SAP Business Network

Supplier System Administration Process Guide

Supply Chain Collaboration

Version 1.0 - 2024

© 2024 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

- The System Administration process guide is generic and provides information about the SAP Business Network for System Administrators
- The System Administrator ensures that the information about the business is current and correct
- The System Administrator is the contact point for SAP Business Network update emails
- The System Administrator is the ONLY user who can create, update permissions and grant access to the SAP Business Network to users
- All screenshots and examples contained within Ariba process guides are taken from SAP Business Network Test Accounts. All documents and the content within the documents are fabrications and in no way reflect any past, current or future documents and any similarities are pure coincidence.
- As your Business System Administrator you can create users, assign permissions and assist users with login information
- Permissions allow access to specific sections of the SAP Business Network, if there is a section that you require contact you system Administrator, refer to Contact System Administrator
- For Users to access the Test account they must have a different login created from within the test account a user cannot jump from a production to a test account without logging out of one and logging into another
- The Supplier Information Portal can be accessed via the Help Centre
- Not all tabs may be visible as Buyers may not have some tabs and processes in scope

Getting Ready to Transact with your Buyer – Initial Process

New Buyer Account Flow

- This is a high level representation to the process to create an SAP Business Network account in the SAP Business Network, there may be variations, however the setup processes in the SAP Business Network are the minimum requirements for all Suppliers
- Links take you directly to the required process

Your Buyer will advises they will use SAP Business Network – or the SAP Ariba Proposals and Questionnaires

May send a Project Notification Letter or other communication

An invitation to create a relationship between you and your Buyer will be sent

This can be in the form of:

Trading Relationship Request

Suppliers already transacting with other Buyers using the SAP Business Network should consider using the **Existing Account** however

Suppliers may also elect to create a **New Account**

The Suppliers System Administrator will receive an **email**

After logging in must complete the Company Profile Information

Complete the **Electronic Order Routing** requirements

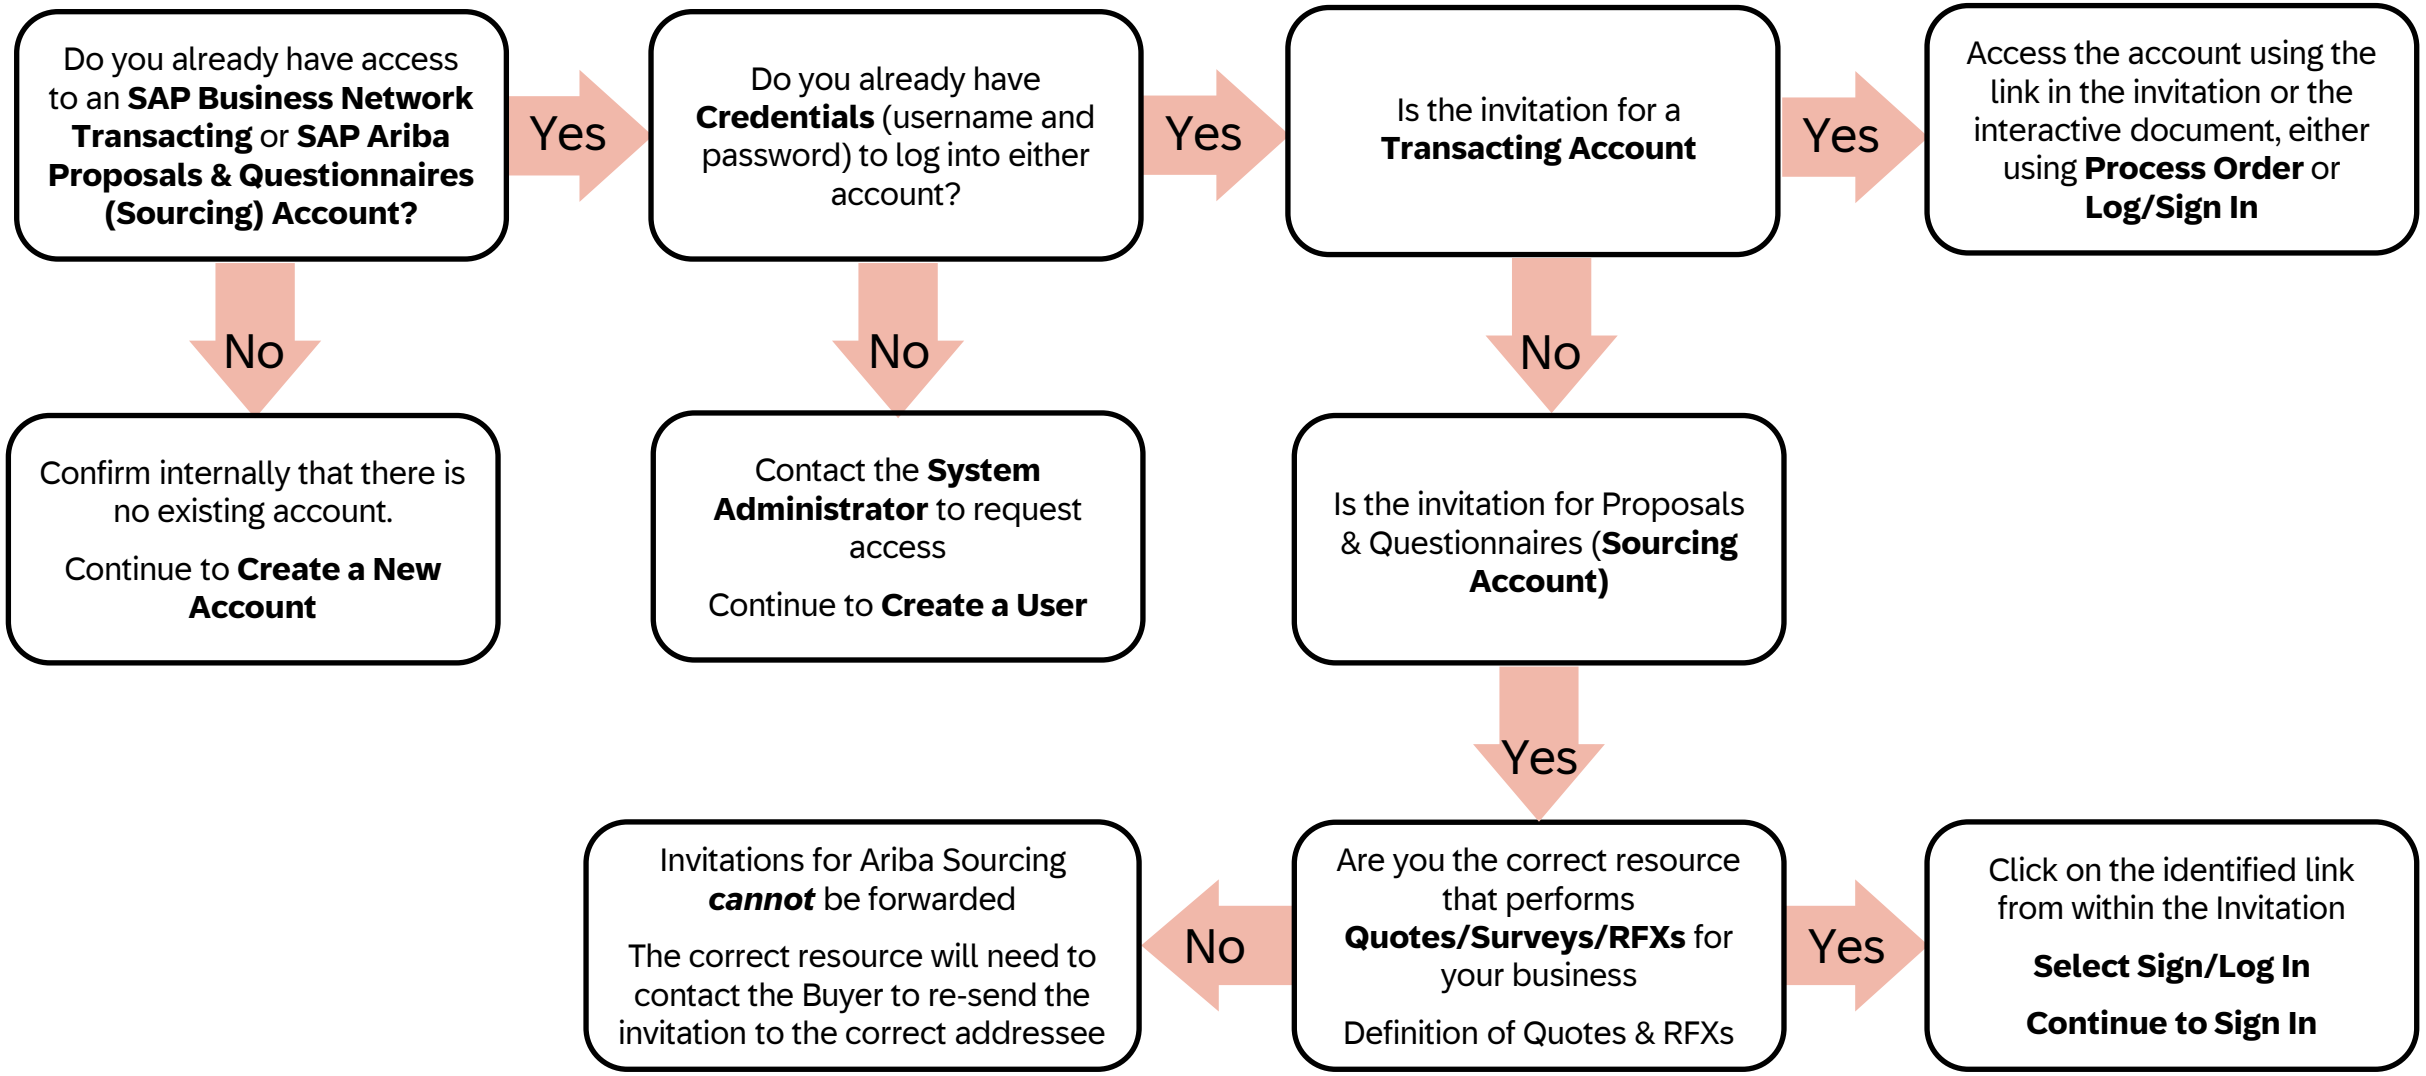
Complete the **Electronic Invoicing Routing** Requirements

Create a Test Account (if required for integration or Catalog testing)

Create Roles, assign permissions and create Users

Accepting an Invitation to Join SAP Business Network

Invitations from a Buyer Flow



Information

- Creating a transacting relationship from a buyer-branded trading Relationship Request (TRR) letter via email
- Ensure you review and accept the Terms of Use (this provides information about any Subscription or Transaction fees)
- Ensure you understand and accept the Privacy Policy
- A Supplier can choose to create a new SAP Business Network Account or use an existing account
- Using an existing account reduces the number of logins
- The SAP Business Network Identification number (ANID) is the unique identifier for each SAP Business Network (SAP Business Network Account)
- Ensure that the correct person actions any invitations to transact via the SAP Business Network noting that the person who accepts the invitation becomes the System Administrator
- Click on the question mark in the top right-hand corner to activate the Help Options Pane to get access to different levels of help
- Passwords must contain a minimum of 8 characters including upper and lower case, numeric digits and special characters
- Always access new invitations or interactive documents from within the email sent to you from the Buyer

The Trading Relationship Request (TRR) Invite

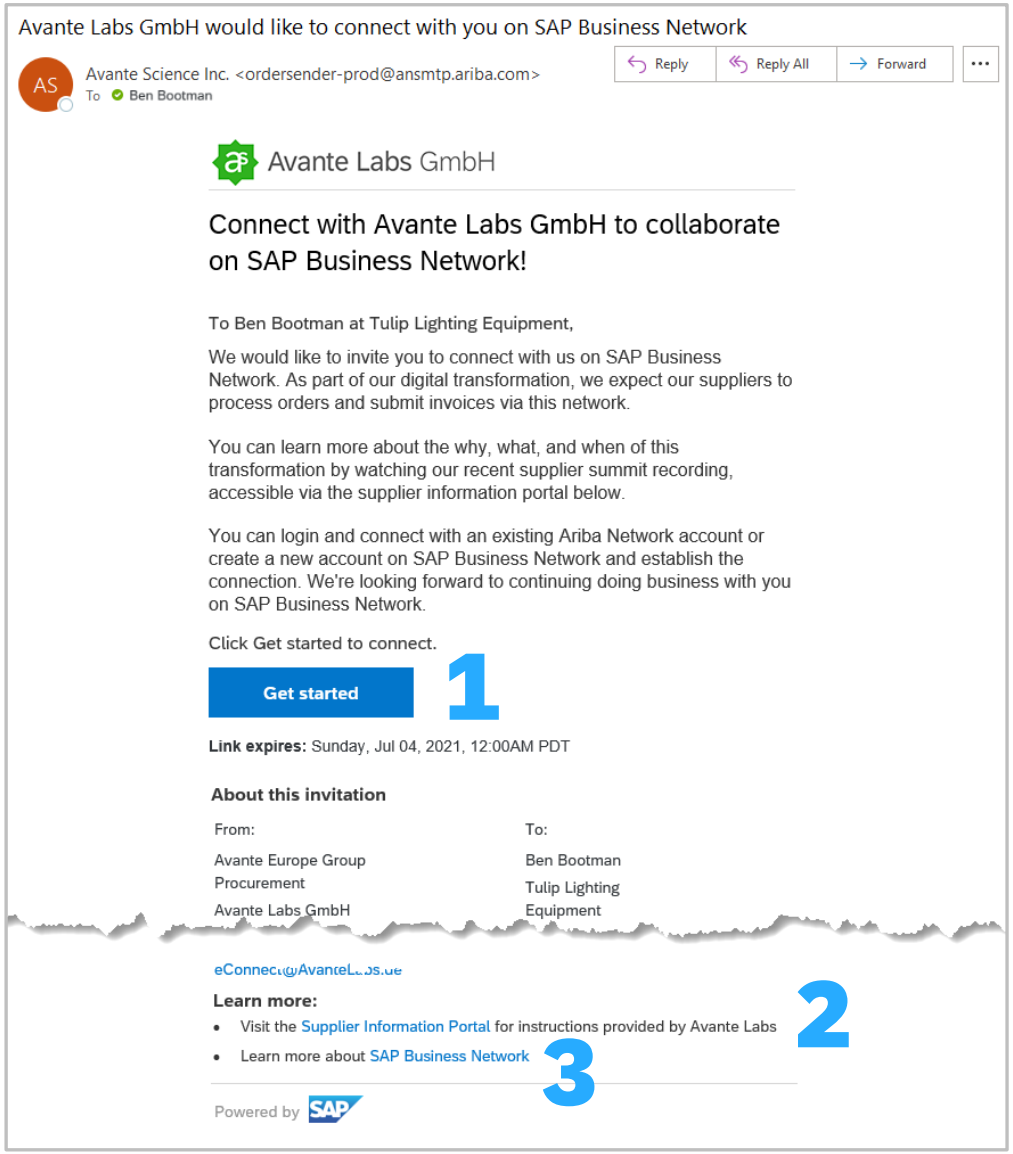
Your Buyer has decided to transact with their suppliers using the SAP Business Network and has sent you a Trading Relationship Request (TRR)

1. **Get Started** button provides access to a form

2. A link to the **Supplier Information Portal** (SIP) for the Buyer is shown on the invitation which provides access to process and training materials

3. **SAP Business Network** provides information about SAP Business Network

Note: All items in blue can be selected to take users to different screens, websites or information that the Buyer wishes to share



Accepting the Transacting Relationships Request (TRR) – Get Started

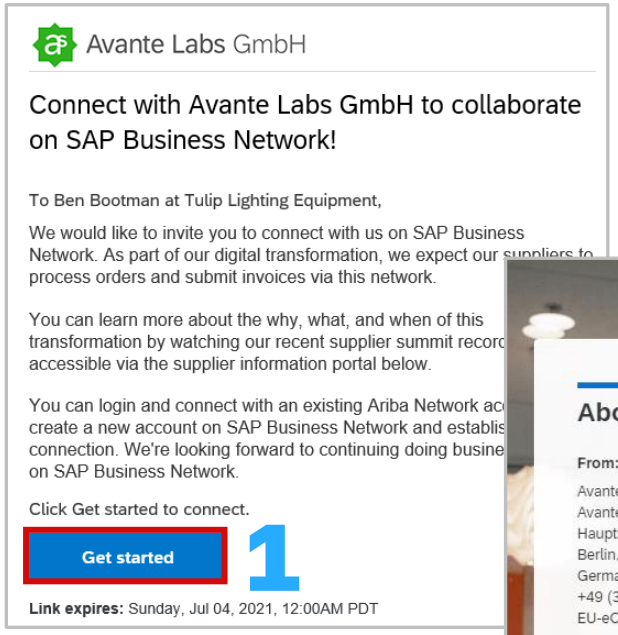
Ensure you are the required person to accept the relationship from your Buyer

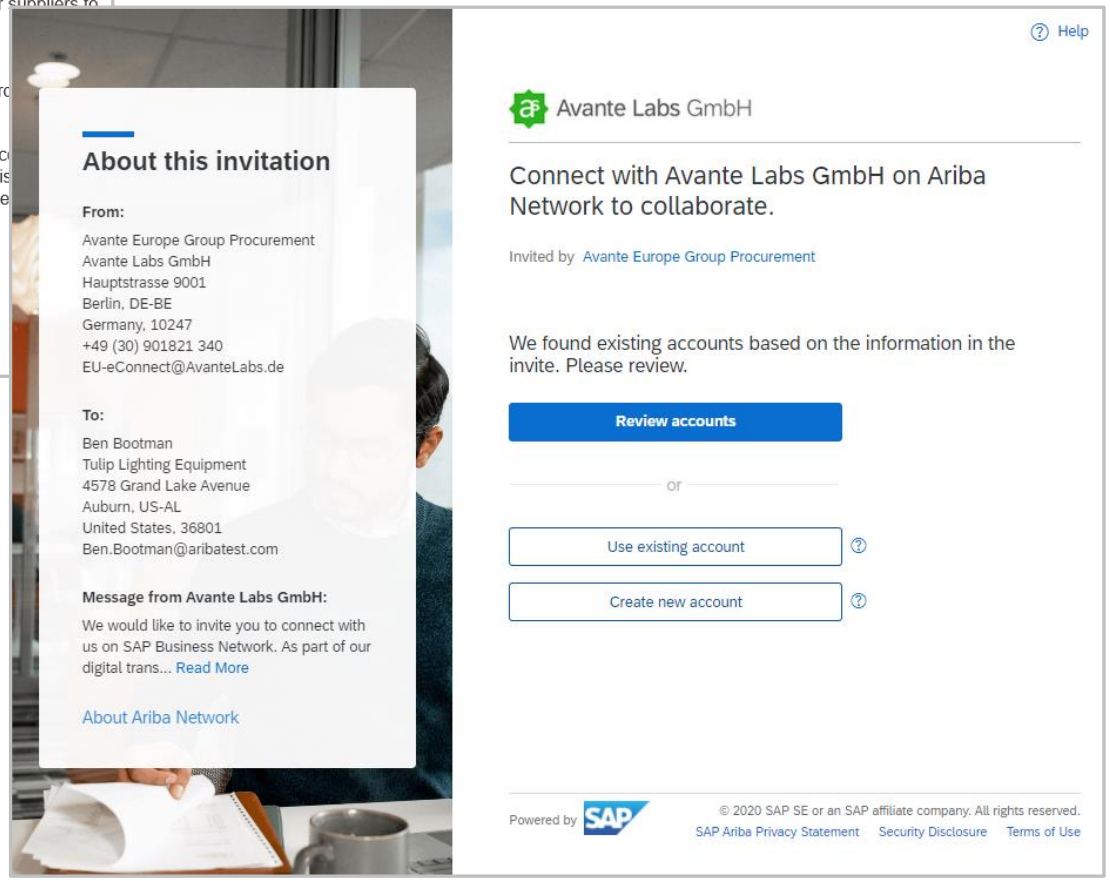
The person who accepts the relationship automatically becomes the business SAP Business Network System Administrator

With the TRR email open

1. Click on **Get Started**

- About this invitation panel – displays content such as the **From:** and **To:**, a **message from your Buyer** and a **Read More** link for more information from your Buyer and **About SAP Business Network** link taking users to an external website
- **Review Accounts** – Suppliers should review accounts to determine whether an account already exists for this Buyer or to identify whether they can use an existing account.
- **Use Existing Account** – As the System Administrator you have identified an existing account, using an existing account reduces the need for multiple log ins
- **Create New Account** - Creation of a new account to transact with the Buyer





Review Account Information – Duplicate Account Process

Review Accounts allows suppliers to identify they already have an SAP Business Network account, using an existing account reduces the number of logins and accounts that need to be maintained.

With the invitation from you Buyer displayed:

1. Click on **Get Started**
2. Where the **Review account** button is activated, Click on Review accounts

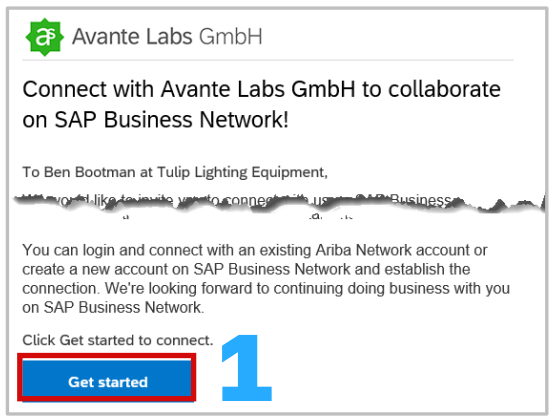
❖ **Note:** If the Review accounts button is not activated it indicates there are no other accounts associated to the business email domain

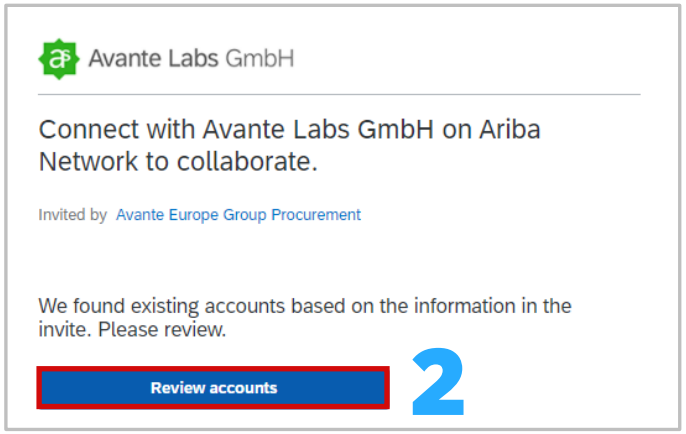
❖ The Review matched accounts screen is displayed:

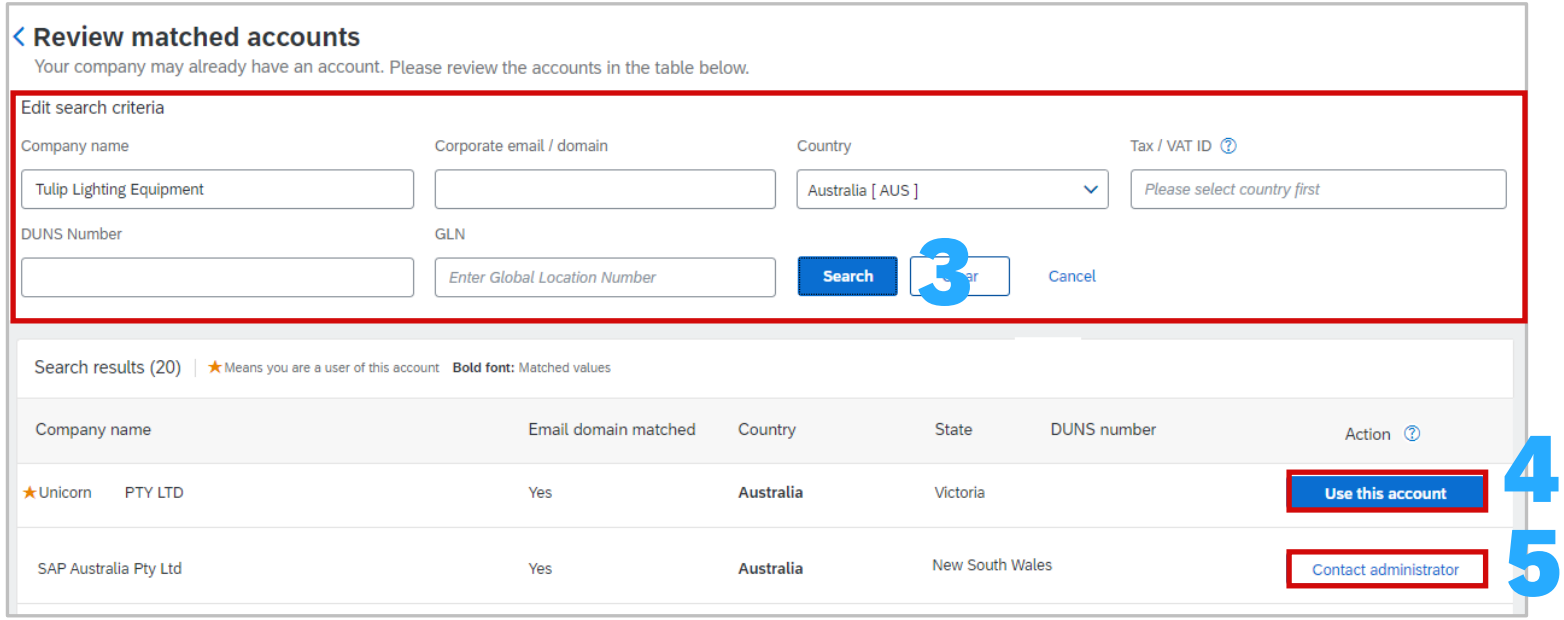
3. **Edit search criteria** is used for specific search criteria then click on Search

❖ Any Search results are displayed

4. If you identify an account you wish to use, Click on **Use this account**
5. If you are unsure about an account and want further clarification click on **Contact Administrator**
6. To **Create a new Account**, click on the back arrow to return to the Registration screen







Use this Account - Using an Existing Account

Your Buyer has decided to transact with their suppliers using the SAP Business Network.

- This can be done using ***either*** from the ***Invitation*** or ***Review accounts*** screen

From the invitation screen

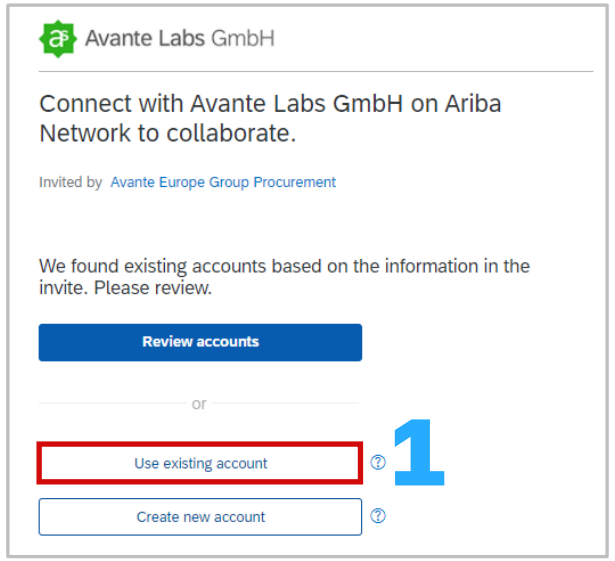
1. Click on **Use Existing Account**
2. Enter the **Username** and the **Password** for the account you wish to use
3. Click on **Connect**

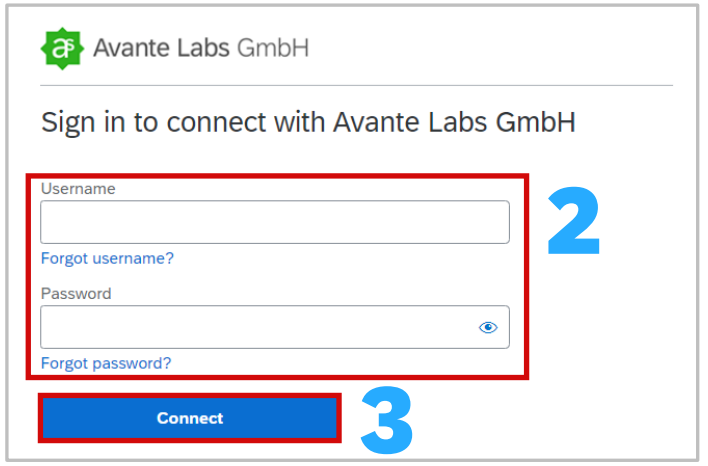
- Complete the details on the screen

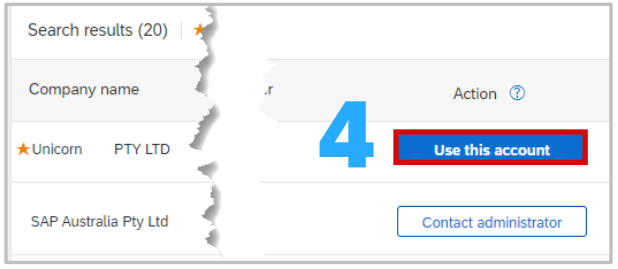
From the Review accounts screen

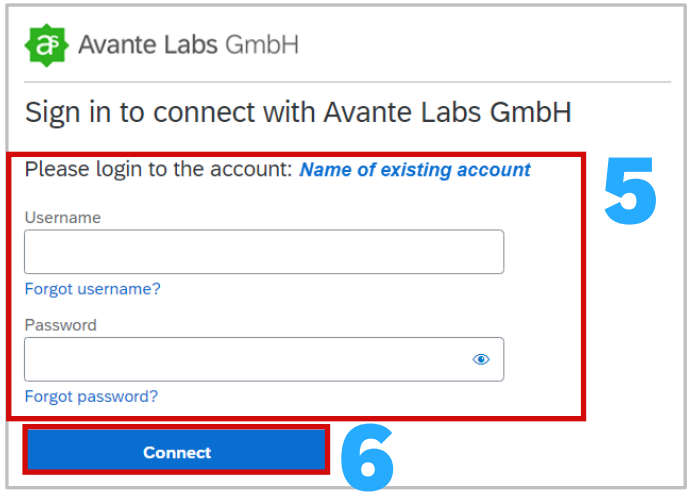
4. Click on **Use this account**
5. Enter the Username and Password for the account you have selected
6. Click on **Connect**

- Complete the details on the screen









Contact Administrator

Use Contact Administrator to investigate whether an account has already been created for this Buyer, this may be an account created by a Head Office in a different country, state or region to clarify whether you should be using the this specific account.

1. Click on **Contact Administrator**

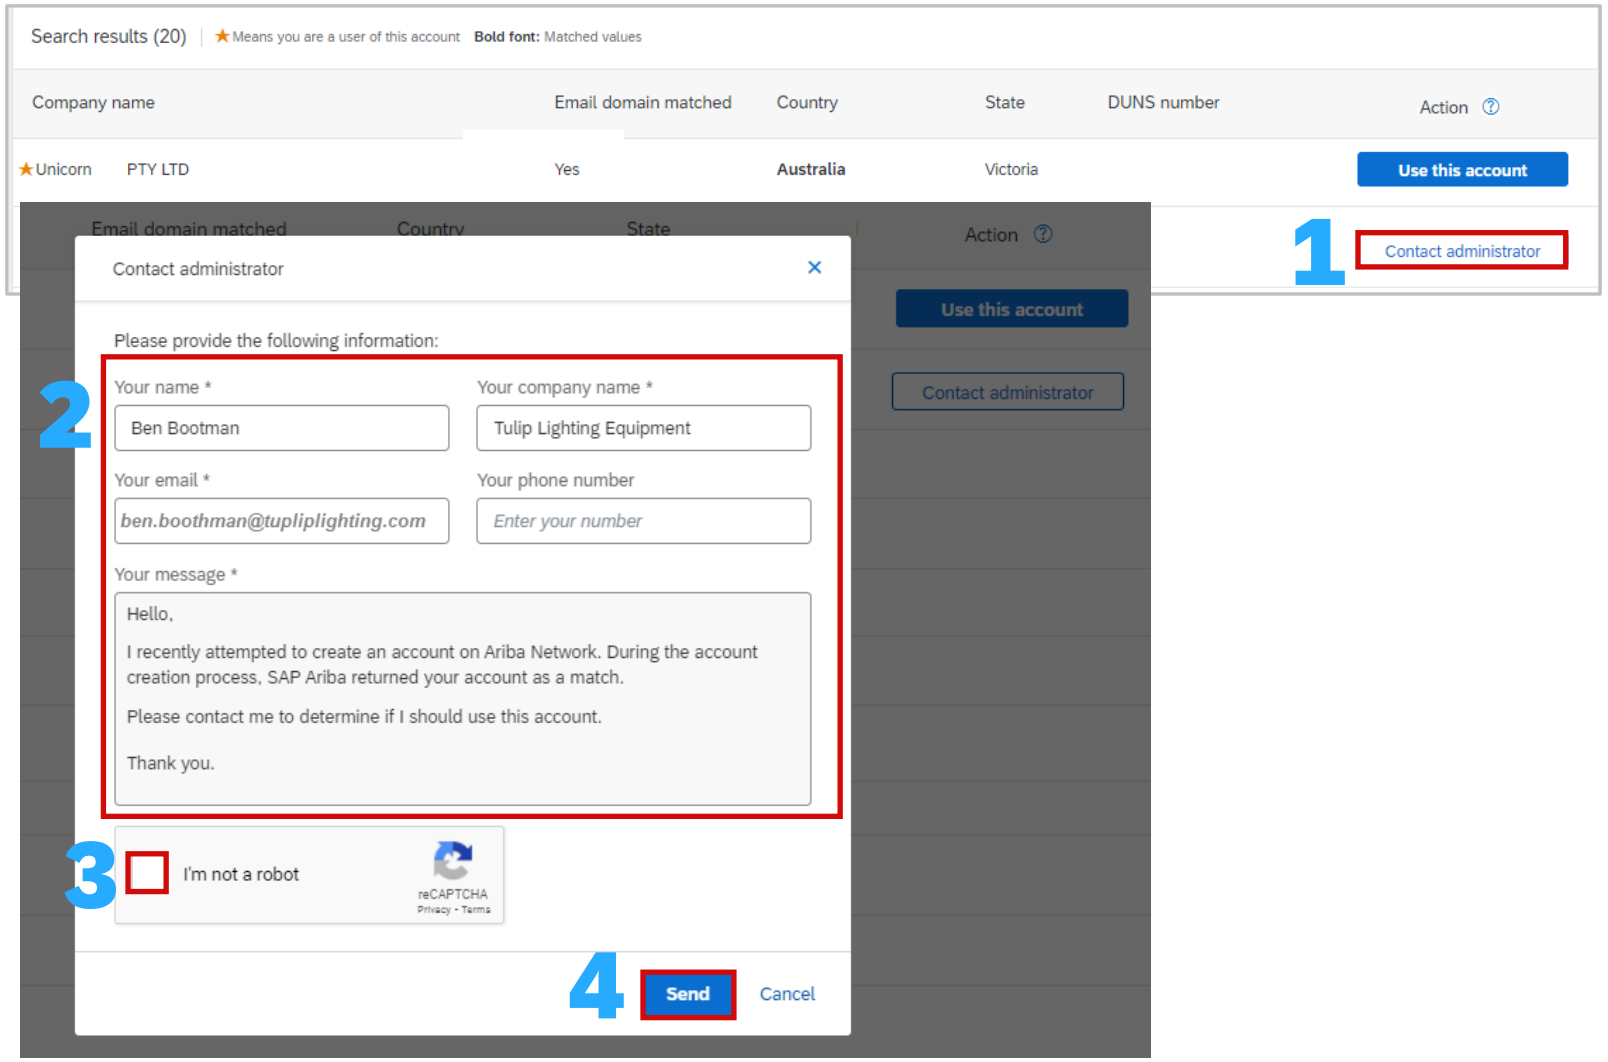
   - The Contact Administrator popup box appears

   - Confirm the details that have been auto-populated are correct and if required provide further information, ensuring that all fields with an asterisk have been completed

2. Click on **I'm not a robot**

3. Click on **Send**

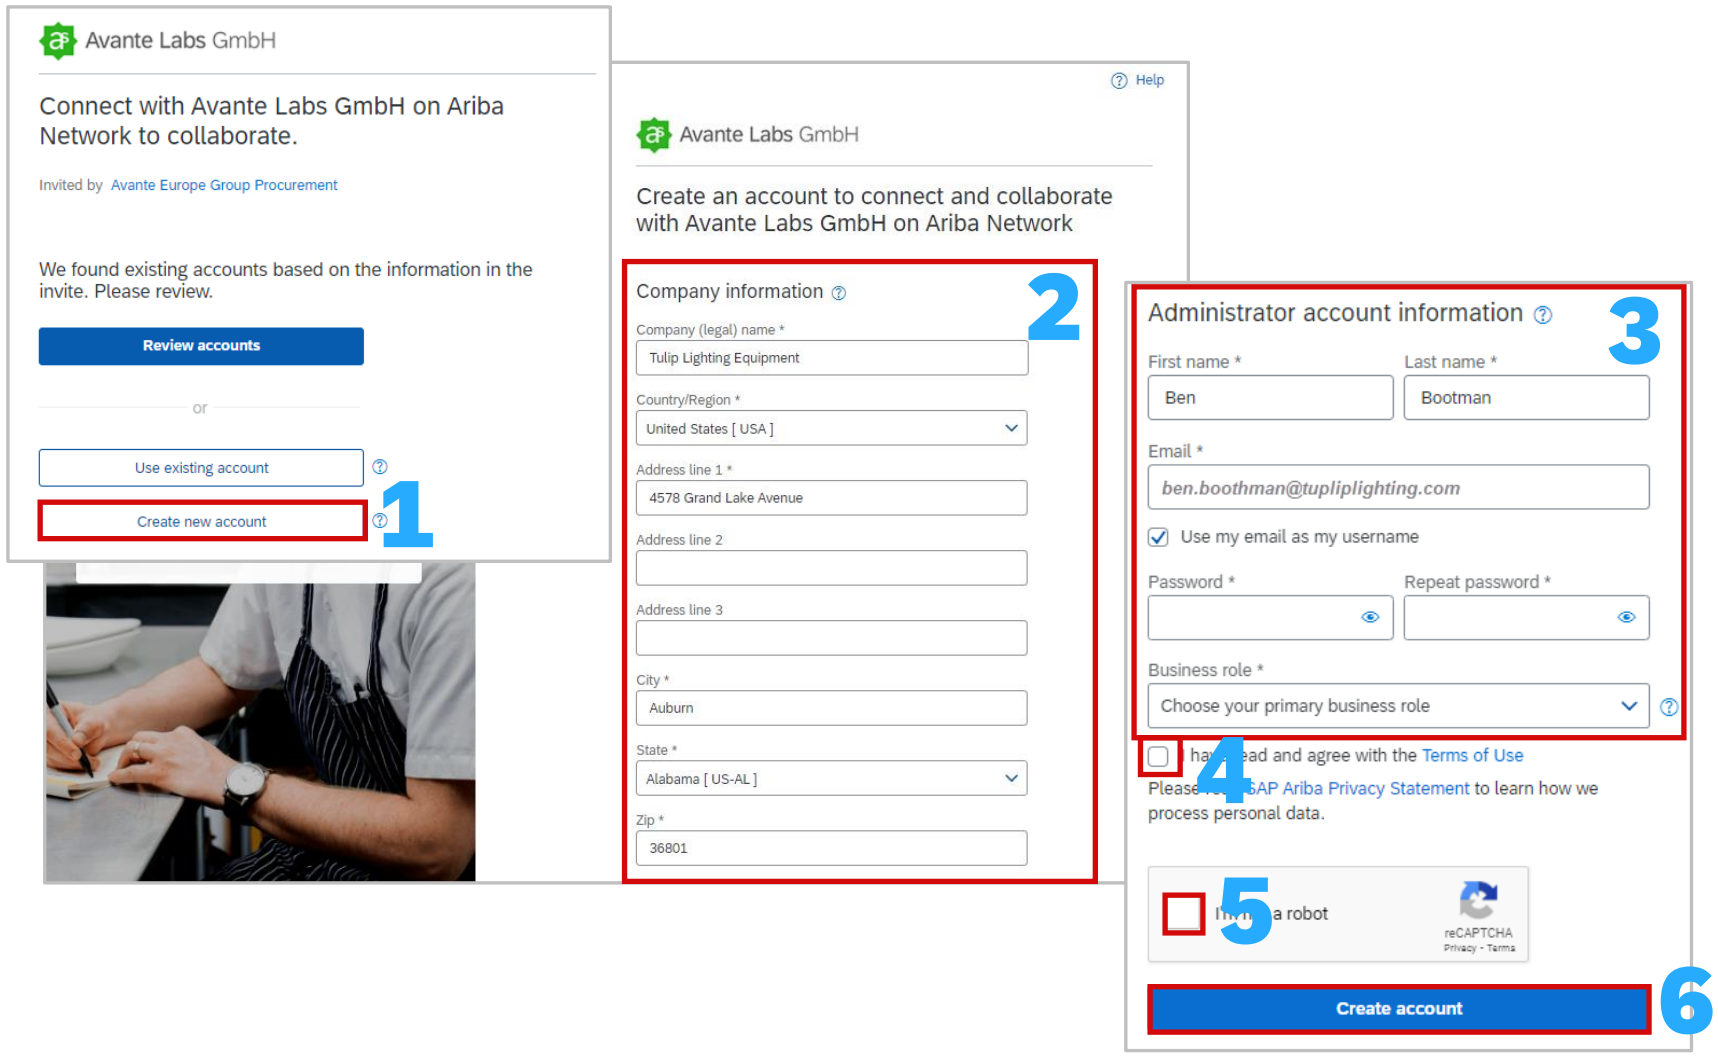
   - An email will be sent to the Administrator



Create a New Account

A Supplier has determined that a new account is required, display the invitation to connect from your Buyer:

1. Click on **Create new account**
2. Confirm or update the **Company information**, information is prepopulated based on the information from the Buyer
   - Ensure that all fields with an asterisk have been completed
- Scroll down to **Administrator account** information
   - **Note:** The fields will be auto-populated, however, if you are ***not*** the assigned System Administrator
1. Confirm or update the **Administrator account information**
2. Create a password, enter the **Password** and **Repeat password**
3. Open and review the **Terms of Use,** then click on I have read and agree with the Terms of Use
4. Click on **I'm not a robot**
5. Click on **Create Account**



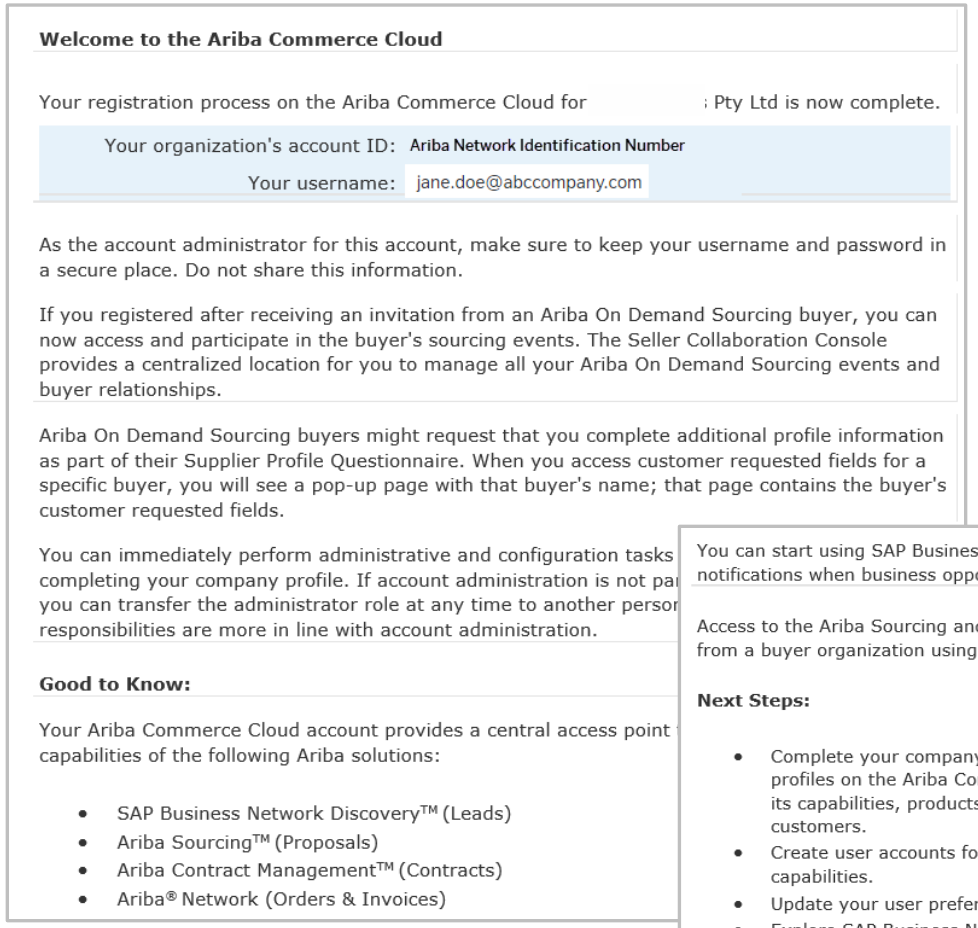
Email Confirmation of an SAP Business Network - Transacting Account

After you click on Create Account, an email from the Ariba Commerce Cloud will be sent to the email entered during the registrations process, it will indicate that the User name above is the System Administrator

A Welcome to the Ariba Commerce Cloud email will confirm:

- Registration
- Ariba Network Identification Number (ANID)
- Your Username
- Good TO Know
- Next Steps

- As the System Administrator you have already created your username and password during the registration process, use these credentials to Sign in to the SAP Business Network



Welcome to the Ariba Commerce Cloud

Your registration process on the Ariba Commerce Cloud for ; Pty Ltd is now complete.

