PunchOut Index File - The Items Tab

Manufacturer Name	Supplier URL	Manufacturer URL
Manufacturer 1	http://www.supplier1.com/item.html	http://www.manu.com
Manufacturer 2	http://www.supplierA.com/item.html	
Manufacturer 3	http://supplier.com/1234.html	
Manufacturer 4		

- **Manufacturer Name - Do Not Use**

Description: Name of the manufacturer

Type of data: String

Maximum length: 255

Example: Epson

- **Supplier URL - Do Not Use**

Description: A URL that links to a Supplier static page about the item (could be a MSDS, construction info, packaging info, etc.), in https: format as required by SAP.

Type of data: String

Maximum length: 255

Example: <https://www.supply.com/Catalog/product18.htm>

- **Manufacturer URL – Do Not Use**

Description: A URL that links to a Manufacturer’s static page about the item (could be a MSDS, construction info, packaging info, etc.)

Type of data: String

Maximum length: 255

Example: <http://www.manu.com/Catalog/product18.htm>

Catalog Creation – L1 PunchOut Index File - The Items Tab

Lead Time	Market Price	Supplier Part Auxiliary ID
1		1234-75
1		
3		
1		

- **Lead Time - Do Not Use**

Description: Number of working days for the product to be shipped from the date you receive the Purchase Order

Type of data: Integer

Maximum length: 40

Example: 1

- **Market Price – Do Not Use**

Description: List or retail price.

Note: Does not show on the Ariba UI—this is an informational-only field for Suppliers.

Type of data: Decimal

Example: 4.32 or 1234.78

Note: To separate the integer from the decimal, you must use a ‘dot’ and not a comma. Also, do not use a comma to indicate ‘thousands’. Do not include any currency symbols such as \$, £ or ¥.

- **Supplier Part Auxiliary ID – Optional**

Description: Uniquely identifies a single item. For example, items in multiple languages or available in multiple units of measure

Type of data: String

Maximum length: 255

Example: 1234 French

Note: If any items have the same reference (Supplier Part ID column), this column allows you to differentiate the

Catalog Creation – L1 PunchOut Index File - The Items Tab

Language	Currency
en_US	USD

- **Language – Do Not Use** (If blank, defaults to 'en_US')
Description: Specifies the language used to describe the item.
Type of data: String
Maximum length: 255
Example: en_US
Note: A listing of language codes is in your Customer's Supplier Information Portal

- **Currency – Do Not Use** (Can be set as a default value in Header)
Description: Specifies the currency used for the prices
Type of data: String
Maximum length: 32
Example: USD, CAD (Canadian Dollar)
Note: A listing of currency codes is in your Customer's Supplier Information Portal

Catalog Creation – L1 PunchOut Index File - The Items Tab

Expiration Date	Effective Date
en_US	USD

- **Expiration Date – Optional, but desired**

Description: Date that the catalog item expires and is removed from catalog visibility.

Type of data: Date

Format: YYYY-MM-DD

Note: In Ariba catalogs there is no warning about items' expiring. When the date occurs, the item(s) are removed from visibility automatically.

- **Effective Date – Optional, but desired**

Description: Date that the catalog item becomes valid.

Type of data: Date

Format: YYYY-MM-DD

Note: If you load an item with a date prior to today, the item will be seen immediately, regardless of the Effective Date.

Catalog Creation – L1 PunchOut Index File - The Items Tab

PunchOut Enabled	Keywords
TRUE	Pen, paper, folder, notepad

- **PunchOut Enabled – Required**

Description: Indicates a PunchOut index catalog item. Must be set to TRUE for the system to see this as a PunchOut item

Value: True, False (Default) or blank

Type of data: Boolean

- **Keywords – Required**

Description: Key words that help identify the item in a search. Separate words with a comma.

