

SAP Fieldglass Quick Reference Guide

Recipient Created Tax Invoice (RCTI) Fact Sheet

Supplier

**All screenshots provided are examples only*

Overview

The purpose of the RCTI is to create greater efficiency for TMR and our suppliers through the sourcing process.

The onboarding of our suppliers and the ability to transact is effective at the acknowledgement of the RCTI process.

An RCTI agreement can provide several benefits, including:

- Streamlined invoicing process: With an RCTI agreement, the recipient can create and issue tax invoices on behalf of the supplier, reducing the time and effort required by the supplier to generate and submit invoices.
- Improved accuracy: RCTI agreements can help reduce errors and inconsistencies in invoicing, as the recipient is responsible for ensuring that the invoices are accurate and comply with relevant tax laws and regulations.
- Faster payment cycles: Because RCTI agreements streamline the invoicing process, they can help reduce payment cycles and improve cash flow for both the supplier and the recipient.
- Reduced administrative burden: By allowing the recipient to take on invoicing responsibilities, RCTI agreements can reduce the administrative burden on the supplier, freeing up time and resources to focus on other business activities.