Your organization's account ID: Ariba Network Identification Number

Your username: jane.doe@abccompany.com

As the account administrator for this account, make sure to keep your username and password in a secure place. Do not share this information.

If you registered after receiving an invitation from an Ariba On Demand Sourcing buyer, you can now access and participate in the buyer's sourcing events. The Seller Collaboration Console provides a centralized location for you to manage all your Ariba On Demand Sourcing events and buyer relationships.

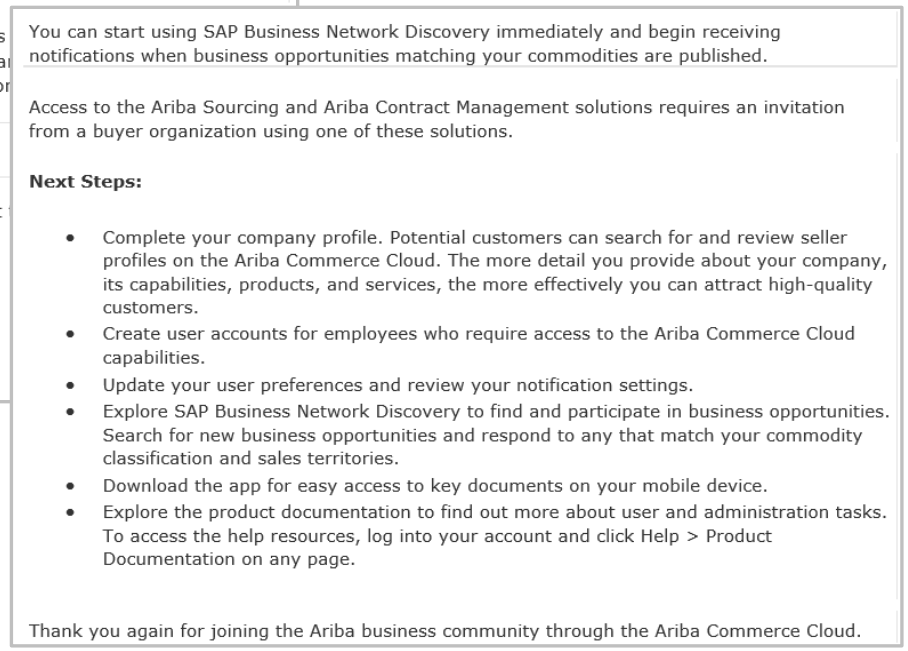
Ariba On Demand Sourcing buyers might request that you complete additional profile information as part of their Supplier Profile Questionnaire. When you access customer requested fields for a specific buyer, you will see a pop-up page with that buyer's name; that page contains the buyer's customer requested fields.

You can immediately perform administrative and configuration tasks
completing your company profile. If account administration is not pa
you can transfer the administrator role at any time to another perso
responsibilities are more in line with account administration.

Good to Know:

Your Ariba Commerce Cloud account provides a central access point
capabilities of the following Ariba solutions:

- SAP Business Network Discovery™ (Leads)
- Ariba Sourcing™ (Proposals)
- Ariba Contract Management™ (Contracts)
- Ariba® Network (Orders & Invoices)



You can start using SAP Business Network Discovery immediately and begin receiving notifications when business opportunities matching your commodities are published.

Access to the Ariba Sourcing and Ariba Contract Management solutions requires an invitation from a buyer organization using one of these solutions.

Next Steps:

- Complete your company profile. Potential customers can search for and review seller profiles on the Ariba Commerce Cloud. The more detail you provide about your company, its capabilities, products, and services, the more effectively you can attract high-quality customers.
- Create user accounts for employees who require access to the Ariba Commerce Cloud capabilities.
- Update your user preferences and review your notification settings.
- Explore SAP Business Network Discovery to find and participate in business opportunities. Search for new business opportunities and respond to any that match your commodity classification and sales territories.
- Download the app for easy access to key documents on your mobile device.
- Explore the product documentation to find out more about user and administration tasks. To access the help resources, log into your account and click Help > Product Documentation on any page.

Thank you again for joining the Ariba business community through the Ariba Commerce Cloud.

Email Confirmation of an SAP Ariba – Proposals & Questionnaires – Sourcing Account

The SAP Business Network is primarily used as a Transacting Account, where Purchase Orders and proceeding documents are exchanged with your Buyer.

The SAP Ariba Proposals and Questionnaires (Ariba Sourcing) is for suppliers to provide information through a questionnaire (if required by the Buyer) or used to perform Events such as:

- Surveys
- Reverse Auctions
- RFI's – Request for Information
- RFPs – Request for Proposal
- RFQs – Request for Quote

Always use the "Click Here" when accessing the Invitation for the first time.

Only the person who receives the Invitation for Sourcing can access it. If it is sent to a user that is not longer with the business, contact the Buyer.

RFXs are usually created first, and ONLY when the Quote or information is completed a Purchase Order is completed

Examples only

Dear, Jane Doe

NAME OF BUYER has invited you to participate in the following event Doc2599: Test RFx Team Access. The procurement event is set to begin on Dates required by the Buyer and ends on Dates required by the Buyer

Please Click Here to log in or register on the Ariba Commerce Cloud to access this procurement event. You must register on the Ariba Commerce Cloud or log in using your existing Ariba Commerce Cloud account username and password before you can access this event.

NOTE: This link is only valid for 30 days.

If you have questions regarding access to this procurement event or how to participate, please email questions regarding the RFx content, please submit your query through the relevant Ariba event message board.

Yours sincerely,
NAME OF BUYER

e following event:
uary 29, 2024 at

TEST events:

When you click this link, log in with your username and password. You will then have the option to register your buyer-specific user ID with a new or existing Ariba Commerce Cloud account and participate in your event.

If you do not want to respond to this event, Click Here. You must register on the Ariba Commerce Cloud or log in using your existing Ariba Commerce Cloud account username and password before you can indicate that you do not want to respond to this event.

If you have forgotten your username or password and are unable to log in, Click Here.

Please save your responses every 15-20 mins. And please delete 'Cookies' & 'Temporary files' regularly (once a day) to ensure that your session doesn't expire frequently.

For any technical issues or any training on the tool, please submit a request with Ariba Helpdesk by following the below steps:

Log In or Register – SAP Ariba Sourcing Account

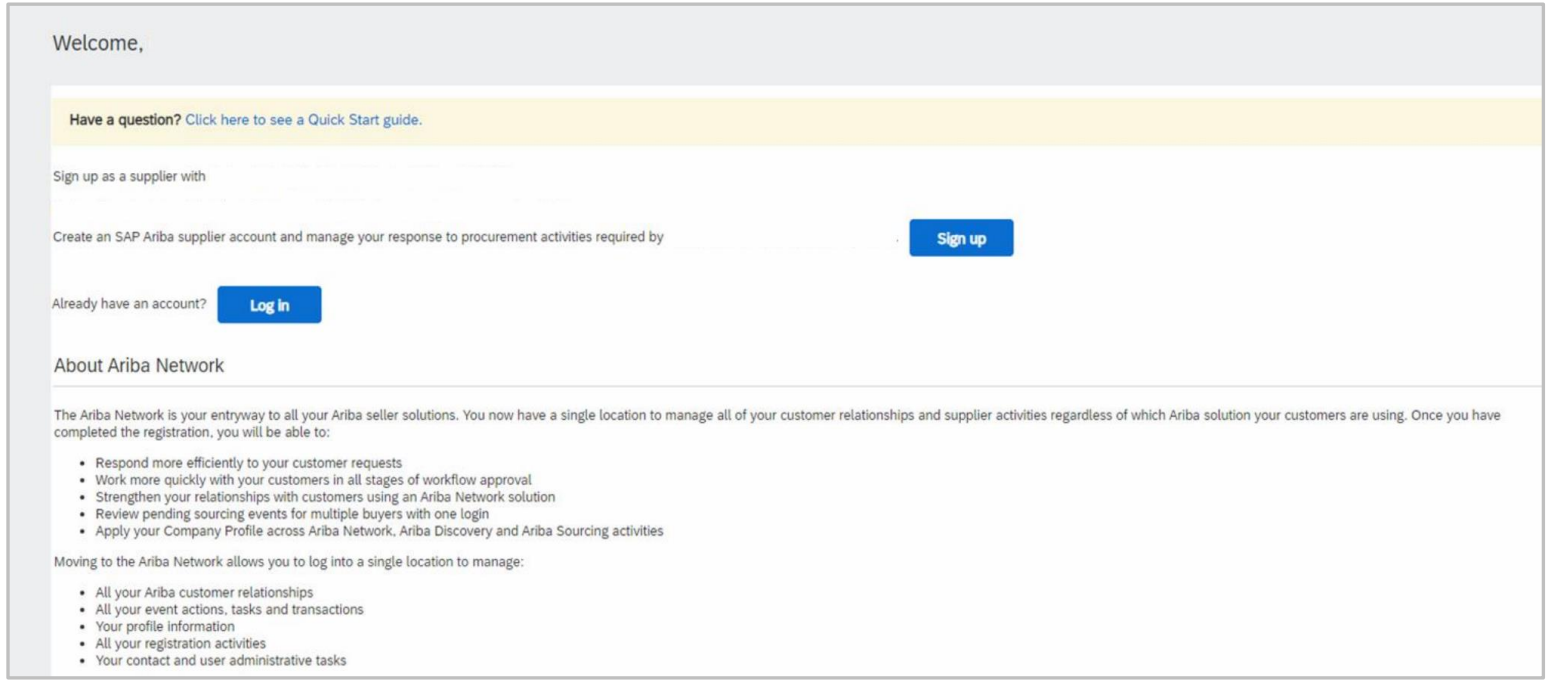
After clicking on the link from within the SAP Ariba Sourcing (Proposals and Questionnaires) Account, you need to determine whether you need to:

Register a New Account

Or

Log In to an existing account

Always access a new invitation from within the invitation type you have been sent



Temporary Account Information

In some instances a Buyer may use a Quick Enablement Process. Click on the link from within the invitation.

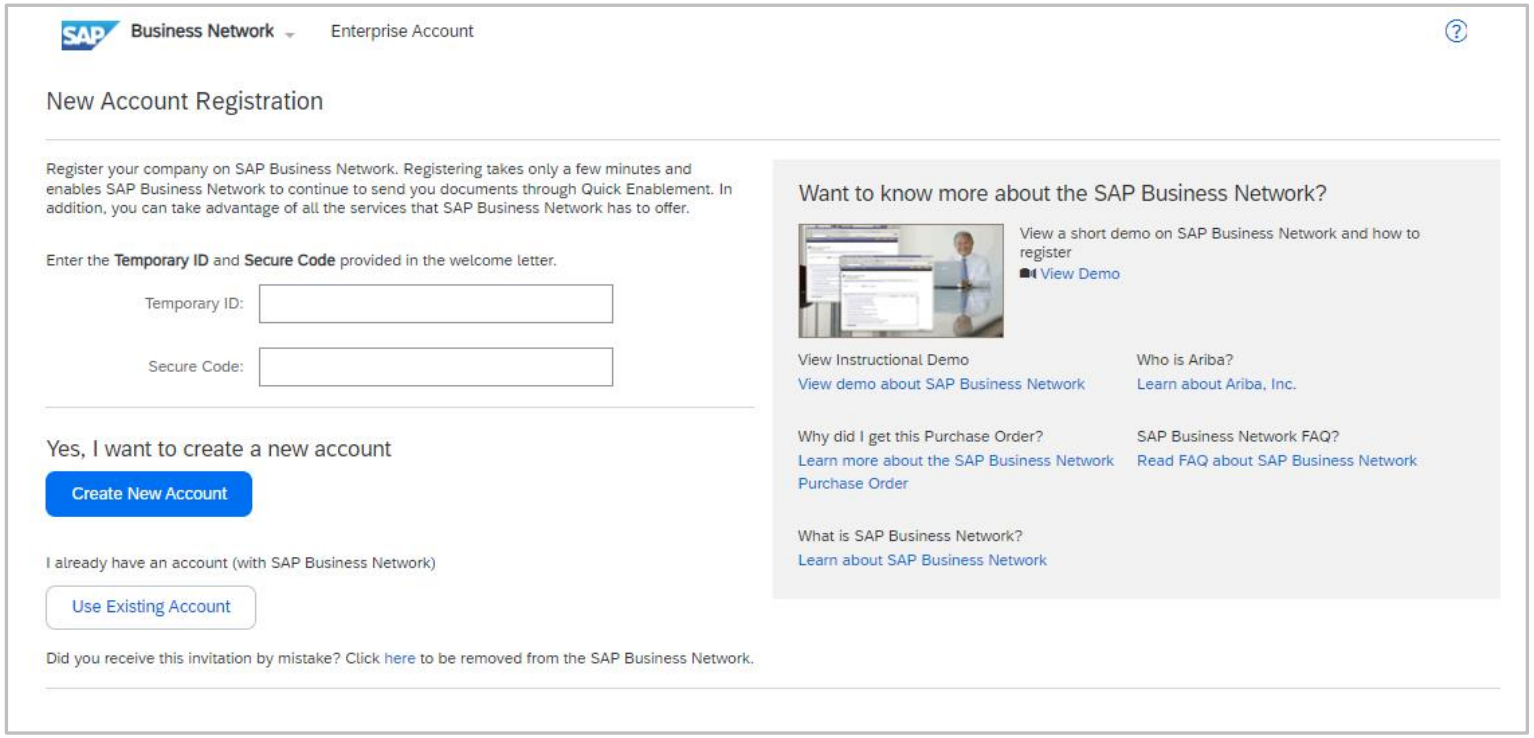
The invitation or interactive document will provide a Temporary ID and Secure code for Supplier to enter to access and complete the task requested by the Buyer.

Suppliers can also elect to:

Create a New Account

OR

Use and Existing Account



Sign in for the first time

After the account has been registered, irrespective of whether it is an SAP Business Network Transacting Account or an SAP Ariba Sourcing account, the first time you log in is the same.

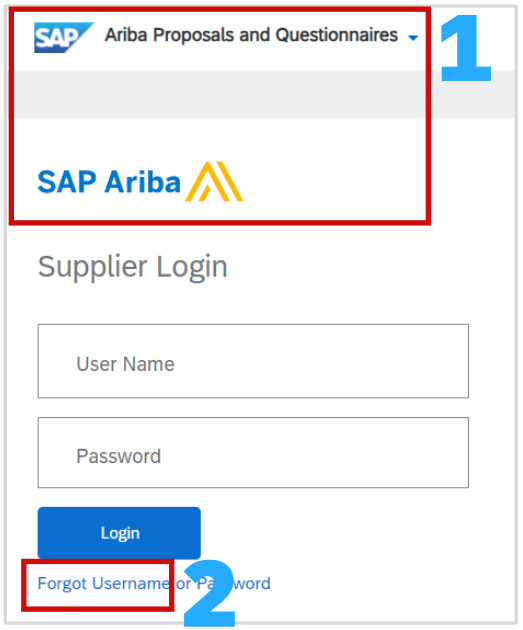
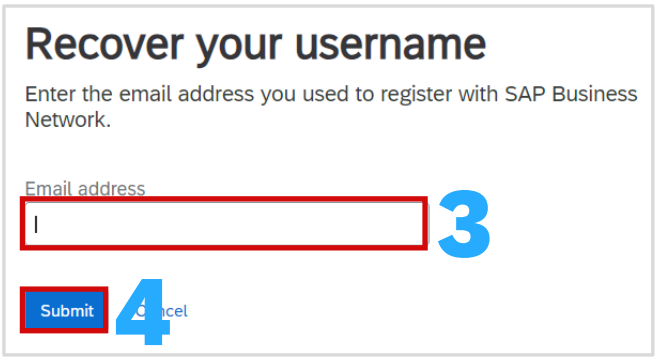
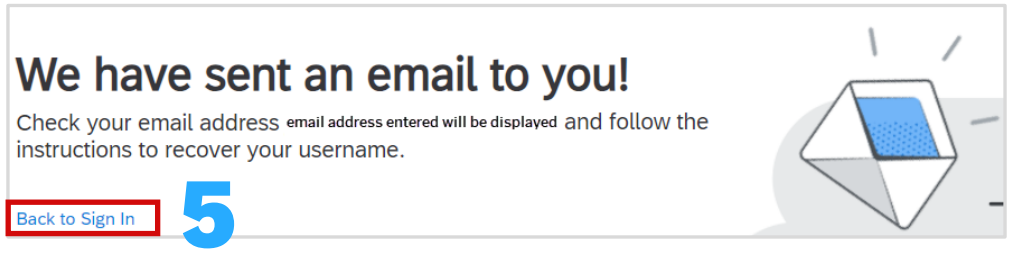
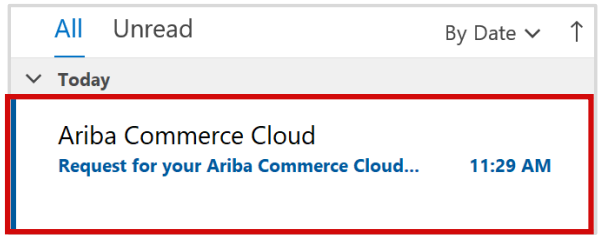
6. Locate the Ariba Commerce Cloud email – **Request for your Ariba Commerce Cloud username**

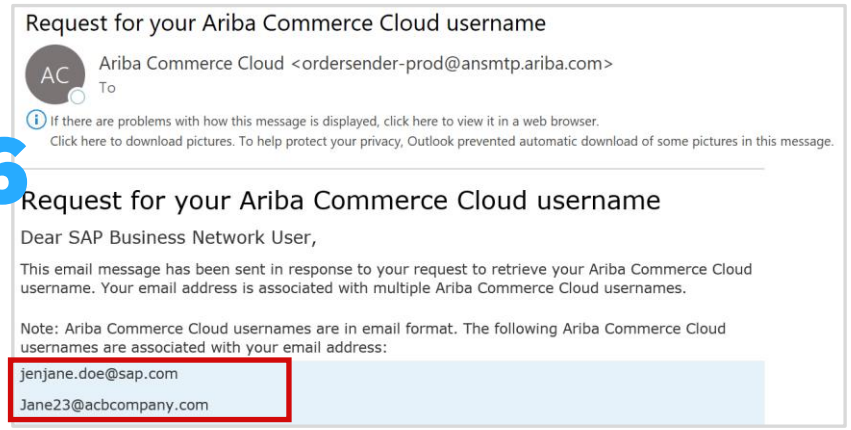
   Open the email, Identify the required username
7. Enter the **Username** into the **Supplier Login** screen
8. Enter your **Password** (Click here if you have forgotten your proposals and Questionnaires password)
9. Click on **Login**

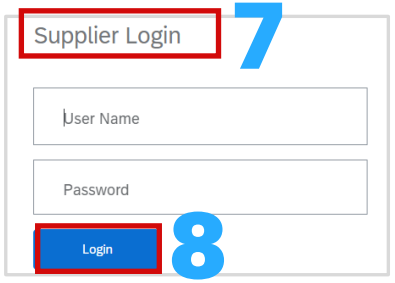












Log in to Ariba Proposals & Questionnaires (Sourcing) Account – Forgot Password

After logging in, **SAP Ariba Proposals and Questionnaires** will be displayed on the top left of the screen

Display the Ariba Proposals and Questionnaires Supplier Login page (refer to Which Account am I using)

1. Display the SAP Ariba login screen
2. Click on Forgot **Password**
3. Enter your **Email Address**

Note: You will need to re-enter your **Username**, and click **Next** to return to the password entry Sign-in screen

4. Click on **Submit**

Screen Message – **We have sent you an email**

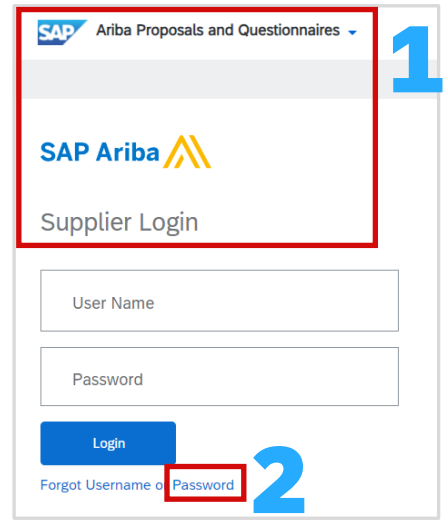
6. Click on **Back to Sign in**
7. Locate the Ariba Commerce Cloud email – **Ariba Account Password Reset Information,**
8. Open the email, Identify the username that you have forgotten the password for, then click on **Click Here** next to the username

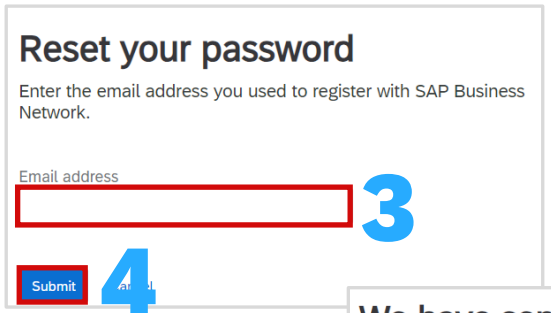
Note: Where you have more than one account, click on the **Click Here** next to the required username to update the password on

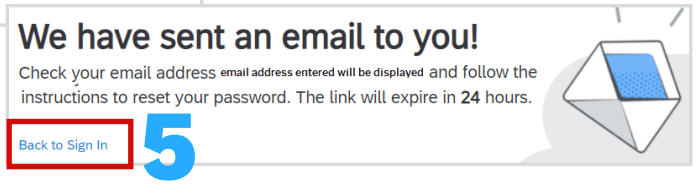
9. Enter your New Password (Refer to Creating a Password for more information)
10. Re-enter the **New Password**

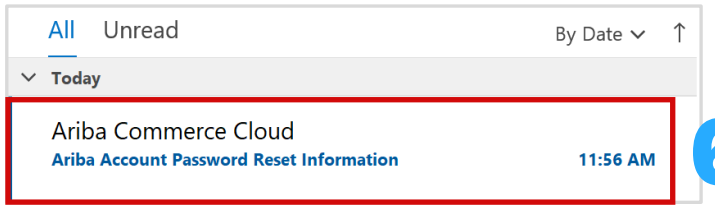
Note: Clicking on 👁 displays what has been entered

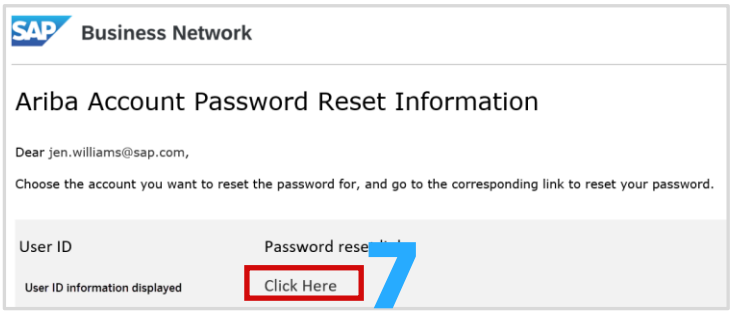
11. Click on **Submit**
12. Click on **Back to Sign in**
13. The **Supplier Login** screen is displayed, enter the Username and the newly created password

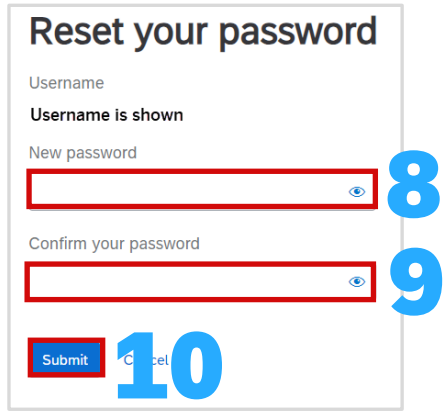


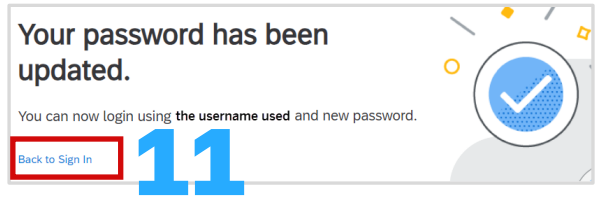


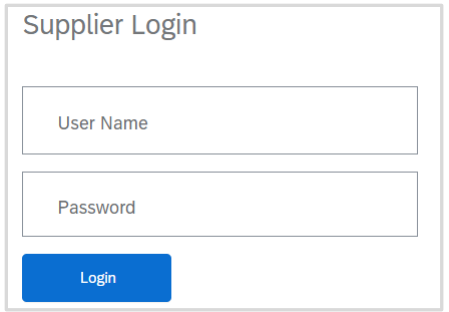


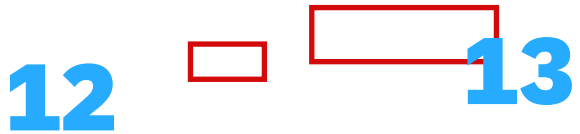












Creating a Password Information

There are specific parameters that must be met when creating a Password.

The initial screen will display all information in black text

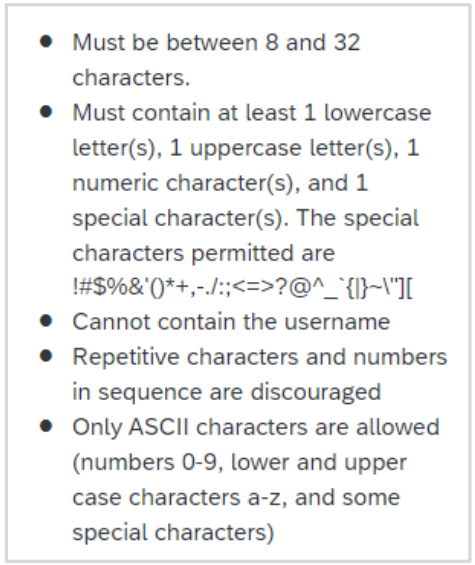
As you create a password:

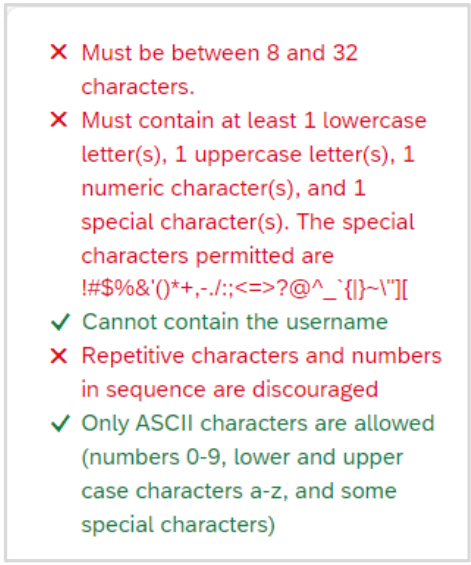
Green indicates that you have met the criteria

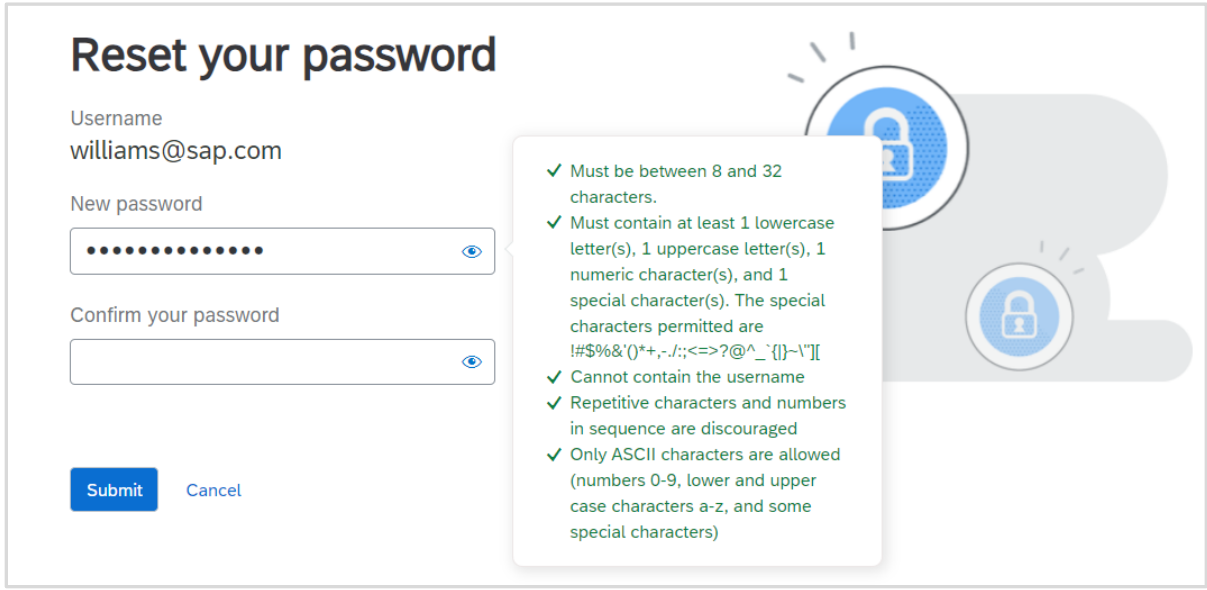
Red indicates that you have not yet met the requirements of the password

Clicking on the 👁 at the end of the field will display what has been entered

When using credentials (Username) that is generic be sure to advise all those using the same credentials of the updated password, otherwise the account may be locked and a new password created







Which Account are you using?

Identify which account you are in by noting the name that appears on the top left of the screen.

Each account allows a user to access it via the drop down on each different account type.

