Target GA: February, 2020

THE BEST RUN SAP

Feature at a Glance

Introducing: Transfer of ship-to address from guided buying requests to SAP S/4HANA Cloud

Customer challenge

Currently it is not possible to transfer the Ship-to address information from guided buying requests to S/4HANA requisitions.

Meet that challenge with
SAP Ariba

This feature enables the sending of standard or nonstandard ship-to address in guided buying requests to SAP S/4HANA Cloud purchase requisitions

Experience key benefits

Ship-to address information in requests created via guided buying can always be in sync with requisition created in S/4HANA.

Solution area

Guided buying capability with the following solutions:
- SAP Ariba Buying
- SAP Ariba Buying and Invoicing

Implementation information

To have this feature enabled, please have your Designated Support Contact (DSC) submit a **Service Request (SR)**. SAP Ariba support will set the above parameters.

Prerequisites and Restrictions

- The Application.Common.EnablePlantBasedDefaultingForSAP parameter and the Application.Procure.AllowAdhocShipToAddress parameter must be enabled for your site.
- Applicable to 2NV and 3EN S/4HANA Cloud integration scenarios with guided buying.
- Plant data must be imported and mapped to purchase organizations.
