Feature at a Glance

Introducing: SAP Ariba Procurement mobile application

Customer challenge

The existing SAP Ariba mobile application for buyers, available on both iOS and Android platforms has functional and technical challenges, which limits its usage.

Meet that challenge with SAP Ariba

The all-new SAP Ariba Procurement mobile application, supported for both iOS and Android platforms, enables users to purchase items from company catalogs, track requisitions and approve requisitions.

The application supports single sign-on (SSO).

The new application will co-exist with the existing mobile application as it gains feature parity.

Although the new application does not perform all the functions in the existing SAP Ariba mobile application, it is envisioned to be SAP Ariba's go-forward mobile application for all Procurement functions.

Experience key benefits

The new SAP Ariba Procurement mobile application is primarily built for the corporate casual user persona.

The new application offers the following key functions:

- Catalogs based purchases
- Requisition tracking
- Requisition approval

Solution area

The Mobile application is available for customers using the SAP Ariba Buying or SAP Ariba Buying and Invoicing solutions.

Implementation information

The SAP Ariba Procurement mobile application is available as a free download on both Apple app store and Google Play store.

Prerequisites and Restrictions

The application is currently meant to work only with the phone form factor.

Buyer administrators must invite and activate users to start using the application.

Mobile Device Management (MDM) platforms are not supported.

Feature at a Glance

Introducing: **SAP Ariba Procurement mobile application**

Detailed feature information

- The SAP Ariba Procurement mobile application supports the following operating systems:
  - iOS versions 10.x and later
  - Android 8.0 and later
  - Support for Apple iOS and Android devices will be available globally
- The application is developed exclusively for the ‘Phone’ form factor. It is not supported on tablets, smart wearables, smart televisions and other smart devices.
- This new mobile application will continue to co-exist with the existing SAP Ariba BUYER mobile application.
- It is recommended that customers using the existing Ariba Buyer Mobile application for Shopping cart purchases and approvals start evaluating and using the same functionality with the improved user interface available in this new (SAP Ariba Procurement) mobile application.
- Customers using functionality related to managing sourcing and contract management tasks through the existing SAP Ariba Buyer Mobile application should continue to use the same. The new application currently does NOT support any features related to managing sourcing and contracts tasks.
- A buyer administrator must invite buying users via the SAP Ariba Buying application to start using the new application. This process is shown in the following slides. Once a user downloads the mobile application, certain onboarding steps must be followed to start using it. These are shown in the subsequent slides.

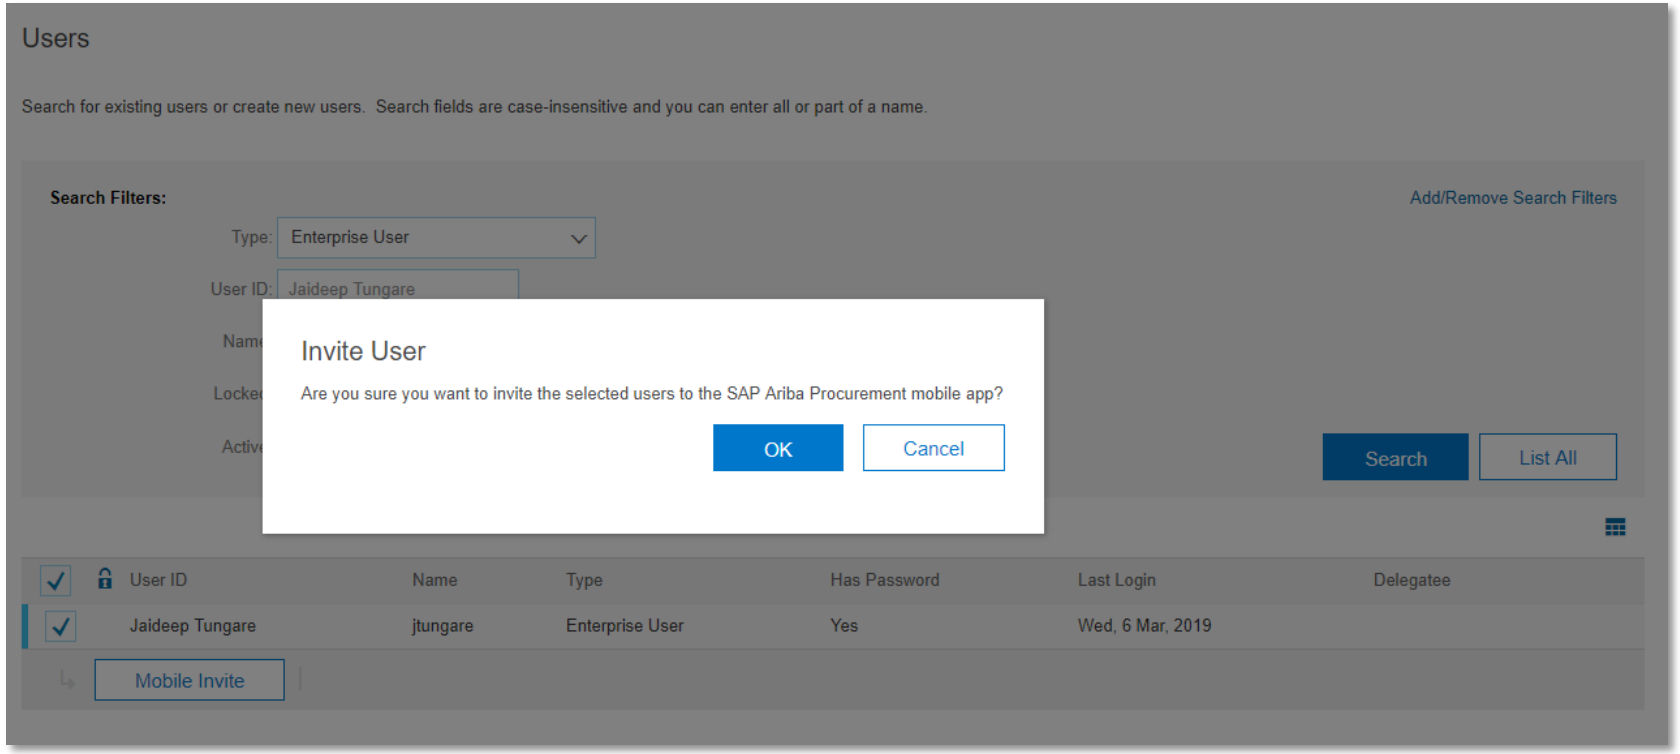
Buyer admin tasks to activate a user for the new mobile application

- Buyer administrators must perform the following steps to invite and activate a user for the new SAP Ariba Procurement mobile application
- Go to Core Administration → Mobile app user Manager → Other users
- Select the user who needs to be activated and click ‘Mobile Invite’



- Once the invitation is sent, the user will receive an email (as shown in the next slide) with information containing details to download the application as well as the Site ID (Realm) and Data center location to start using the application.

Subject: SAP Ariba Procurement app onboarding details

Welcome to the SAP Ariba Procurement app!

Here's how you can start buying from your organization's catalog, track orders, and approve requests directly from your mobile device:

1. Install the app on your mobile device.

   Download on the App Store | GET IT ON Google Play

2. Open the app, and sign in using one of the following options:
   - **User Credentials**
     - SAP Ariba site: *<site>*
     - Site location: *<location>*
     - If your organization has single sign-on set up, sign in with your organization's username and password.
       Otherwise, use your SAP Ariba username and password.
   - **Activation Code**
     - Enter the activation code generated on your mobile app into the SAP Ariba Procurement web app.

Best,
The SAP Ariba Procurement Mobile App team