Type: String

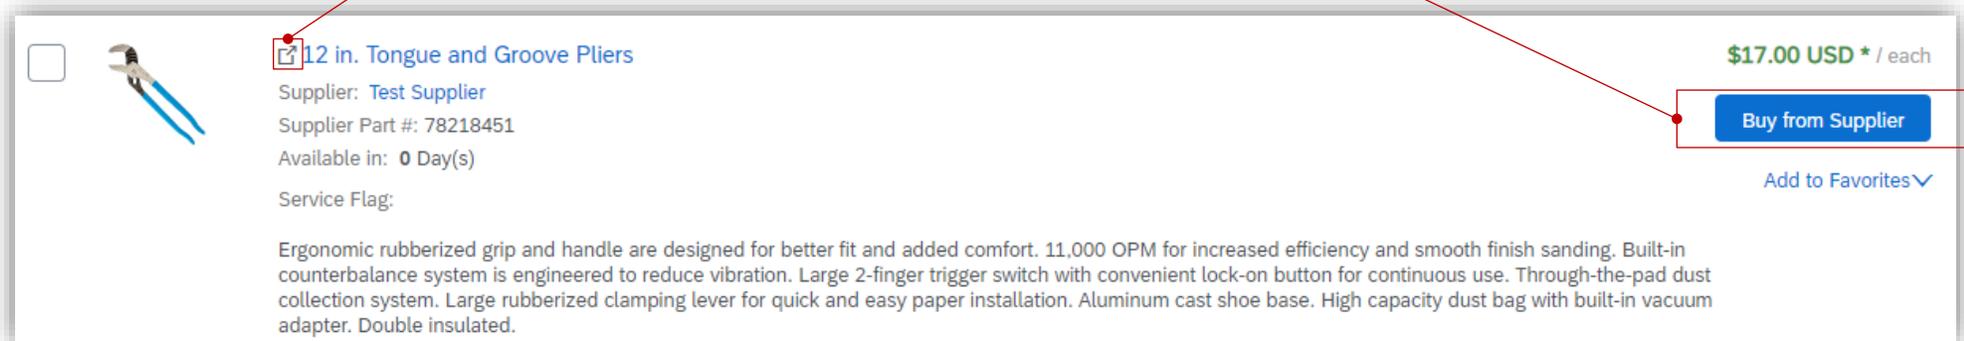

Length: 255

Level 2 Template and **Catalog File Creation**

What Is A Level 2 PunchOut Catalog?

- In **Level 2 PunchOut**, the catalog file is a combination of static catalog information (this is used to search) and it also contains the **PunchOut Enabled** and **PunchOut Level** fields, to tell the system that this is a PunchOut catalog, and the User will be taken to the Supplier's website to add items to their cart as they shop.
- L2 PunchOut items appear on the Catalog interface just as a static item does, but has the “Buy from Supplier” button instead of “Add to Cart”.

The PunchOut icon tells you that this is an external catalog, as well as the “Buy From Supplier” button.

The screenshot shows a catalog item card for "12 in. Tongue and Groove Pliers". On the left, there is a small image of the pliers and a square icon with a red dot, which is the PunchOut icon. The item title is "12 in. Tongue and Groove Pliers" in blue text. Below the title, the supplier information is listed: "Supplier: Test Supplier", "Supplier Part #: 78218451", and "Available in: 0 Day(s)". A "Service Flag:" is also present. The price is displayed as "\$17.00 USD * / each". On the right side, there is a blue button labeled "Buy from Supplier" and a link labeled "Add to Favorites" with a downward arrow. A red box highlights the "Buy from Supplier" button. A red line points from the text above to the PunchOut icon, and another red line points from the text above to the "Buy from Supplier" button.

Catalog Creation – L2 PunchOut Index File - The Header Tab

A	B
CHARSET	UTF-8
LOADMODE:	F
SUPPLIERID_DOMAIN:	NetworkID
UNUOM:	TRUE
CURRENCY:	AUD
COMMENTS:	Any comments can go here.

Note: The **Header** contains information that applies to the entire file. You can see that the only required fields are the **LOADMODE** and **SUPPLIERID_DOMAIN**.

You can set **UNUOM** and **CURRENCY** at the item level in the file and they will override the values in the Header for that particular item.

- **LOADMODE** - F (Full) or I (Incremental) The tool tip explains how Incremental loads work
- **SUPPLIERID_DOMAIN** - Specifies the Domain used. The preferred value is the Supplier's Ariba Network ID Number-"NetworkID". Other values include "DUNS", "internalsupplierid" or custom values
- **UNUOM** - If set to "TRUE", the Unit Of Measure is set to UNUOM (United Nations Unit of Measure); if set to "FALSE", the value is set to ANSI. (Ariba recommends UNUOM)
- **CURRENCY** - Specifies the currency used for the prices. The value "USD" (United States Dollar) is here by default and can be changed to a different currency
- **COMMENTS** - This field can be used for comments related to your catalog. It is a good place to enter the Supplier Name, the Customer Name and Catalog Name

