Introducing: Republishing denied catalog content documents

Customer challenge

Catalog content documents that have been denied during the CMS approval flow cannot be republished. This required the entire catalog content document to be resubmitted for approval. This was extremely time-consuming.

Meet that challenge with **SAP Ariba**

This feature is related to whether Catalog Approvals raised based on Approval Lookup feature in CMS.

When catalog approval requests are denied, the content document moves to the Approval Denied status.

This feature allows catalog content documents that were denied to be republished. A new version is created and rerouted for approval.

Experience key benefits

The new feature will allow customers to update the obsolete lookup definitions and republish the document which might be in a rejected state. This helps customers save time and improve efficiency by not requiring the entire catalog document to be submitted for Approval again.

Solution area

SAP Ariba Catalogs
SAP Ariba Buying
SAP Ariba Buying and Invoicing

Implementation information

This feature is “on” by default. No action is required to utilize this feature.

Prerequisites and Limitations

CMS is enabled as part of the Catalogs functionality
