SAP Ariba

Feature at a glance
Showing RFQ details in the buyer's browser locale timezone

Dan Pouliot, SAP Ariba
Target GA April 2018

SAP Run Simple

Feature at a Glance
Introducing: **Showing RFQ details in the buyer's browser locale timezone**

Customer challenge

The buyer sees the RFQs in their organization time zone set against their buyer profile. This is an issue if there are different teams to manage regional RFQs say in South America and Europe and they all belong under one ANID i.e. buyer profile.

Meet that challenge with SAP Ariba

The RFQ will be shown in the time zone of the browser setting for the logged in user. This way the users sees the response deadline and other dates in their time zone regardless of their organization time zone setting.

Experience key benefits

This feature allows a Buyer to easily determine and communicate response deadline and other dates in their time zone regardless of their organization time zone setting.

Solution area

Operational Procurement / Network Procurement / Quote Automation

Enablement information

On by default for customers already enabled to use Quote Automation.
No action required.
