Introducing: Deleting catalogs that are in the New to Buyer status

Customer challenge

Currently the delete of catalog documents in catalogs and CMS is tightly controlled via certain states in which the document is residing. Manual deletion of the document in CMS does not synchronize the same action in Catalog Buyer for the related document.

Meet that challenge with SAP Ariba

With this feature, catalog managers can delete catalogs that are in the “New to Buyer” status. These catalogs can be deleted only if there aren't any associated catalog content documents in the content management system (CMS), or if they are in New, Parsed, Fatal Error, Validation Error, Validated, Deactivated, or Completed statuses.

Experience key benefits

This results in ensuring that no ghost documents are created in either CMS or Catalog buyer workspaces.

Solution area

SAP Ariba Catalogs
SAP Ariba Buying
SAP Ariba Buying and Invoicing

Implementation information

This feature is **automatically on** for all customers with the applicable solutions and is ready for immediate use.

Prerequisites and Restrictions

Your site must be enabled for managing catalogs using the content management system (CMS).