The account types available are:

- SAP Ariba Discovery
- SAP Proposals And Questionnaires
- Ariba Contracts
- SAP Business Network

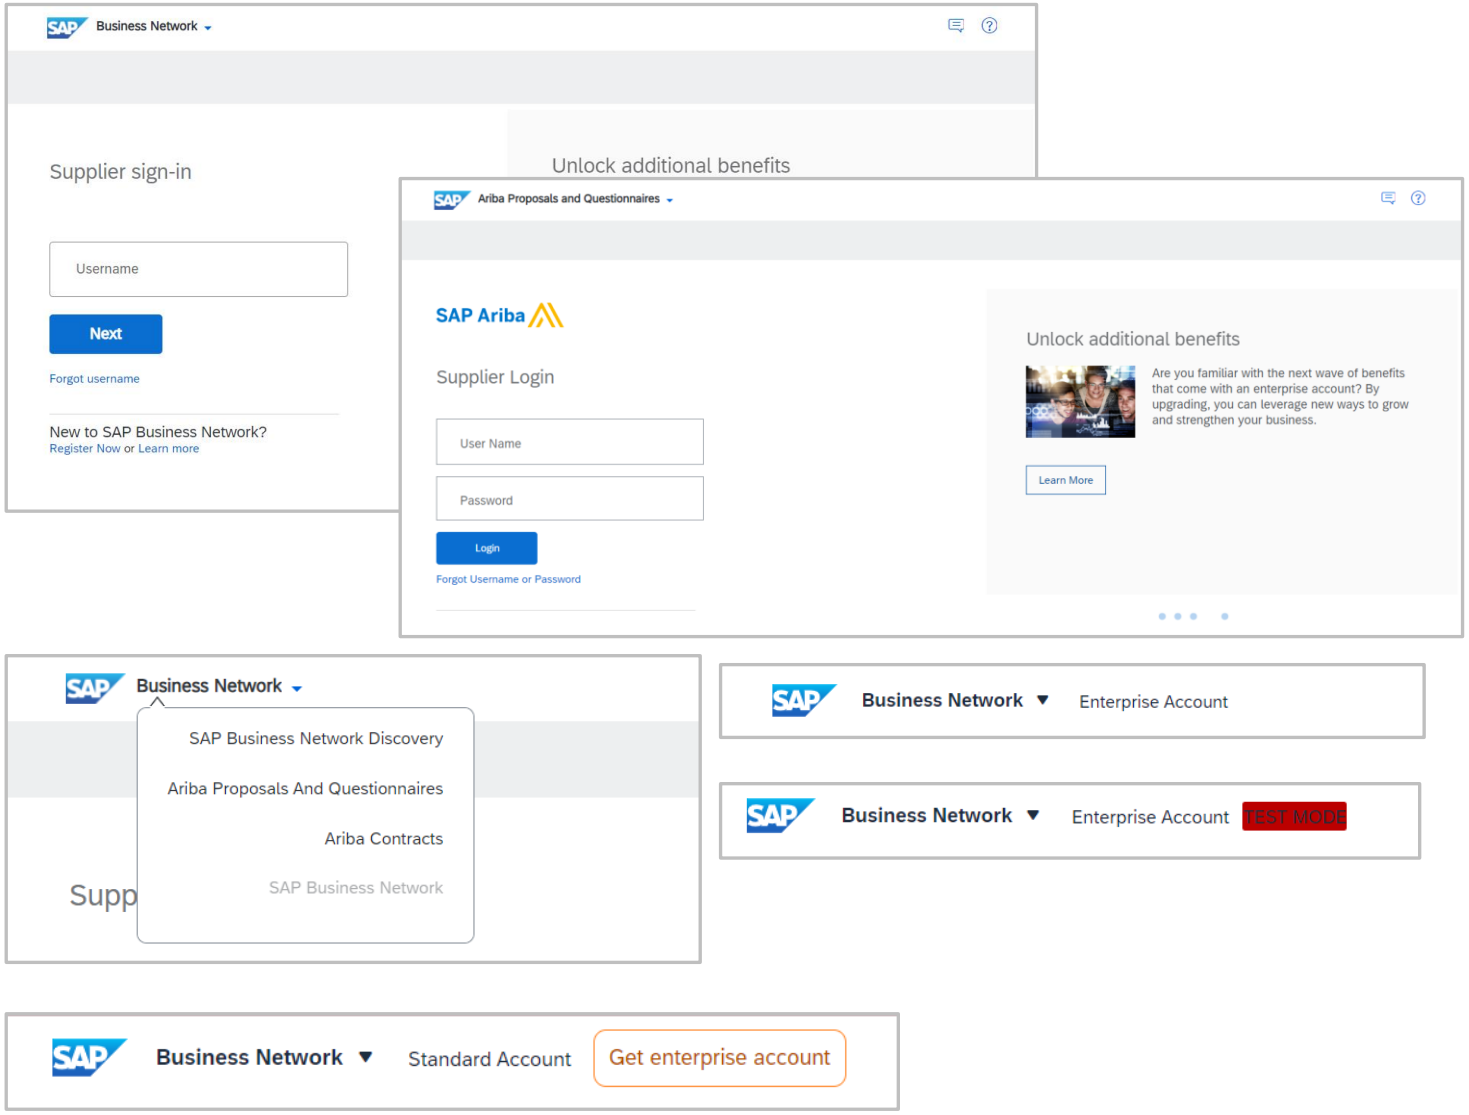
Use the drop-down arrow to change to a different account drop-down

There are two types of Accounts:

- Enterprise Accounts – Attracts Subscription and Transaction Fees but delivers a higher degree of options
- Proposals and Questionnaires – Both Enterprise and Standard accounts do not attract any fees as this is used for responding to surveys, questionnaires or events (RFXs)

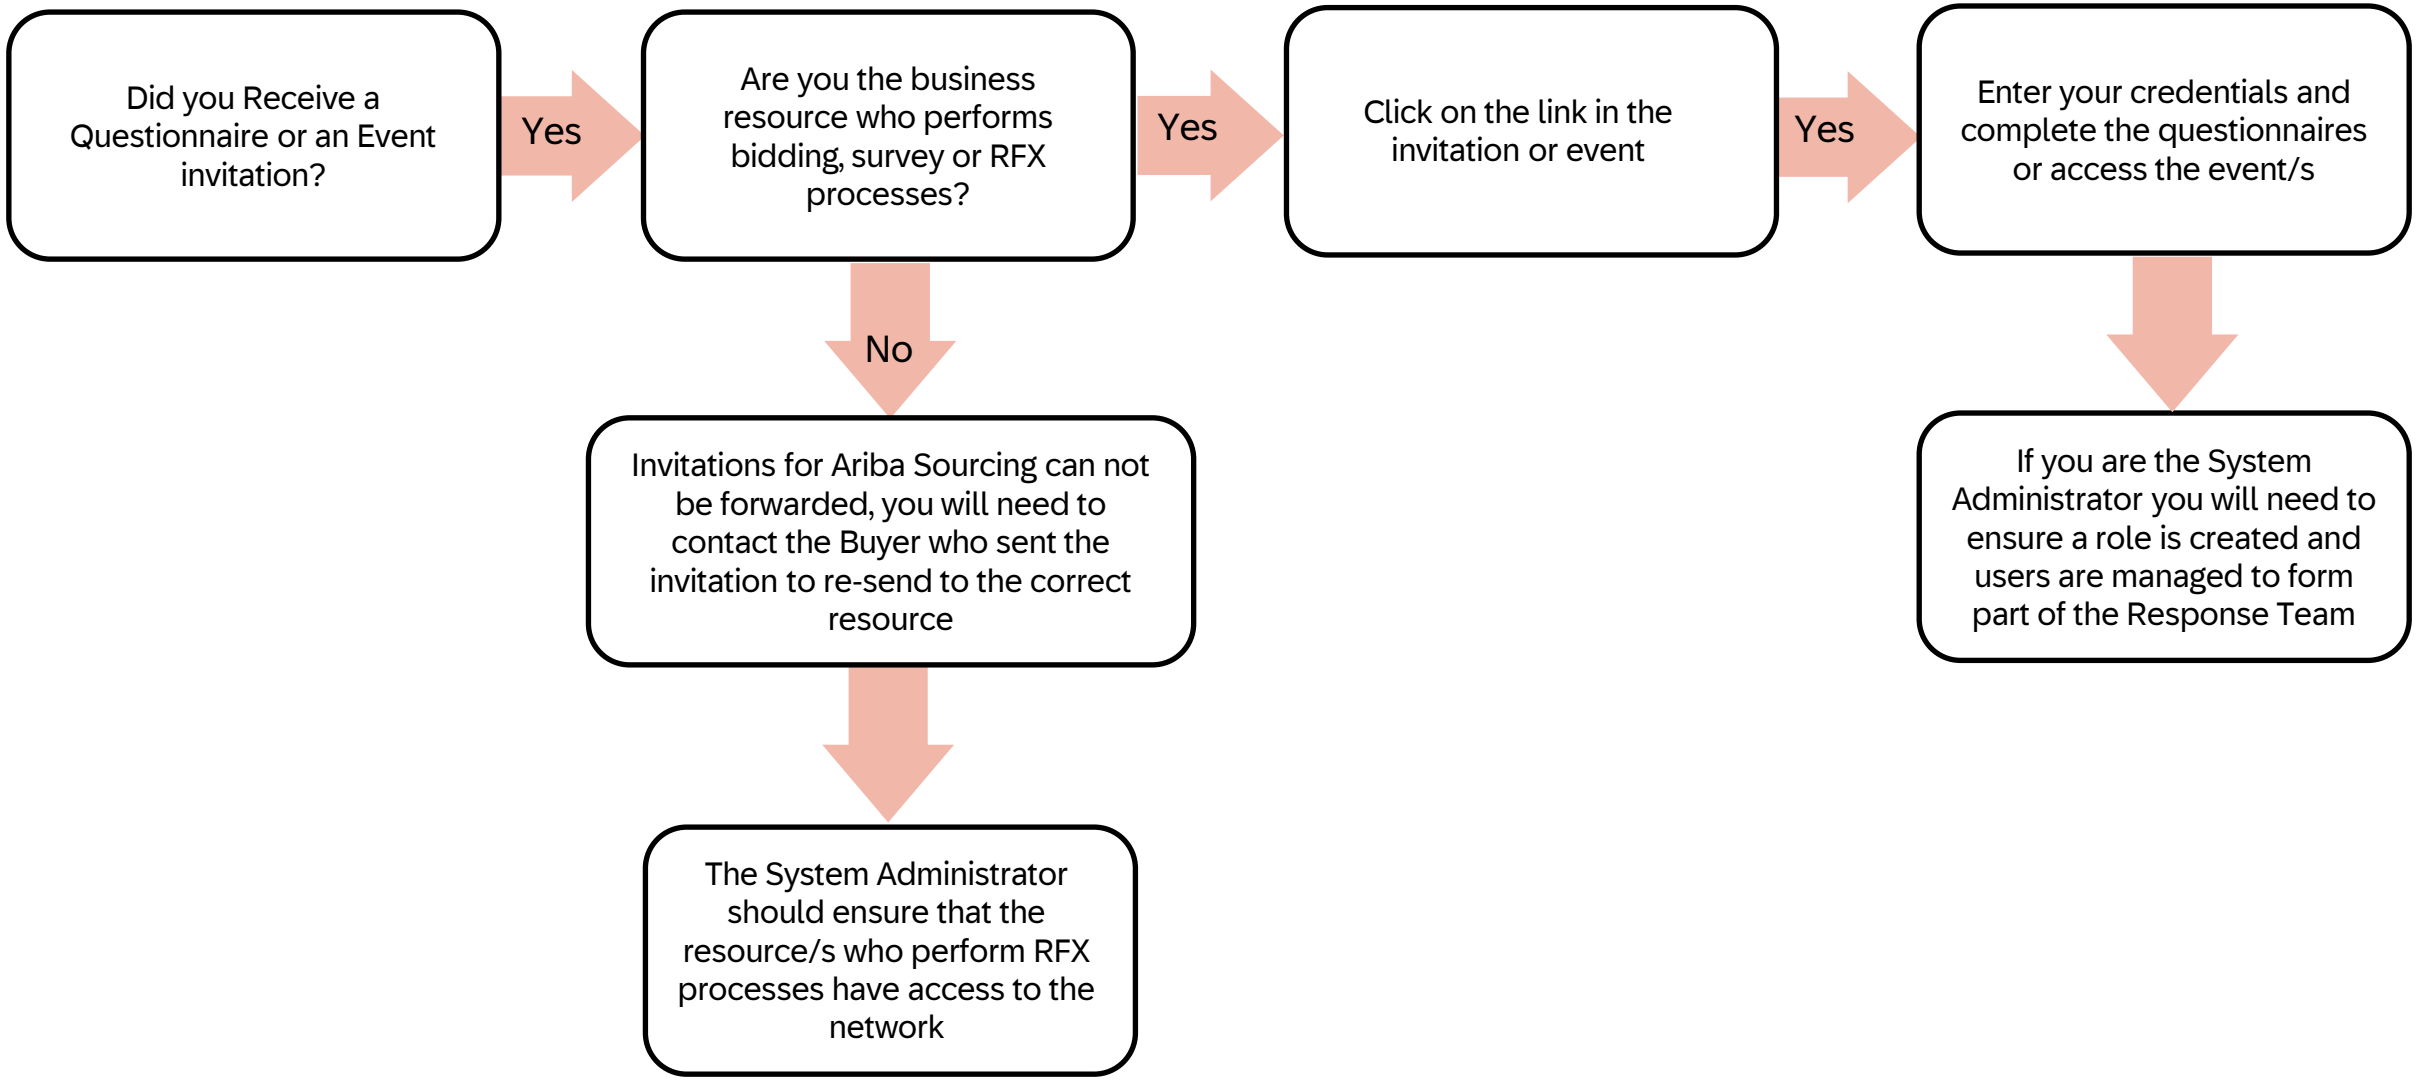
Test Accounts are identified by the inclusion of a TEST MODE heading

Be aware that if a Buyer is using a Supplier Fee Exempt or Buyer Funded Model it means that ONLY that Buyer does not attract fees.



SAP Ariba Sourcing – Proposals & Questionnaires

SAP Ariba Proposals & Questionnaires (Sourcing) Flow



Information

- SAP Ariba Proposals and Questionnaires is where Suppliers access Events (RFXs, Surveys or Questionnaires)
- Only the resource within your business who receives the invitation email can access the information, these emails cannot be forwarded to a different person as they will not be able to access the link
- SAP Ariba Souring is the Supplier Lifecycle and Performance (SLP) allows Buyers to get a 360-degree snapshot of their suppliers
- Suppliers should use an existing SAP Business Network Account where possible and access using existing credentials
- An invitation with a link to events or questionnaire/s will be sent from your Buyer
- An Event includes, a Survey, a Requestion for Information (RFI), a Request for Proposal (RFP) a Request for Quote (RFQ) or a questionnaire (in some cases two questionnaires may be required by a Buyer)
- Buyers determine whether they will use a Supplier Registrations questionnaire and/or a Supplier Purchasing Questionnaire
- Suppliers need to complete the questionnaire they have been sent by their Buyer and once completed the Buyer will review and once Approved creates a relationship between the Buyer and the Supplier
- To access Proposals & Questionnaires from the menu rather than the email sent from your Buyer, click on SAP Business Network and select Ariba Proposals & Questionnaires

Information cont.

- When completing a questionnaire, complete ALL sections with asterisks
- Only the Administrator of the Account can add additional Users, however, be aware that in some instances once users have been added the Buyer will still need to provide approval
- Some Buyers will create and account in their Network, this does not mean it exists on the Supplier side
- Suppliers must decide whether to use existing credentials or create a new account,
- Refer to Which Account am I in information
- Only Register a new account if you perform and respond to Sourcing events
- Use an existing Username and Password if you are already on the SAP Business Network
- Supplier SAP Ariba Proposal and Questionnaires System Administrators can add users and assign permissions, however please note that some Buyers need to approve users to provide quotes on behalf of your business
- Confirm that there is not an existing Sourcing account prior to creating a new account
- There is no charge associated with an SAP Ariba Proposals and Questionnaires account

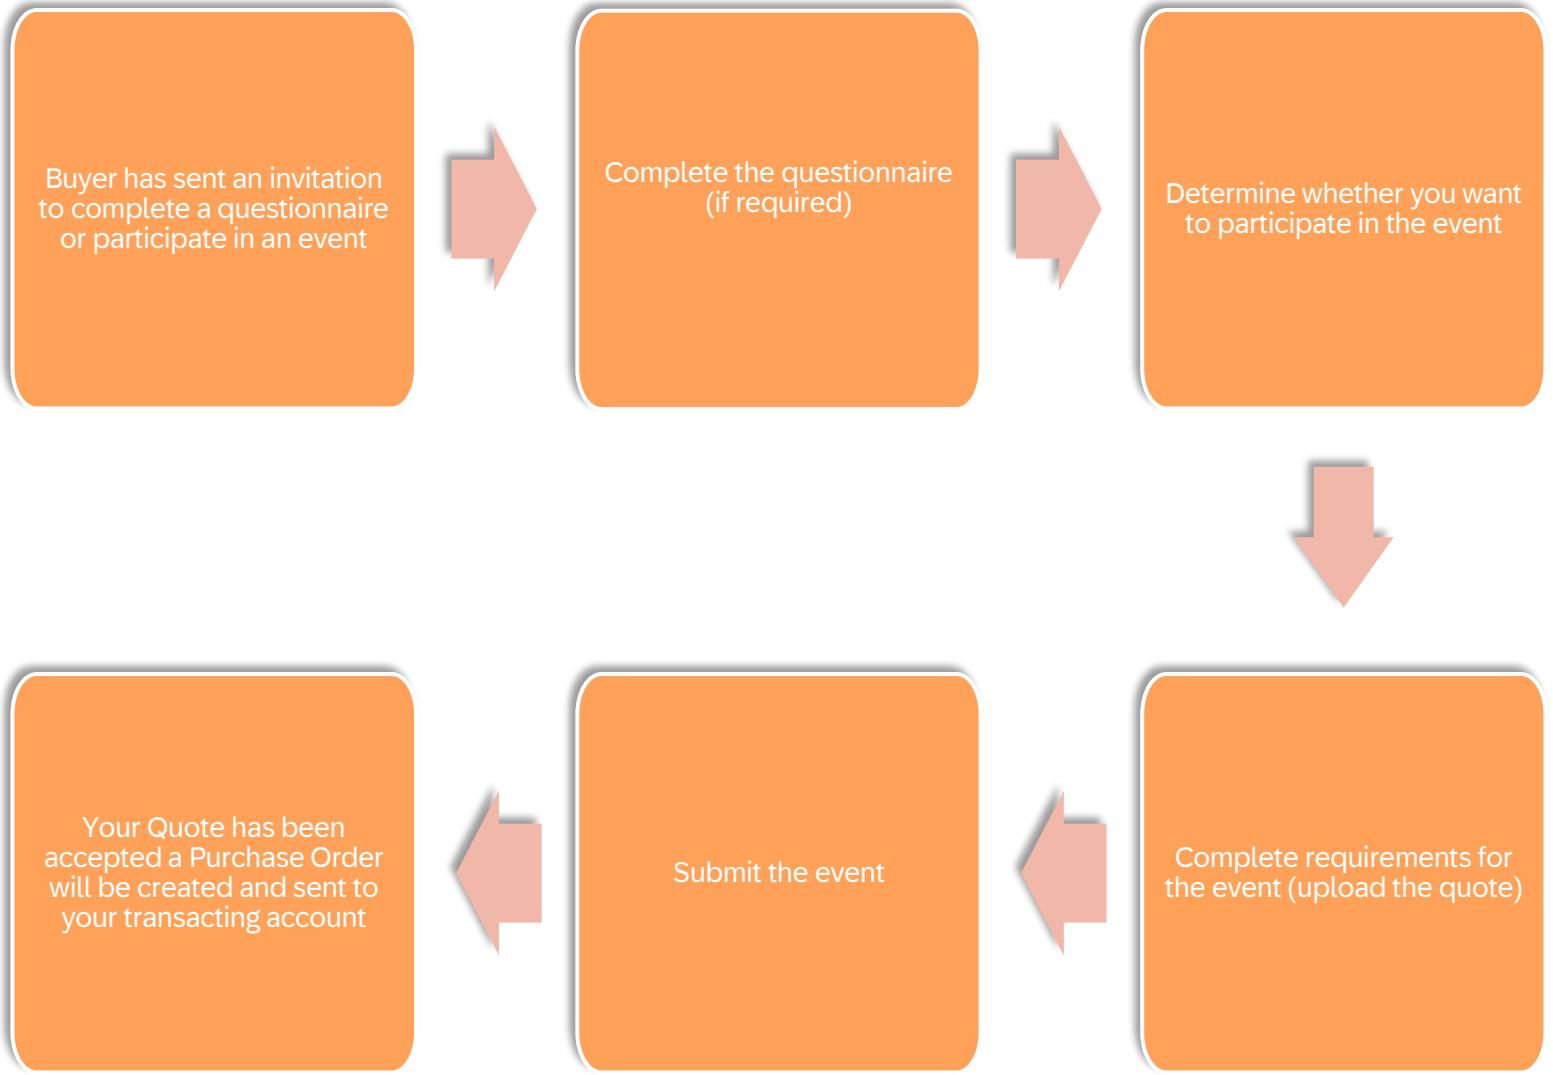
SAP Ariba Proposals & Questionnaires (Sourcing) Invitation Information and Flow

The invitation can ***only*** be opened by the person it was sent to.

The Buyer determines whether or not a supplier is required to complete questionnaires or just participate in events.

The Process:

- Suppliers receive an invitation
- Upon opening the invitation they should either use existing credentials or create a new account
- Buyers ***prefer*** that an existing Transacting account ANID be used for sourcing processes
- There is no cost associated with Sourcing accounts
- Supplier needs to add users to become part of the Response team
- In some cases the Buyer will manually approve the users added
- Some Buyers may have an automatic approval process
- If users are created after questionnaires and events have been added they will only see information from the approved date
- Ensure that if further information is required it is provided an submitted
- Once you have completed an event and are selected you will receive a Purchase Order in your transacting account

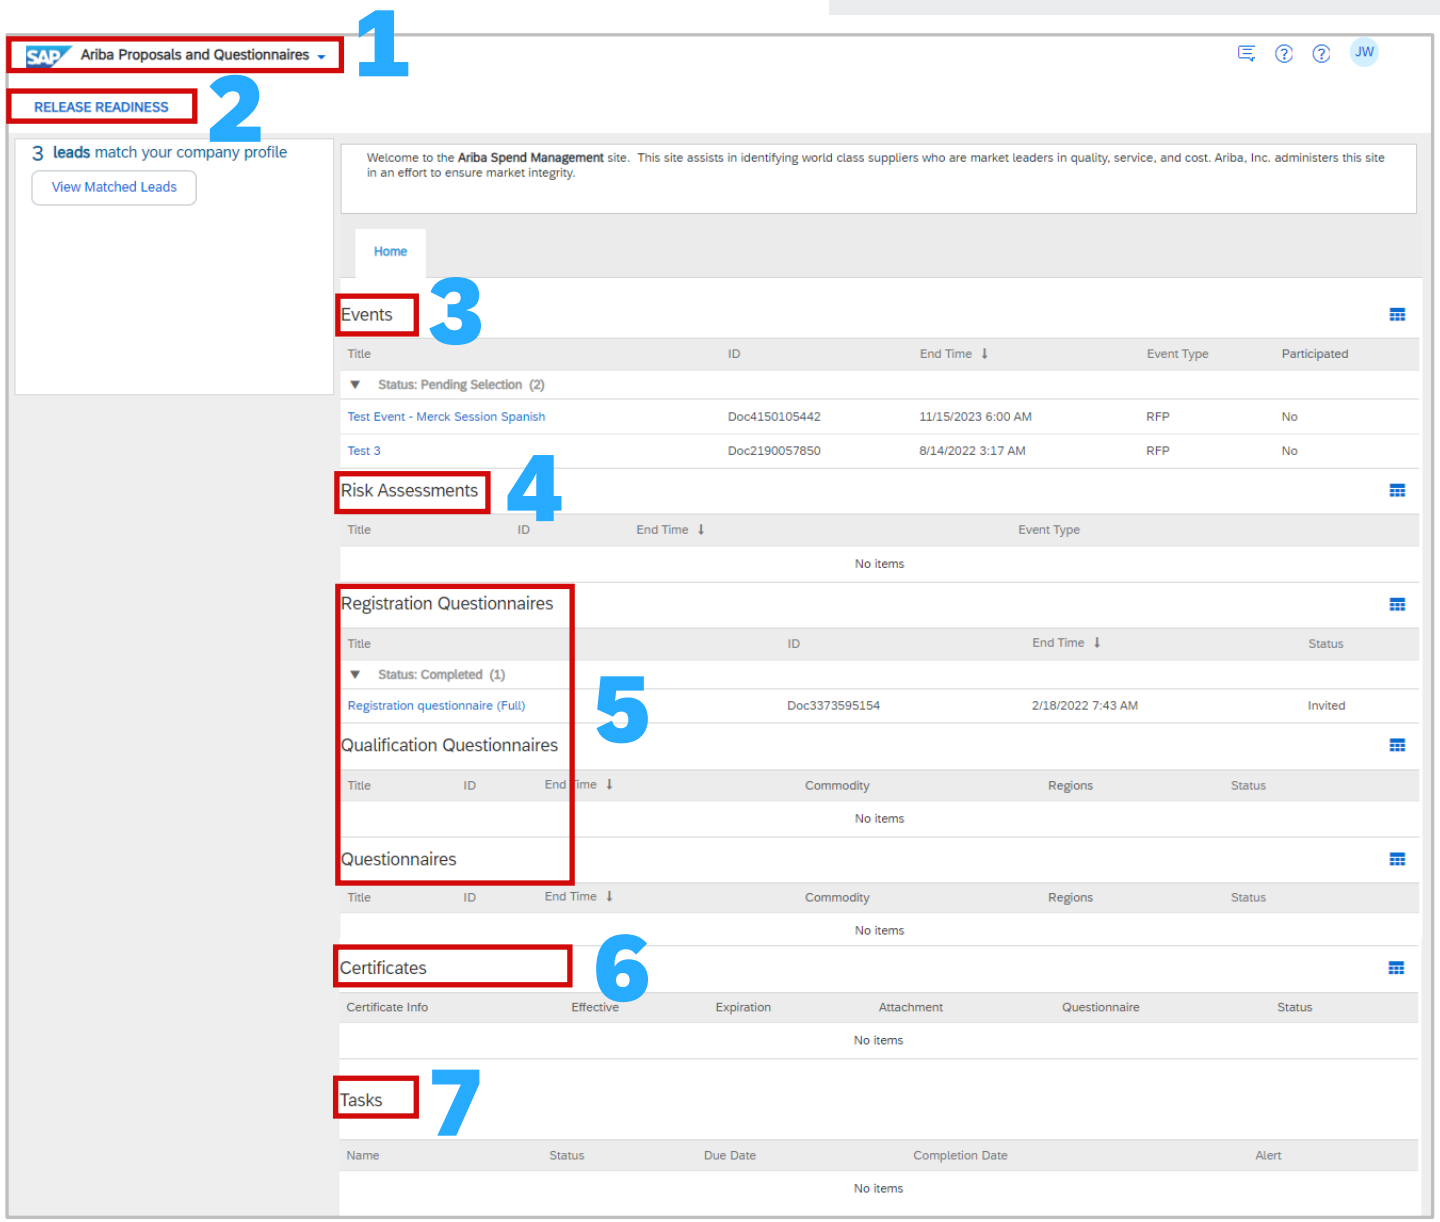


SAP Ariba Proposals and Questionnaires - Main Screen

Ensure that when you are in Proposals and Questionnaires to :

- Respond to a Questionnaire/s
- Respond to an Event
- Provide a Buyer with information or certification/s

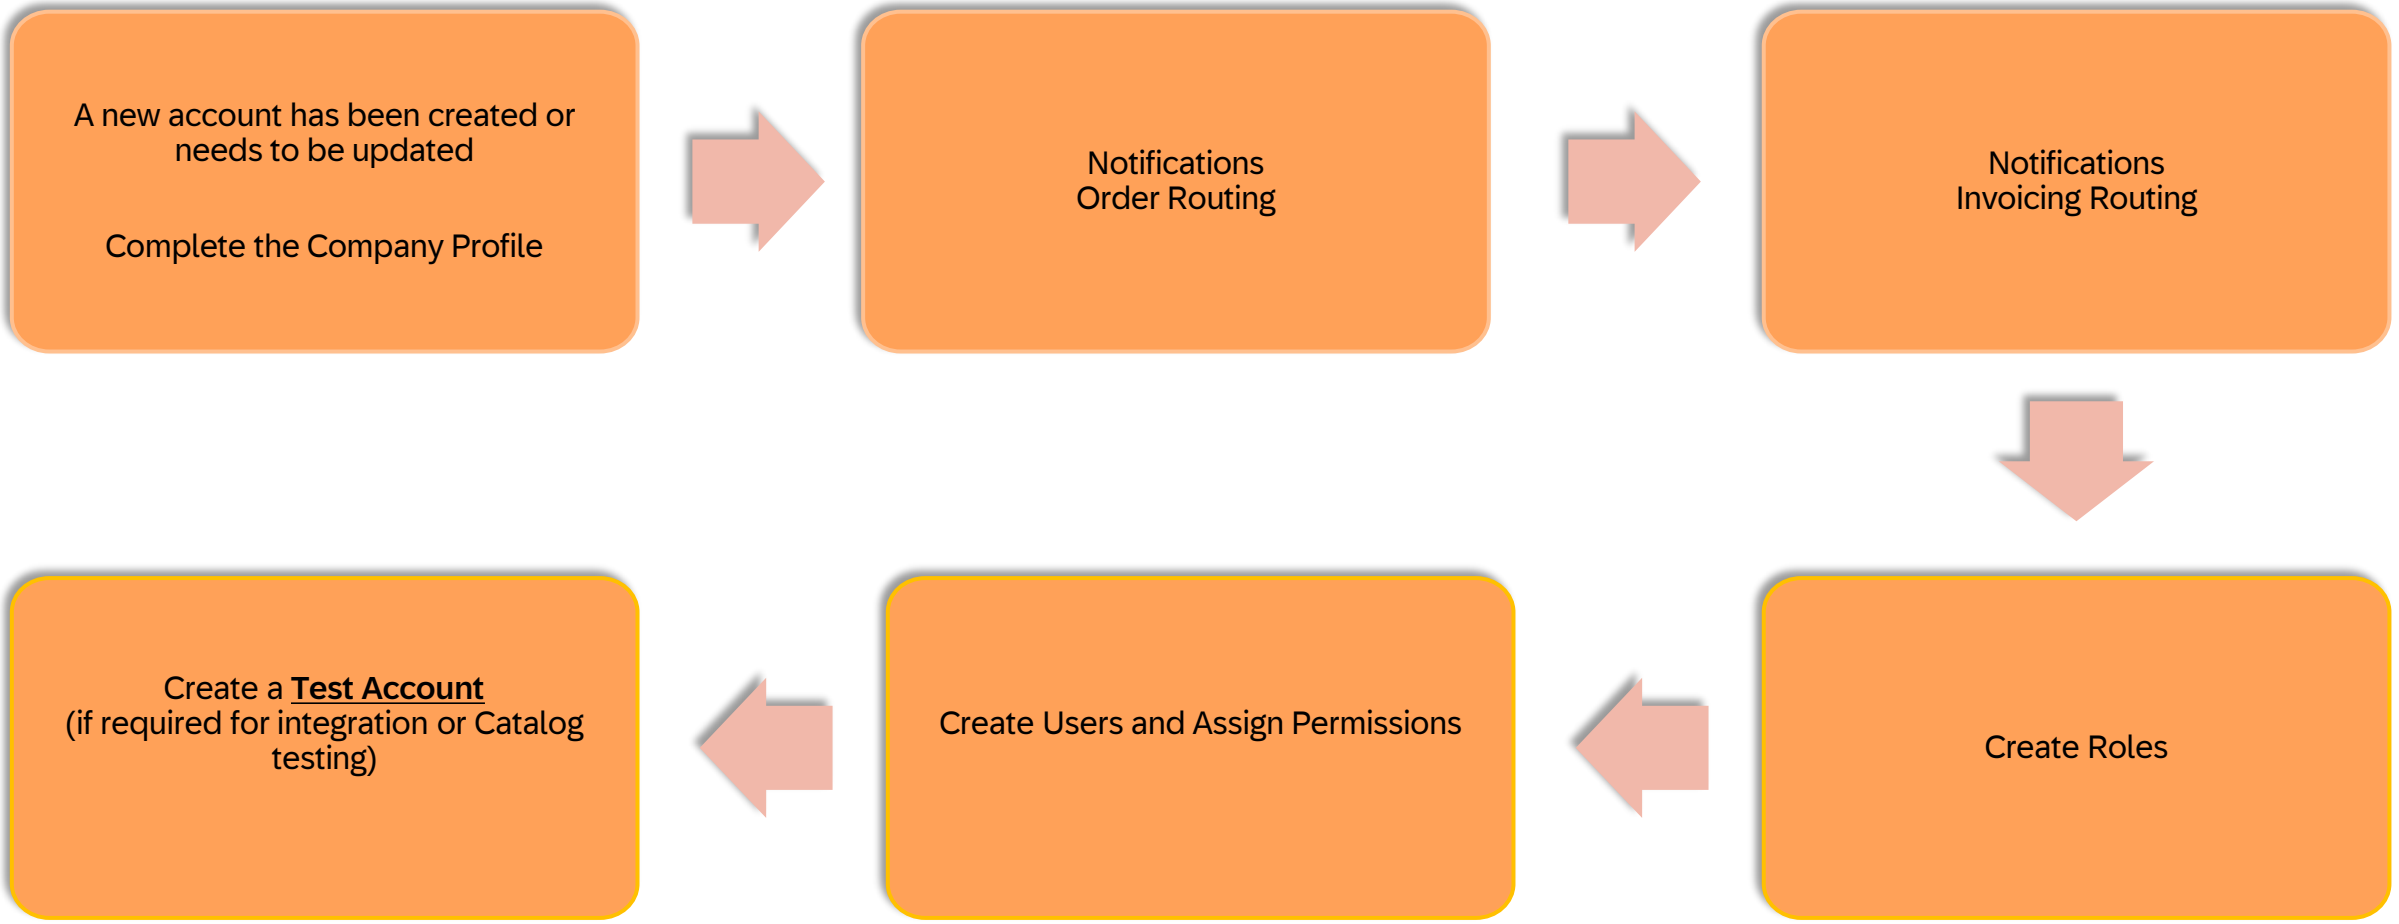
1. SAP Ariba Proposals and Questionnaires screen
2. The name of each buyer on the account is listed along the top in blue
3. Events can be:
    - Surveys
    - Auctions
    - RFIs
    - RFPs
    - RFQs
4. Risk Assessments
5. Questionnaires
    - Registration Questionnaires
    - Qualification Questionnaires
    - Questionnaires
4. Certificates
5. Tasks



Account Configuration - Company Profile

Setting up for Success – What you need to know - Transacting Account

- Once you have received your Welcome email and have credentials, the System Administrator will need to ensure that the business Transacting Account is set up for success. This includes ensuring that the company profile access by potential buyers is accurate and correct, that notifications are for specific account information are sent to the correct user/s.



Information

- The Company Profile is used by Suppliers to add information
- Information with an asterisk in Mandatory
- Adding information that is not mandatory provides more details about your business
- Account Configuration allows the System Administrator to set up the SAP Business Network for users, ensuring that the information is specific to the supplier and consistent across all users
- The Company Profile can be accessed via either the SAP Business Network Account or the SAP Ariba Proposals and Questionnaires account, they are one in the same, and all changes made via either account are the same
- Only one Company profile can be added to an ANID, this means that the Company Profile in your transacting account is reflected in the SAP Ariba Proposals and Questionnaires account

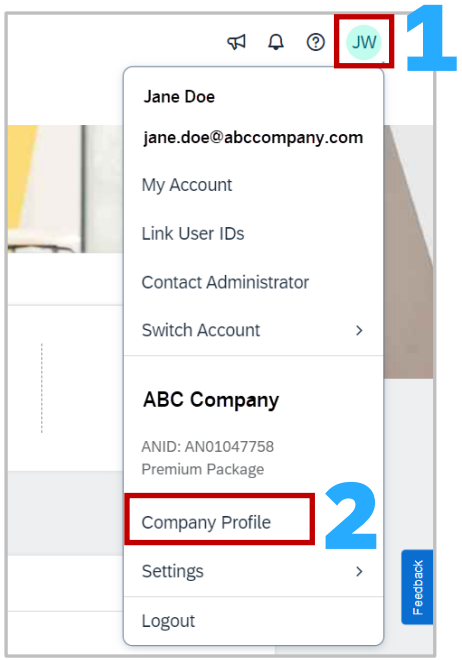
Accessing the Company Profile Screen

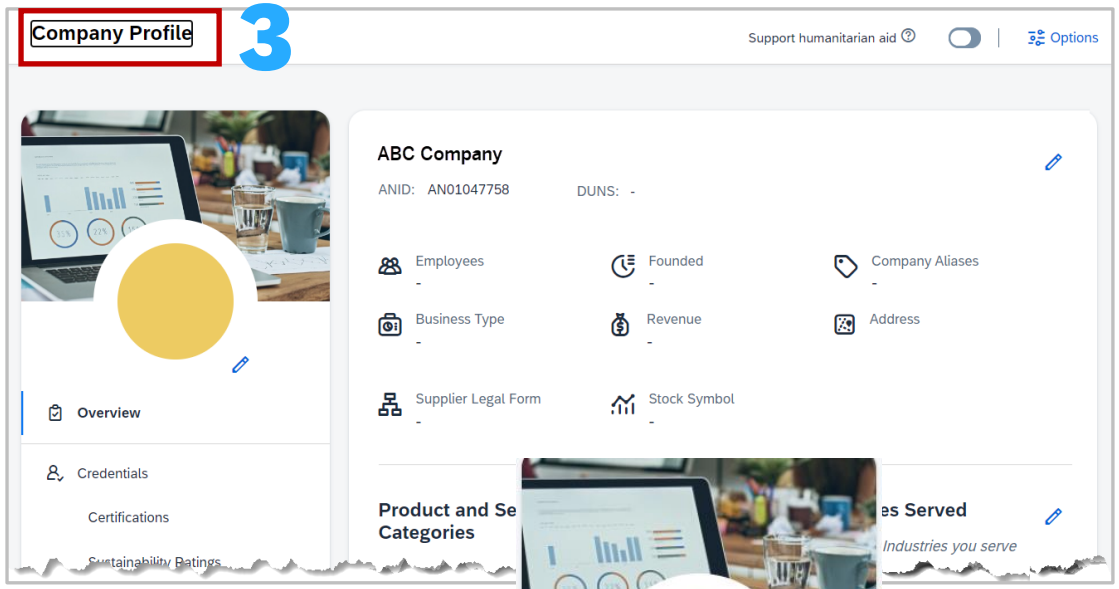
The Company profile provides basic information about your business and provides information to Buyers performing a search in the Buyer SAP Business Network

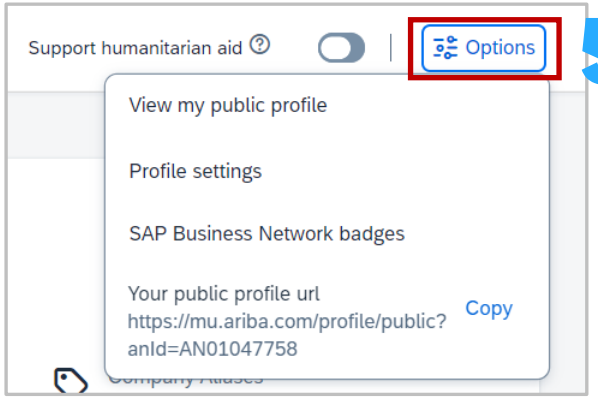
1. Click on your **initials** at the top of the page
2. Select **Company Profile**
3. The **Company Profile** is displayed
4. There are a number of sections in the company profile:
   - Overview
   - Certifications
   - Sustainability Ratings
   - Additional Addresses
   - Business Information
   - Contact
   - Additional Documents

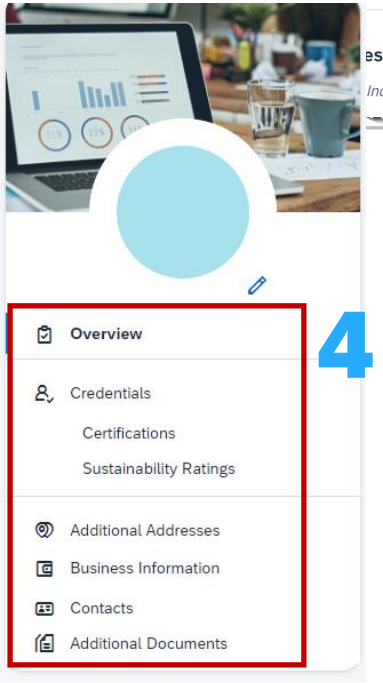
As the System Administrator, the level of information completed is based on the needs of your business

5. Options – Allows Suppliers to view their Public Profile
   - Identify the Profile Settings
   - Identify if they have achieved any SAP Business Network Badges
   - Copy their SAP Business Network Public Profile









Using Options

With the Company Profile Page Displayed:

1. Click on **Options** at the top of the page

The available options are shown in the drop-down list

2. Select **View my public profile**

   The screen displays the Company Profile that can be accessed by potential customers on the SAP Business Network

3. Select **Profile settings**

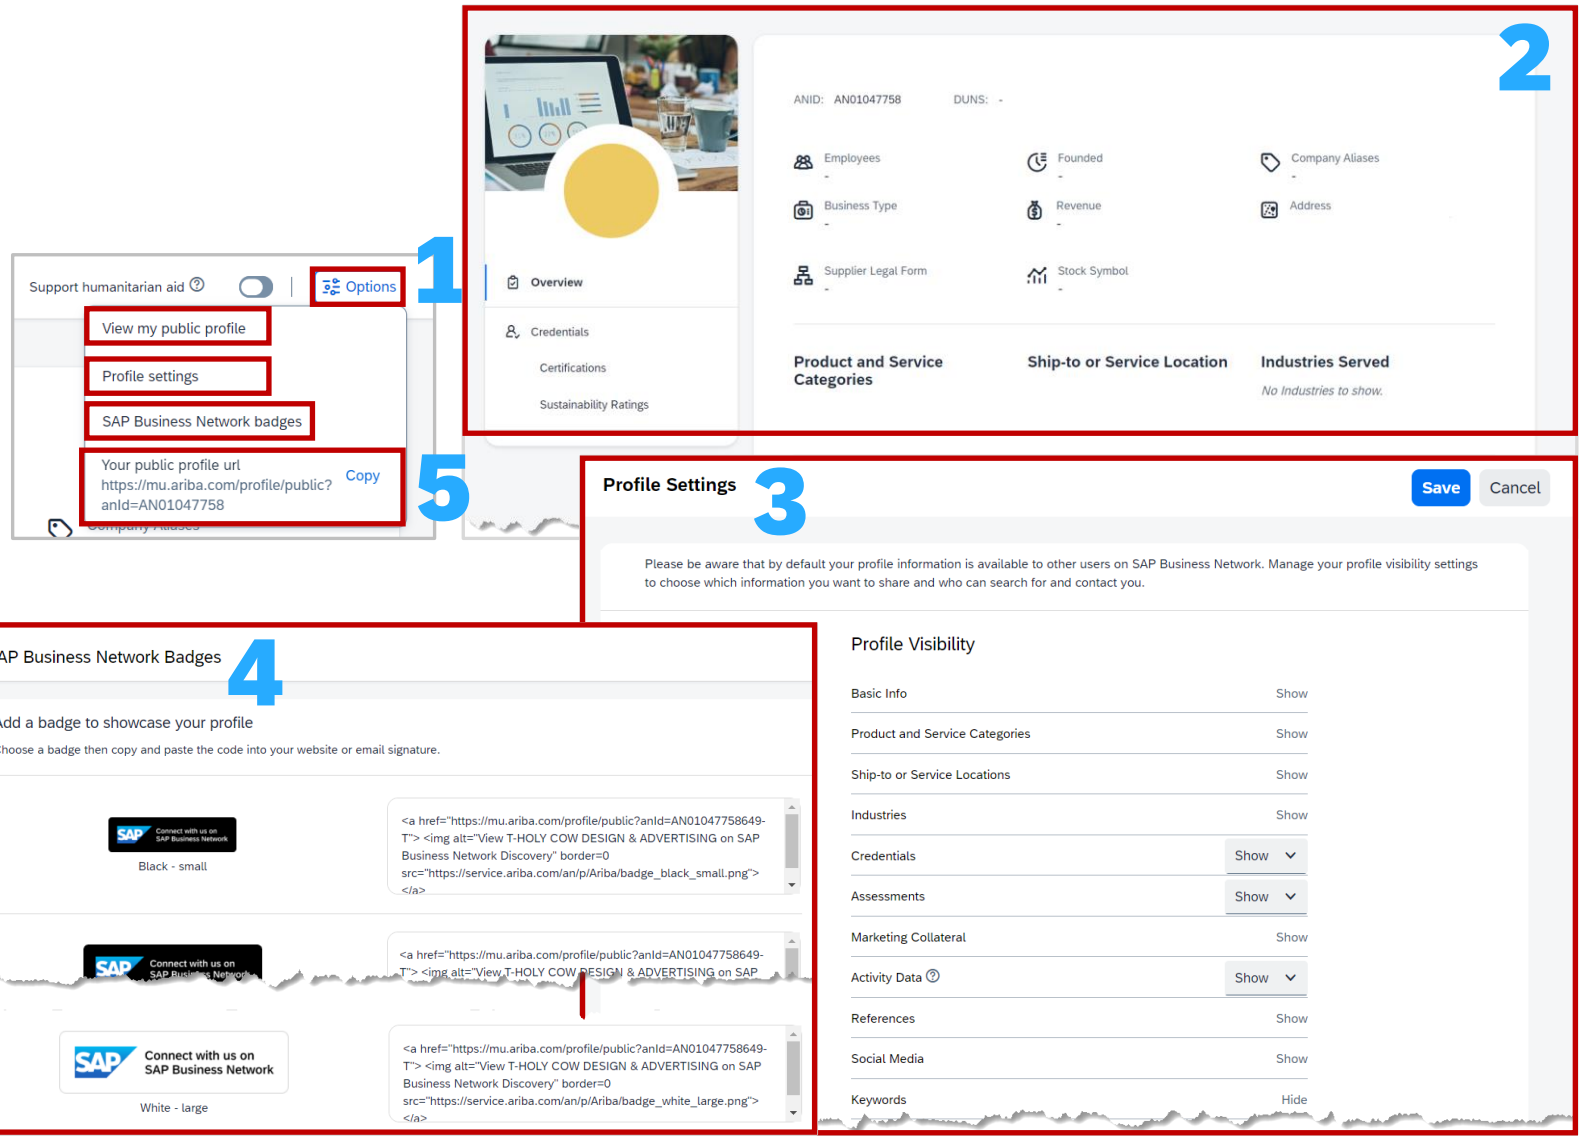
   Profile Settings allow some screens to be hidden or shown only to my trading partners, on the bottom of the Screen are Search Results Visibility options

4. Select **SAP Business Network badges**

   This option will require a Plug-In and requires acceptance of the content and information

5. **Your Public Profile url**, click on copy to share

   The ability to company the Public URL is available, the link provides direct access to the profile for your trading partners useful when there are a number of accounts



Profile Settings - Search Results Visibility

Search Results Visibility allows suppliers to identify what level of information their Trading Partners can see when they perform a search

Please be aware that by default your profile information is available to other users on the SAP Business Network. Manage your profile visibility settings to choose which information you want to share and who can search for and contact you.

