Introducing: Enhanced envelope bidding with improved team control for access

Customer challenge

There is currently no systematic mechanism for controlling access to envelopes in a multi envelope event.

Meet that challenge with SAP Ariba

This feature introduces a new template rule, "**Will teams control envelope access?**" When it is set to **Yes**, authorized group members first open envelopes, then select the participants who will advance to the next envelope opening. Only authorized members of the next envelope will see the response of the suppliers selected in the first envelope.

Experience key benefits

This feature will ensure a fair and complaint multi envelope event.

Solution area

SAP Ariba Sourcing

Implementation information

This feature is automatically on for all customers with the applicable solutions and is ready for immediate use.

Prerequisites and Limitations

None
