# Feature at a Glance

## Introducing: Update Material Master items in CLID from sourcing award

### Customer challenge

A sourcing award is conducted and line items are awarded to a supplier. In instances, where there's already a existing contract with the supplier, the user would want to update the line items with the new prices from the sourcing event. Currently application allows only append of line items and not updates to the line items

### Meet that challenge with

#### SAP Ariba

With this solution users should be able to update line items into a CLID from a sourcing award

### Experience key benefits

1. Same contracted line item can be updated with new prices without the need to create new line items or contracts each time there is a better price from the market
2. Allows smoother transition of sourcing award line items in to a contract workspace

### Solution area

SAP Ariba Sourcing, SAP Ariba Contracts

### Implementation information

This feature is "on" by default. No action is required to utilize this feature.

### Prerequisites and Limitations

1. Updates will happen only for Material Master items with Material Numbers. This is not applicable for free text lines

## Feature at a Glance

# Introducing: **Update Material Master items in CLID from sourcing award**

### Detailed feature information

1. With this feature in addition to appending lines to a CLID in a contract workspace from a sourcing award, the lines with the same material number can now be updated.