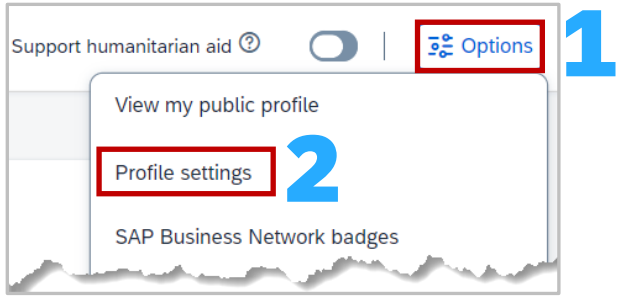
1. Click on **Options** at the top of the page
2. Select **Profile Settings**

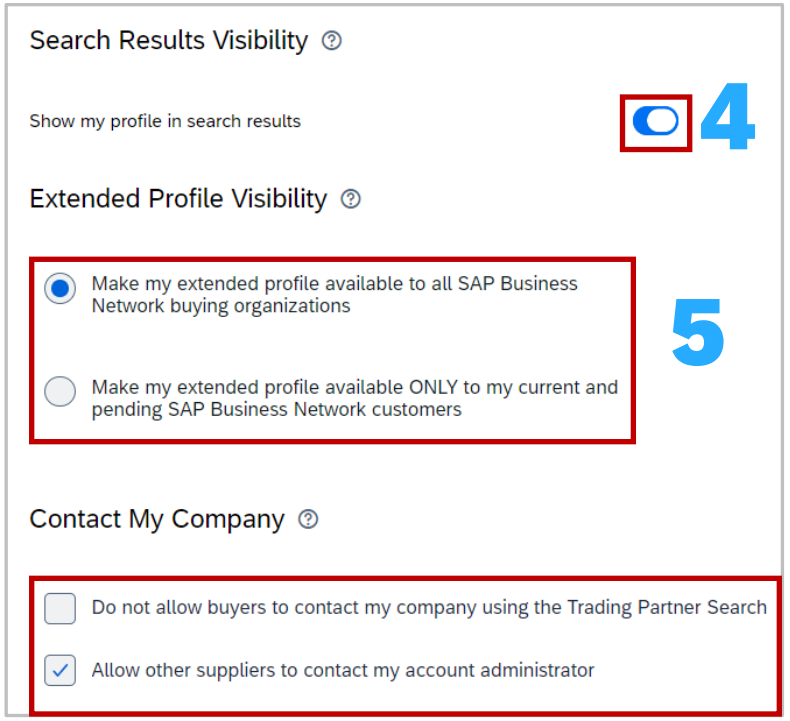
Note: Greyed-out options cannot be changed as they are part of the default settings

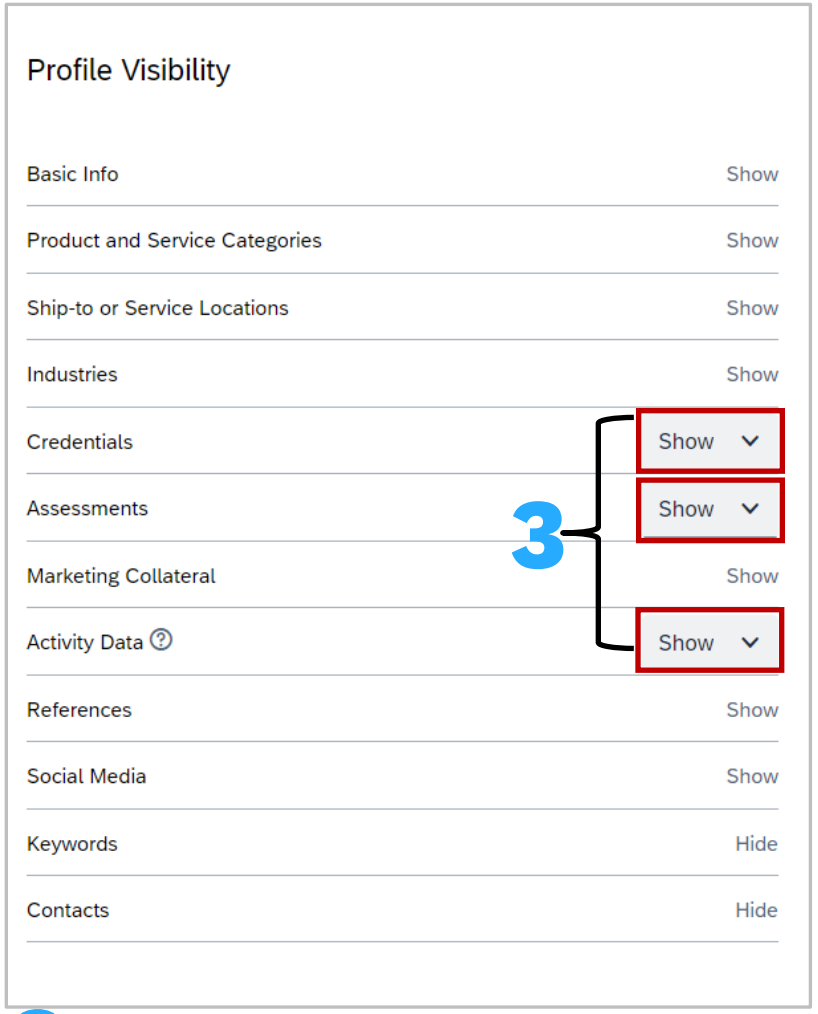
3. Update the options with a drop-down list

The drop-down will either display Show/Hide or Show/Show to my trading partners only

4. Scroll down to display the Search Results Visibility section, to stop your profile from appearing in search results slide the slider across
5. Determine whether you want your extended profile available select the required option
6. Determine the level of contact your business requires, select the required option







Update Logo

With the Company Profile Page Displayed:

1. Click on the

The Upload company logo pop-up box is displayed

1. Click on **See example**

Examples of how the logo should be positioned for maximum effect

2. Click on **Browse**

Your file system will open, locate and select the logo you wish to use, select it and click on Open

Logos must be less than 200KB

3. Click on **Save**

The Screen Returns to Company Profile, and the logo will be displayed

REMEMBER:

- 250 maximum pixels (so use resize)
- Less than 200KB size

4. Click on **Save**
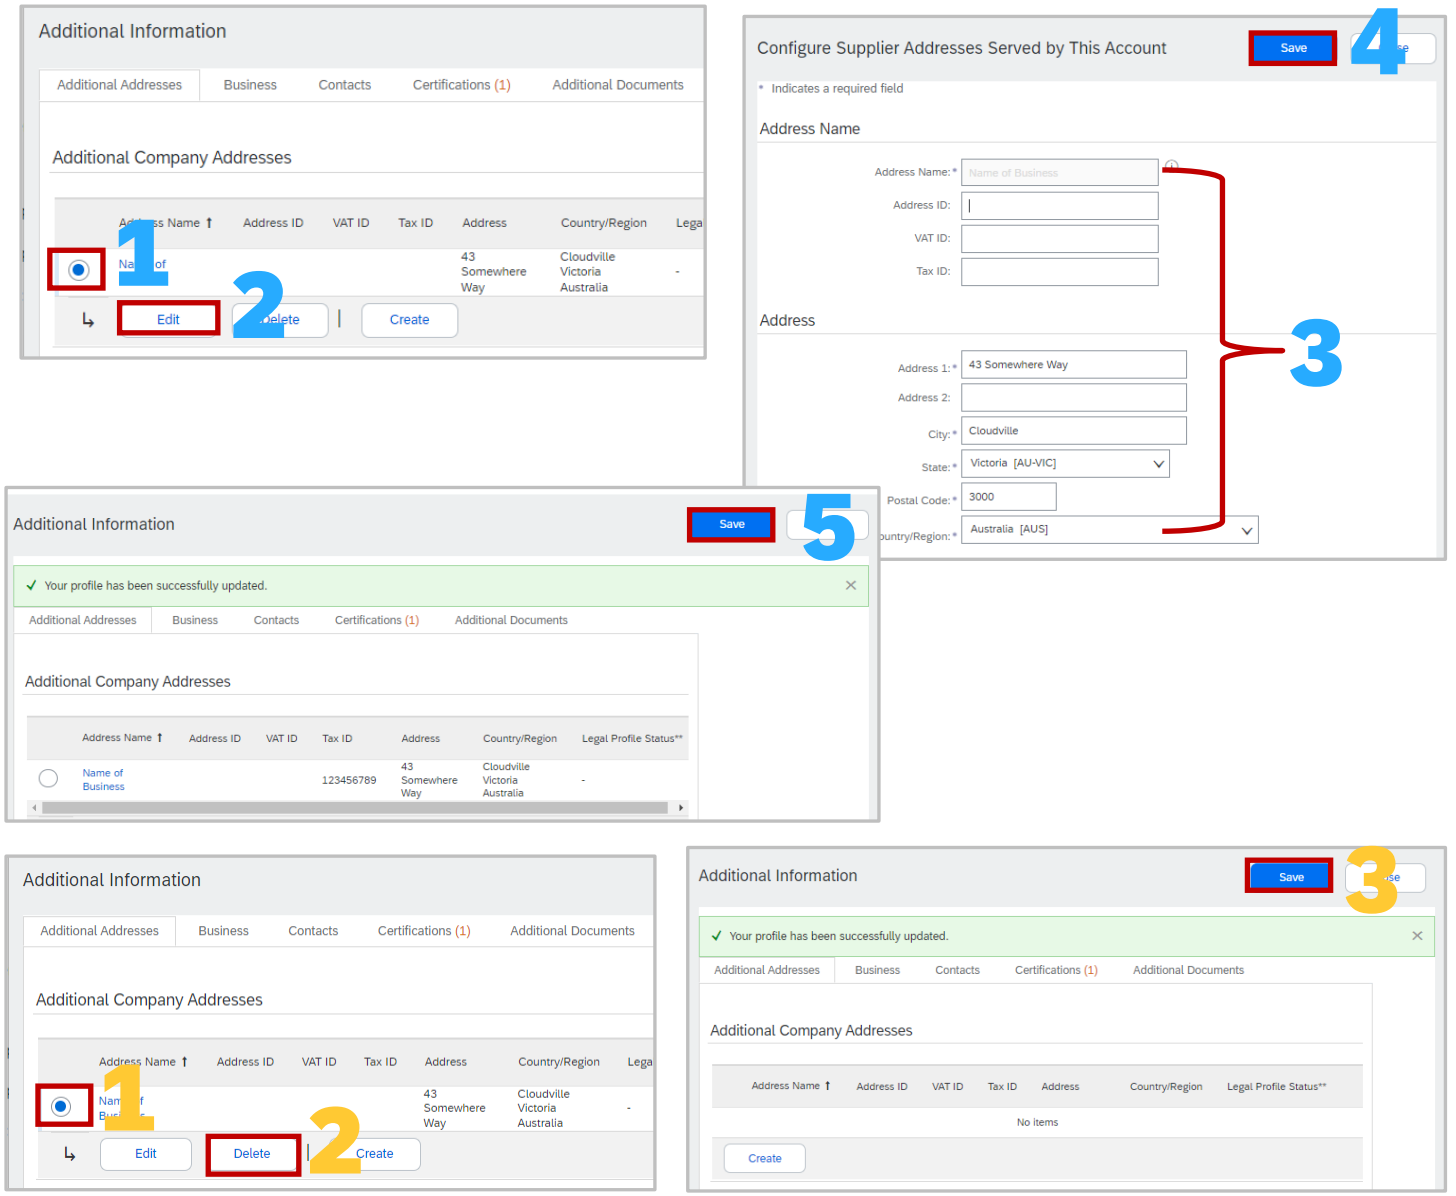
5. Screen returns to the Additional Company Address screen, click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save

To Delete an Additional or incorrect Address:

1. Select the Address Name you wish to delete (orange numbers)
2. Click on **Delete**
3. Click on **Save**



Additional Information – Business

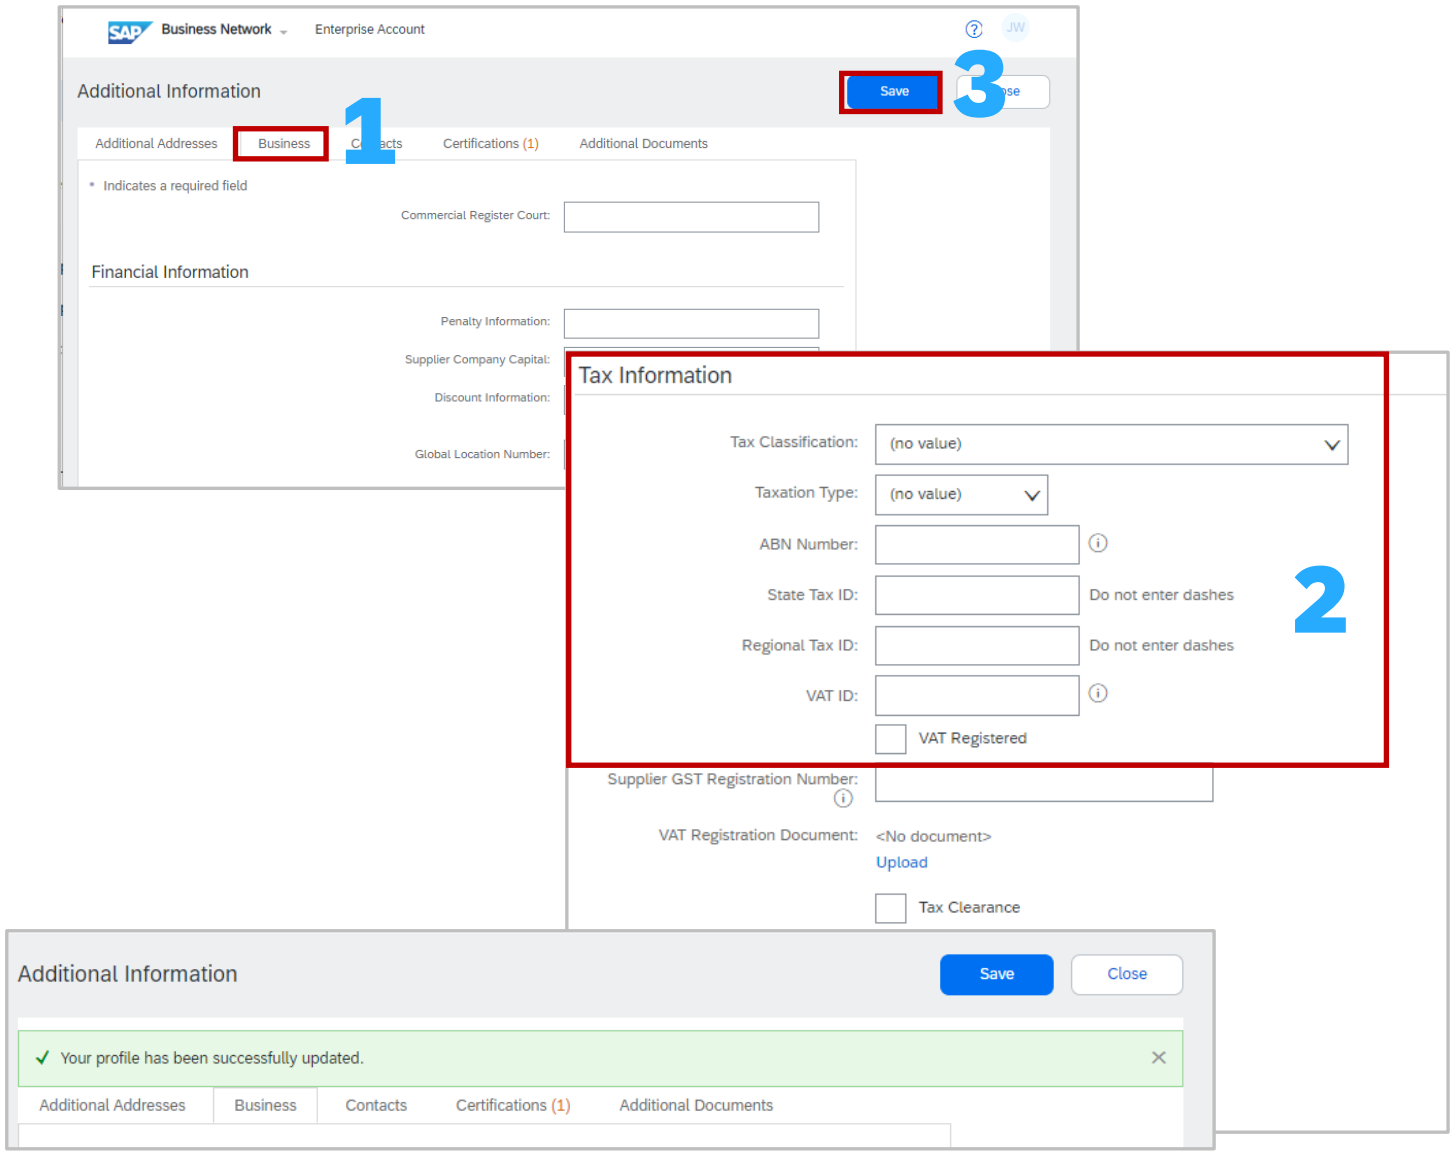
Use the Business Tab to add information about your Business that is not shown on the business Public profile, however is not mandatory.

Adding the relevant Tax information ensures that these fields are automatically populated when required during the Invoice creation process (where completed)

Display the Additional Company Addresses screen

1. Select the **Business** tab
2. Add the applicable and relevant Tax information
3. Click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save



Additional Information – Contacts Information

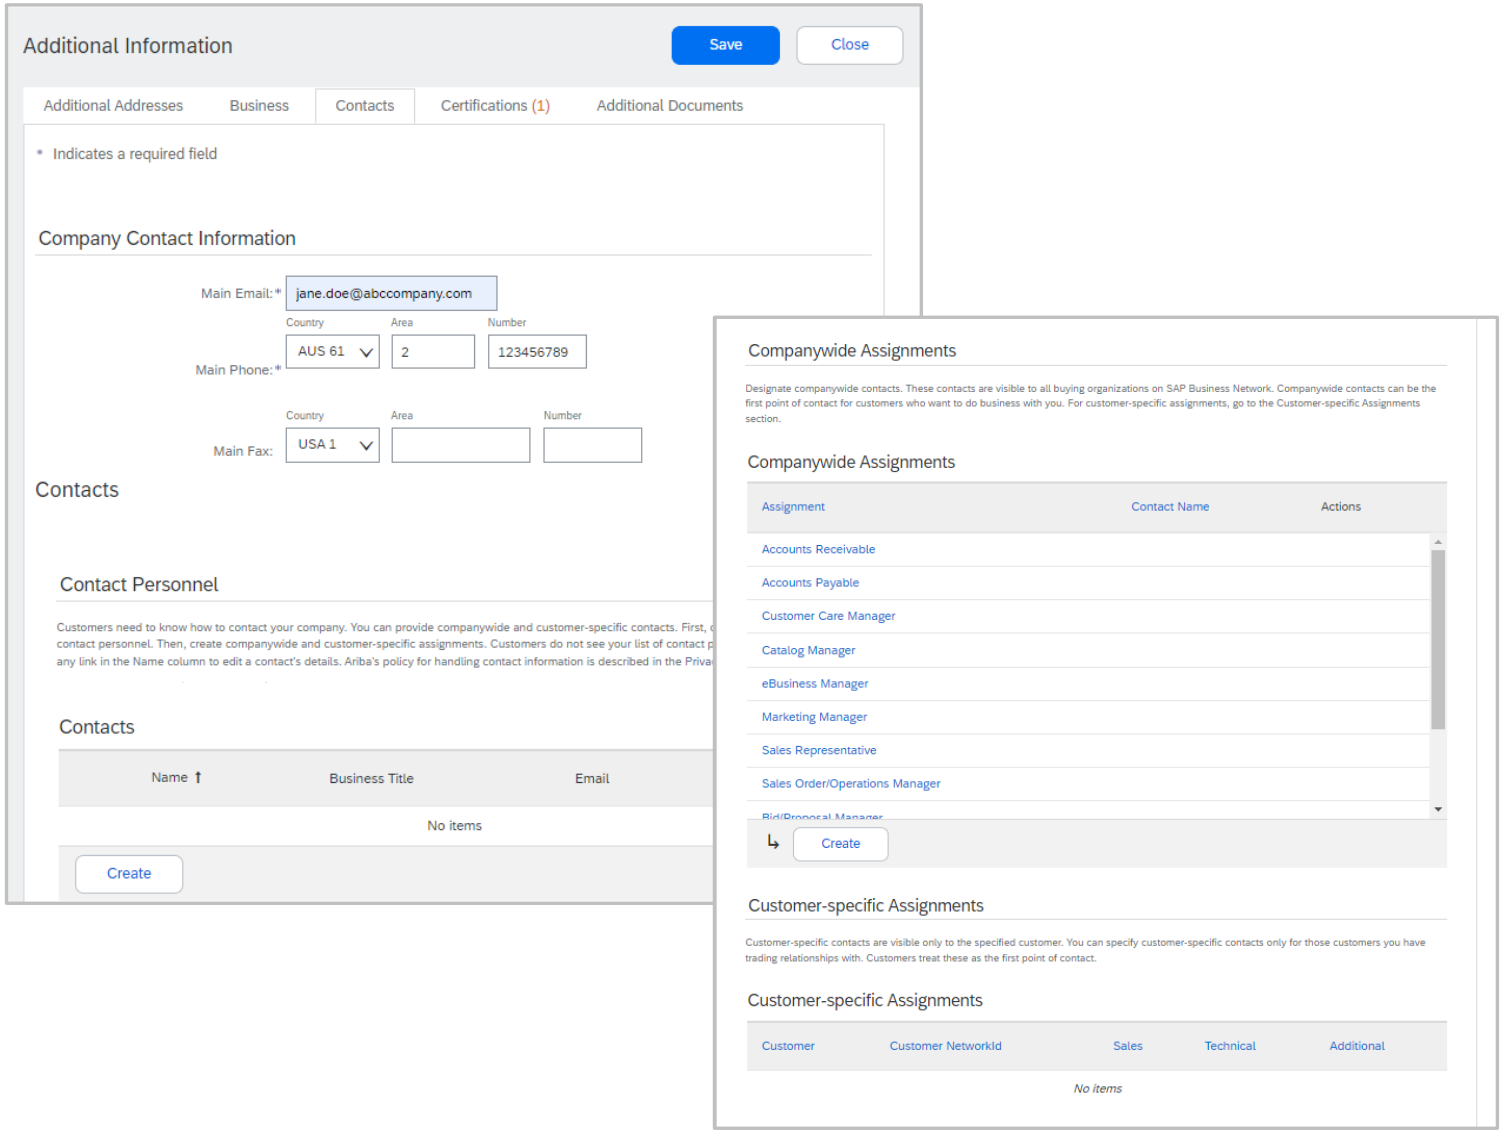
Use the Contacts Tab provides information about whom they should contact in your business company-wide and customer-specific contacts.

The contact sections are:

Contact Personnel – internal only, your customers can not see this list

Companywide Contacts – these contacts are visible to all buyers on the SAP Business Network

Customer Specific Assignment – visible only to specified customers, such as customers with a trading relationship with your business so that a Buyer knows who the main point of contact should be



Additional Information – Company Contact and Contact Personnel Sections

Display the Additional Company Addresses screen

1. Select the **Contacts** tab

Note: All fields with Asterisks are mandatory, others without an asterisk can be completed or left blank

2. Confirm, Edit or Update the main **Company Contact Information**

3. Click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save

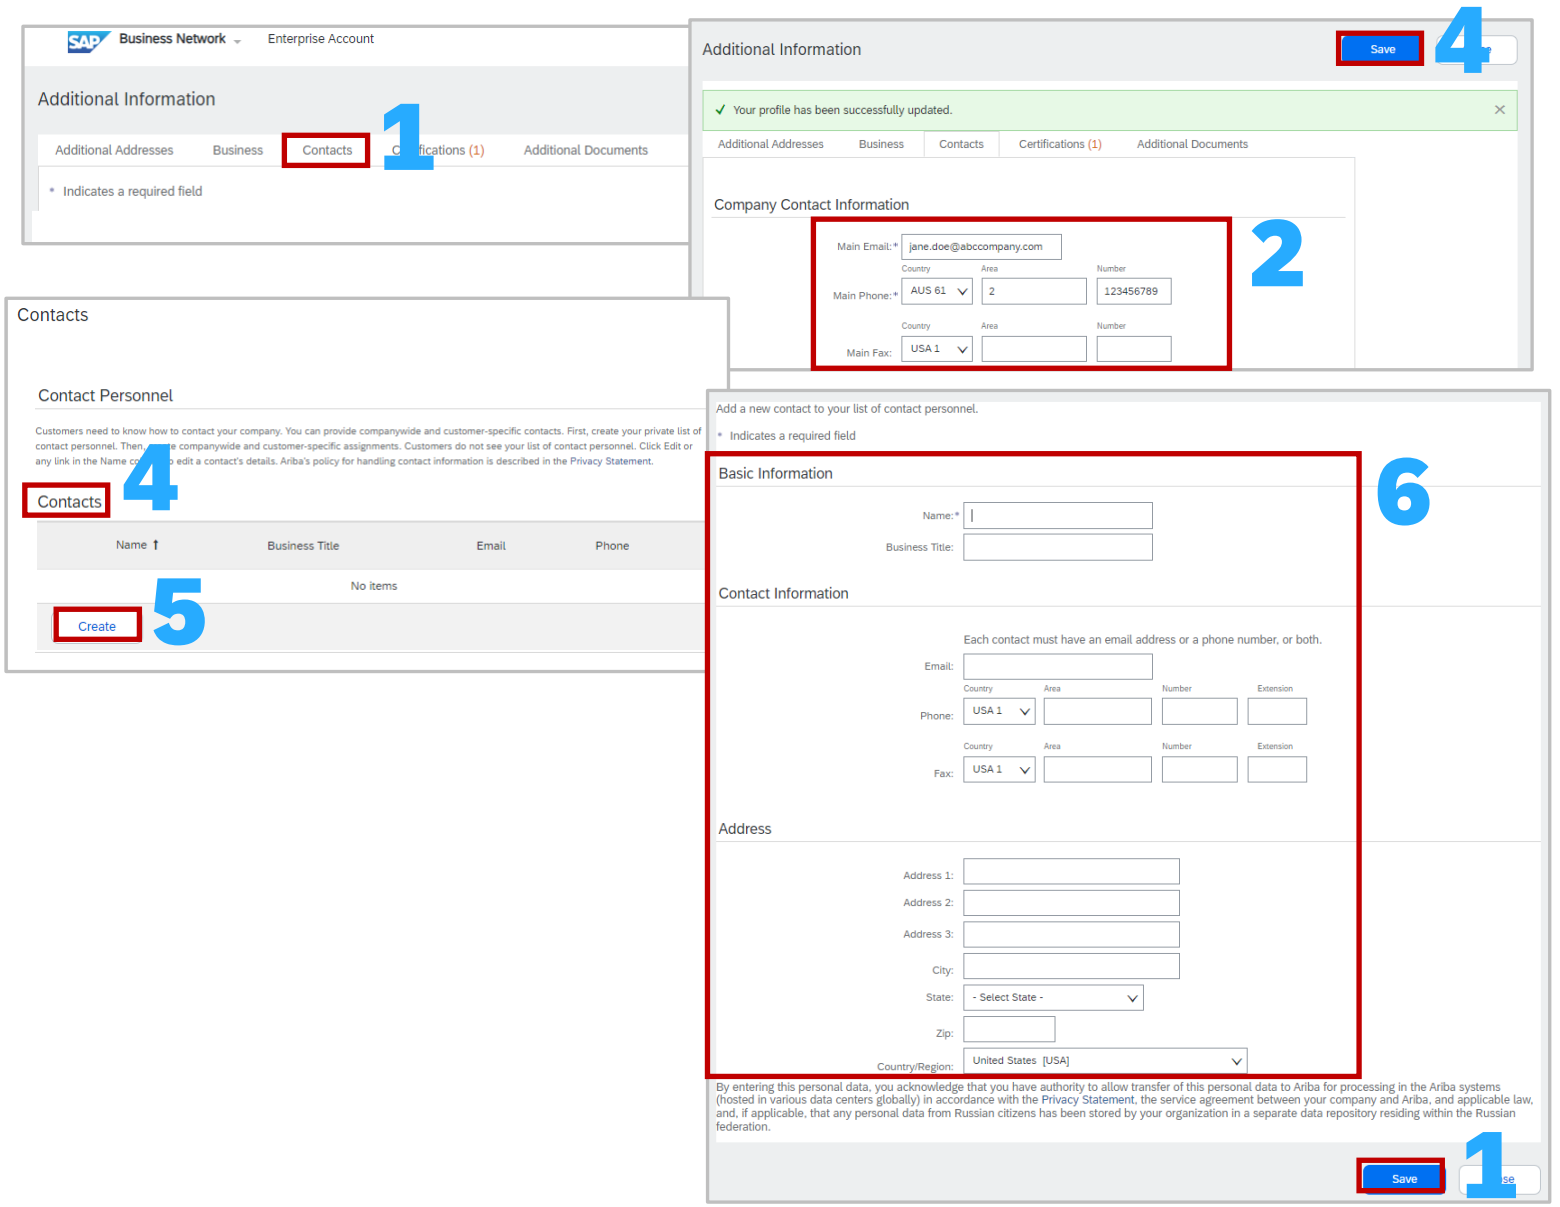
4. Scroll down to **Contacts**

5. Click on **Create**

The **Create new Contact** screen is displayed

6. Complete all fields with an **Asterisks**

7. Click on **Save**



Additional Information – Company-Wide Assignments Section

In order to complete company-wide assignments the Contact Personnel section needs to be set up first so that you can assign contact types. The Company-Wide Contacts are visible to all Buying Organisations on the SAP Business Network.

Display the Additional Company Addresses screen

1. Select the **Contacts** tab

Note: All fields with Asterisks are mandatory, others without an asterisk can be completed or left blank

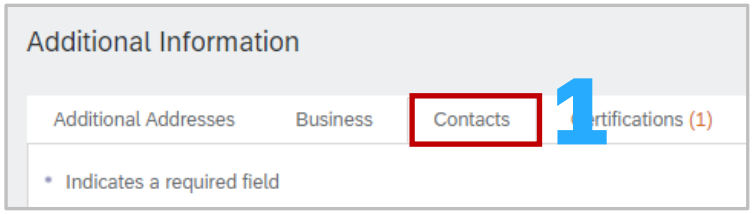
2. Scroll down to **Companywide Assignments**
3. Click on the **Assignment** type you wish to add a contact to
4. Select the **Contact Person** from the drop-down list
5. Click on **Save**, and repeat to add more contacts to other listed **Assignment** Roles

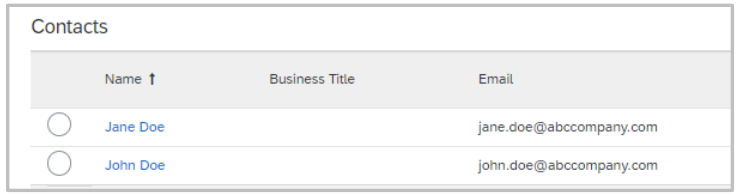
Note: You can add the same resource name to multiple Assignment Roles, but you can only add 1 name to each Assignment

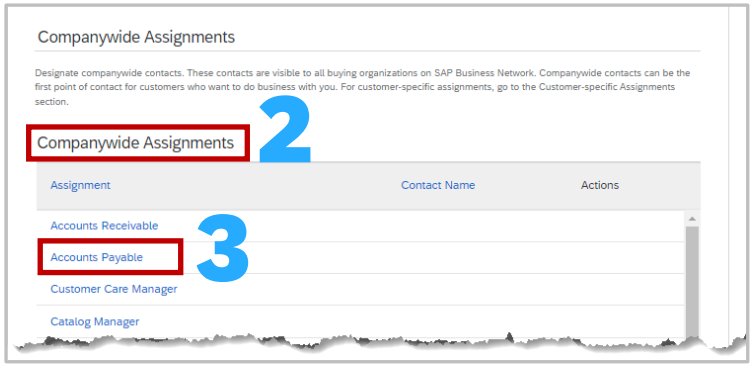
To Add more Assignments

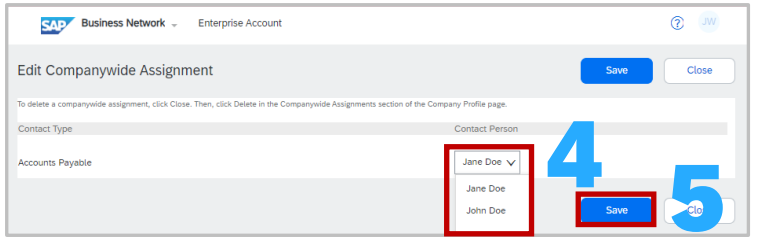
6. To add other roles or names of roles that reflect your business and can already be shown in the original listed roles, click on **Create**
7. Enter the **Contact Type** role
8. Click on **Save**
9. Click on **Save**

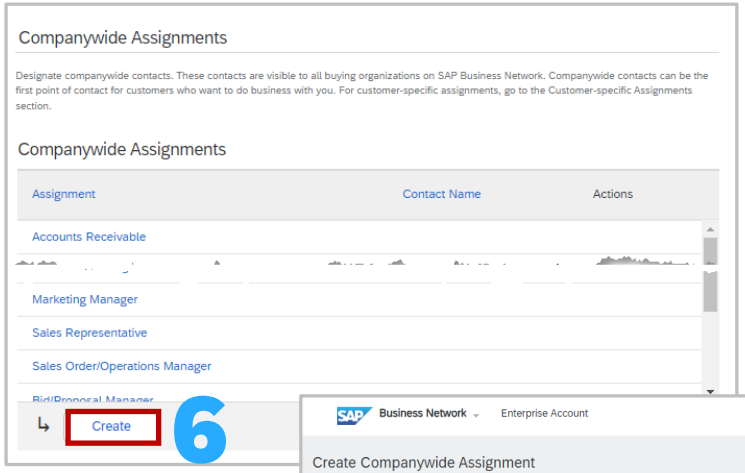
A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save

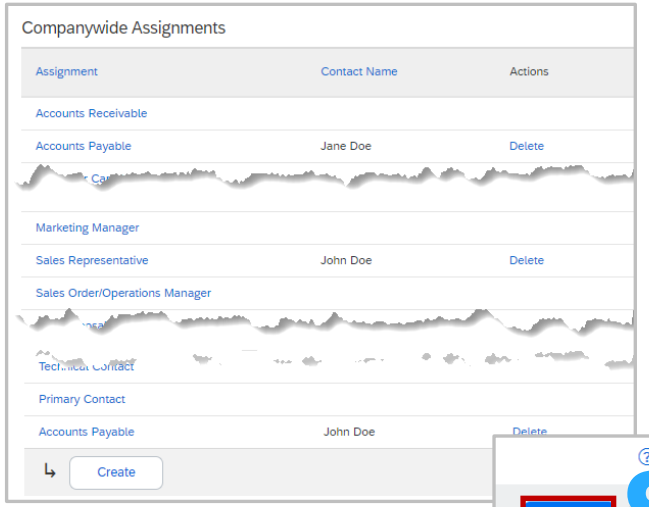


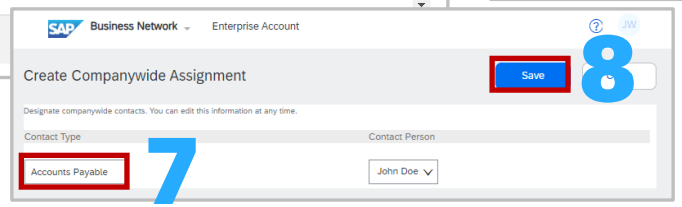


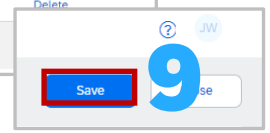












Additional Information – Customer - Specific Assignments Section

In order to complete Customer-specific Assignments you need to have a trading relationship with them on this ANID. The Company-Wide Contacts are visible to the specified customer and should be the first point of contact for the Buyer.

1. Select the **Contacts** tab

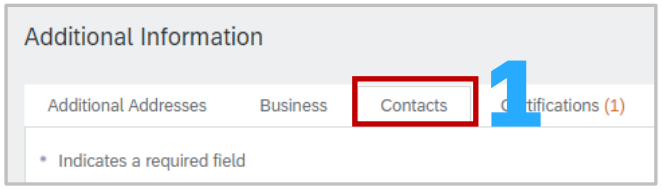
Note: All fields with Asterisks are mandatory, others without an asterisk can be completed or left blank

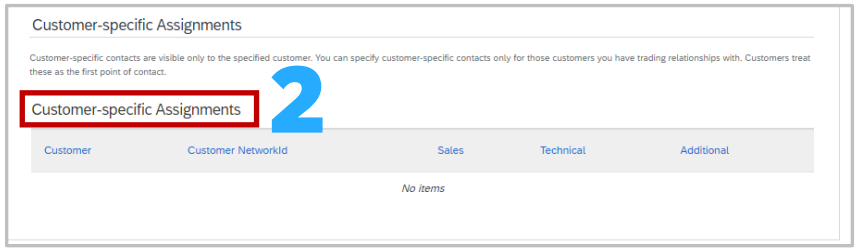
2. Scroll down to **Customer-specific Assignments**
3. Click on the **Buyer Name** type you wish to add a contact to
4. Is the Contact Type a Sales Representative or a Technical Contact, if **Yes**, select the name from the drop-down list
5. Do you need to add a new Contact Type (role), if **Yes**, enter the name of the role and select the name of the person from the **Contact Person drop-down** list

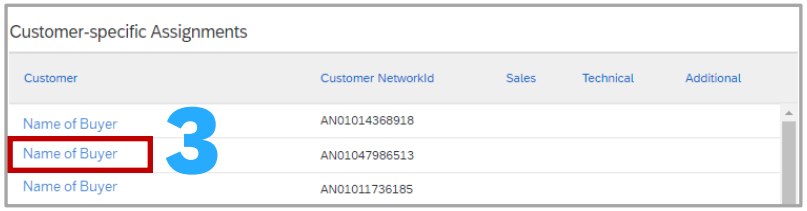
Note: You can only add 1 Contact type and select the name from the drop-down list of contacts already added

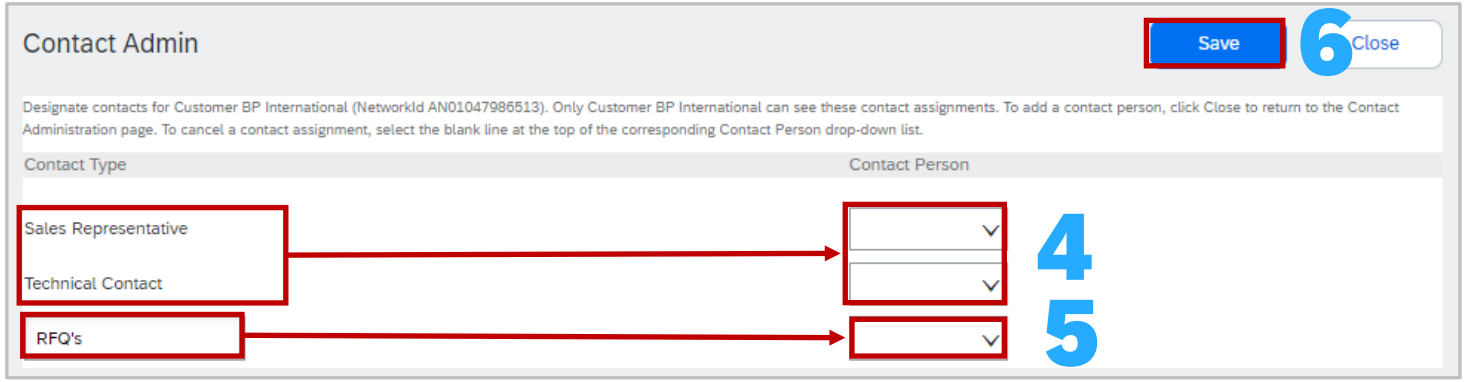
6. Click on **Save**
7. The screen returns to Contact, click on **Save**

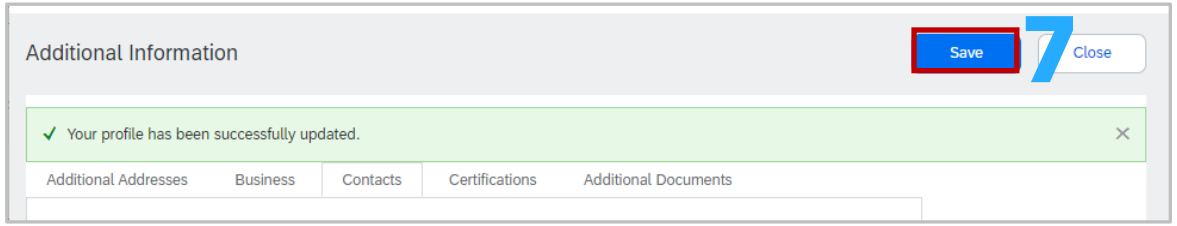
A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save











Additional Information – Certifications

The Certification screen within Additional Information caters for other types of certifications that are not internationally recognised but have significant differentiators in specific country markets.