Catalog Creation – L2 PunchOut Index File - The Items Tab

Supplier ID	Supplier Part ID	Item Description
AN0199999999	12345	Pens, Bic, Ballpoint, Blue, 1 dozen
AN0199999999	87690	Stapler, Swingline, Black
AN0199999999	479-56	Post-It, Yellow, 1"x2", pad of 100

- **Supplier ID - Required**

Description: If the Header is set to “NetworkID”, then enter the Supplier’s Business Network ID, otherwise the appropriate value for the Domain used-DUNS, internalsystem, etc. Ask your Catalog Advisor if you have questions

Type of data: String

Maximum length: 255

Example: AN09067477712

Note: If you publish the Catalog in your test account, add a suffix –T to your ANID or DUNS number like this: AN09067477712-T

- **Supplier Part ID - Required**

Description: Part Number used by the Supplier. The Part Number must be unique for each item in the Catalog.

Type of data: String

Maximum length: 255

Example: 2772882

- **Item Description - Required**

Description: Description of the product or service. Make your descriptions as clear and complete as possible (Item type, brand, model, color, etc.)

Type of data: String

Maximum length: 2000

Example: Printer, Laser, A4, Epson Stylus Color 740

Catalog Creation – L2 PunchOut Index File - The Items Tab

Unit Price	Unit of Measure	Short Name	Classification Code-1	
			Domain	Value
3.48	EA	Soft Drink, Soda, Dr Pepper	UNSPSC	43191504
12.95	EA	Dairy, Milk, 1% milkfat	UNSPSC	43191504
8.76	DZN	Coffee, Dark Roast, Starbucks	UNSPSC	44122011
12.25	BX	Soft Drink, Juice, Minute Maid	UNSPSC	44122011

Unit Price - Required

Description: Customer-specific price

Type of data: Decimal

Example: 4.32 or 1234.78

Note: To separate the integer from the decimal, you must use a 'dot' and not a comma. Also, do not use a comma to indicate 'thousands'. Do not include any currency symbols such as \$, £ or ¥.

Unit of Measure - Required

Description: Unit of measure related to the Unit Price. Use a United Nations UOM if the UNUOM in the Header is set to "True"

Type of data: String

Maximum length: 32

Example: BX

Note: A file containing the Units of Measure is available in your Customer's Supplier Information Portal

Short Name - Required

Description: Short description of the item. The Short Name is displayed first in the UI, and is in a larger type face and blue color. You can use the Short Name to describe a category or Item type, then give the specifics in the Item Description

Type of data: String

Example: Nylon Glove, Blue

Maximum length: 80 characters

Classification Code-1 – Required

Description: Classification of the product or service.

Detail: Domain – Required

Description: Use 'UNSPSC' if the Header specifies "UNSPSC" as the CODEFORMAT

Type of data: String

Maximum length: 40

Example: UNSPSC, Custom

Detail: Value – Required

Description: The classification code that corresponds to the product or service

Type of data: String

Maximum length: 40

Example: 45678900 (level 3) and 45678923 (level 4)

Note: Ariba supports UNSPSC Version 13.5. A code list is available in your Customer's Supplier Information Portal.

Format: YYYY-MM-DD

Note: In Ariba catalogs there is no warning about items' expiring. When the date occurs, the item(s) are removed from visibility automatically.

- **Effective Date – Optional, but desired**

Description: Date that the catalog item becomes valid.

Type of data: Date

Format: YYYY-MM-DD

Note: If you load an item with a date prior to today, the item will be seen immediately, regardless of the Effective Date.

Catalog Creation – L2 PunchOut Index File - The Items Tab

PunchOut Enabled	PunchOutLevel
TRUE	Product
TRUE	Product
TRUE	Product

- **PunchOut Enabled - Required**

Description: Tells the system that this file is a PunchOut Index file. Must be set to TRUE for the system to see this as a PunchOut item

Type of data: Boolean

- **PunchOutLevel - Required**

Description: Tells the system that this item is a L2 PunchOut item that will take the User to the Supplier's site at the **Store** Level (like a L1), the **Aisle** level (a category, that requires then to further refine the search on the Supplier's site), the **Shelf** level (a refined category that results in only a few items that will all be displayed in the PunchOut) or the **Product** level (this takes the User to the exact item on the Supplier's site that they searched for in Ariba). **Product** is the most common level

