Introducing: **Remove users in engagement and issue assignee project groups using project team management**

Customer challenge

Previously users could only add individual users in the manage team popups. Now users can add and remove users and global user groups from the engagement page as well as the issue page.

Meet that challenge with SAP Ariba

This feature introduces more flexibility for managing control-based engagement risk assessment project teams without requiring permission to access the advanced view of the project, including removing team members, adding global user groups, and removing global user groups from the Project Owners project group.

Experience key benefits

Individual users and global user groups can now be removed from engagement request teams, and issue assignees using the manage team popups. This prevents unauthorized access to project workspaces and tasks.

Solution area

SAP Ariba Supplier Risk

Implementation information

This feature is ready for immediate use for all customers with the applicable solutions but requires **customer enablement** steps.

Prerequisites and Restrictions

Control-based supplier engagement risk assessment projects must be enabled in your site.

See next page for additional enablement steps and prerequisites.

Feature at a Glance

Introducing: **Remove users in engagement and issue assignee project groups using project team management**

Additional enablement steps and prerequisites

To enable changing a project owner from the engagement page, a member of the Customer Administrator group in your organization must enable the self-service site configuration parameter **Application.SR.Engagement.ChangeOwnerAction** in your site. For information on working with self-service configuration parameters, see the Common Data Import and Administration Guide.

To enable adding or removing team members or global user groups in the Project Owner project group from the engagement page, a member of the Customer Administrator group in your organization must enable the self-service site configuration parameter **Application.SR.Engagement.ManageProjectTeamAction**.

To add or remove a team member or global user group in the Project Owner project group of an engagement risk assessment project from the engagement page, you must have permission to view it.

To add the users added to the engagement risk assessment Project Owner group automatically to the Assignee project group in issue management projects associated with the engagement, your issue management template must use the dedicated issue assignee group feature

1: **Identify** the users/ user groups that are already selected to be part of the ER project or Issue assignee team. These will be rows with checkbox is already checked

2: **Uncheck** the checkbox against the users to be removed

3: Click **OK** to confirm removal of these users from the ER project or Issue assignee team

NOTE: You cannot remove yourself (signed in user) or the ER Owner user from this action. Checkbox will be greyed out.

To change the ER owner, use the Change owner action.