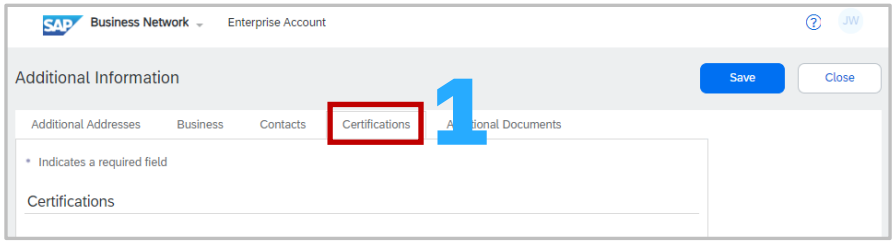
Buyers can view these designations in your Company Profile and search using this information when looking for new suppliers. There is no ability to upload certificates but is more to highlight niche market differentiators.

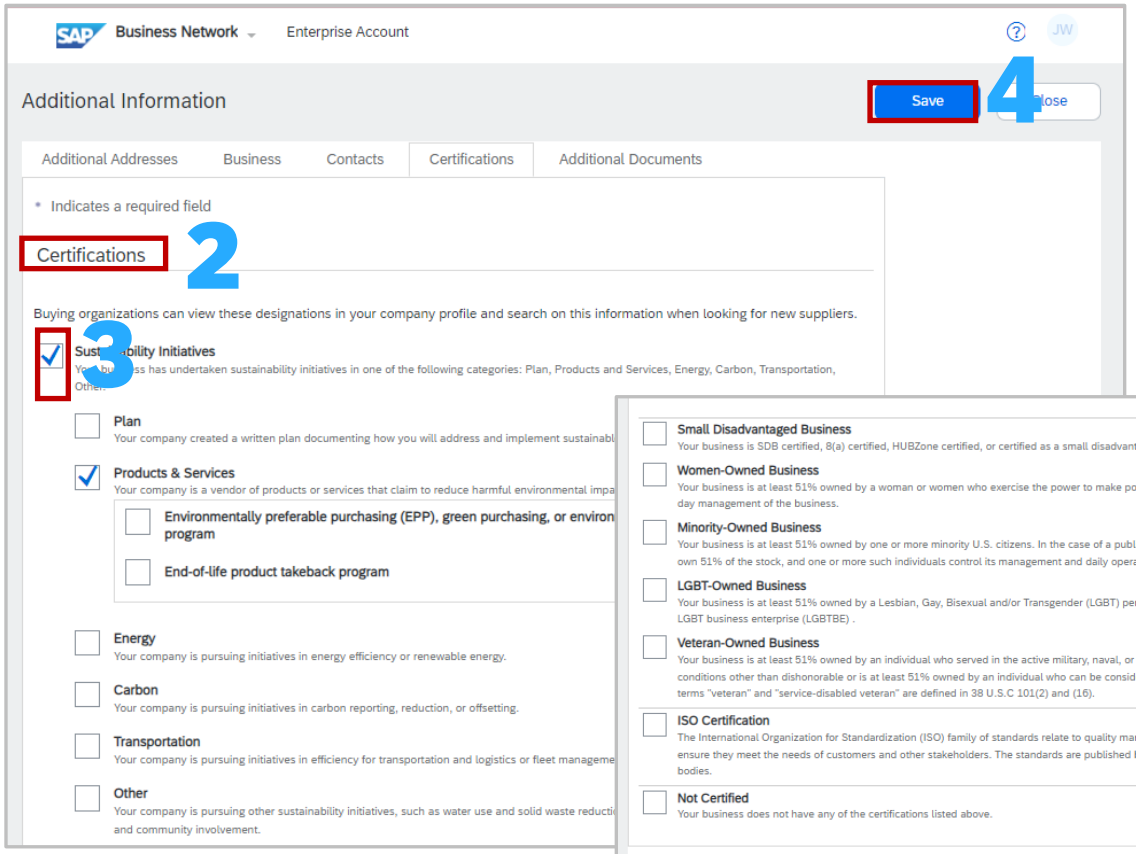
Globally recognised certifications can be uploaded to the Company Profile, refer to **Credentials - Certifications**

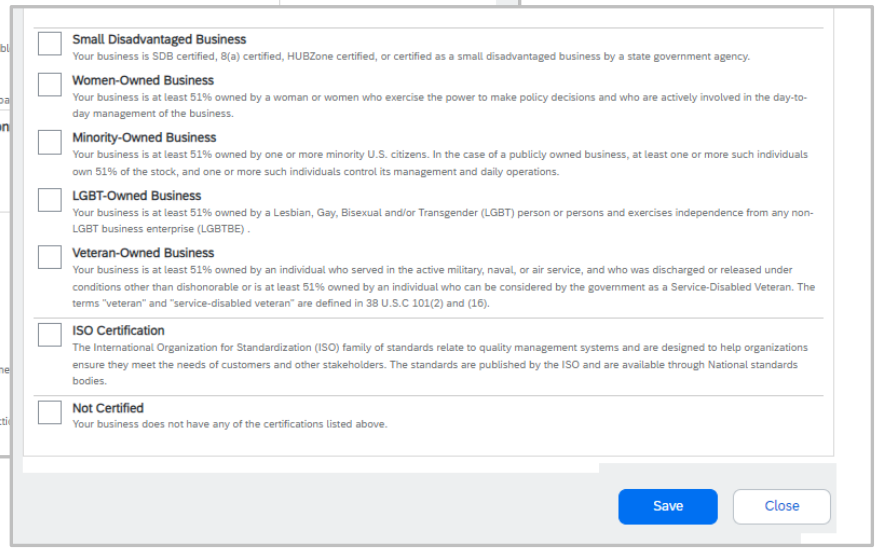
Display the Additional Company Addresses screen

1. Select the **Certifications** tab
2. Scroll through and select the **Certifications**
3. Select the **Certifications** required
4. Click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save







Company Profile - Company Keywords

Use Company Keywords to make finding your business/company easier to find.

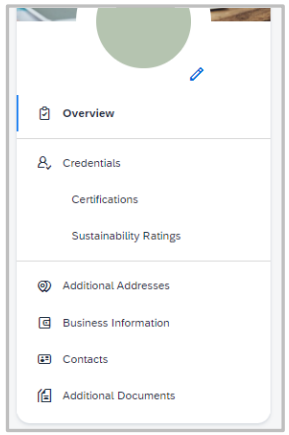
With the Company Profile Page Displayed:

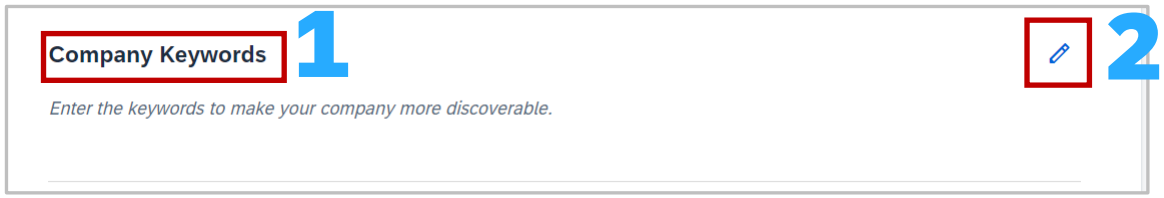
1. Scroll down to locate **Company Keywords**
2. Click on the ✎
3. Click on **+ Add Keywords**

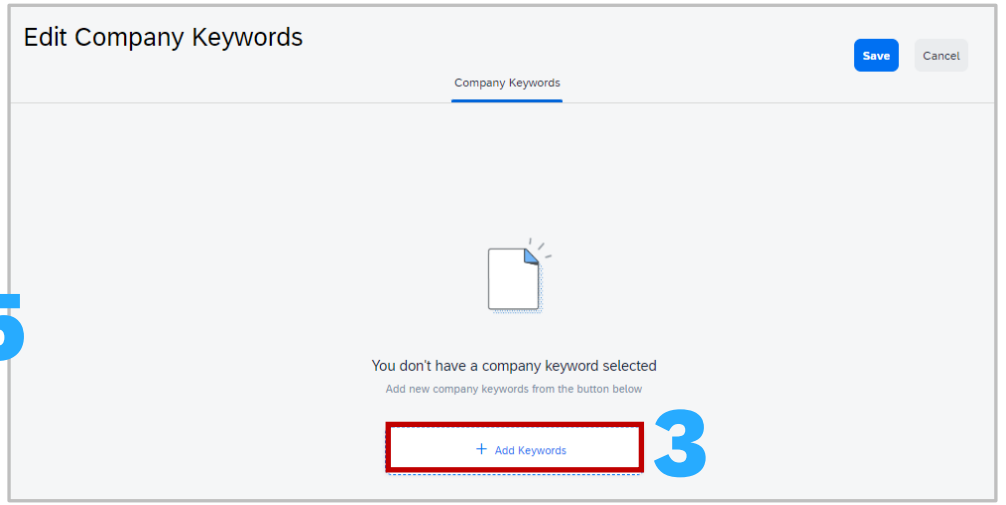
The **Add New Keywords** screen is displayed

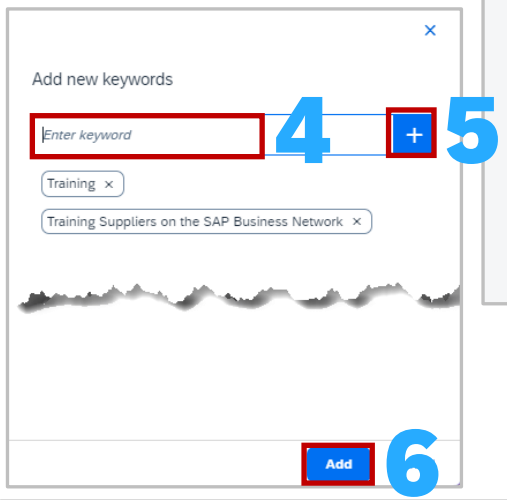
4. Enter a word or short sentence
5. Click on the +
6. Continue until all keywords have been entered and click on **Add**
7. Click on **Save**

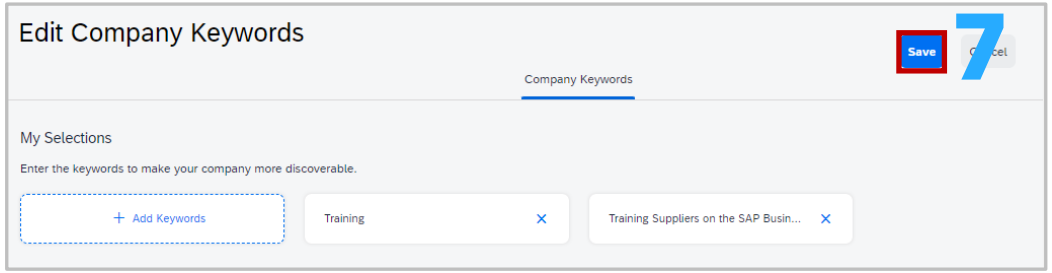
A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save







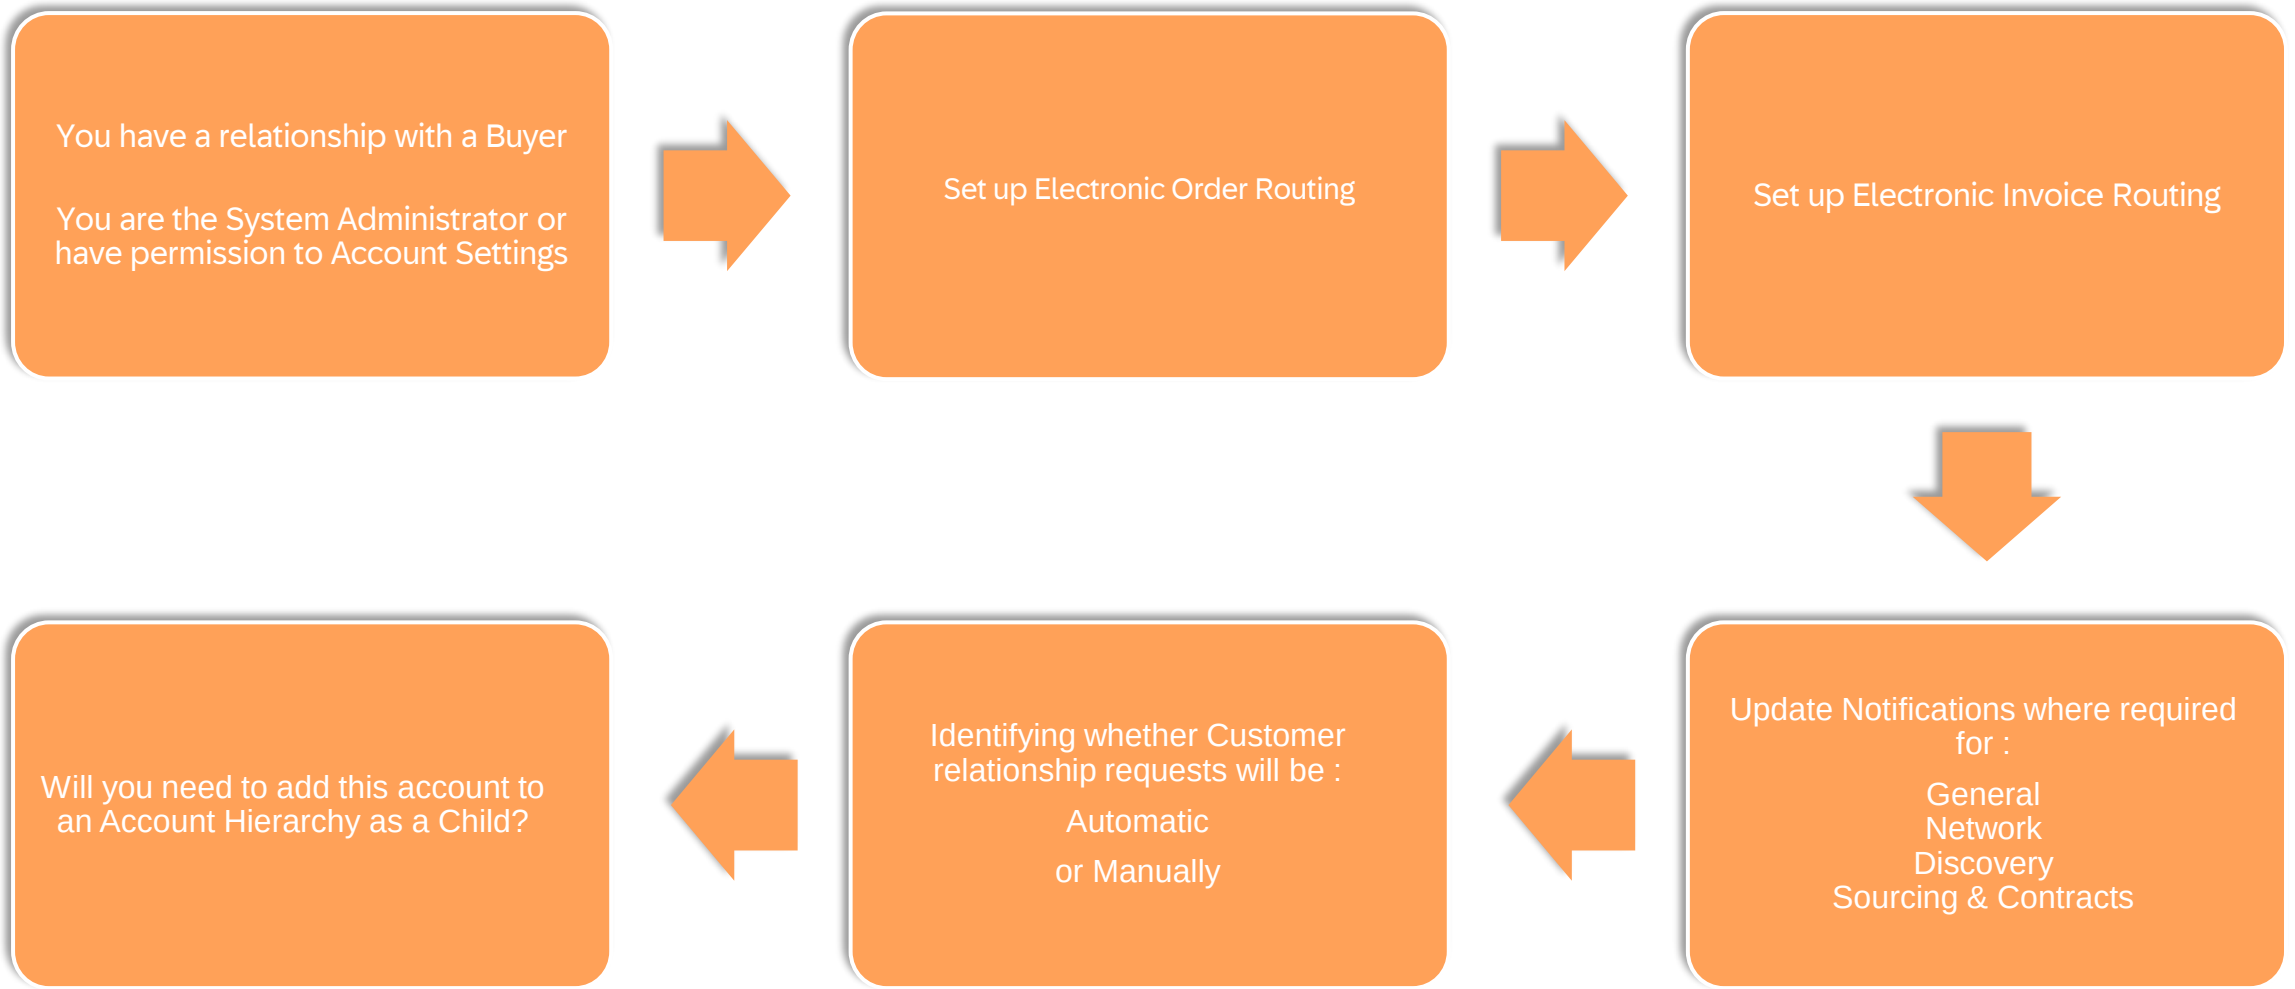




Account Settings

Account Settings Flow

- Account Settings allow Suppliers to set the communication parameters of documents in the SAP Business Network, for who is advised a new purchase order has been received to rejected invoice notifications



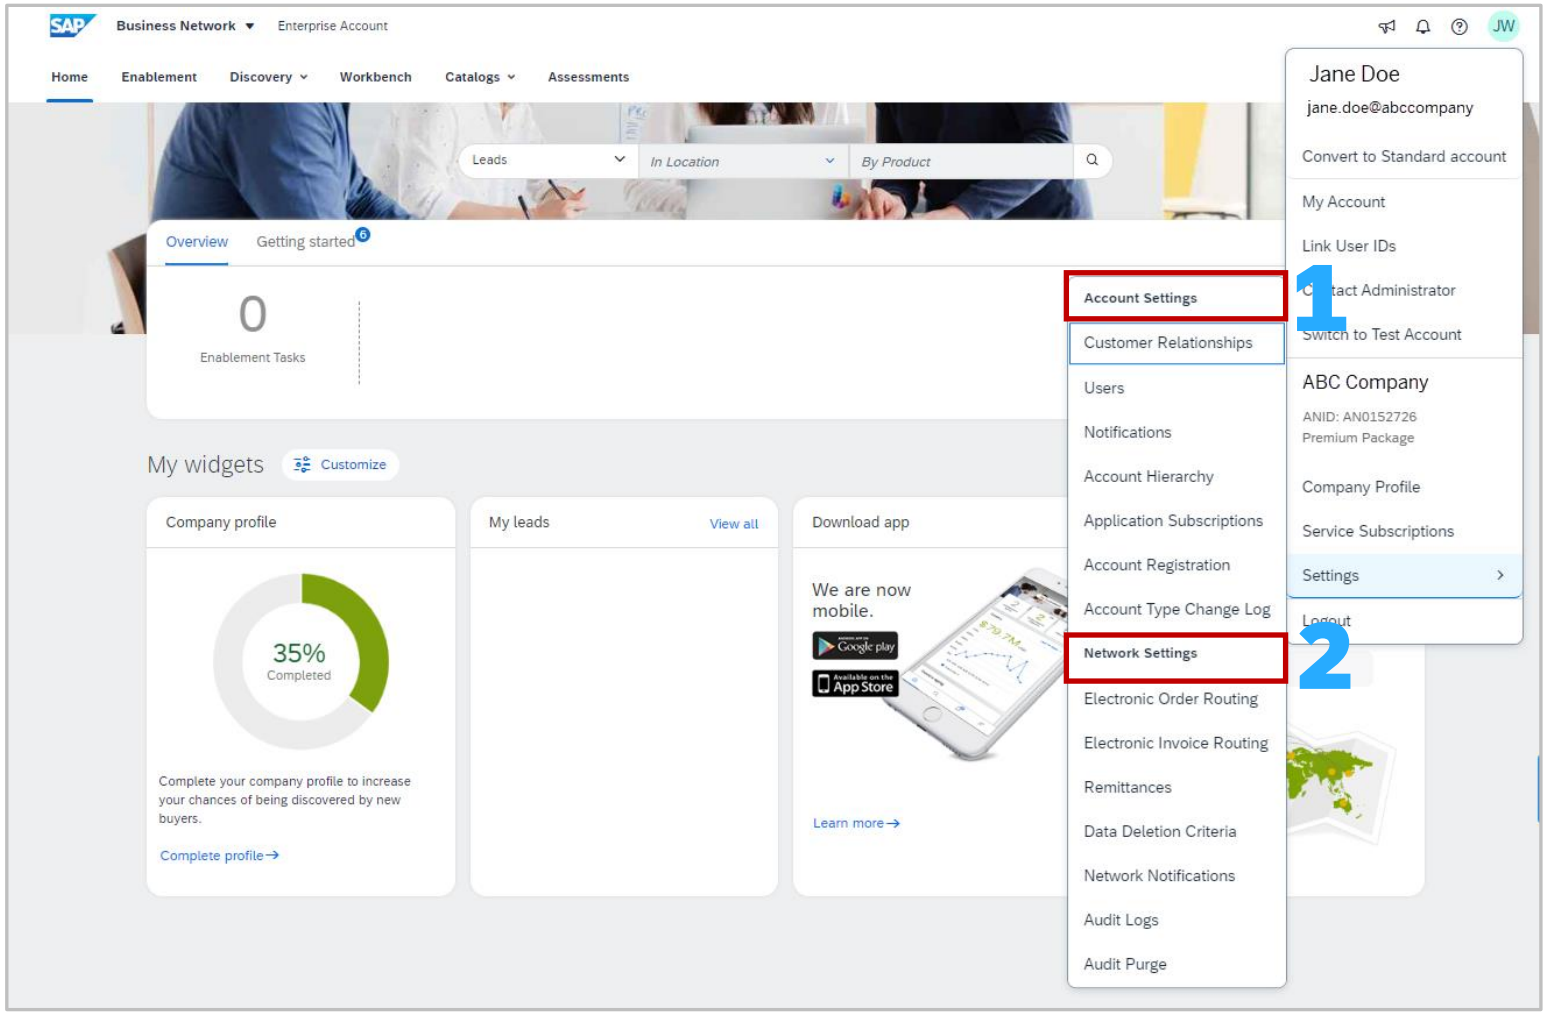
Settings Drop Down Information – Account Settings

The Settings selection under your name initials on the top right-hand corner provides access to the Account Settings drop-down list

- The drop-down list shows the selections available to all users, however, only the System Administrator has all ***available*** selections including Users and Audit Logs
- There may be additional selections based on the SAP Business Network account you have

1. Accounts Settings usually consists of:
   - Customer Relationships
   - Users
   - Notifications
   - Application Subscriptions
   - Account Registration

2. Network Settings usually consist of:
   - Electronic Order Routing
   - Electronic Invoice Routing
   - Accelerated Payments
   - Remittances
   - Data Deletion Criteria
   - Network Notifications
   - Audit Logs



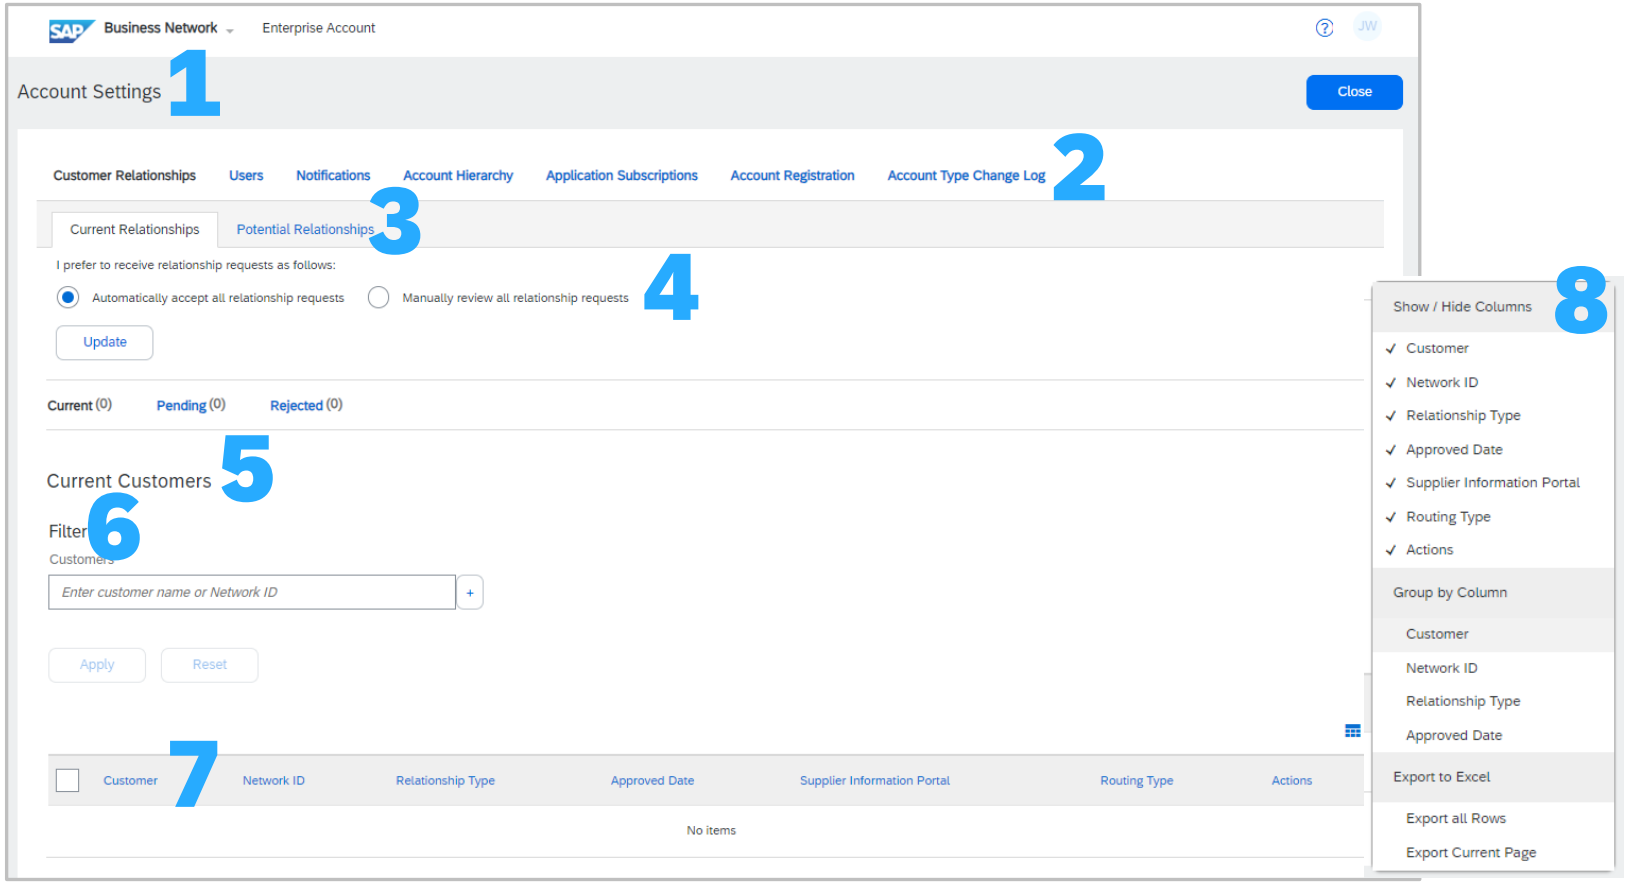
Account Setting Screen – Customer Relationship Information

The System Administrator has access to all relevant tabs under Account Settings, however, users will only have access to the tabs based on the permissions set for each user

Customer Relationships provides suppliers with information about:

- Current Relationships
- Potential Relationships
- Numbering Preferences
- More which contains Numbering Preferences and Automatic Invoice Creation

Note: Tabs can be used to access other sections under the Account Settings Screen instead of exiting and selecting from the Settings drop down list



1. **Account Settings** screen header
2. **Tabs** to other options under the Settings > Account Settings option
3. **Current Relationships** and **Potential Relationships** tab
4. **Relationship request options** – automatic or manual
5. **Current Customers** sub heading
6. **Filter** to search for customers
7. All Buyers that have a transacting relationship in the SAP Business Network
8. **Show Hide Columns** options

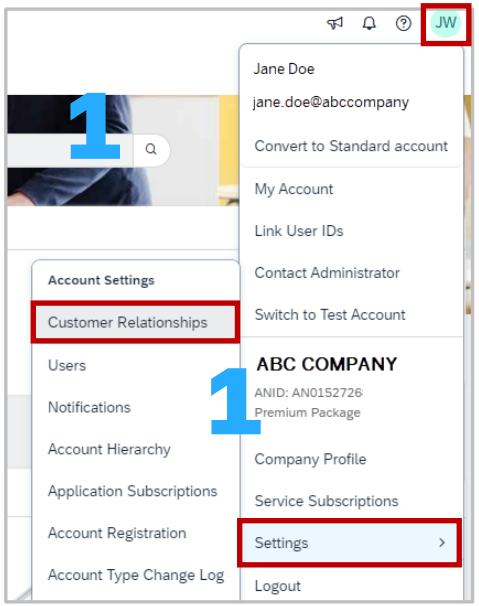
The Buyer-Supplier Information Portal & Reference Documents – For System Administrator Information

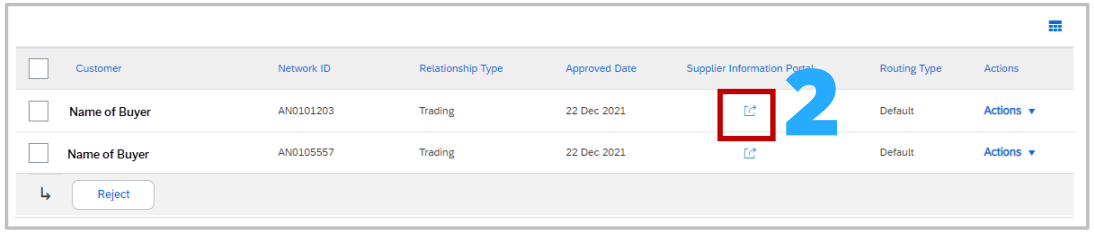
The **Buyer-Supplier Information Portal** is a way Buyers can communicate with their supplier's System Administrator with the information they need to transact using the SAP Business Network. However, only System Administrators or those with the applicable "Customer Relationships" permission can access this section

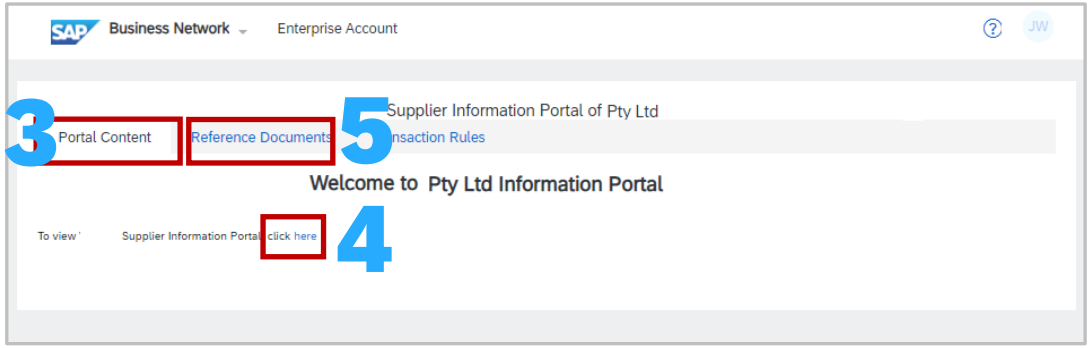
General Access to the Supplier Information Portal should be done via the Support function. Refer to Accessing Buyer Suppliers Information Portals for all Buyers transacting on this account.

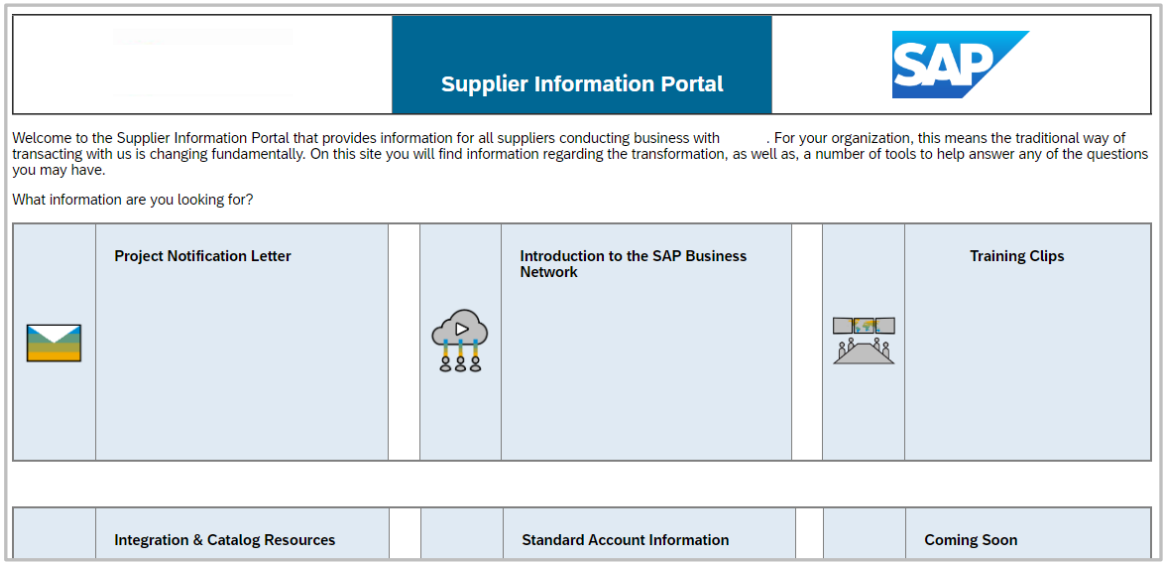
To access each tab in the Buyers Supplier Information Portal:

1. Access **Settings > Customer Relationships**
2. Under **Current Customers** locate the **Supplier Information Portal column**
3. Click on under the Supplier Information Portal heading associated with the Buyer you require information on
4. The **Supplier Information Portal of** the Buyer you selected with the Portal Content tab open
5. Click on the **Reference Documents** tab to identify any documents from your Buyer









For example, only there may be variations in design and content

Transaction Rules via Customer Relationships

Each Buyer creates a list of parameters to transact with their supplier via the SAP Business Network. Supplier System Administrators and sub-users with the correct permissions can access a cut-down list of the transaction rules that affect the way suppliers collaborate.

