Customer challenge

Buyers can send Purchase Orders with different Ship-To addresses at item level, depending on where they require the supplier to deliver each of the individual items.

However, some buyers will need suppliers to submit different Shipment Notices for items with different Ship-To addresses.

Meet that challenge with **SAP Ariba**

The buyer can configure a business rule to prevent suppliers from including items with different Ship-To locations on the same Ship Notice document.

This business rule is applied to both online and integrated cXML transactions.

When creating a Shipment Notice the supplier will additionally now be able to view the delivery address at the item level, when so provided on the Purchase Order..

Experience key benefits

Suppliers will be alerted if the buyer does not support Shipment Notices with different item level delivery addresses.

Solution area

Operational Procurement / Network Transactions

Implementation information

This feature is “on” by default

Customer configurable – Check the rule ***Do not allow multiple Ship To addresses on a ship notice*** under Administration > Configuration > Default Transaction Rules

Prerequisites and Limitations

None

New Default Transaction Rule in AN Buyer

Order Confirmation and Ship Notice Rules

Do not allow multiple Ship To addresses on a ship notice	<input checked="" type="checkbox"/>
Do not allow suppliers to reject entire purchase orders	<input type="checkbox"/>
Do not allow suppliers to change line item description	<input type="checkbox"/>

If this rule is checked, suppliers must use the same Ship To address for all ship notice items.
