Feature at a Glance

Introducing: Search results all on one page

Ease of implementation  Low-touch / simple
Geographic relevance  Global

Customer challenge

Some customers (implementation before 2018) are still using the tab design in guided buying to display the search results where catalog items and spot buy items appear on two separate tabs.

Guided buying now provides an even better search experience by displaying search results on a single page. It divides the returned results into separate carousels (sections) for each buying channel, such as catalog items, spot buy items and forms.

Meet that challenge with SAP Ariba

SAP Ariba has made changes to the user interface to enable search results on a single page. There are now carousels to display the returned search results for the following categories:

1. Catalog items
2. Spot buy items
3. Preferred suppliers
4. Forms (RFQ forms, custom forms)
5. Landing pages (internal and external sites)
6. Ad hoc requests

Experience key benefits

The improvement enables a better search experience for users. They can now see the search results returned in one page, without having to jump to another page to see items from other categories.

Solution area

- SAP Ariba Buying with guided buying capability
- SAP Ariba Buying and Invoicing with guided buying capability

Implementation information

This feature is **automatically** on for all customers with the applicable solutions and is ready for immediate use.

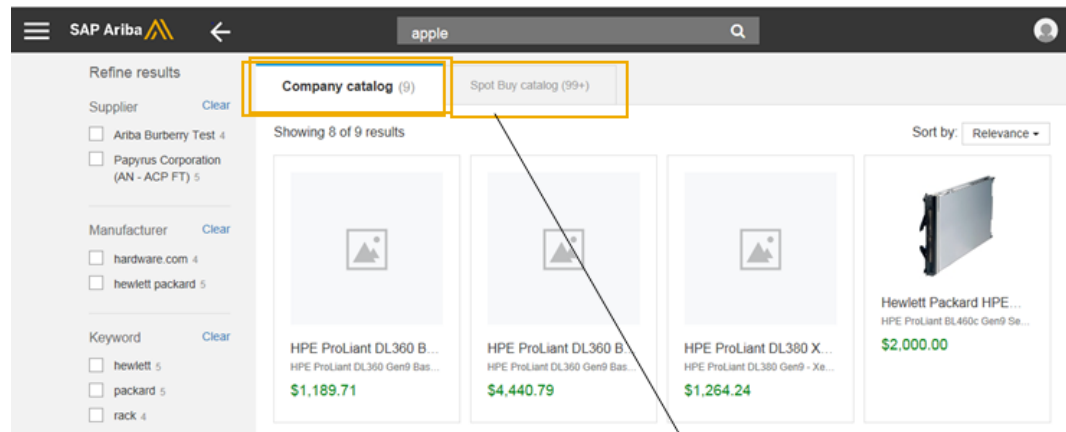

Prerequisites and Restrictions

None
