Introducing: SAP Ariba Procurement mobile app 2.0

Ease of implementation  High touch
Geographic relevance  Global

Customer challenge

The first version of the SAP Ariba Procurement mobile app, which was released in 2019, did not fully conform with SAP's FIORI UI standards.

Some key capabilities such as push notifications for the app and management of sourcing and contracts tasks were missing.

As a result users of SAP Ariba Sourcing / Contracts customers were unable to get value from the first version of the mobile app.

Solution area

SAP Ariba Buying
SAP Ariba Buying and Invoicing
SAP Ariba Sourcing
SAP Ariba Contracts

Meet that challenge with SAP Ariba

This version introduces the following key changes:

- Complete redesign of all screens in the app. This includes screens that catered to the catalogs shopping cart and requisition approval functionality, which was released in 2019.
- Push notifications related to any new requests or tasks associated with the relevant solutions.
- Management and completion of sourcing and contract tasks.

Implementation information

This feature is **automatically on** for all customers with the applicable solutions and is ready for immediate use.

Experience key benefits

Simple, easy to use consumer-grade user interface should enhance the adoption of the app among its user base.

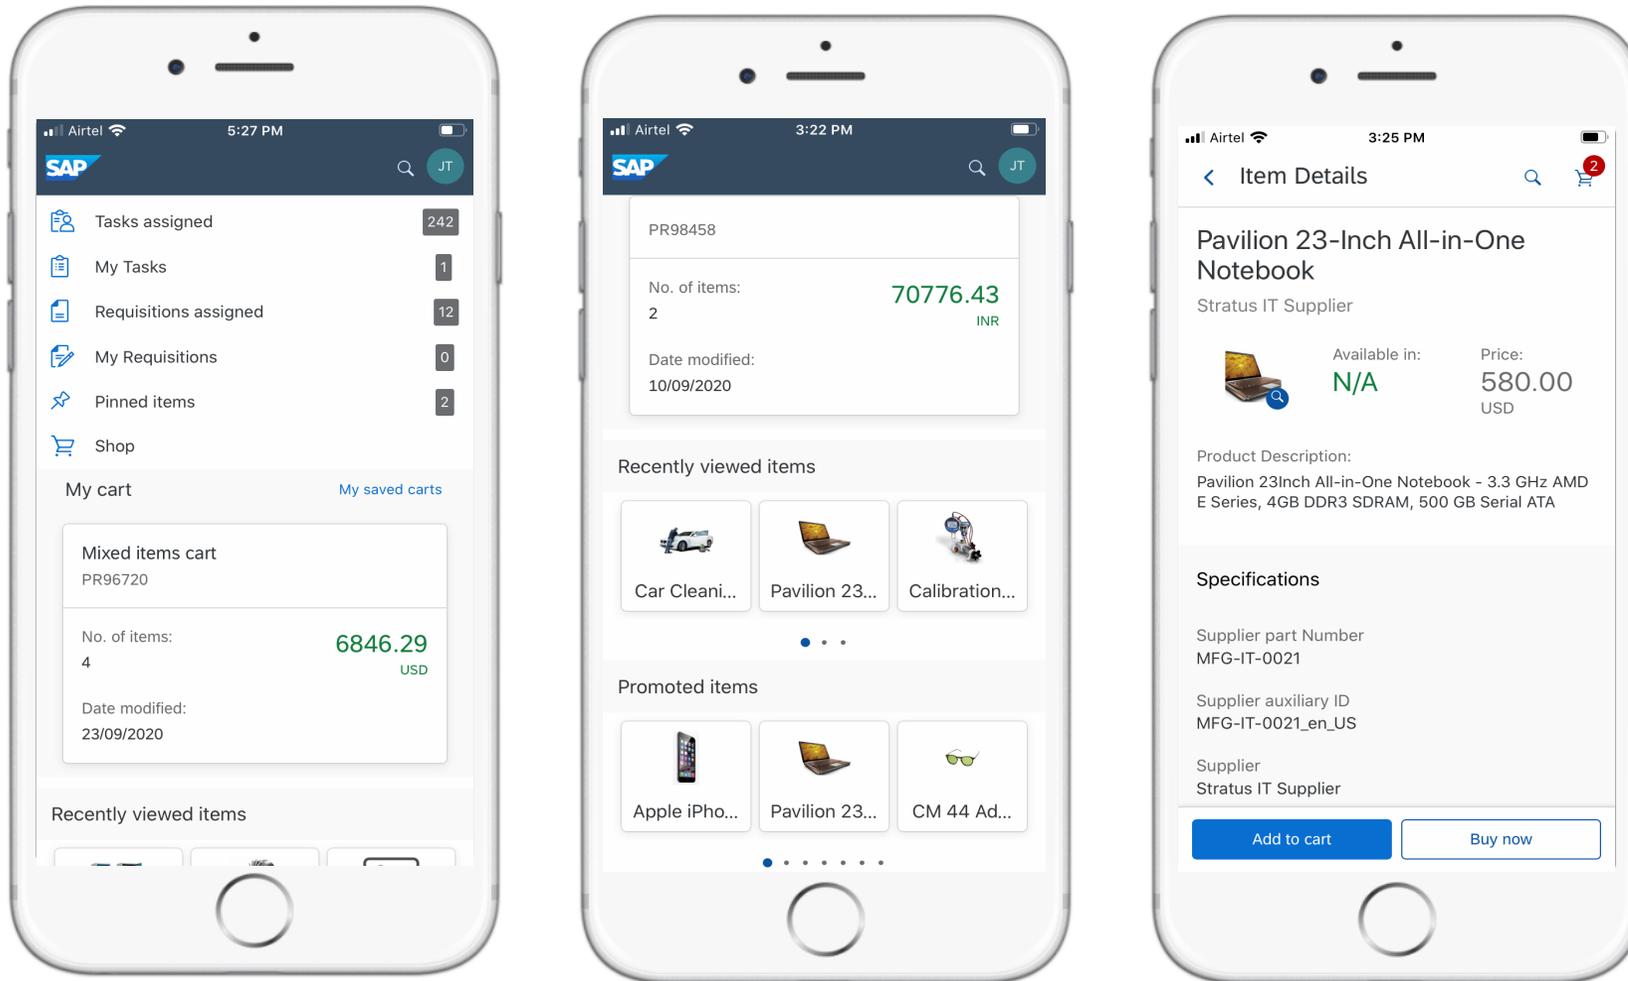

Users should benefit from the ability to manage tasks and receive push notifications while on the move.

Prerequisites and Restrictions

- SAP Ariba Procurement mobile app cannot be used on devices that are not passcode protected or are jailbroken.
- User needs to download the new SAP Ariba Procurement mobile app version and be assigned to the 'Ariba Mobile User' group in the SAP Ariba Procurement solutions.
- SAP Ariba Strategic Sourcing solution users must belong to the 'Mobile shopping' group to use the shopping cart feature.
- Push notification currently only supports sourcing and contract tasks, not requisitions.