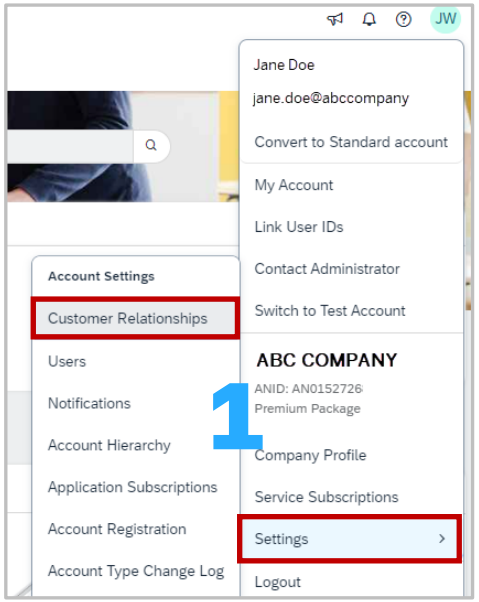
To access each tab in the Buyers Supplier Information Portal and the Transaction Rules:

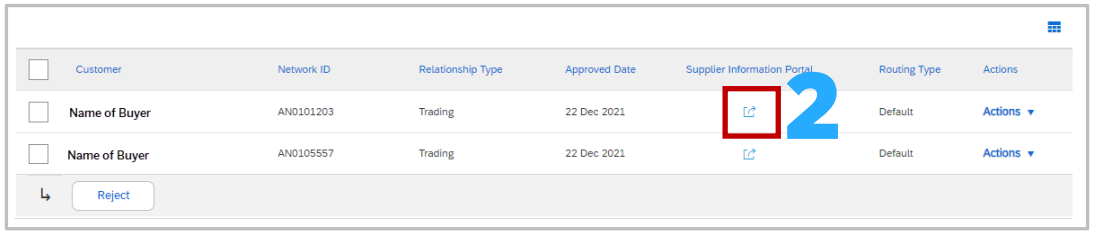
1. Access **Settings > Customer Relationships**
2. Under **Current Customers** locate the **Supplier Information Portal column,** Click on ↗ of the Buyer required
3. Click on the **Transaction Rules** tab to view the transaction rules set by the Buyer

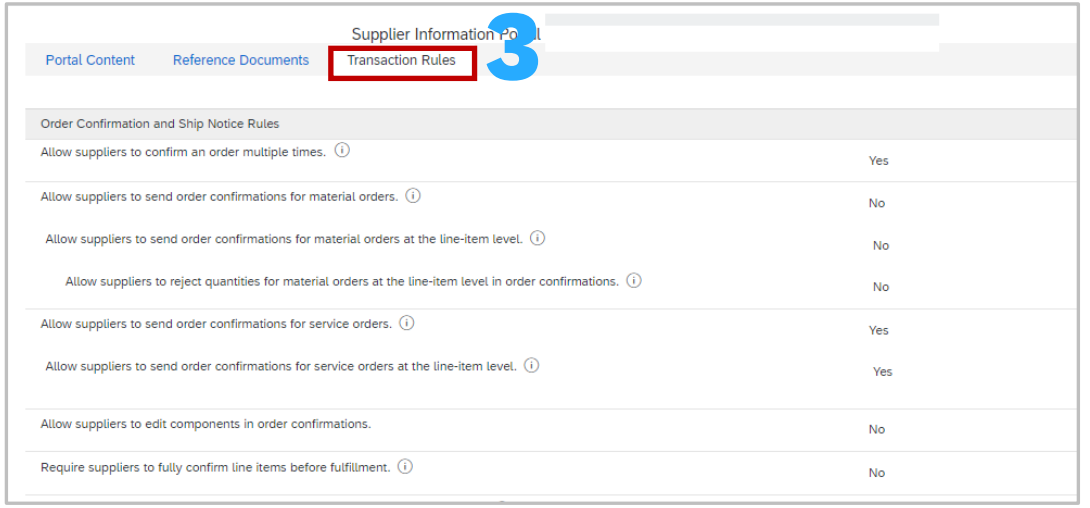
To search specific rules:

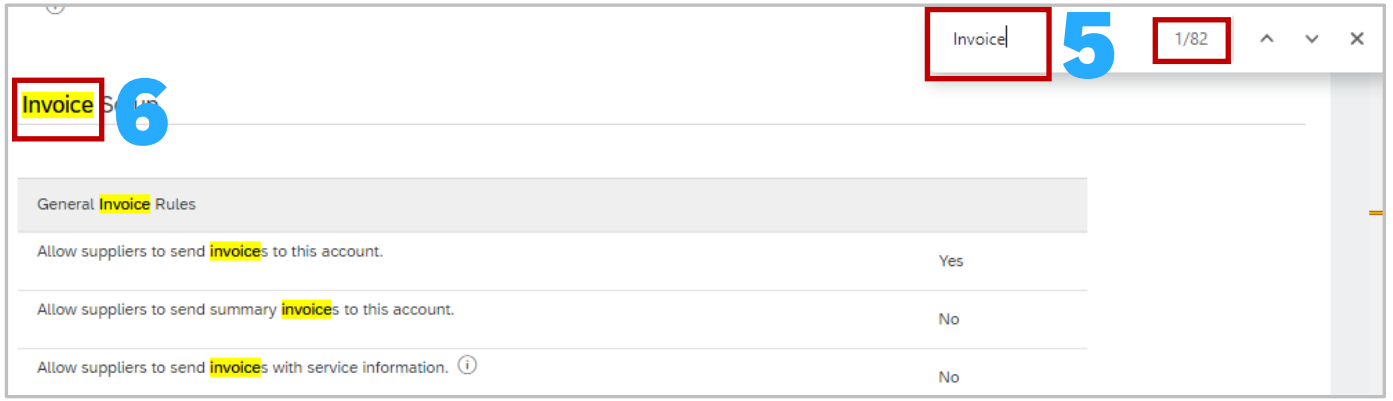
4. Click **ctrl** and **F**
5. Enter the term, for example, **Invoice**
6. The number of items for the search term is displayed and all instances of the term highlighted

Note: You can not modify or change the transaction rules as these are controlled by the Buyer









Accessing a Buyer (SIP) – Sub Users or those without Customer Relationship Permissions

The **Buyer-Supplier Information Portal** is a way Buyers can communicate with their supplier's System Administrator with the information they need to transact using the SAP Business Network. However, only System Administrators or those with the applicable "Customer Relationships" permission can access this section

General Access to the Supplier Information Portal should be done via the Support function. Refer to Accessing Buyer Suppliers Information Portals for all Buyers transacting on this account.

Note: A user ***must*** be logged on to access specific Buyer Supplier Information Portal/s.

To access all Buyer Supplier Information Portals you are transacting with on an account (both Standard & Enterprise Accounts)

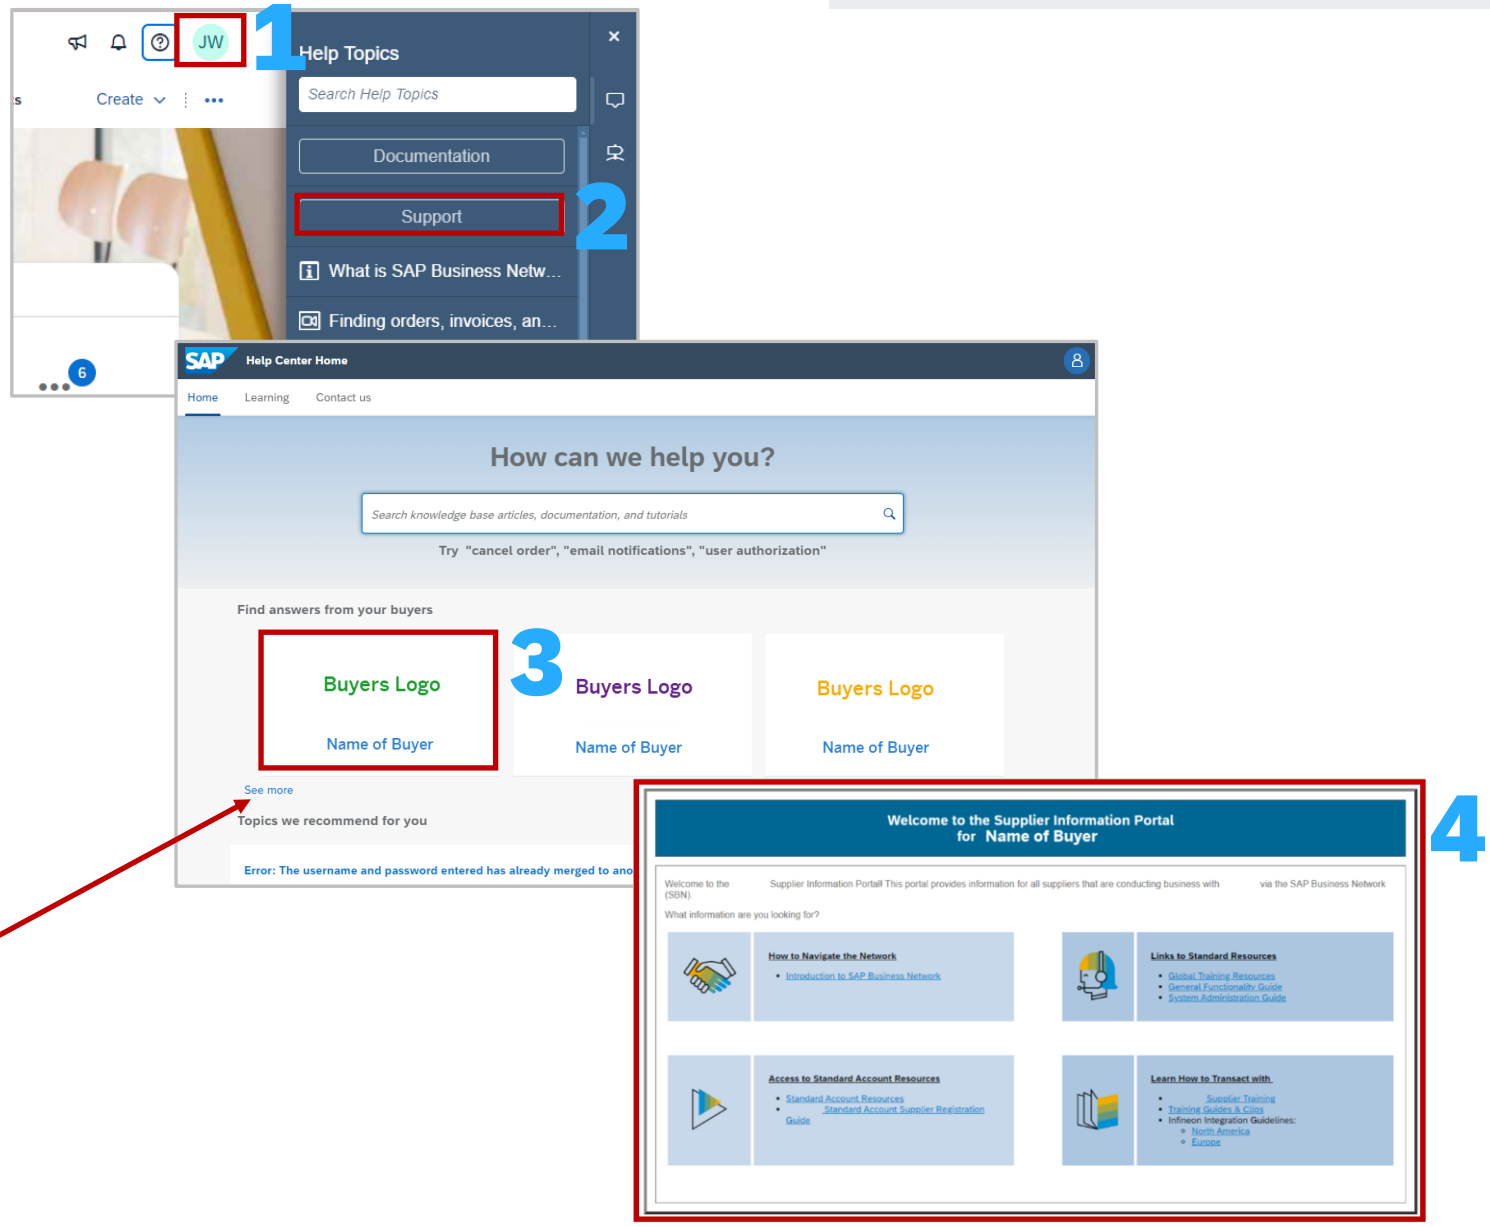
1. Login and from the Home page, click on your **initials**
2. Click on **Support**

The SAP Help Centre Home page is displayed, and a list of all of the Buyers you are transacting with on this ANID is displayed

3. Click on the tile with the name of the **Buyer** you are looking for

Note: To view all Buyers on the ANID click on **See more**....

4. The selected Buyer Supplier Information Portal (SIP) is shown

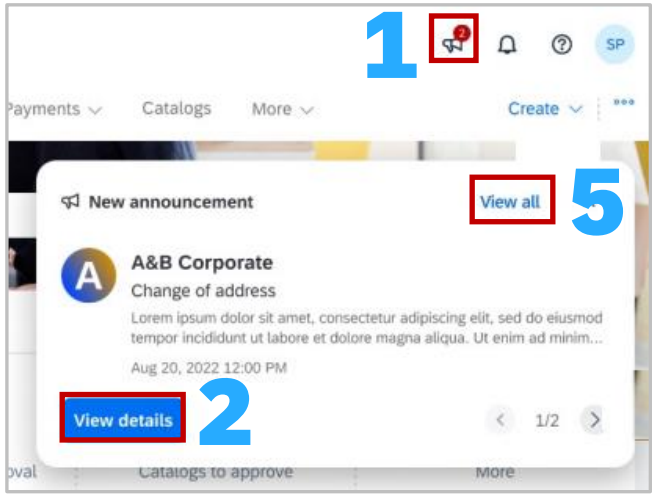


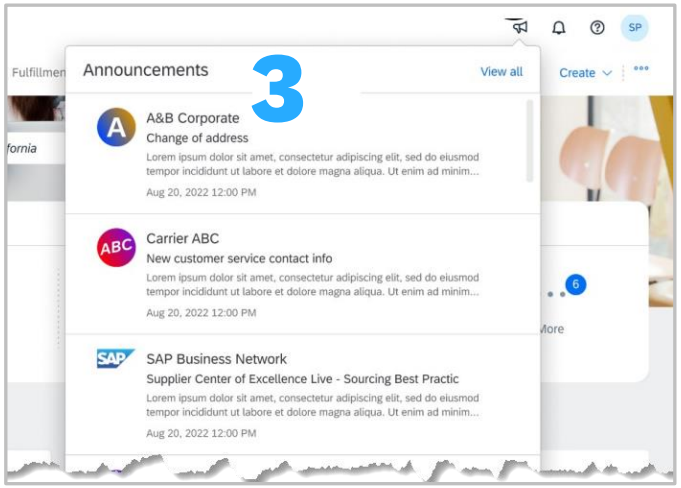
Buyer Announcements

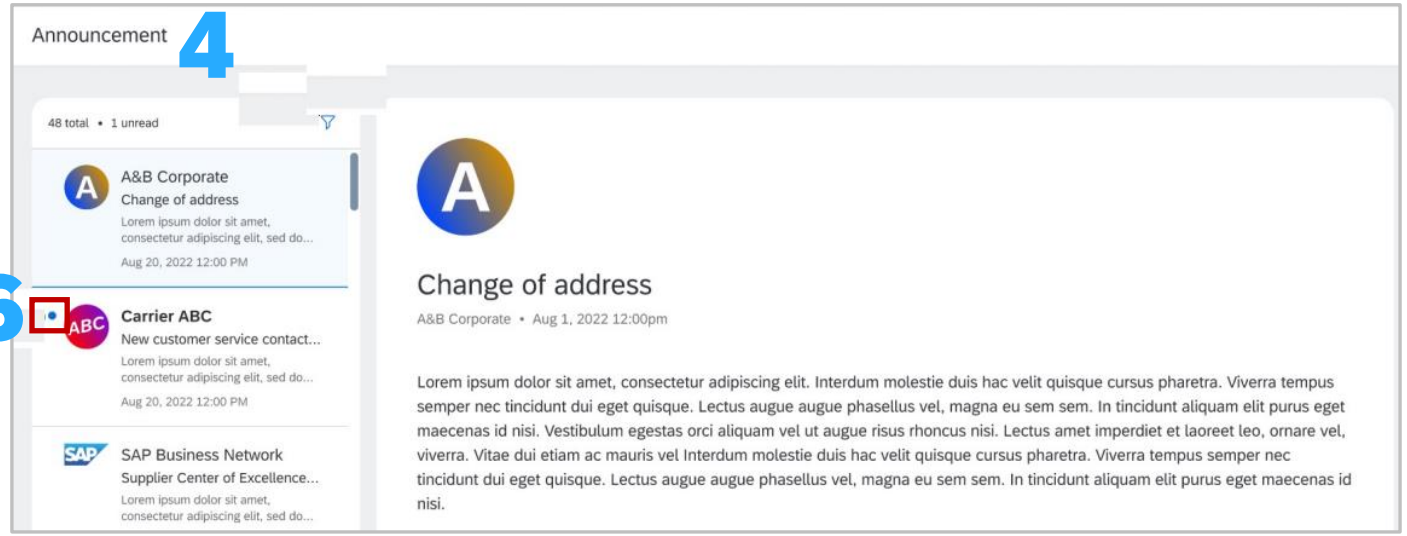
Some Buyers may have Buyer Announcements activated in the Buyer SAP Business Network. Buyers will be able to send timely announcements to their Suppliers.

Suppliers can filter on Unread/Total announcements. Blue Dots show unread announcements and to open a Suppliers click on the announcement and it will change from unread to read

1. New Announcements will be highlighted by a **Red circle**, which may contain a number indicating the number of new messages that are unread - Click on the **Announcement** icon on the shelshell barlbar to view all announcements
2. Click on **View Details** to see a specific announcement,
3. If there is more than 1 announcement they will appear in a drop-down list
4. Clicking on an announcement will take Suppliers to the Announcements Detail Page
5. **View All** will take you to the announcements page
6. All items with a **Blue Dot** indicate an unread message







Unsubscribe from Communications from SAP

Suppliers can unsubscribe from receiving news about SAP Products and Services or SAP Newsletters –

Click Here to Unsubscribe

(https://www.sap.com/profile/unsubscribe.html)

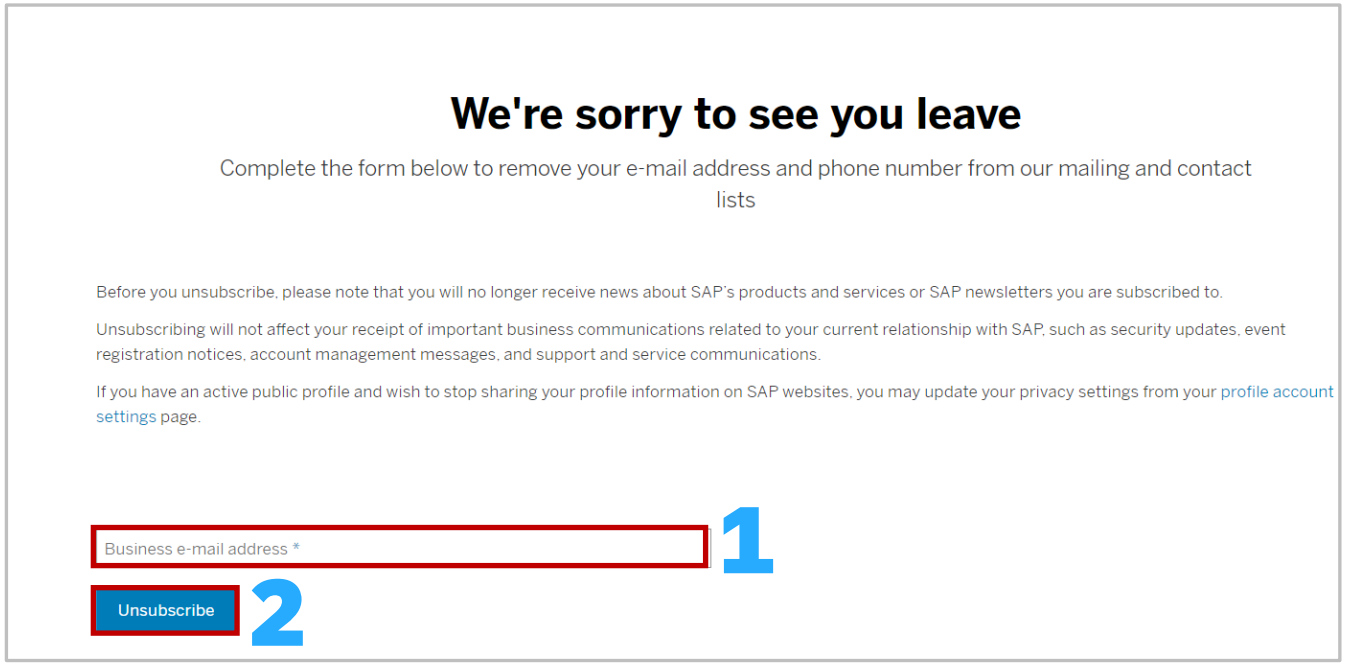
Unsubscribing will not affect the receipt of important business communications related to your current relationship with SAP this includes:

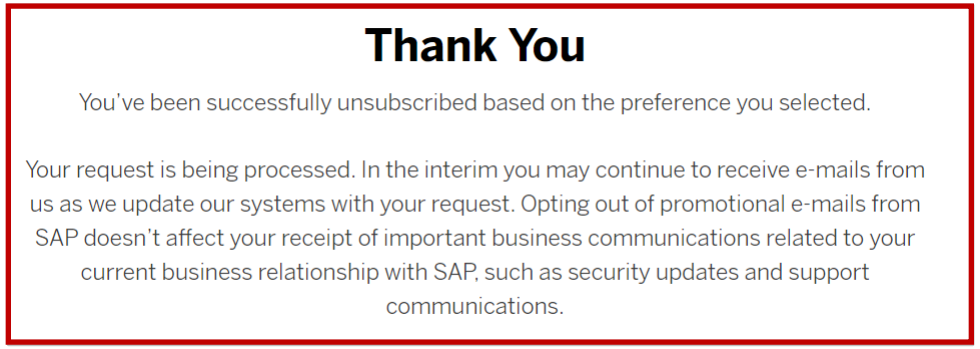
- Security Updates
- Event Registration notices
- Account Management Messages
- Support and Service Communications

If you have an active public profile and wish to stop sharing your profile information on SAP sites, update the privacy settings in profile settings

Open a Web Browser by using the link or copy and pasting the link into your browser

1. Enter your **Business Email Address**
2. Click on **Unsubscribe**
3. You will see a **Thank You** Pop up message





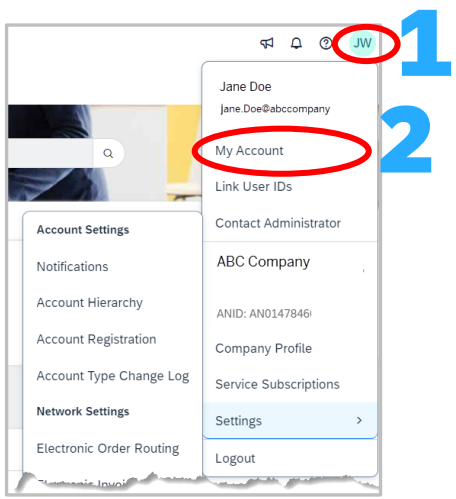
Set Time zone and Currency

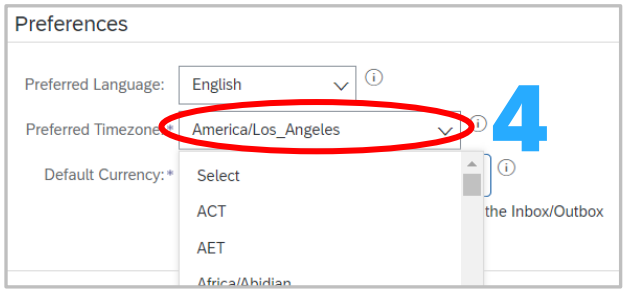
Suppliers can set up accounts to reflect the currency and time zone they are in. If you are using a generic login that has many users the changes will impact all users using the same credentials.

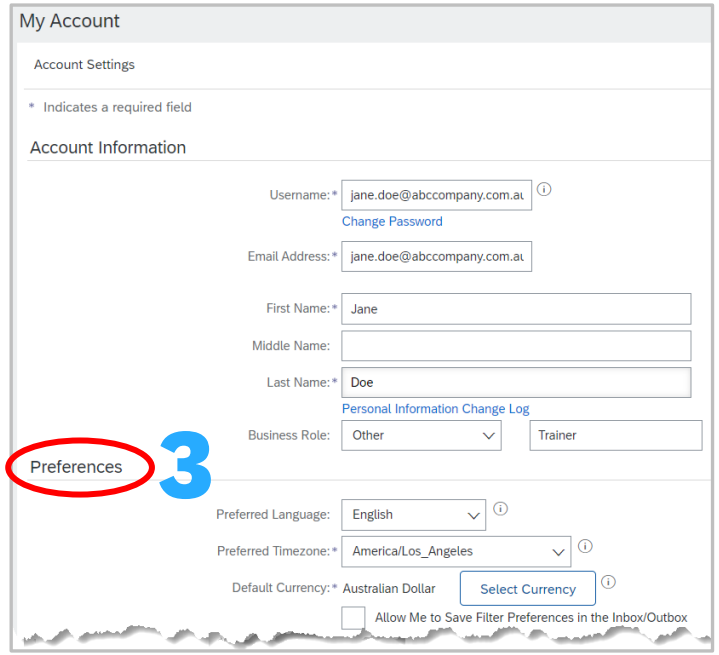
The inbox represents documents that are sent from the Buyer/Customer to the Supplier, such as Purchase Orders and The outbox represents documents sent from the Supplier to the Buyer such as Invoices

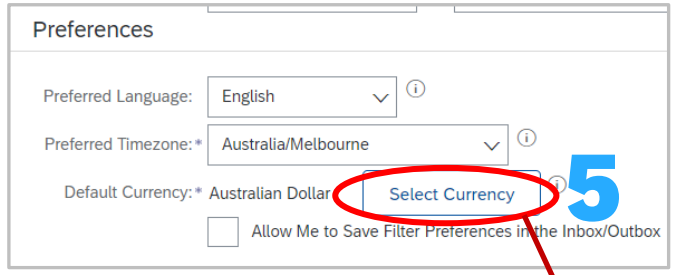
1. **Sign in** to the SAP Business Network and click on your **initials** at the top of the screen
2. Select **My Account**
3. The My Account screen is displayed, locate **Preferences**
4. To change the Time zone, click on the **Preferred Timezone** down arrow and select the required time zone from the list
5. To change the currency, click on **Select Currency**, select the currency required from the drop-down list
6. Determine whether you require the preferences to be saved for the **Inbox/Outbox**, and select (if required)
7. Click on **Save**

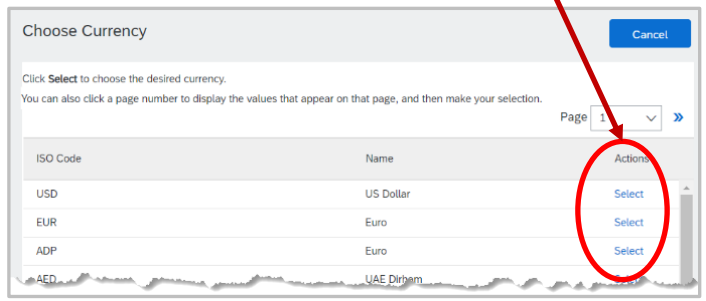
A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save

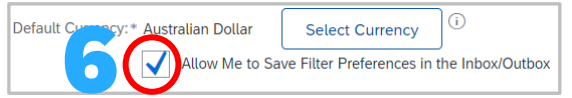


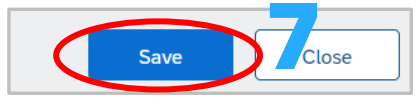












Routing Processes

Electronic Order Routing Options- Information

- There are a number of Electronic Order Routing Options, ensure that you select the correct routing type
- In most instances the System Administrators email will auto-populate most fields
- An Email must be provided in all fields with an asterisk, however until the option is selected by placing a tick in the associated box it will not activate
- Up to 5 email addresses can be entered into each field separated by a comma only, do not include spaces or use other separators
- Using emails and selecting to attach a copy of the Purchase Order means that Suppliers can view what their Buyers require prior to logging into the SAP Business Network – SAP Ariba
- Email addresses can include distribution lists, generic email boxes or specific people's email addresses
    - **Online** –This means that the Purchase Order is sent to the SAP Business Network but no email notifications will be sent to advise there is a new purchase order from your Buyer/s
    - **Email** – This is the default setting and means that an email will be sent to advise that a new purchase order/s is in the SAP Business Network from your Buyer/s
    - **cXML/EDI** – Only used when system integration is set up
- This document only directs suppliers to complete the mandatory fields required for the initial set-up, however, there are many other fields that can be activated to send emails for other document types (default is set to online)

Electronic Order Routing – New Orders

Electronic Order Routing is where suppliers can set up the preferred method for transacting with your customer, the information entered affects all users on your SAP Business Network

Where a Supplier is transacting with multiple Buyers on the SAP Business Network, separate routing for each different Buyer cannot occur.

Also, ensure that all fields with asterisks have an email address entered, only when there is a tick next to the option does it become active.

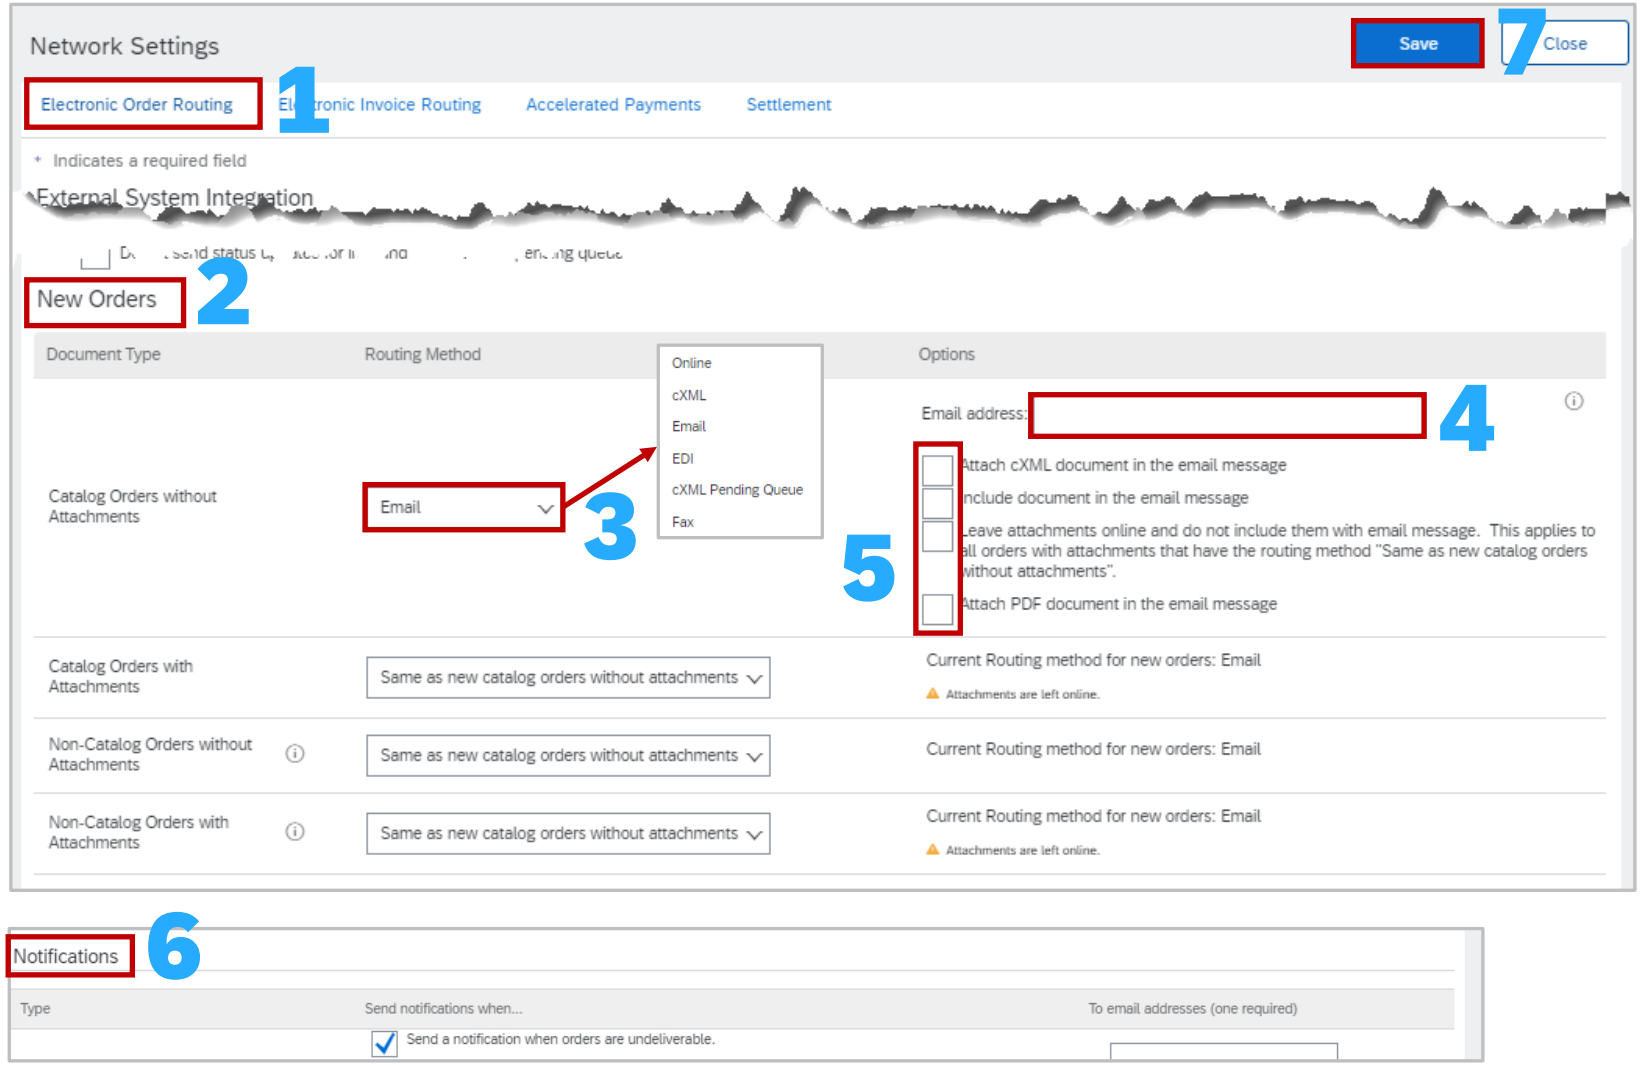
Open **Network Settings** by, clicking on your **Initials** at the top right of your screen, selecting **Settings**

1. Click on **Electronic Order Routing** under Network Settings
2. Locate **New Orders**
3. Select the **Routing Method** (the default is Email)
4. Confirm or enter up to 5 emails **into Email Address,**

To add more emails only use a comma, no spaces or dashes

5. Select the required option/s from (Enterprise Accounts only):
   - Attach cXML document in the email message
   - Include document in the email message
   - Leave attachments online and do not include then with email messages etc.
   - Attach PDF document in the email message
   - All other New Order routing methods will reflect the choice made for Catalog Orders without Attachments
6. Scroll down to **Notifications**

Refer to [Electronic Order Routing - Notifications]



Electronic Order Routing - Notifications

Suppliers can identify when they require to be notified about a document by ticking in the applicable **Send Notifications when…**

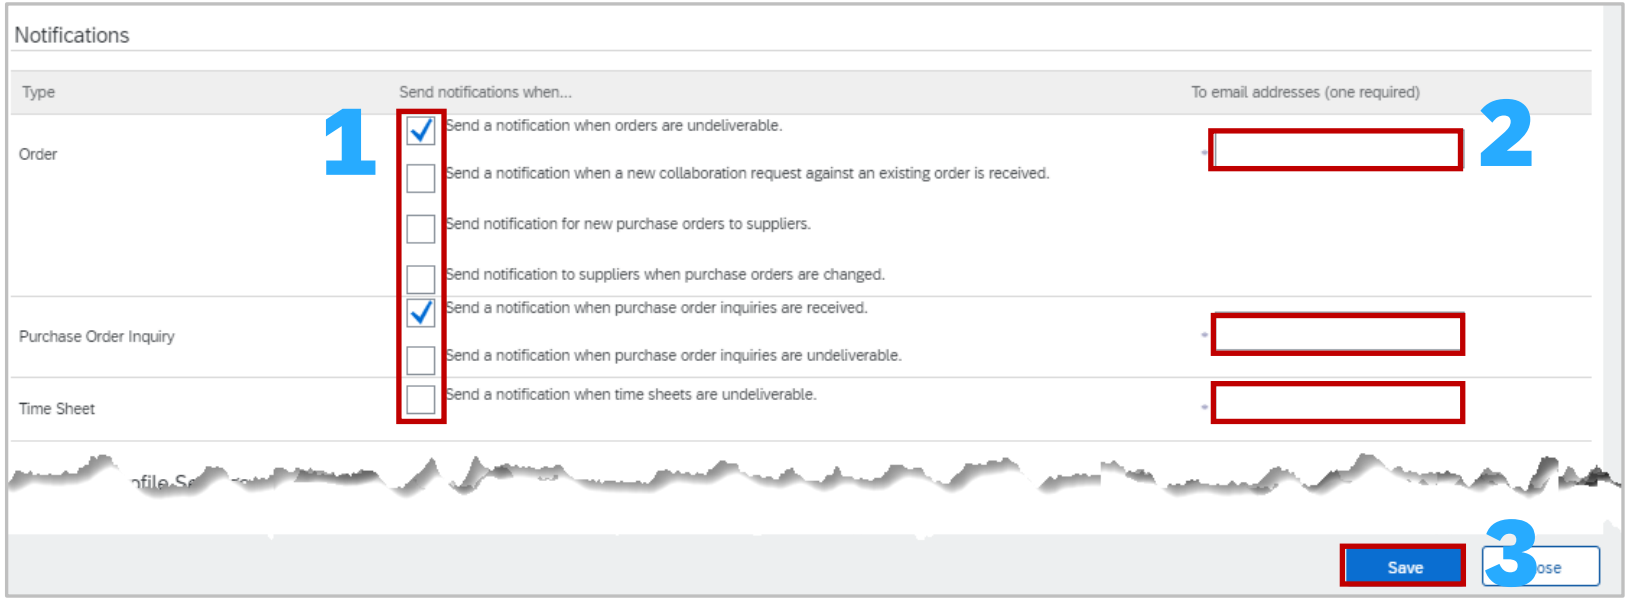
At lease one email address must be in the To email addresses and the System Administrator email may already be displayed

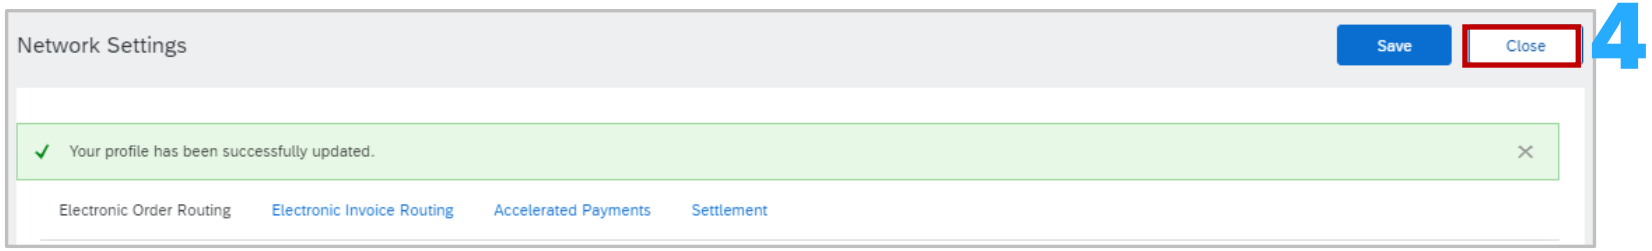
1. Select the required **Send notifications when…,** putting a tick in the associated box activates the selection
2. Confirm or enter the **To email addresses** applicable email address
3. Click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save

4. Click on **Close** to exit or select the next tab required

❖ Even if none of the selections are chosen there must be an email address in the fields with an asterisk





Electronic Invoice Routing and Notifications

The Electronic Invoice Routing activity is required only for Notifications

- Do not change the Routing Method for Invoices and Customer Invoices unless advised to do so from an SAP Ariba Representative

1. Select the required **Send notifications when…,** putting a tick in the **Send a notification when invoices are undeliverable or rejected**

Note: Selecting Send a notification when invoice status changes generates an email for each process associated with the invoice and may trigger large quantities of emails

