Feature at a Glance
Simplified Excel uploads for creating or updating event line items

Ashley Vandenhoek, SAP Ariba
Target GA: February, 2019

THE BEST RUN **SAP**

Feature at a Glance

Introducing: **Simplified Excel uploads for creating or updating event line items**

Customer challenge

The current Excel Upload for event creation has a complex file structure and is prone to errors due to input errors in the excel file.

Meet that challenge with
SAP Ariba

This feature enables you to quickly add sections and line items, including material master data items, to a sourcing event from a Microsoft Excel document. You can specify term values for line items, such as quantity and price. You can also specify values for custom terms.

Experience key benefits

This feature provides a new Simplified Excel Import operation that replaces all content in an event with the contents from an Excel file. The Simplified Excel Import operation includes a step to export a template with the current contents of your event. The template contains just 1 worksheet to be completed.