Feature at a Glance

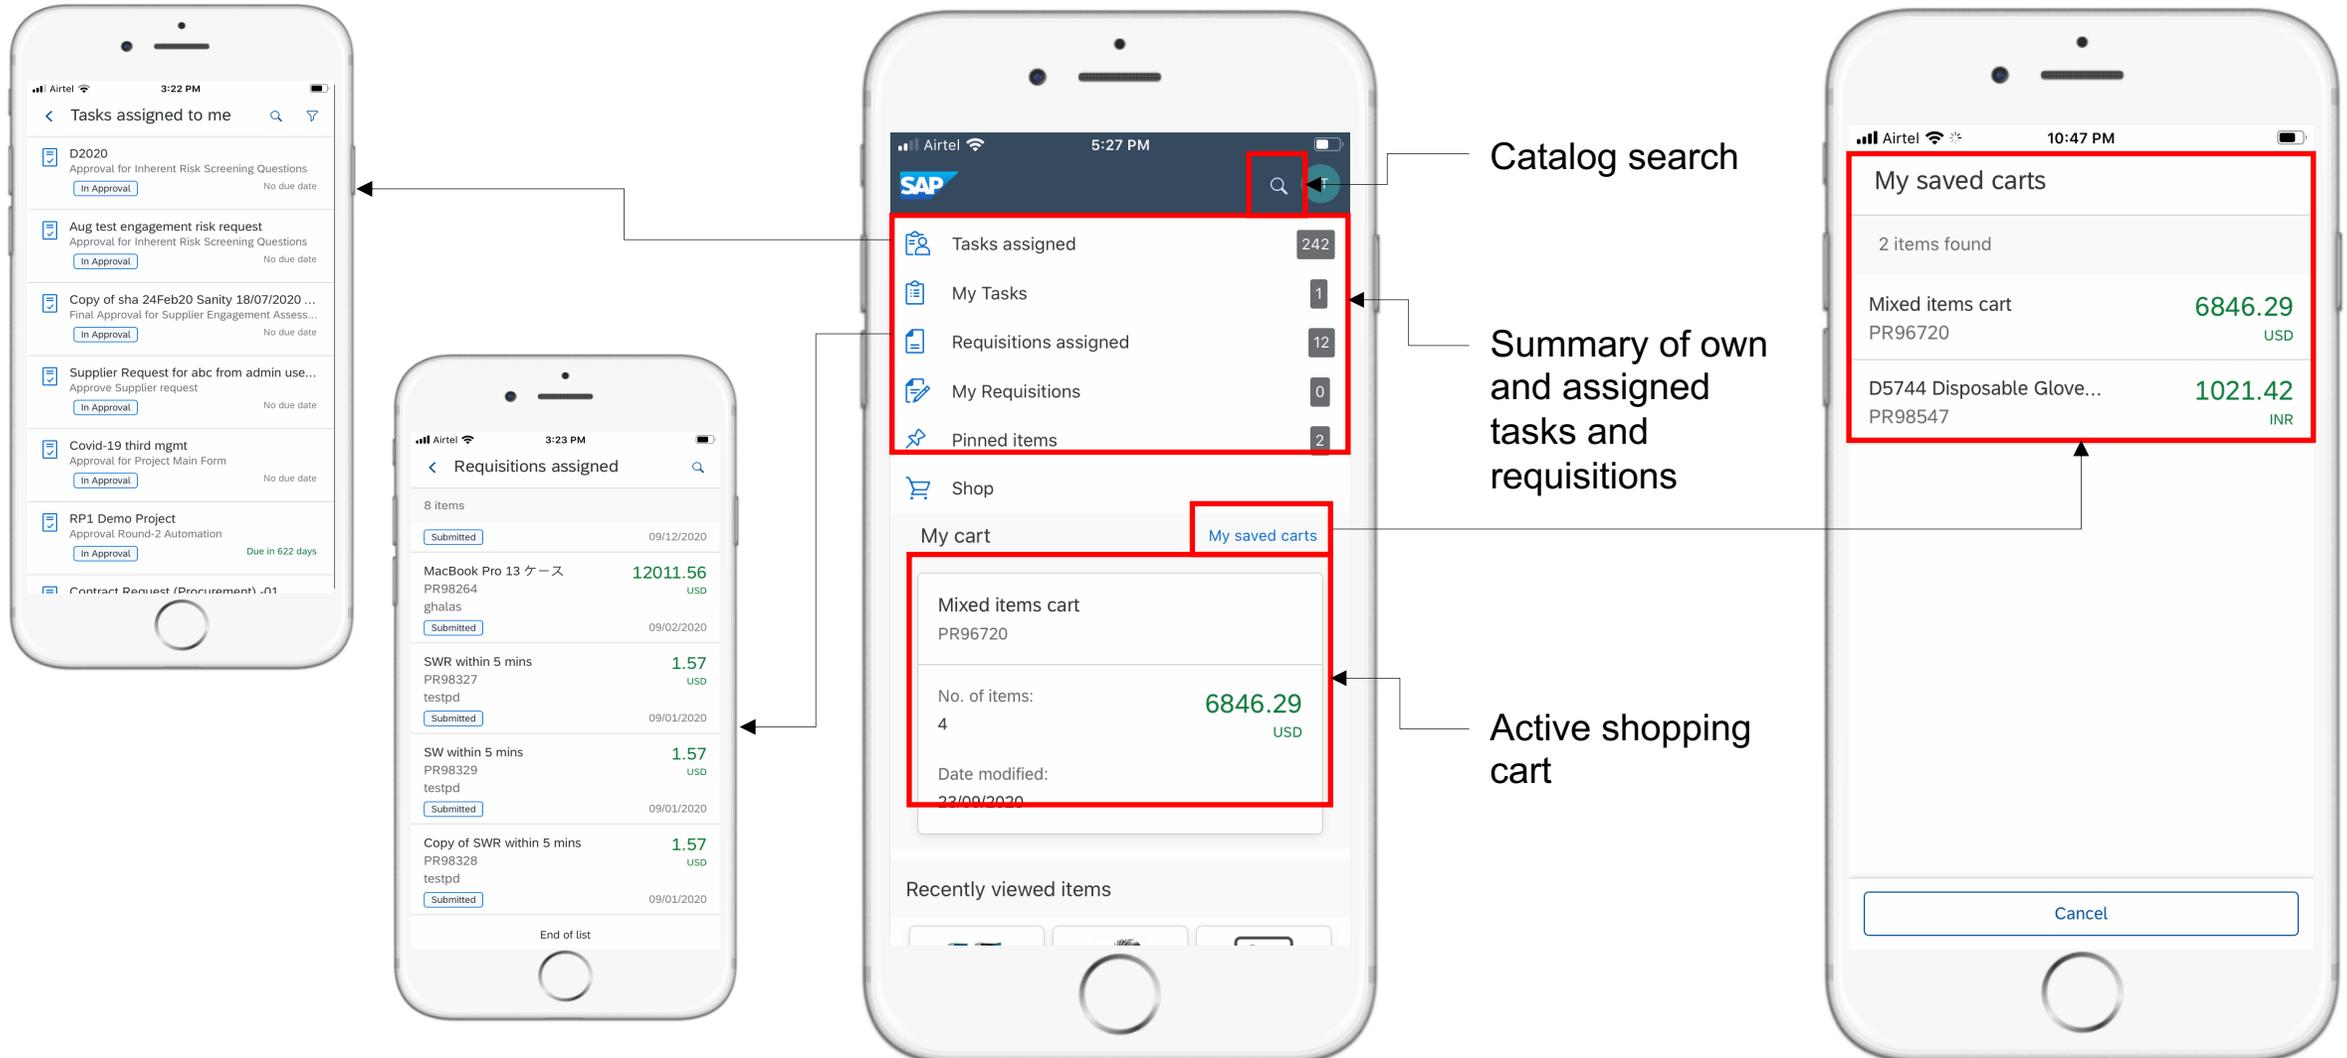

Introducing: SAP Ariba Procurement mobile app 2.0

- Brand new user interface for the mobile app. This will replace the first version of user interface for the SAP Ariba Procurement mobile app, launched in Aug 2019.
- Download the new version from the App store or Google Play store to see the new user interface.

Task Management

- Sourcing and Contracts managers responsible for their respective projects can do task management and task completion via the mobile app.
- User can pin tasks in the mobile app and complete them later in the web application.
- Push notifications for tasks*.

* Currently push notification only supports sourcing and contract tasks, not requisitions.