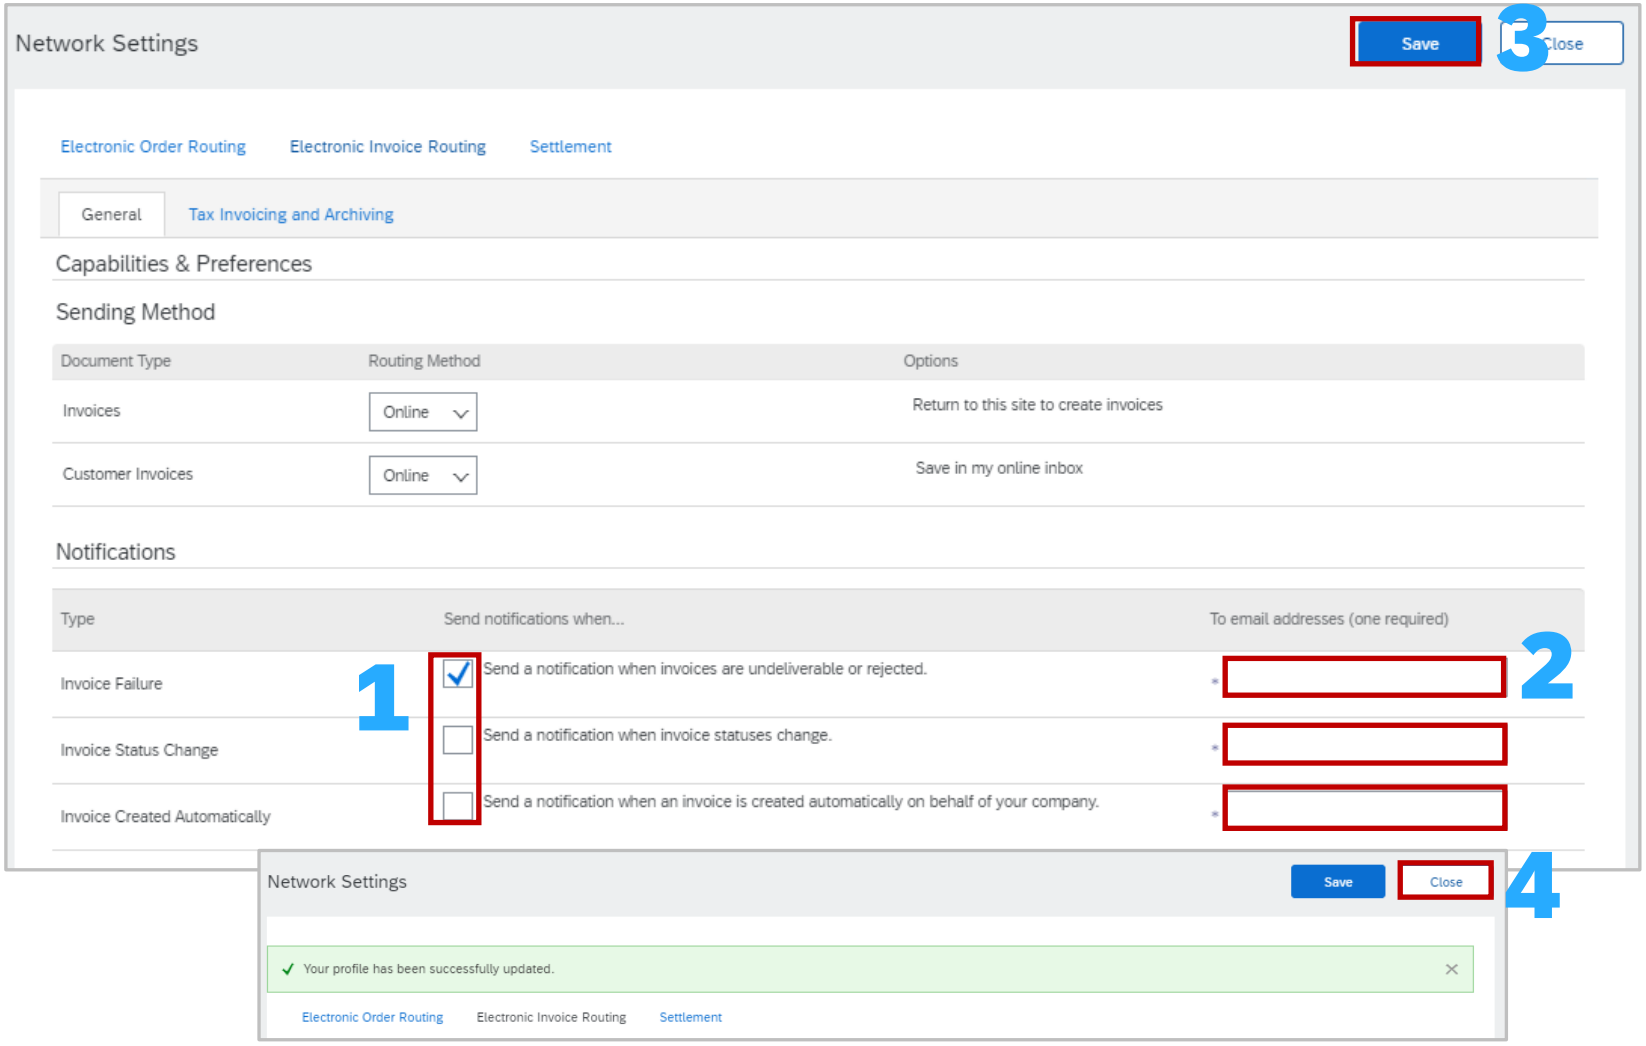
2. Confirm or enter the **To email addresses** applicable email address

3. Click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save

4. Click on **Close** to exit or select the next tab required

Even if none of the selections are chosen there must be an email address in the fields with an asterisk



Electronic Invoice Routing – Tax Invoicing and Archiving

The Electronic Invoice Routing activity is required only for Notifications

- Do not change the Routing Method for Invoices and Customer Invoices unless advised to do so from an SAP Ariba Representative

1. Select the required **Send notifications when…,** putting a tick in the **Send a notification when invoices are undeliverable or rejected**

Note: Selecting Send a notification when invoice status changes generates an email for each process associated with the invoice and may trigger large quantities of emails

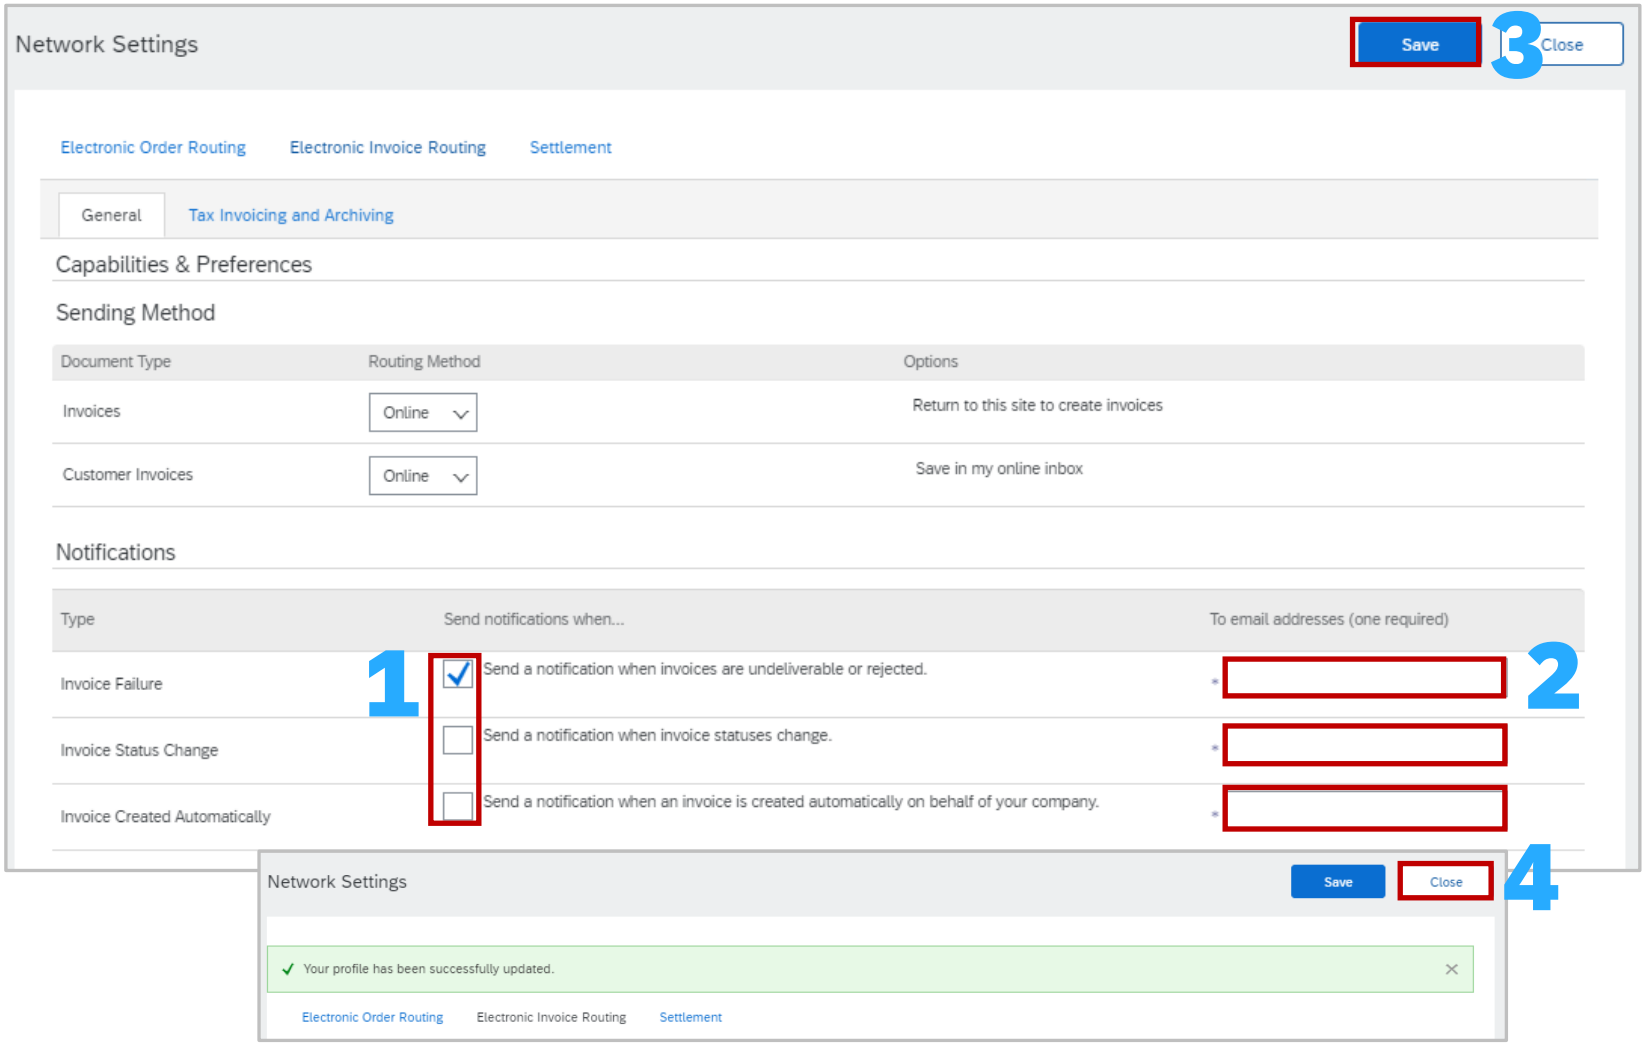
2. Confirm or enter the **To email addresses** applicable email address

3. Click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save

4. Click on **Close** to exit or select the next tab required

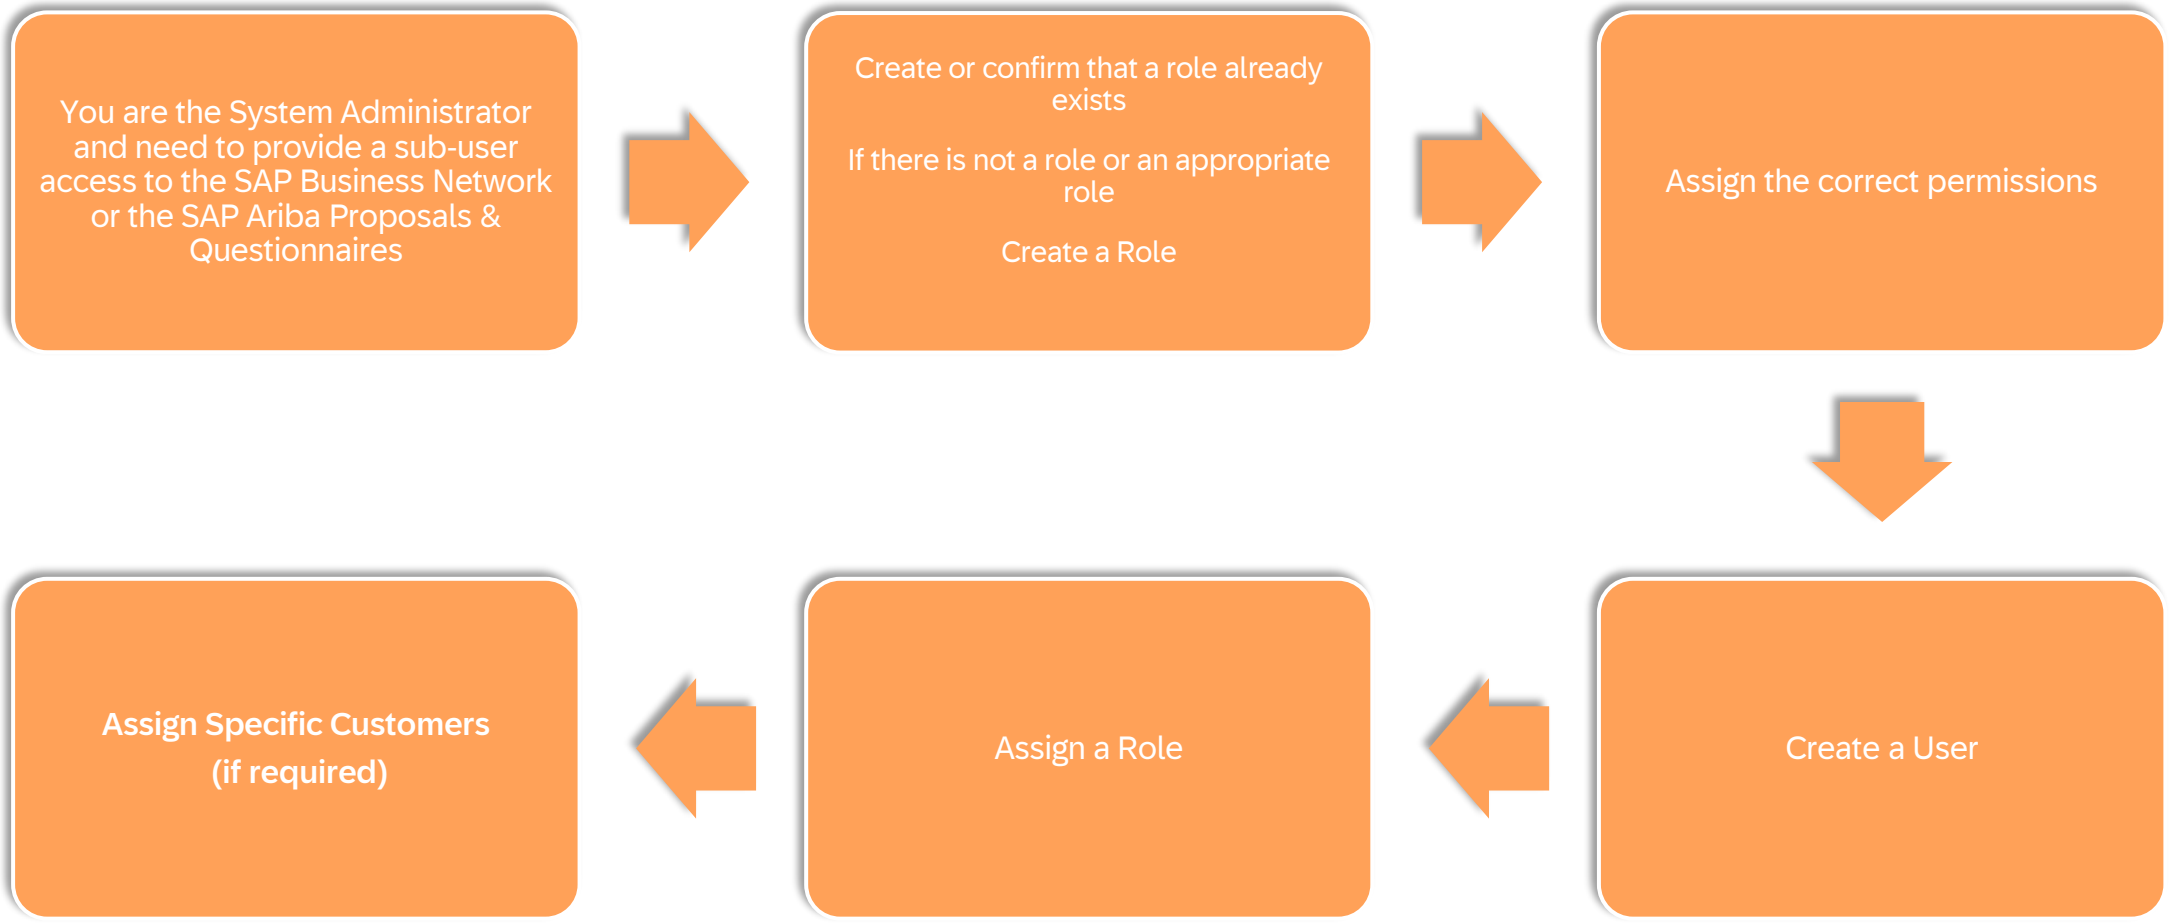
Even if none of the selections are chosen there must be an email address in the fields with an asterisks



Roles, Users and Network Permissions

New Roles, Users and Permissions Flow

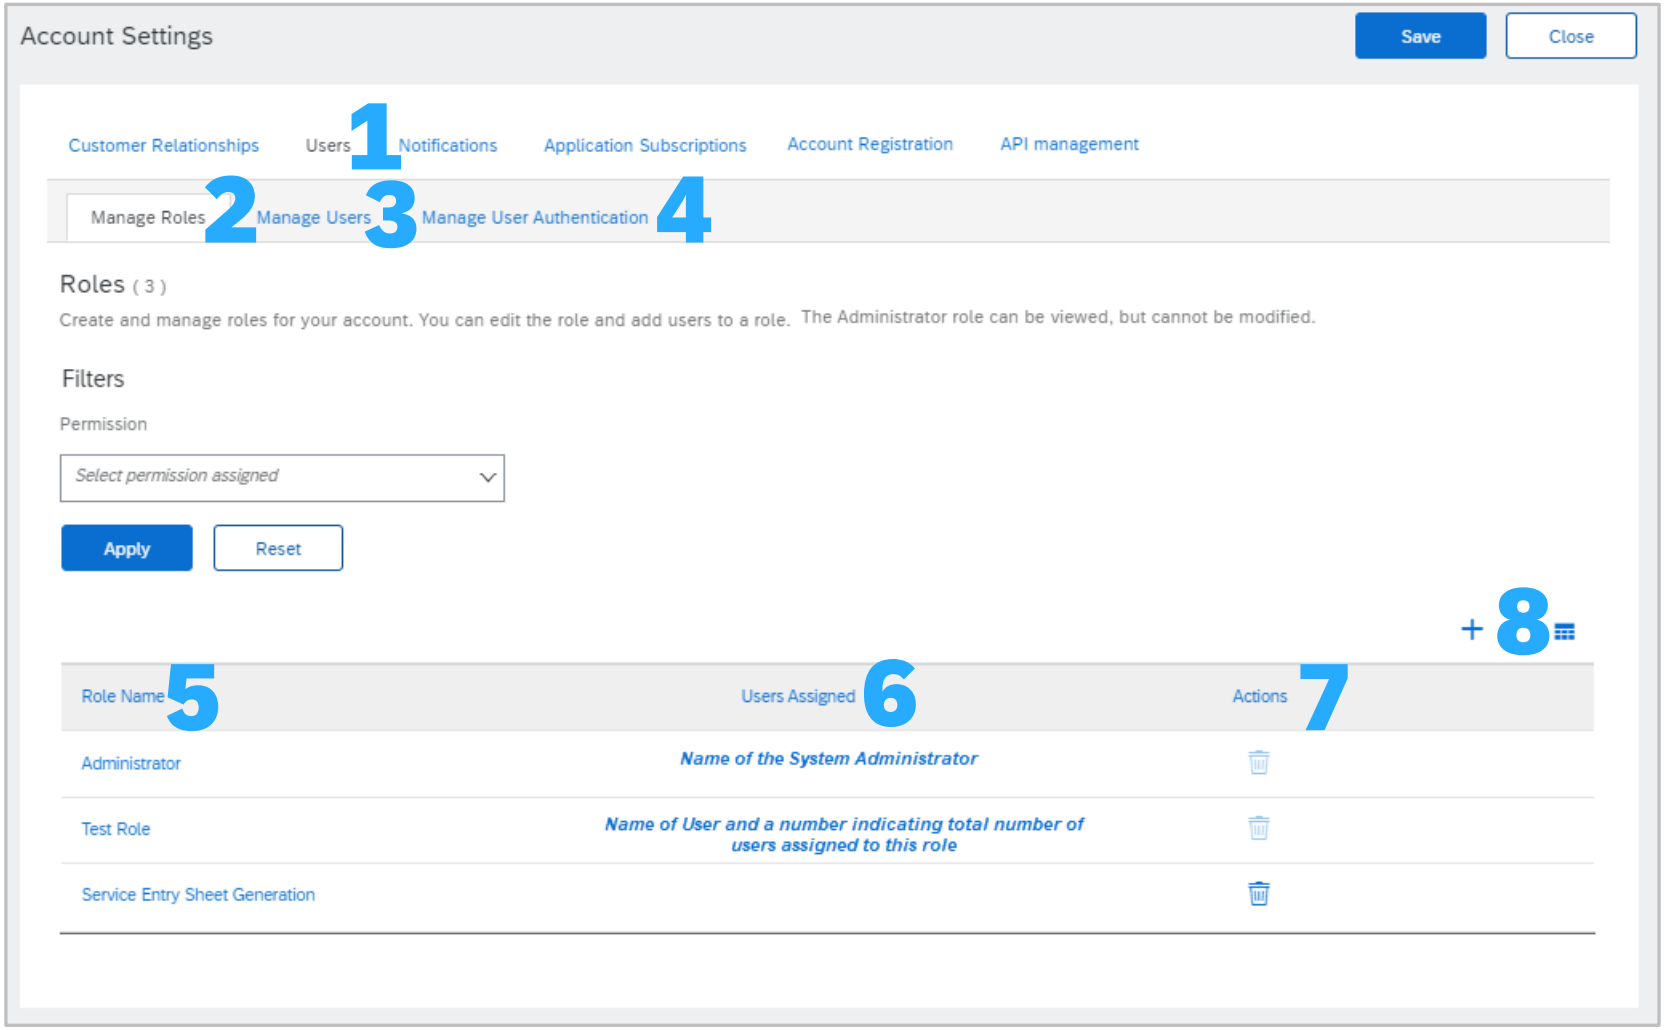
- A Role must be available or created before adding a user, many users can be associated with a particular role. Roles can be named using your businesses terminology and permissions can be added or removed when required



Account Settings – Users Tab Information

The Users tab/selection is only available to the System Administrator, use this tab to maintain users for the SAP Business Network for:

- Creating Roles
- Creating Users
- Maintaining Users
- Assigning permissions
- Resetting passwords
- Assign the System Administrator role to another user



1. **Users** – The tab accessed by the System Administrator to create, update and maintain users
2. **Manage Roles** – Roles must be created prior to creating users, roles are created based on the functions/roles within the supplier organisation
3. **Manage Users** – Used to add, delete, update and maintain both users and specific permissions of users
4. **Manage User Authentication** – Used to increase system security
5. **Role Name** – The name of the function/role added by the System Administrator, users are then assigned a role based on the permissions required to perform their job
6. **Users Assigned** – Indicates the number of users assigned to the Role
7. **Actions** – The actions allowed, the System Administrator role cannot be deleted, there is only 1 System Administrator at any one time
8. + - Used to Add Roles

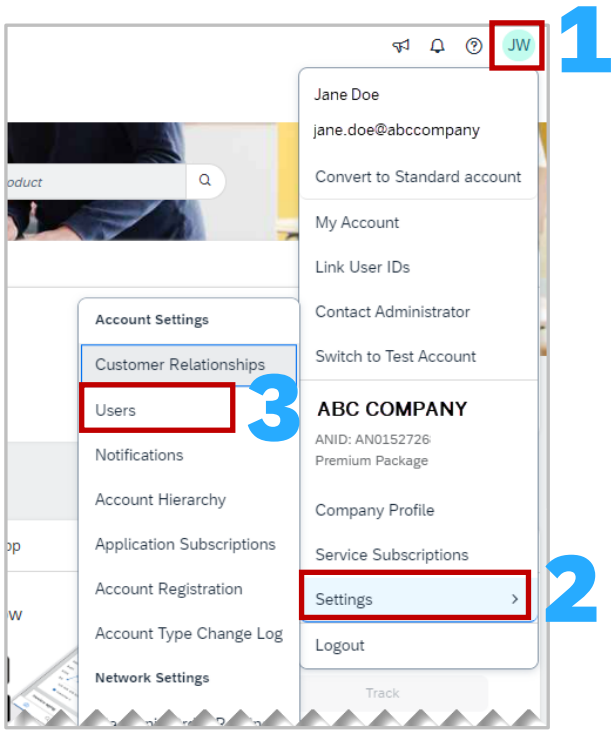
Checking there is Roles

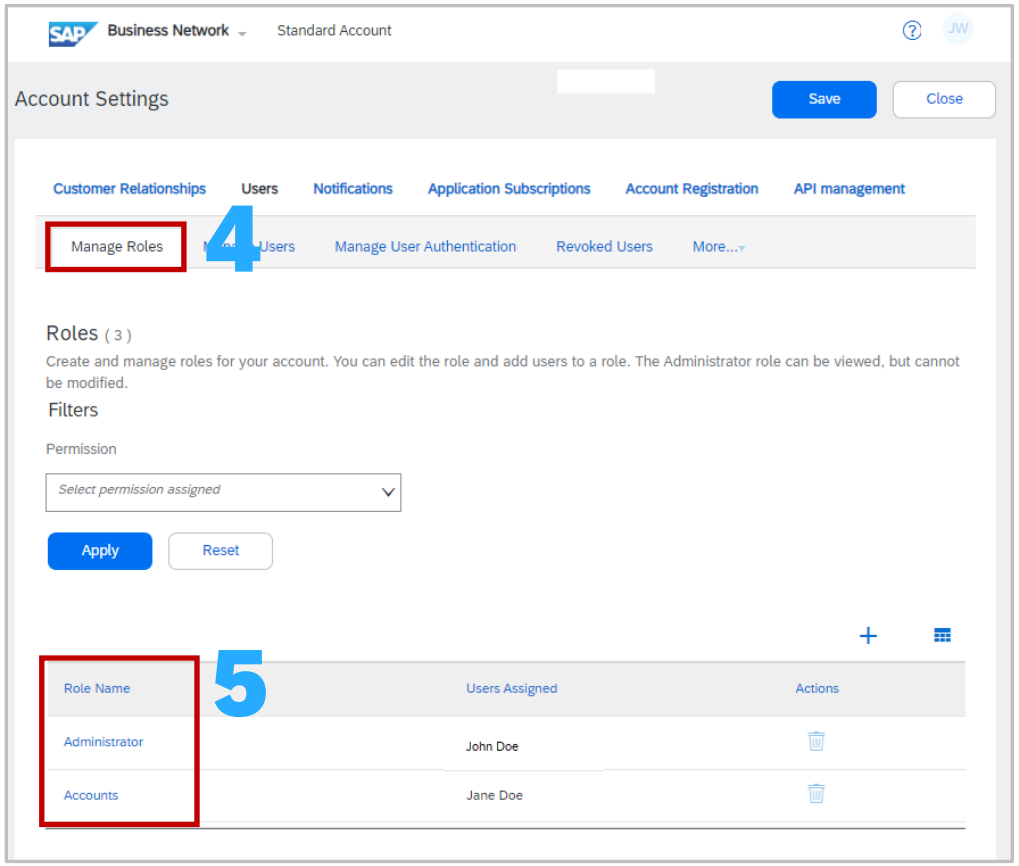
Only the System Administrator can manage roles, add users and control permissions. Even selecting all available permissions will not provide access to the Users section of the SAP Business Network.

Roles should reflect the job roles within your organisation, particularly those that need to interact with the SAP Business Network.

Roles are then assigned permissions so that sub-users are able to access the network and perform the tasks required.

1. Sign in to the SAP Business Network, click on your **initials**
2. Select **Settings**
3. Select **Users**
4. Confirm you are on the **Manage Roles** tab
5. Locate **Role Names** and determine whether you need to add, edit or update permissions on an existing role





Adding a Role

Permissions are assigned by the System Administrator based on the Role responsibilities, refer to **Permissions**.

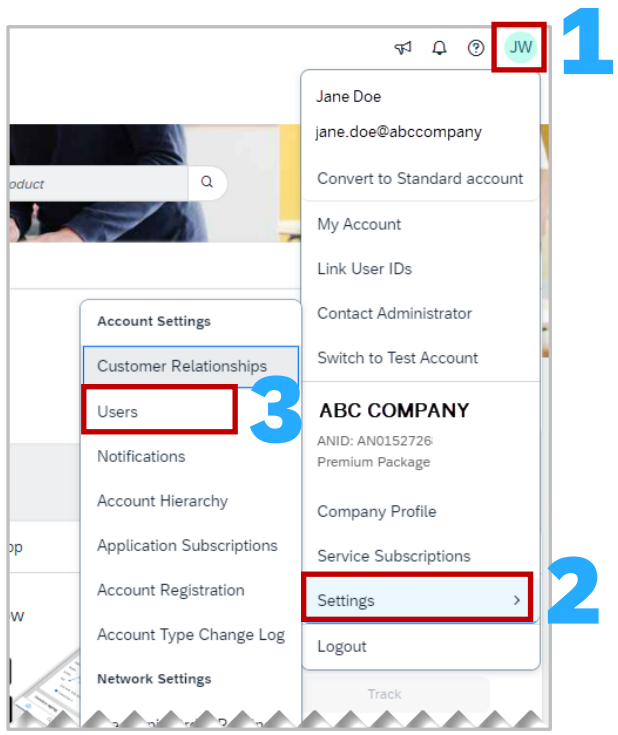
A new role does not need to be created if adjusting permissions, refer to editing permissions.

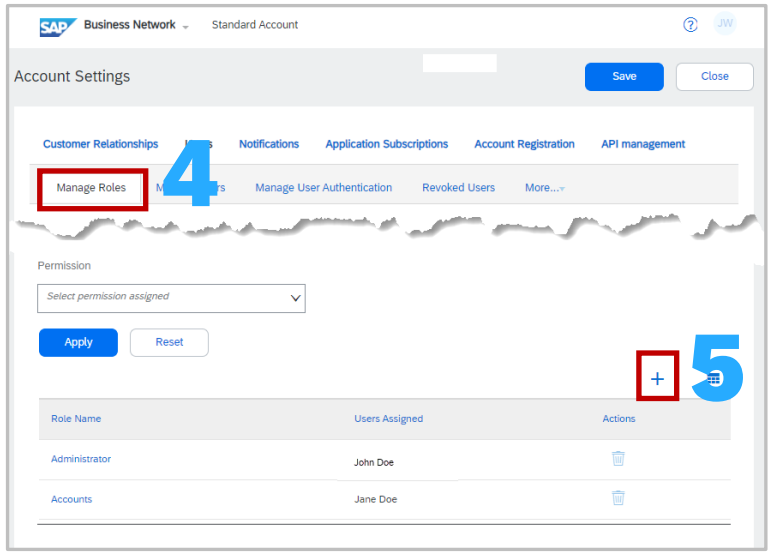
1. Sign in to the SAP Business Network, click on your **initials**
2. Select **Settings**
3. Select **Users**
4. Confirm you are on the **Manage Roles** tab
5. Click on the **+**
6. Add the name of the **role**
7. Scroll down to see available permissions, and select all applicable permissions, use **Page** to review more permissions
8. To select all permissions select **Permission**
9. Once completed, click on **Save**

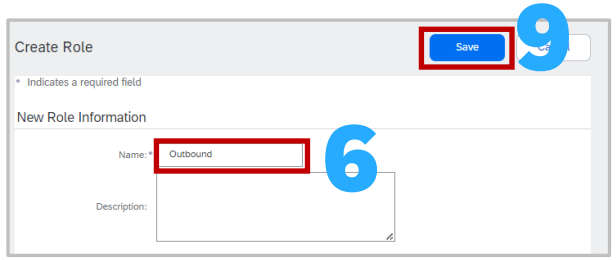
The screen will revert back to the Manage Roles Tab

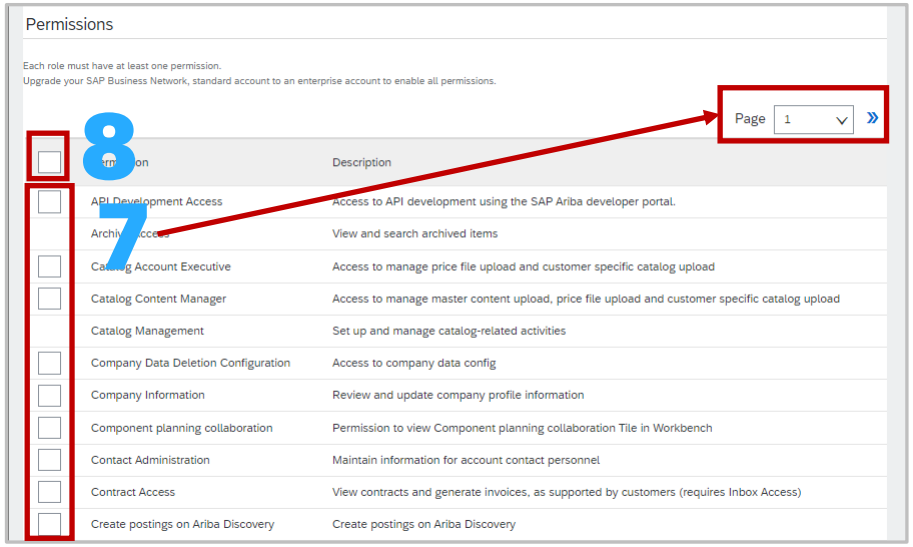
10. Click on **Save**

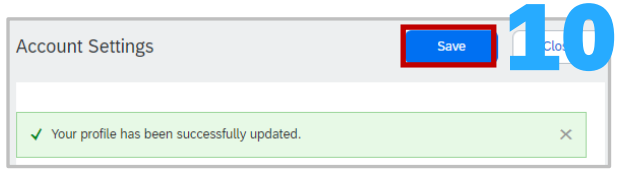
A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save











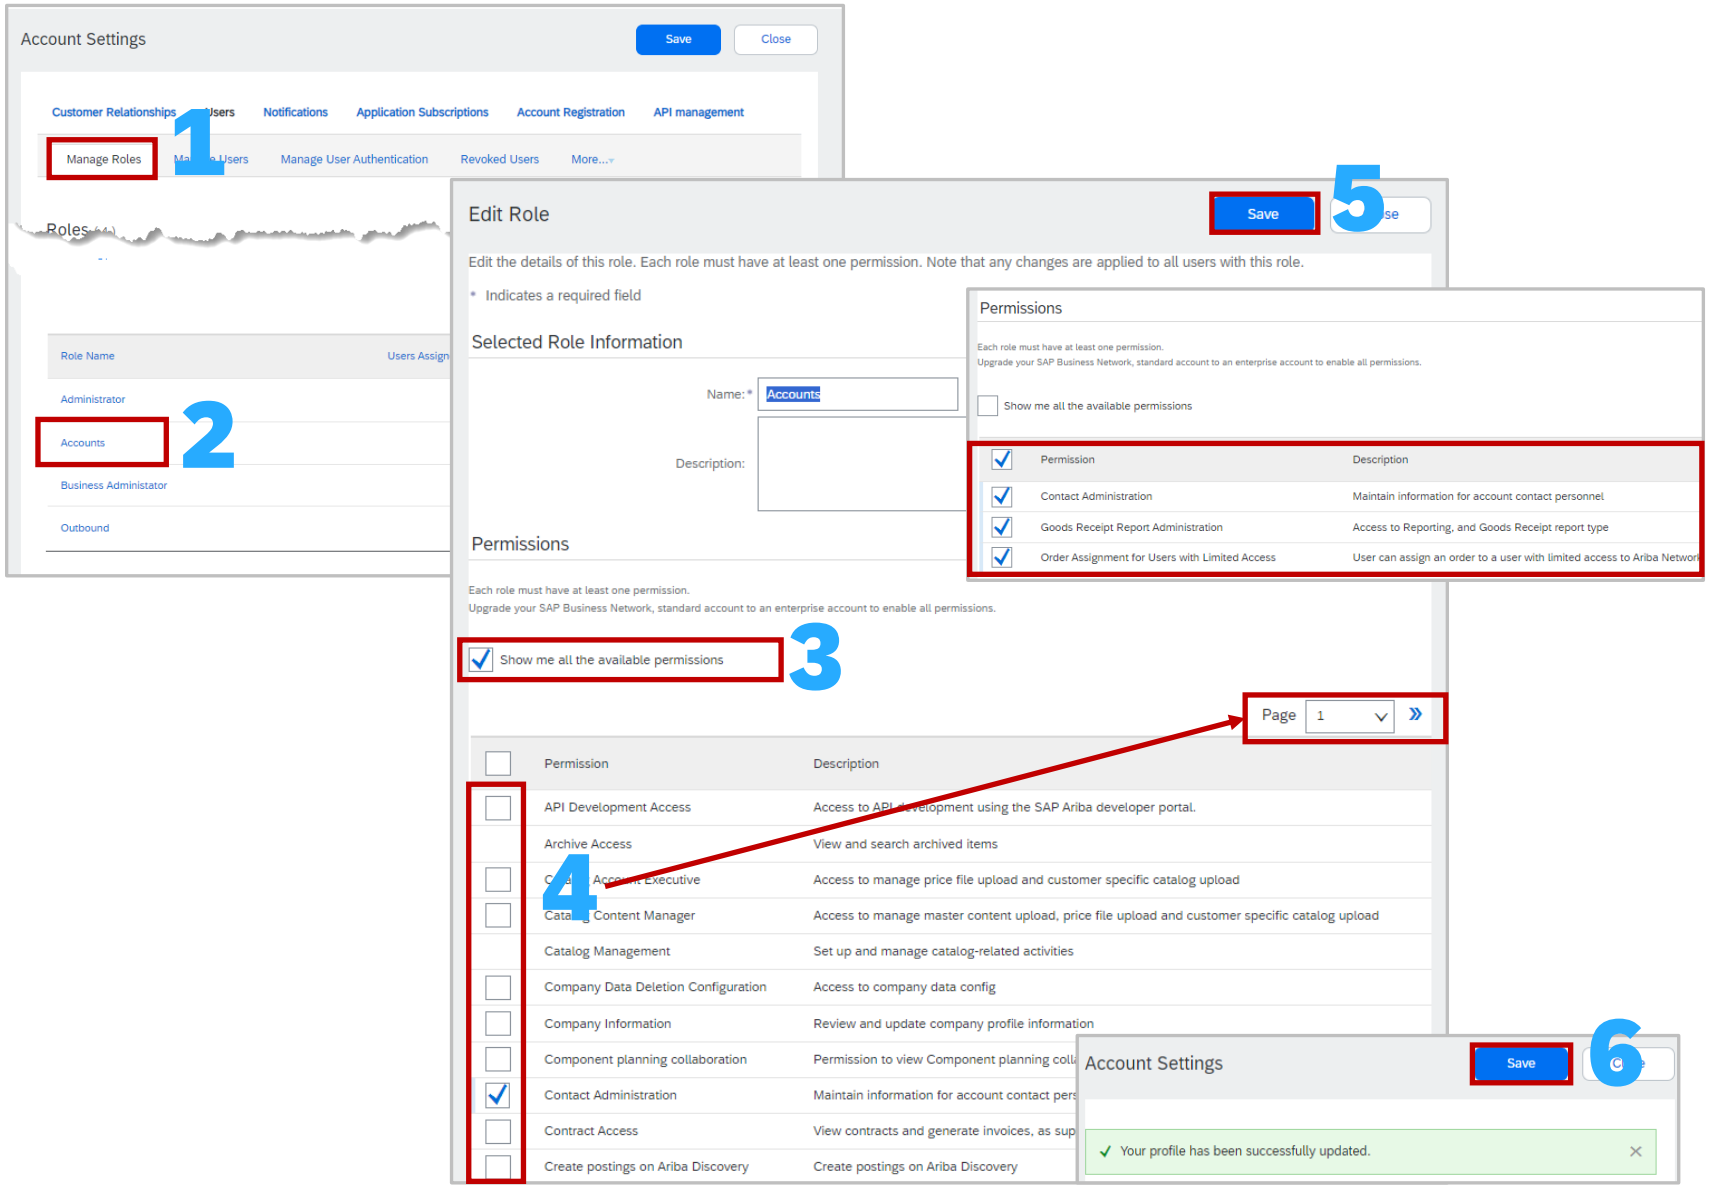
Editing a Role

Existing Roles can be edited, including:

- Changing the name of the Role
- Removing permissions
- Adding Permissions
- Identifying Assigned Users
- Moving Assigned Users to another role

1. Display the **Manage Roles** Tab
2. Click on the name of the role you need to modify
3. The Edit Role screen is displayed, the active permissions are shown, to view other available permissions, click on **Show me all the available permissions**
4. Review and select other permissions this role should have (review other pages)
5. Click on **Save**
6. Screen returns to the Manage Roles tab, click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save



Identifying Assigned Users to a Role and Moving users to another Role

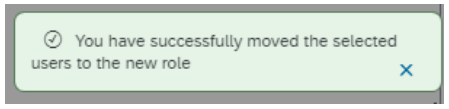
Only the System Administrator can manage roles, add users and control permissions. Even selecting all

1. Display the **Manage Roles** Tab
2. Scroll down to **Assigned Users**
3. The **Users** assigned to this **Role** will be displayed
4. To Move a User to a different Role, select the affected **user**
5. Click on **Move to another role**
6. The Move Users to Another Role pop-up box is displayed, click on the **Select Role** down arrow

Note: The System Administrator role is not available, to change the System Administrator refer to [Change Administrator]