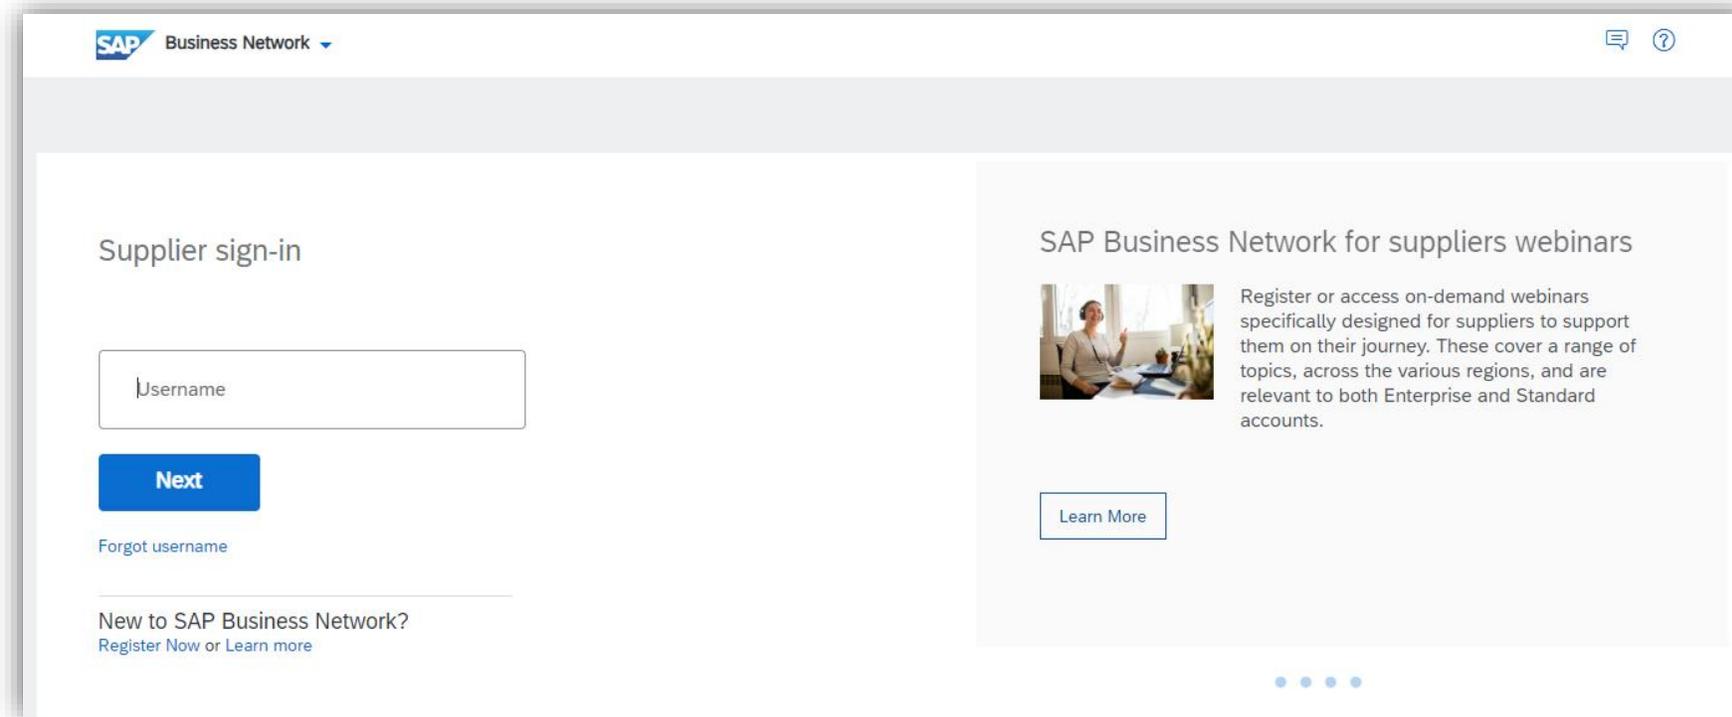

Values: Store, Aisle, Shelf, Product

Type of data: Boolean

Uploading and Publishing a PunchOut Catalog

Uploading and Publishing a PunchOut Catalog

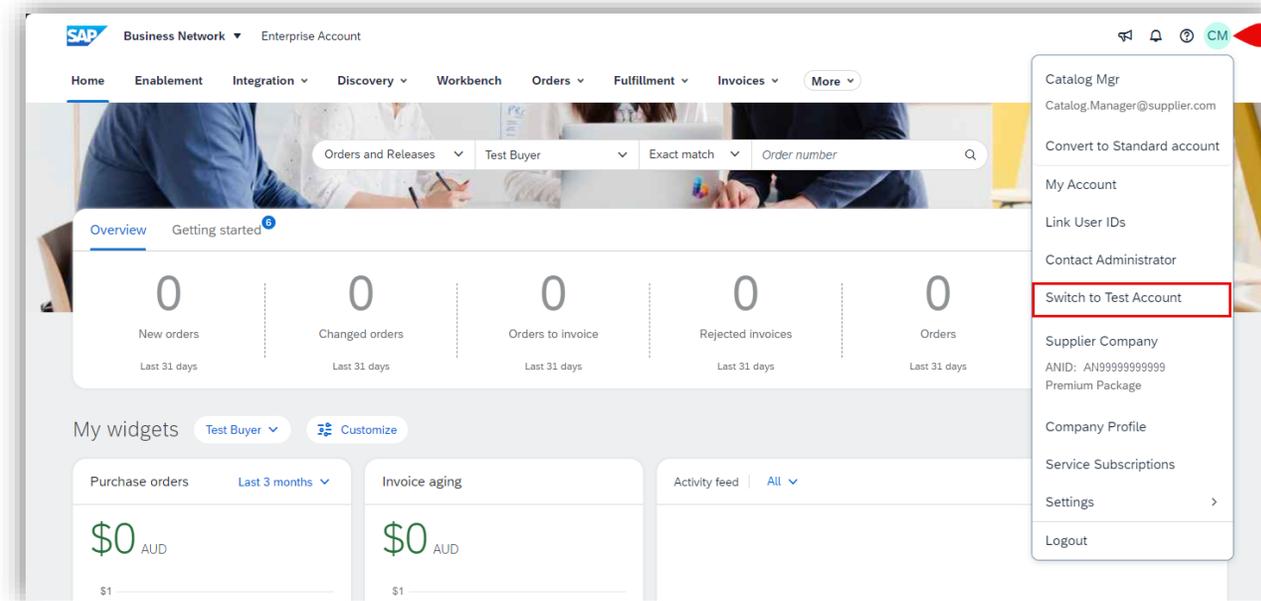

- **Login to Business Network**
 - Go to: <https://supplier.ariba.com>
 - Log in with your Username and Password

Uploading and Publishing a PunchOut Catalog

■ Switch to your Test Account

- Your Catalog should be loaded and tested in your Test Account. (Note: If you are instructed to load a Catalog to a Production account, just skip this step)
- Find your name and click for the pull down menu, then click “Switch To Test ID”
- If you don’t see a “Switch to Test ID” link, your Test account has not yet been set up. Contact your Business Network Administrator

- You will get a warning. **“You are about to switch to Test Mode.”** Click “OK”

