Feature at a Glance

Ease of implementation  Low touch / simple
Geographic relevance  Global

Introducing: **Date and time validation on items to ship**

Customer challenge

Customers often want to control the ASN creation behavior with validations on what delivery schedules can be shipped for the suppliers. So far Ariba Network did not have rules to restrict suppliers from clubbing different delivery lines with different delivery dates/time stamps. The requirement becomes more critical in high volume JIT based manufacturing industries.

Meet that challenge with **SAP Ariba**

This feature enables suppliers to group and ship multiple ship notices from the Items to Ship page in Ariba Network, based on unique delivery dates.

Experience key benefits

The feature will benefit buyers to define controls on how suppliers can ship the materials by complying to requested delivery dates.

Solution area

SAP Ariba Commerce Automation
SAP Ariba Supply Chain Collaboration

Implementation information

This feature is automatically on for all customers with the applicable solutions but requires customer configuration.

Prerequisites and Limitations

None

Feature at a Glance

Introducing: **Date and time validation on items to ship**

- In order to allow suppliers to efficiently search for POs and ensure business process compliance for order fulfilment, this Items to Ship enhancement for unique date validation will help customers control the shipment creation for suppliers.
- The feature is available for all network customers.
- New business rule is introduced. Buyers can activate the business rule and this will help validate the shipment creation for the suppliers/groups.
