Introducing: Enhanced Product Sourcing UI Tables for Material and BOM Views

Customer challenge

Users of Product Sourcing today

- Face **considerable delays** to load materials while searching for long list of materials.
- Have to **wait** to see all 24 months of data while there is more significant number of materials in the material view table.
- Have **no easy** way to update estimate prices, AML splits & estimated lead times in the UI.

Meet that challenge with SAP Ariba

SAP Ariba introduces intuitive new UI for Product Sourcing that considerably enhances performance through a faster and simpler solution. Product Sourcing users can now:

- See enhanced **UI loading performance** and **response time**.
- Ability to select multiple materials and update estimated prices, AML splits & estimated lead times by providing the ability to copy the inputs.
- Ability to see pinning info and RFx Term for the selected materials.

Experience key benefits

- Simpler, faster performance with intuitive new UI.
- Enhanced **user experience**.
- **Reduce time spent** by users on operational activity through faster UI loads and easier way to update inputs.

Solution area

SAP Ariba Strategic Sourcing Suite/Product Sourcing

Implementation information

The features will be enabled by default for the new deployments.
However, existing customer need to contact customer support to have the feature enabled.

Prerequisites and Limitations

Members of *Material Viewer* group see information about materials owned and members of *Material Manager* group see information on BOMs.