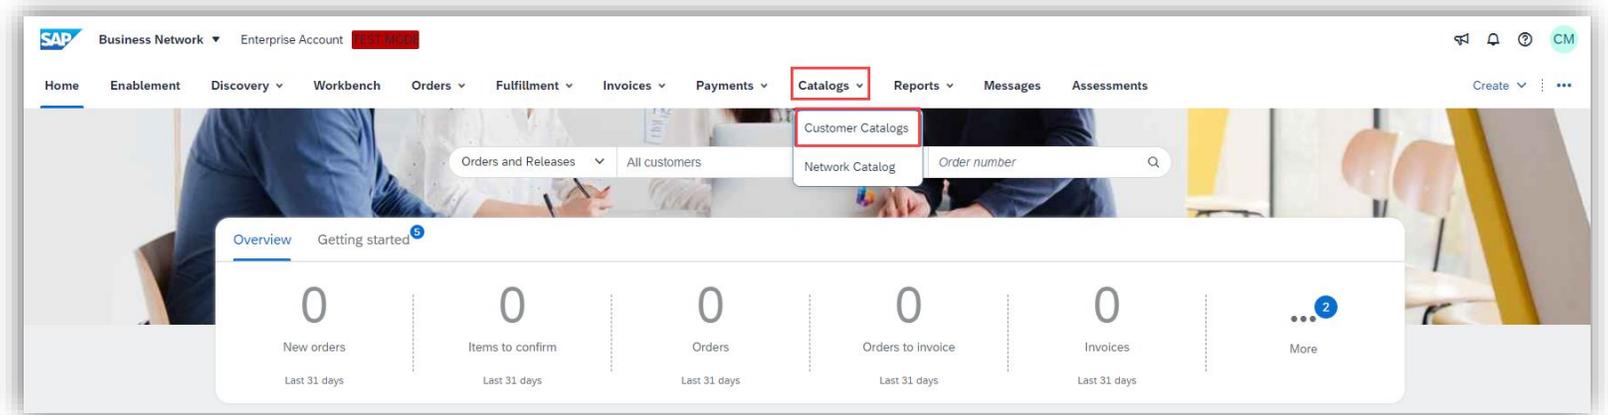

Uploading and Publishing a PunchOut Catalog

- When uploading a Catalog on Business Network, there are four steps you will follow:
 - 1. Uploading**—Transfers the Catalog file from your local drive to Business Network. During the upload process, you enter the Catalog name (this becomes the “Subscription Name” in the Buyer’s local Catalog) descriptive text, and classify it so that buying organizations that are looking for specific products and services can find your Catalog
 - 2. Setting Visibility**—Allows you to specify whether the Catalog version is “Public” or “Private” and determines which of your Customers can access it
 - 3. Validating**—The Network checks the Catalog for errors, checks for zero price values and does a high-level validation of UNSPSC codes and Units of Measure
*(Note: Customer-specific validation rules for UNSPSC and UOM codes, and zero price values can be more detailed and much more strict than the high-level Network validations, therefore your Catalog may **pass** the Network validations but **fail** the Customer-specific validations for these same items)*
 - 4. Publishing**—Freezes the current version and notifies your Customer of the Catalog’s availability

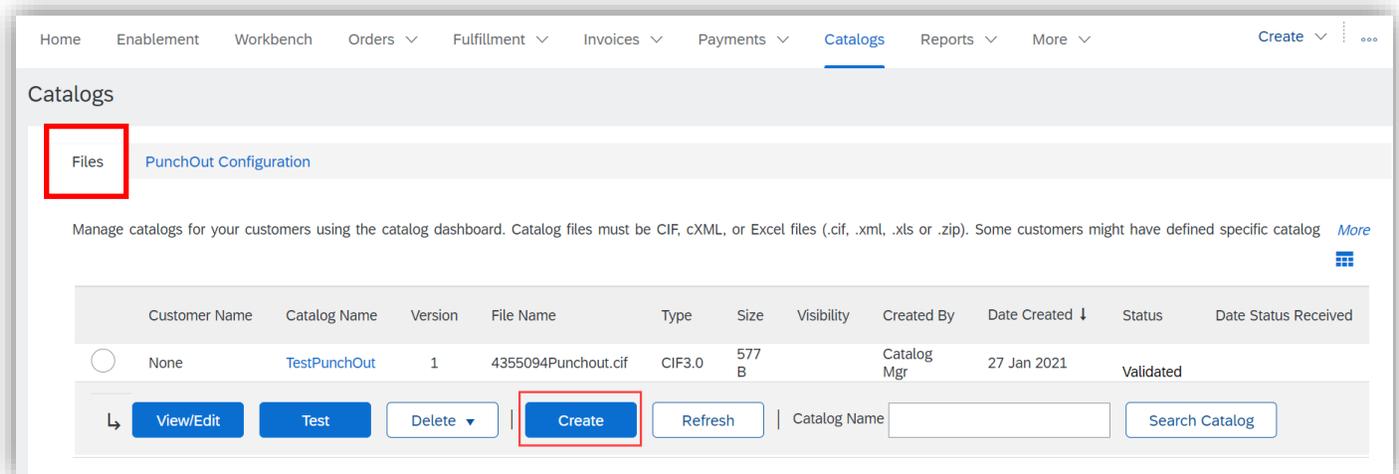

Uploading and Publishing a PunchOut Catalog

- Navigate to the Catalogs Tab and click “Customer Catalogs” tab.

