Connect with Synlait through SAP Business Network

Synlait and SAP Business Network

Synlait is offering suppliers a transition to a digitized purchasing process through our SAP Business Network Solution. Your organization has the opportunity to be added to the list of suppliers who will use our new solution. SAP Business Network Enterprise accounts are free for Synlait suppliers.

If you don't already use SAP Business Network, the links below will provide an overview to help you get familiar with it.

What is SAP Business Network?

SAP Business Network, formally known as SAP Ariba, is a SAP product. The SAP Business Network will become Synlait's primary method of purchasing and transacting with new and existing suppliers. The technology will enable Synlait to automate transactions with suppliers when purchasing goods and services across the world. It will also enable Synlait to communicate more effectively with suppliers, improve order accuracy, collaborate on transactions, strengthen our relationships and discover new business opportunities.

What are the key benefits of SAP Business Network for your organisation?

The SAP Business Network will provide you with:
- Online visibility of purchase orders, confirmations, documentation flow, goods and services receipts, advanced shipping notifications and invoicing.
- The ability to track invoice status and payment schedules online in real time.
- On-time invoice payments and reduced invoice and payment errors.
- The ability to send documents, maintain delivery dates, submit service/timesheets and more.
- The ability to integrate directly with Synlait to improve Purchase/Sales cycle efficiency.

Once you are on SAP Business Network, you can use this same network for other customers using the platform.

What do I need to do?

Synlait will send you a questionnaire that will determine your ability to transact directly with Synlait through the SAP Business Network. If you have any questions, please contact ariba@synlait.com.
