SAP Ariba

Feature at a Glance
Prevent budget reversal when imported requisitions are edited

Johan Holm, Solution Manager SAP Ariba
Target GA: February, 2020

THE BEST RUN **SAP**

Feature at a Glance

Introducing: **Prevent budget reversal when imported requisitions are edited**

Customer challenge

Previously in sites enabled for budget checking in external systems, when users edited requisitions imported from external systems, the requisitions were withdrawn and budgets reserved for those requisitions in the external system were reverted to availability.

Meet that challenge with
SAP Ariba

With this feature, sites can be configured to prevent withdrawal of imported requisitions and reversal of the associated budgets in the external system when users edit those requisitions in the buying solution.

Experience key benefits

Now customers can prohibit budget reversal in the ERP when imported requisitions are edited.

Solution area

- SAP Ariba Buying
- SAP Ariba Buying and Invoicing

Implementation information

To have this feature enabled, please have your Designated Support Contact (DSC) submit a **Service Request (SR)**.

Prerequisites and Restrictions

- This feature is only applicable for imported requisitions.
- This feature is only applicable for sites configured for budget checking in external systems.