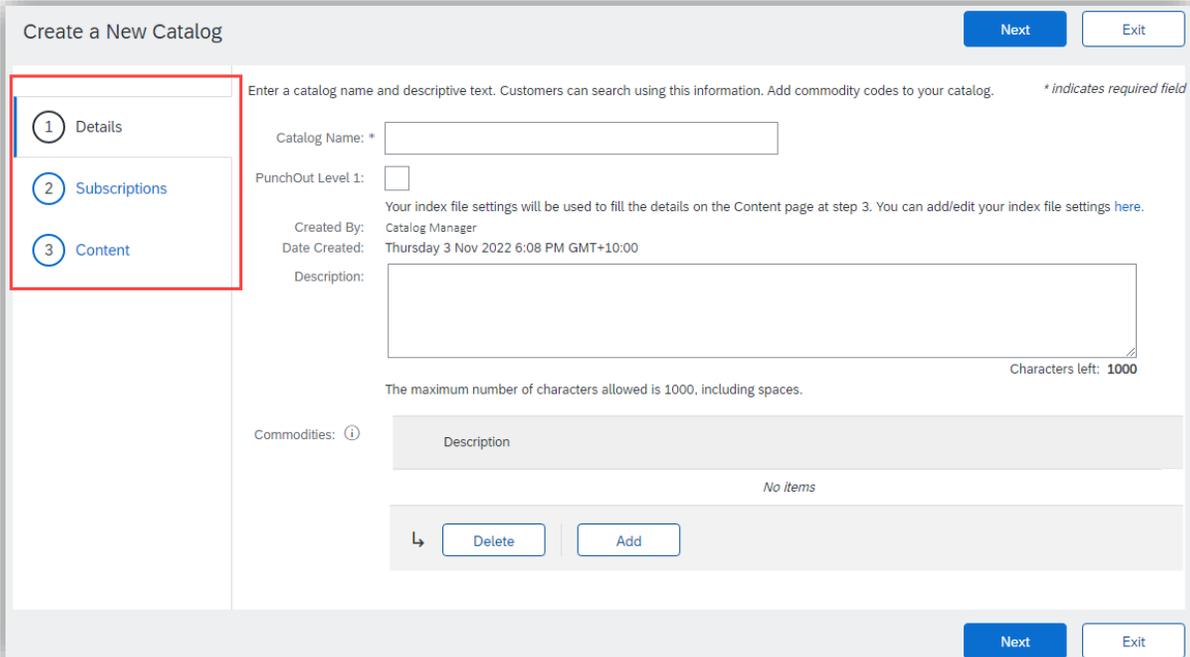

- Click “Files” tab.

- On the Catalogs screen, click the “Create” button.

Uploading and Publishing a PunchOut Catalog

- You are now on the **Create a New Catalog** Screen
- To create the Catalog, there is a 3-step Wizard:
 - ① **Details** - General information about the Catalog
 - ② **Subscriptions** - Who you are publishing the Catalog to
 - ③ **Content** - Uploading the actual Catalog file

Create a New Catalog

Enter a catalog name and descriptive text. Customers can search using this information. Add commodity codes to your catalog. * indicates required field

Catalog Name: *

PunchOut Level 1:

Created By: Catalog Manager

Date Created: Thursday 3 Nov 2022 6:08 PM GMT+10:00

Uploading and Publishing a PunchOut Catalog

② Subscriptions

- You determine which Customers subscribe to your Catalog—specific Customer(s) or to all Customers on the Network
- Set the Visibility to “Private”. You can select a single customer.
- To select your Customer, check the box next to the “Customers” list.
- If the Supplier does not appear, it means that they have not established a relationship with your company yet. This is required prior to uploading a Catalog to them
- When you complete this screen, click “Next”

Add customers and set the catalog visibility for customers. Click the customer's name to view validation rules on your customer's site.

You can receive status updates on catalogs, including catalog errors from your customer through email. To receive emails, click [Manage Profile](#) and enter the email address in the Email notification section.

Visibility: Private - Only the selected customers that have a trading relationship with you can view and receive the catalog
 Public - All customers can view the catalog. Customers that have a trading relationship with you can also receive the published catalog

UPLOAD YOUR CATALOG AND ATTACHMENT FILES

Catalog File Format: EXCEL

Catalog File: Choose File No file chosen

Images and Attachments File: Choose File No file chosen

! After you click, Validate and Publish, please wait for the catalog to finish uploading. Large catalogs may take several minutes to upload and you will be redirected to the catalogs page upon completion

