Feature at a Glance
Quote expiration and reusability

Jaideep Tungare, SAP Ariba
Target GA: May, 2020

THE BEST RUN **SAP**

Feature at a Glance

Introducing: **Quote expiration and reusability**

Customer challenge

Price quotes provided by suppliers through an RFQ in guided buying had no expiration date. Therefore, a guided buying user could get a quote and use it in a request even after it had become invalid. Also the quote could be used only for one request.

This was a challenge, which resulted in issues around order fulfillment and invoicing.

Meet that challenge with
SAP Ariba

This feature allows suppliers to submit quotes in response to guided buying RFQs by specifying dates when the quotes expire and indicating whether they can be used in multiple requests.

New terms in the Guided Buying Quote template are available that allow suppliers to specify this information.

Experience key benefits

Suppliers now have better control over when a quote is valid, resulting in improved fulfillment of orders and fewer invoicing issues.

Solution area

SAP Ariba Buying with guided buying capability
SAP Ariba Buying and Invoicing with guided buying capability

Implementation information

This feature is automatically on for all customers with the applicable solutions but requires **customer configuration**.

'Expiration date' and 'reusability' terms need to configured in Guided buying quote template in SAP Ariba sourcing need

Prerequisites and Restrictions

Guided buying template in SAP Ariba sourcing must be configured correctly to allow for suppliers providing an expiration date and making the quote reusable.
