Introducing: PIR Integration for BOM Quote

Ease of implementation

Geographic relevance

some complexity

Global

Customer challenge

- Last quarter a predecessor feature was introduced to allow product sourcing users request a quote on an entire BOM
- Users still see issues in some use cases where they would first expect the system to calculate BOM cost roll-up on the top material and then trigger a PIR on the rolled-up cost

Meet that challenge with SAP Ariba

- SAP Ariba addresses this specific customer challenge through the current feature
- The feature provides an ability for users in product sourcing to configure the PIR on a rolled up BOM cost

Experience key benefits

Enhanced product usability

Solution area

SAP Ariba Strategic Sourcing Suite

Implementation information

To have this feature enabled, please have your Designated Support Contact (DSC) submit a **Service Request (SR)**.

Prerequisites and Restrictions

The site must be configured for product sourcing
Users need to be associated with Material Manager group