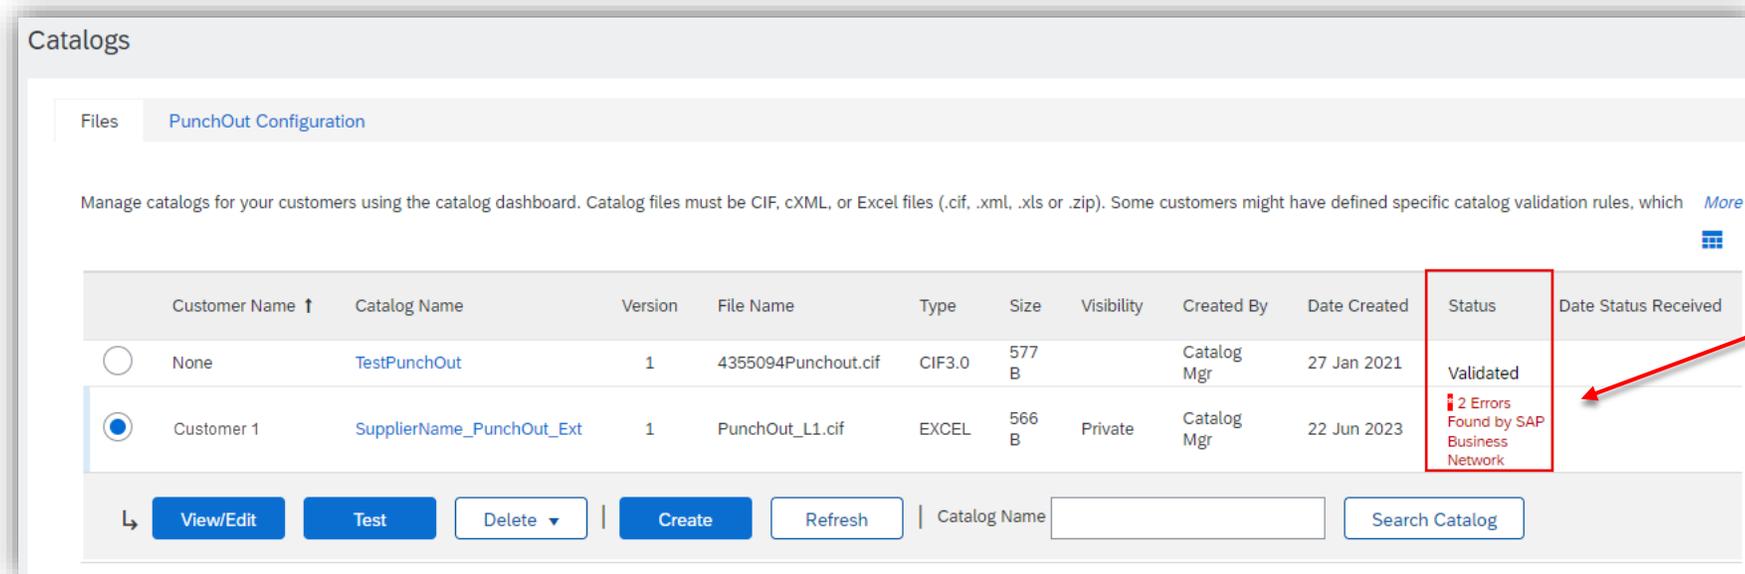

Validate and Publish

- As your Catalog loads, the status will read “Validating”. Click the “Refresh” button at the bottom of the screen to see the status change

Uploading and Publishing a PunchOut Catalog

■ Network Catalog Validation

- After the Network completes validation, it changes the Catalog status from “Validating” to one of the following statuses:
 - **Validated, Published or Pending Buyer Validation**—your Catalog is error-free
 - **Errors Found by Business Network**—the Network detected Catalog content that violates validation rules
 - **Bad Format**—your Catalog failed the file validation check. Audit the file for problems in format
- A Catalog with an error status means you need to review the error results and correct them before going on

Catalogs

Files [PunchOut Configuration](#)

Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers might have defined specific catalog validation rules, which [More](#)

Uploading and Publishing a PunchOut Catalog

■ Customer Approval

- When your Catalog passes the Network upload validation, your Customer is then notified to audit, validate and approve your Catalog. The Network may show any of these statuses: **“Published”**, **“Validated by Customer”** or **“Pending Buyer Validation”**—*note that these are all valid statuses.*
 - Each Customer may have specific validation rules—and these rules may be more strict than the standard Network rules. This means that your Catalog could pass the Network validation, but fail the Customer-specific rules and be returned to you.
 - If your Customer finds anything in your Catalog file that requires your attention, you will be notified by e-Mail.
 - Corrections should be made to the original Excel file, then the corrected Catalog file needs to be uploaded to the Network.
 - Each Catalog must pass both the Network validation, and the Customer audit before it can be loaded into the Customer’s buying application and be available for their Users.
-
