SAP Ariba ⋀⋀

Feature at a Glance
Allow use of conditions to control the visibility of category attribute hierarchy questions to suppliers

Content Owner Umesh Verma, SAP Ariba
Target GA: November, 2019

THE BEST RUN **SAP**

Feature at a Glance

Introducing: **Allow use of conditions to control the visibility of category attribute hierarchy questions to suppliers**

Customer challenge

Currently customers cannot control the visibility of category attribute hierarchy questions to suppliers in sourcing events.

Meet that challenge with
SAP Ariba

Customers can now use conditions to control the visibility of category attribute hierarchy questions to suppliers in sourcing events.

Experience key benefits

Provides improved usability since customer can now control as to which specific suppliers can see what specific question applicable to them. For example, one can create a question that applies only to suppliers that are in a specific region.

Solution area

SAP Ariba Strategic Sourcing Suite

Implementation information

This feature is **automatically on** for all customers with the applicable solutions and is ready for immediate use.

Prerequisites and Restrictions

Category attribute hierarchy must be enabled in your site

Feature at a Glance

Introducing: **Allow use of conditions to control the visibility of category attribute hierarchy questions to suppliers**

Detailed feature information

- A Visibility Condition field was added to the create question page that is accessed from Manage > Administration > Category Attribute Manager

- A new tile called Conditions was added. The number of conditions created is shown on the Conditions tile. You can click on the tile to search for conditions.
