## Introducing: Enhancements to quality review search filters and custom types

### Customer challenge

Today, customers / buyers do not have an ability to search the Quality review documents for multiple suppliers in search criteria. It is restricted to one.

Also, buyers were able to only use four QR types and did not have an ability to add more review types on the network.

### Meet that challenge with

#### SAP Ariba

- The feature now enables buyer to search for review documents by multiple suppliers.
- The feature now allows buyers to define multiple quality review types, subtypes referring to existing standard review types as templates.

### Experience key benefits

Customers can now benefit from usability enhancements with search of review documents for multiple suppliers as well as take advantage of defining multiple review types based on business requirements.

### Solution area

SAP Ariba Supply Chain Collaboration and Quality Collaboration Add on.

### Implementation information

This feature is enabled for all customers with the applicable solutions but requires configuration.

### Prerequisites and Limitations

None

## Feature at a Glance

### Introducing: **Enhancements to quality review search filters and custom types**

The feature will add below enhancements to the existing quality review functionality offered to SAP Ariba Supply chain collaboration with Quality Add on Customers.

1. Ability to Search for QR documents for multiple suppliers in search criteria.
2. Ability to add custom review types.
3. Improvement in Legal hold functionality.

# Feature at a Glance

## Introducing: Enhancements to quality review search filters and custom types

### 1. Enable Supplier filter to accept multiple entries

The feature will now allow the buyers to search for QR documents for multiple suppliers. Earlier the search filter was restricted to only one supplier.

The screenshot displays the SAP Quality Review search interface. The top navigation bar includes links for HOME, INBOX, OUTBOX, QUALITY (highlighted), PLANNING, CATALOGS, SUPPLIER ENABLEMENT, ADMINISTRATION, REPORTS, UPLOAD/DOWNLOAD, and MORE... A sub-navigation bar shows Review, Inspection, and Notification. The main content area is titled 'Quality review' and contains a 'Search filters' section. The 'Supplier' filter is highlighted with a red box and contains three entries: 'LOB APJ SUPPLIER 9 - TEST', 'SK Enterprise', and 'LOB NALA SUPPLIER 1 - TEST'. Other filters include Customer location, Supplier batch, Customer batch, Product family, Show reviews by (Last updated, Due date, Closed date), Date range, Start date, End date, Review type, Review subtype, Review number, Review status, Keyword in subject, Your actions, and Priority. A 'Search' button and a 'Reset' button are located at the bottom right of the search filters section.

### 2. Ability to add custom review types

The feature now allows the buyer to load multiple quality review types and sub types based on the business scenario. Earlier the same was restricted to only four quality review types. New review types can be added referring the standard review type as an template.

The screenshot shows the 'Create quality review' form. The 'Subject\*' field contains 'General review'. Under the 'Details' section, the 'Customer\*' field is 'LOB APJ Buyer 1 - TEST', 'Customer location' is '3200 - Atlanta', and 'Review type\*' is set to 'Select'. A dropdown menu is open for 'Review type\*', showing a list of options: 'Select', 'Batch Review1', 'Change Request1', 'Customer Complaint1', 'General1', 'Batch Review2', and 'Change Request2'. A red box highlights this dropdown menu. At the bottom, there is a 'Comment' section with a text area containing 'Write your comment here.' and an 'S' icon.

The screenshot shows the 'Create quality review' form. The 'Subject\*' field contains 'General review'. Under the 'Details' section, the 'Customer\*' field is 'LOB APJ Buyer 1 - TEST', 'Customer location' is '3200 - Atlanta', and 'Review type\*' is set to 'General1'. A dropdown menu is open for 'Subtype', showing a list of options: 'Select', 'Investigation', 'Validation Documents', 'Shipping Schedules', 'APR', 'Training', and 'Audit Schedules'. A red box highlights this dropdown menu. Below the 'Details' section, there is a table for 'Impacted batches and parts' with one row containing 'Customer batch' and '1'. An 'Add line' button is visible at the bottom.

### 3. Improvement in Legal hold functionality

Admin buyers can now edit the status of the legal hold functionality, as applicable.

The screenshot displays the 'Review details' page in SAP. It features a navigation bar with a back arrow and an 'Edit' button. Below the navigation are two tabs: 'Details' (active) and 'History'. The main content area is divided into two sections. The top section is a table with columns: Subject, Created, Priority, Due date, and Status. The bottom section is a form with fields for Supplier, Customer location, Review type, Batch Review, Review no., Reference no., and Legal hold. A red box highlights the 'Legal hold' field, which currently shows 'No' and has an edit icon. A zoomed-in view of the dropdown menu for the 'Legal hold' field is shown to the right, with 'No' selected and 'Yes' as an alternative option.

Subject	Created	Priority	Due date	Status
CXX1	Sep 22, 2018	High	Sep 21, 2018	In process

  

Supplier	qi-r-supplier@sap.com	Review type	Batch Review1	Review no.	CXX1
Customer location		Line of business		Reference no.	
		Product family		Legal hold	No
