

2608 SAP Business Network Release Summary

Release Readiness Team
August, 2026

Procurement and Supply Chain Collaboration

Unified Private Sector Access for Non-Promote Suppliers [PAY-27893]

Introduces a source-agnostic 3-posting free quota for non-promote suppliers on private sector postings, with controlled access beyond the limit and a clear path to Promote.

Customer Benefit

Suppliers get fair, consistent access to private sector opportunities with full visibility and a seamless upgrade journey to Promote.

Remove Schedule Lines for Received Items in OC Massload and Re-Confirmation Tile [CSC-85099]

This feature introduces logic-driven filtering and UI controls in SAP Business Network to automatically exclude or block fully processed schedule lines (based on shipment and receipt status) from Order Confirmation (OC) workflows. This eliminates redundant reconfirmation efforts for suppliers across OC Excel mass upload/download and “Items to Confirm” views.

Customer Benefit

- Reduces redundant supplier actions
- Improves usability of OC workflows
- Minimizes confirmation errors
- Enhances data clarity in mass processing scenarios

Ariba Network Purchase Orders API - Filter Extensions [CSC-85100]

Enhancement of the REST Purchase Order API to enable Suppliers to correctly manage their portfolio and for Buyers to correctly manage receptions.

Customer Benefit

- Enable Suppliers to manage correctly their portfolio and for Buyers to manage correctly receptions.
- “*adjusted due ship qty*” information field
- Support of specific PO number search without date.
- Extended date range search for multiple PO search from 31 days to one year.

Feature Overview

Business Network Purchase Orders API - Filter Extensions