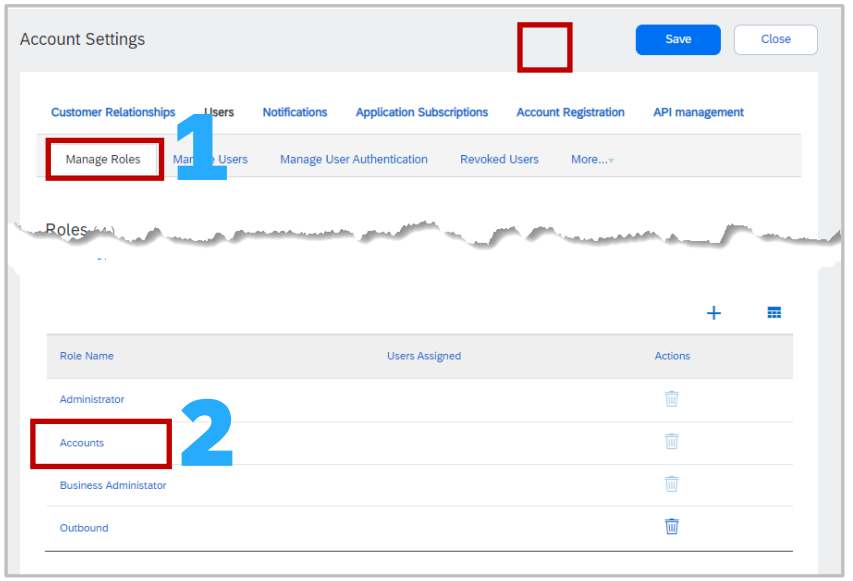
7. Click on **Move and Save**

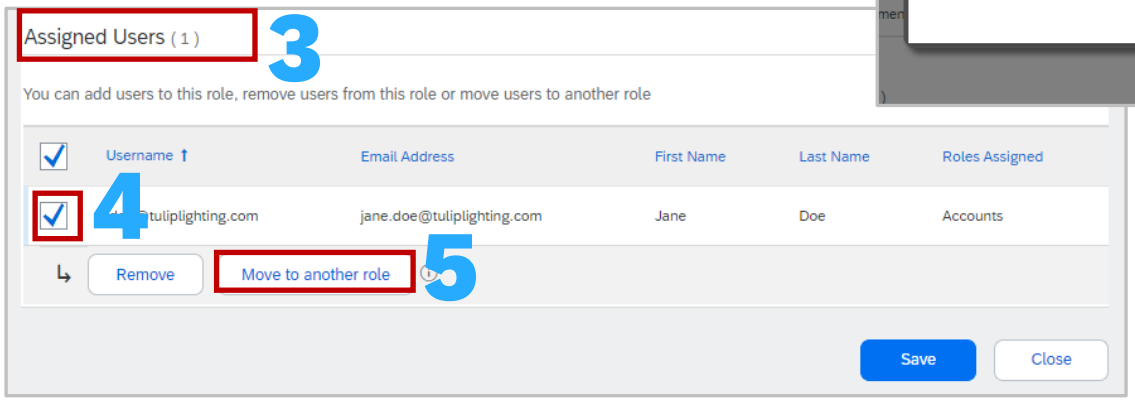
Note: A screen pop up confirms the move

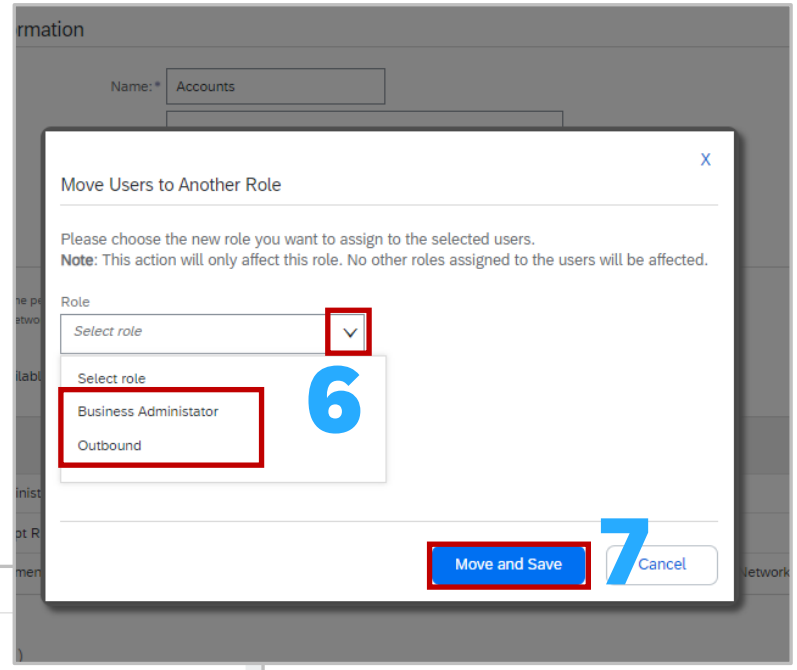


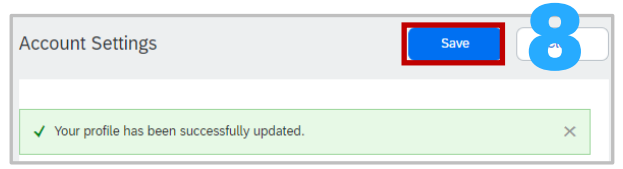
8. Screen returns to the Manage Roles tab, click on **Save**

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save







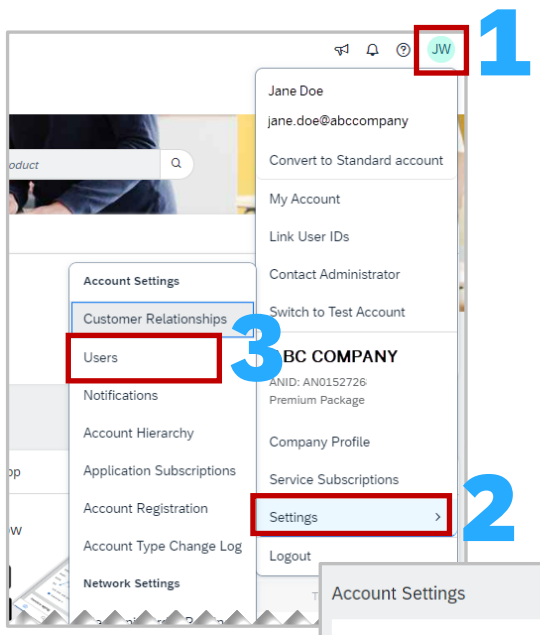


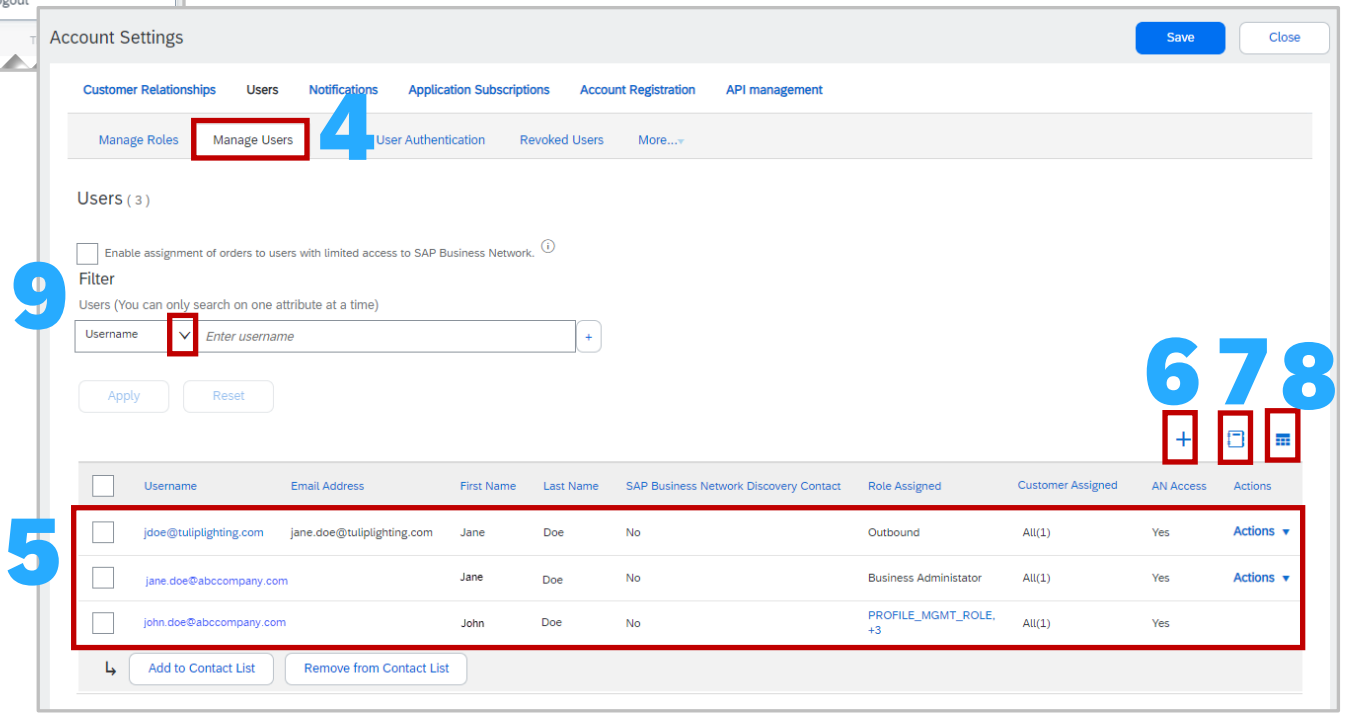
Getting to the Manage User Tab - Manage Users Information

Only the System Administrator can manage sub-users, assign a new System Administrator and control permissions.

Accessing the Manage Users Tab

1. Sign in to the SAP Business Network, click on your **initials**
2. Select **Settings**
3. Select **Users**
4. Confirm you are on the **Manage Users** tab
5. The list of users is displayed
6. Click on + to add users
7. Click on to export contacts list
8. Click on for the Table Options Menu
9. The Filter allows for a search based on the criteria selected, use the drop down to select the criteria, enter the information, click on the then click on Apply. The info will be displayed





Users – Create Users/Assign Roles/Assign Customers

After Roles have been created or added as required, **Users** can be created

To Create a User:

1. Click on the **Manage Users** tab
2. Click on the **PLUS** button
3. The Create User Screen is displayed, enter a **User name**

Note: The User name can be the email address of the User or it can be created, however it must be in an email format, for example jane@abc.com

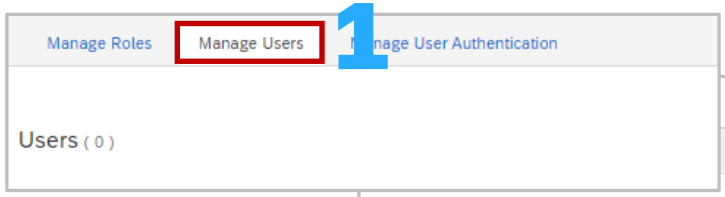
4. Enter the **Email Address** of the User
5. Enter the User's **First Name**
6. Enter the User's **Last Name**

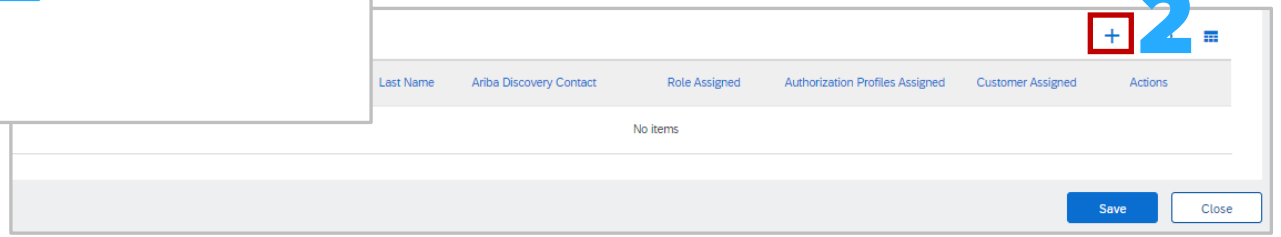
There is no requirement to add information without an Asterisk

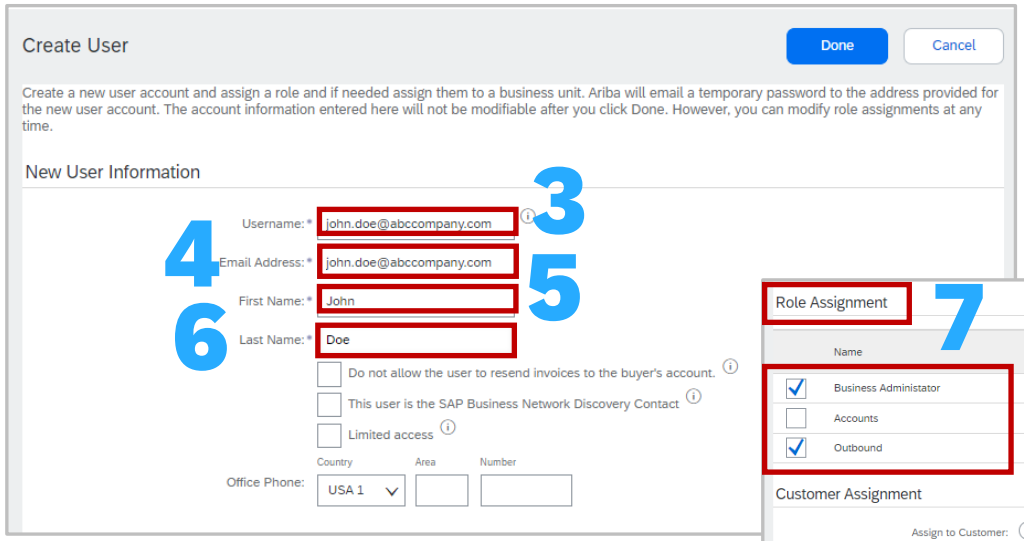
7. Scroll down to **Role Assignment**, select the **Role/s** that suits the needs of the Sub-user

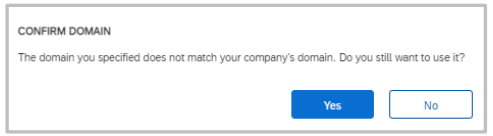
Note: Users can be assigned more than one Role

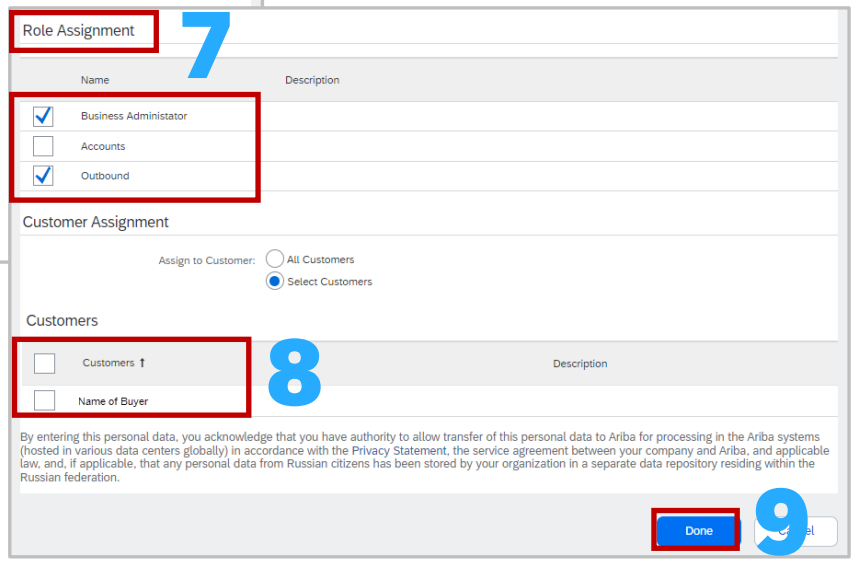
8. Scroll down to **Customer Assignment**, and identify whether the user works specifically on one or more Customers (only customers with a relationship will appear)
9. Click on **Done** (you may get a Confirm Domain message particularly if you have not used the actual email address of the user for the Username, click **Yes**)
10. Click on **Save**

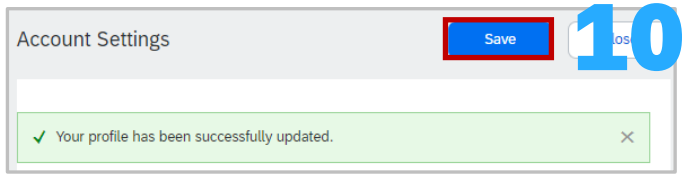












Manage User Deletion and Delete a User

Only the System Administrator can manage roles, add users and control permissions. Even selecting all available permissions will not provide access to the Users section of the SAP Business Network.

Prior to deleting Users from accessing the SAP Business Network, confirm that a retention period has been entered. Retention periods are done in “months”.

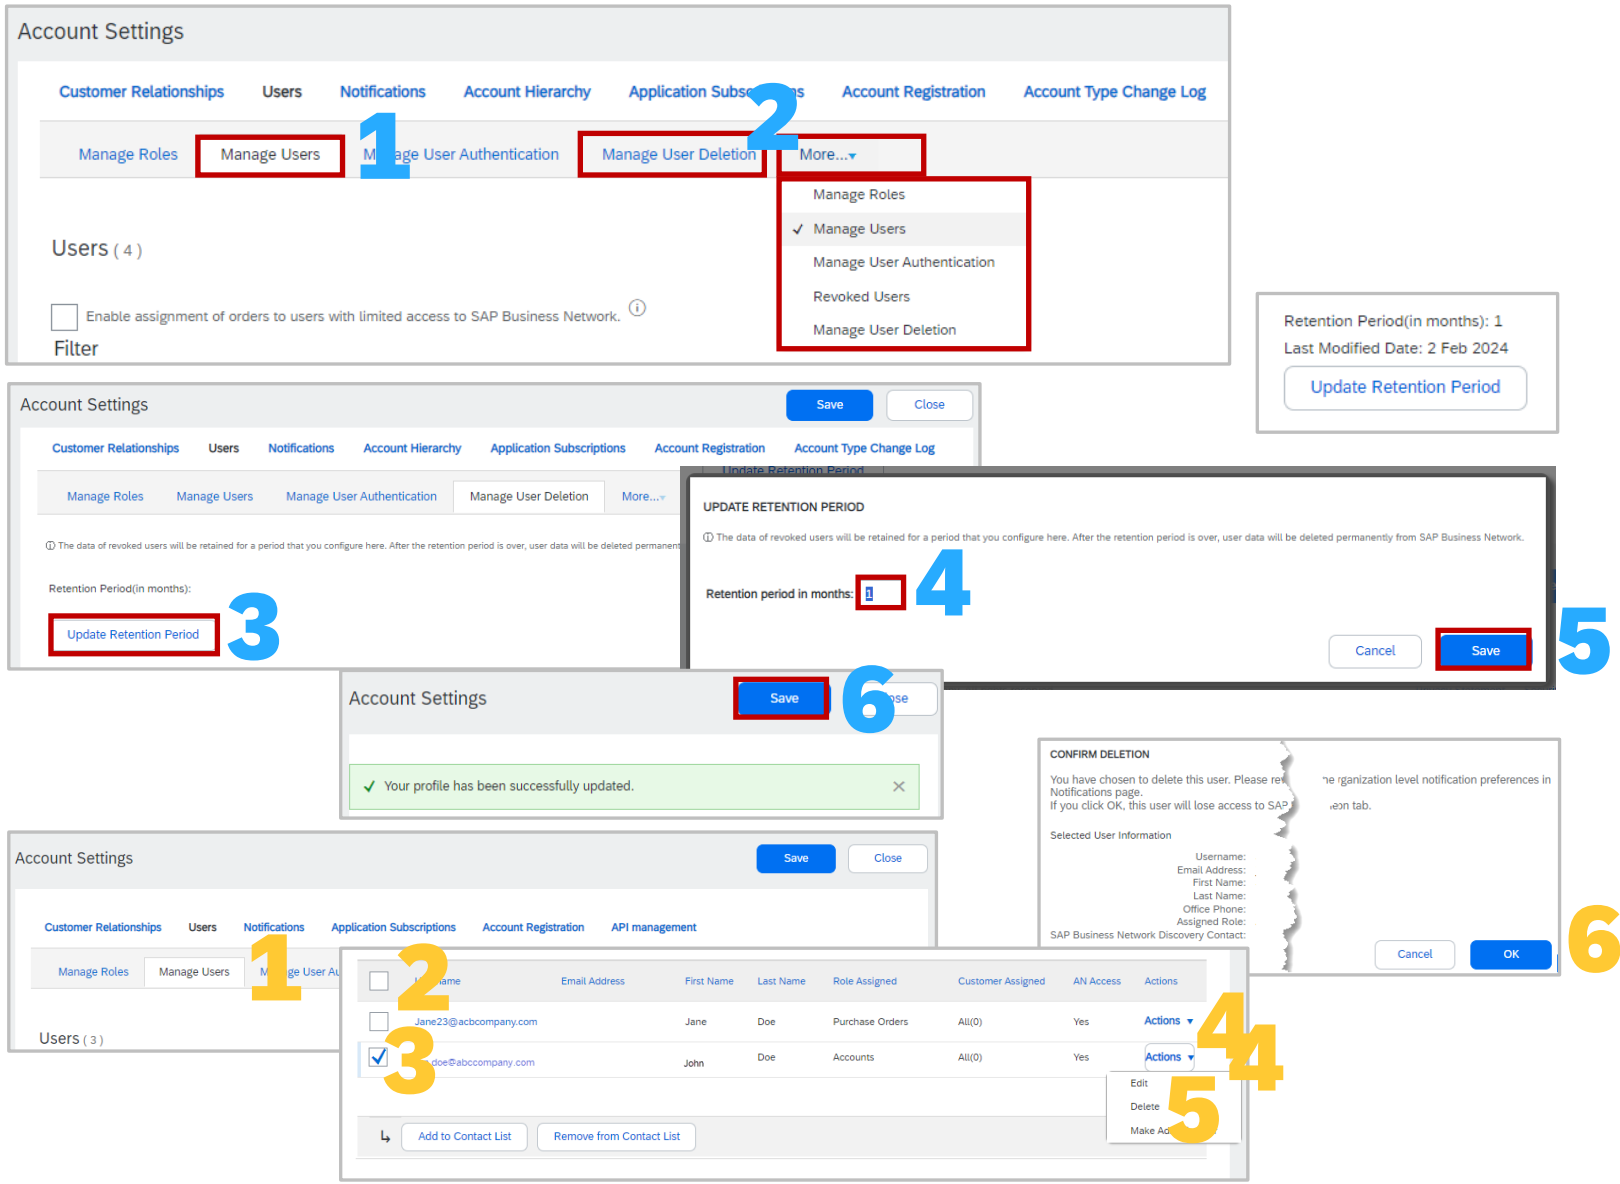
To access the Deletion Retention period:

1. Display the Account Settings screen with the Manage Users tab selected
2. **EITHER** – Click on the **Manage User Deletion** tab
   Or Click on **More** and select the **Manage User Deletion** from the drop-down list
3. To add or change the retention period, click on **Update Retention Period**
4. Enter a number between 1 and 12
5. Click on **Save**
6. The Retention Period is shown with the date the retention period was modified

A **Green** ribbon indicates that it has been successfully saved, a **Red** ribbon indicates an error, correct and re-save

To Delete a User: (numbers in orange)

1. Display the **Manage Users Tab**
2. Scroll down to the **list of users**
3. Select the **User** you need to delete
4. Click on **Actions**
5. Select **Delete** from the drop-down list
6. The details of the user are shown, click on **OK**

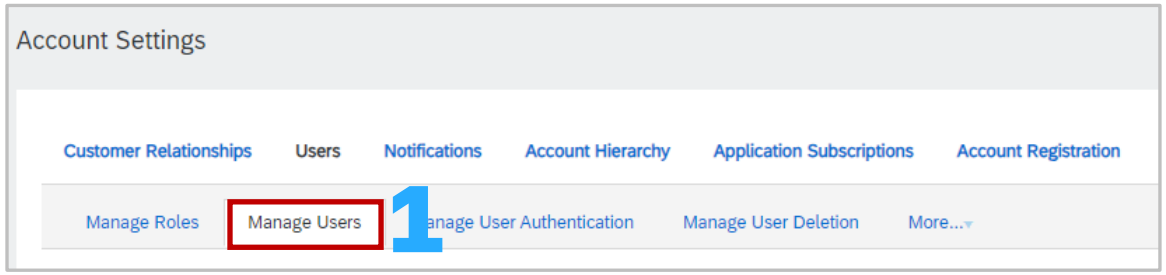


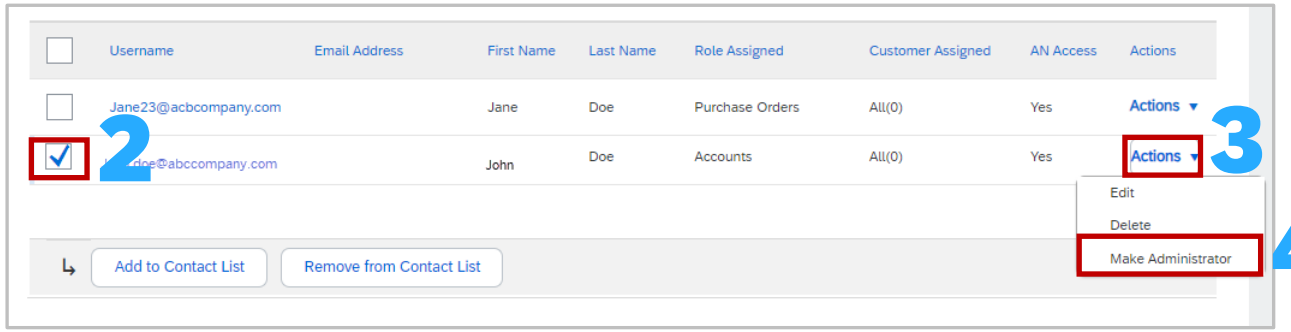
Updating the System Administrator

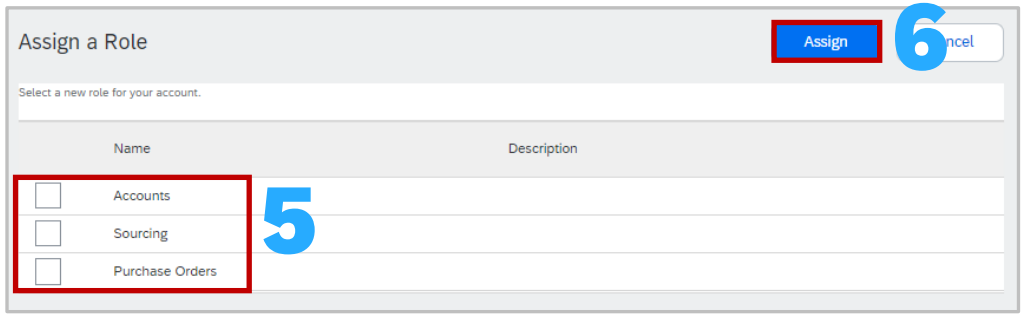
Where the Administrator is still working in the business but no longer is the designated SAP Business Network System Administrator. Ensure that the new administrator has a Username and Permissions already assigned to an existing role.

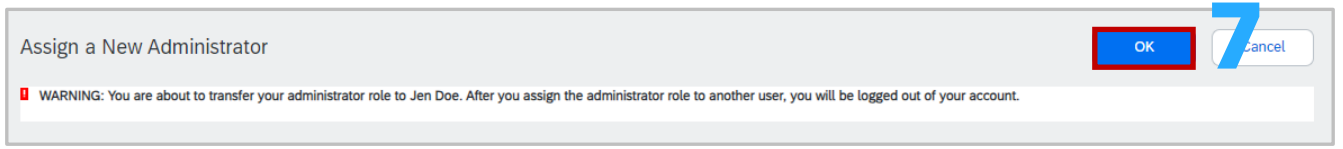
1. Display Account Settings and select the **Manage Users** tab
2. Scroll down to **Users or** use filters to search for a specific user, select the **User** that is the new designated administrator
3. Click on **Actions**
4. Select **Make Administrator**
5. Select the **role/s** being assigned to the existing administrator
6. Click on **Assign**
7. A screen message will confirm that the new administrator is being assigned

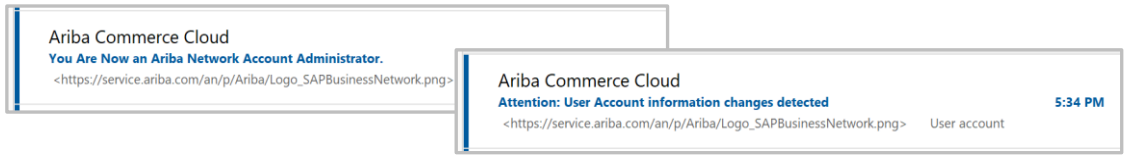
Note: The new system administrator will receive and email advising they are now the new administrator and the previous system administrator will be logged out, the Username and password remain the same for both the old and new administrators









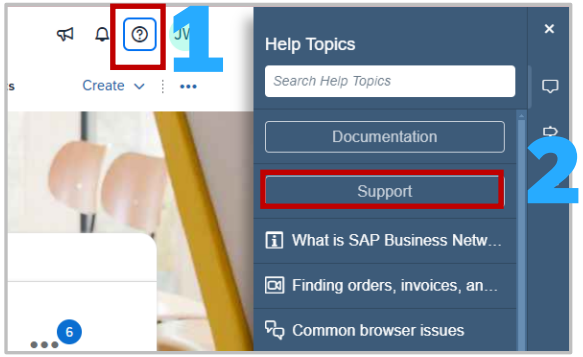


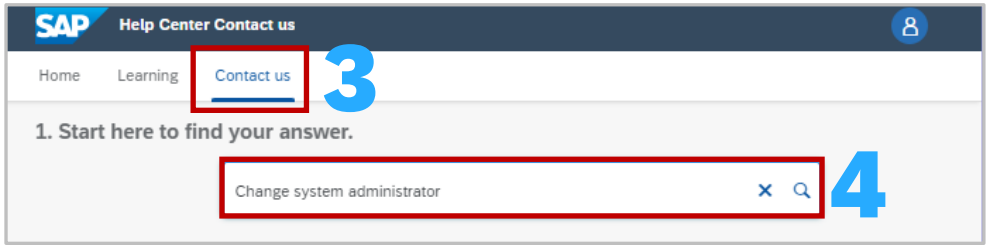
What to do if the System Administrator has Left and you have a username and password

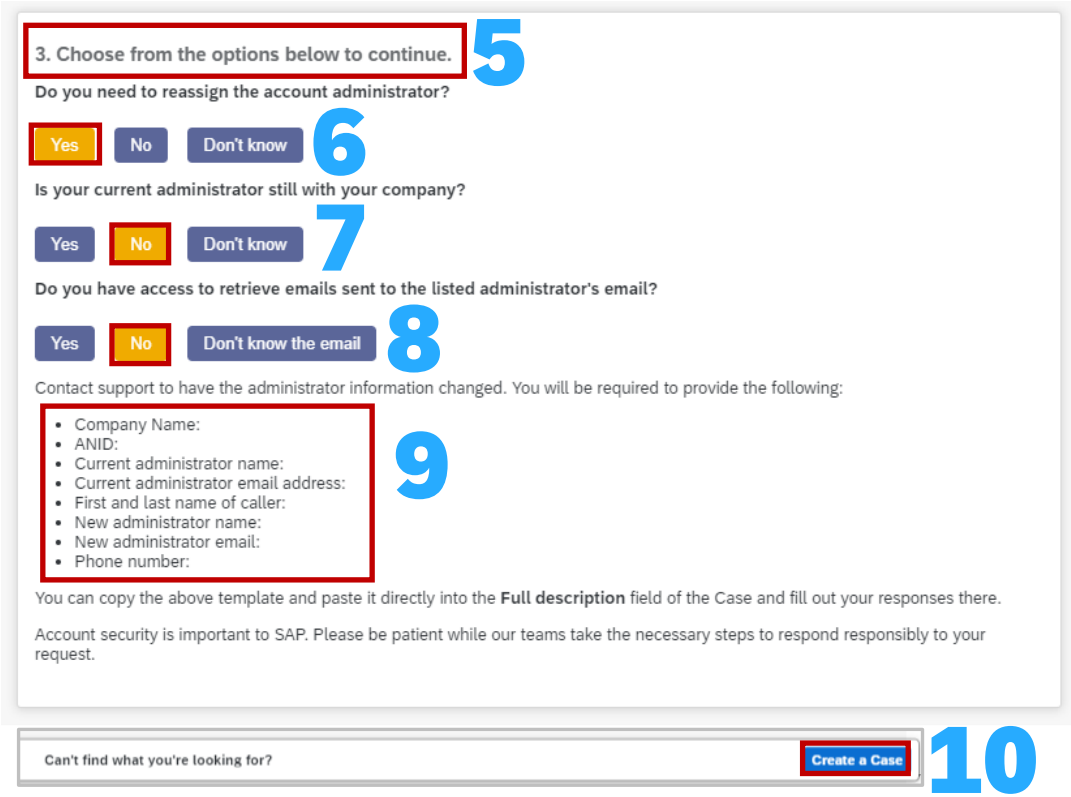
Where the System Administrator has left the business but a sub-user has a username and password, you need to assign a new System Administrator you will need to log a support request. Creating a case while logged in will update the ANID of the account you are using

1. Sign in to the SAP Business Network AND Click on the ?
2. Select **Support**
3. The SAP Help Centre Home is displayed and click on **Contact Us**
4. Enter **Change System Administrator**
5. Scroll down to **Choose from the below to continue**
6. Click on **Yes**
7. Click **No**, for the current administrator is still with the business/company
8. Click **No**, that you do not have access to the listed administrator email
9. Ensure you have the information listed
10. Click on **Create a Case** at the bottom of the screen

Refer to Create a Case





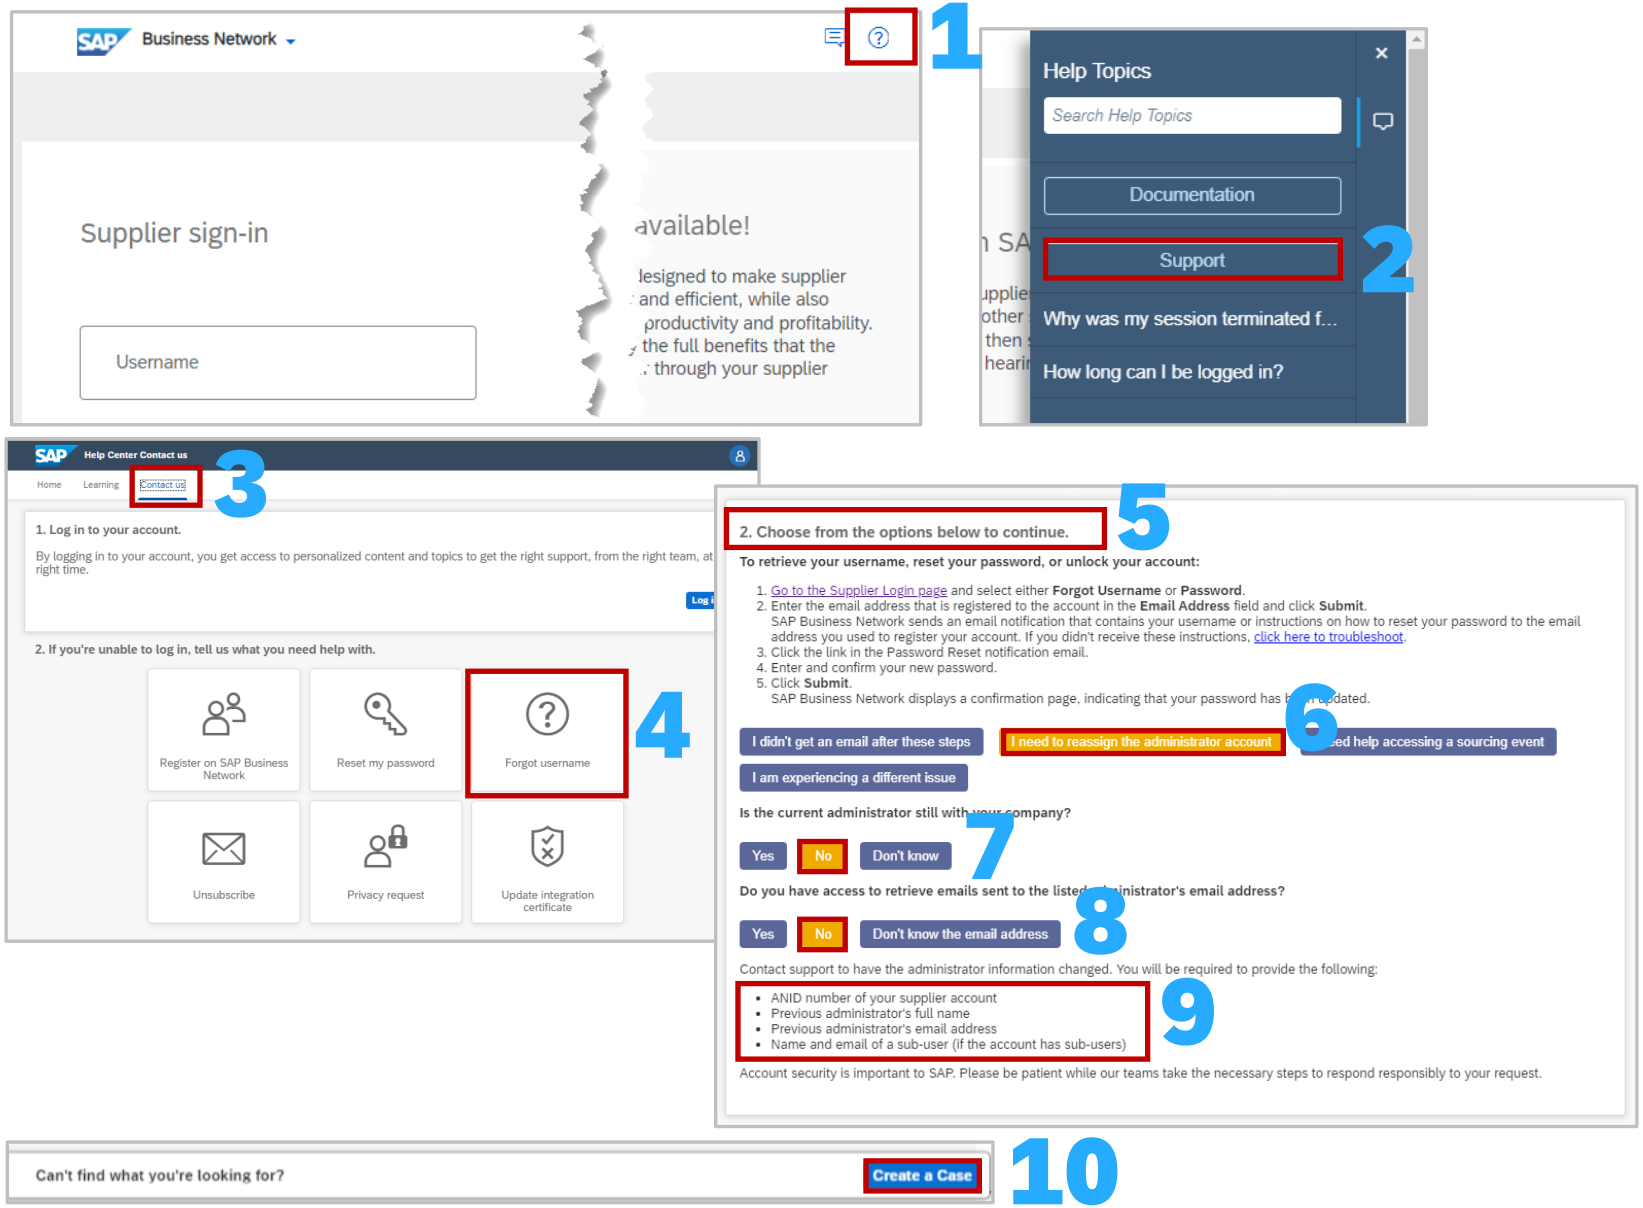


What to do if the System Administrator has Left and you do not have a username and password

Where the System Administrator has left the business and you need to assign a new System Administrator you will need to log a support request. If you do not have access to the network and no other sub-user has a username or password follow this process.

1. From the **SAP Business Network Sign-in Page** (httpsw://service.ariba.com) and click on the ? the top corner of the screen
2. Click on **Support**
3. The SAP Help Centre Home is displayed and click on **Contact Us**
4. Click on **Forgot username**
5. Scroll down to **Choose from the below to continue**
6. Click on **Yes**
7. Click **No**, for the current administrator is still with the business/company
8. Click **No**, that you do not have access to the listed administrator email
9. Ensure you have the information listed
10. Click on **Create a Case** at the bottom of the screen

Refer to Create a Case



Multi-Factor Authentication

Configure Multifactor Authentication Information

- Multifactor Authentication increases a business SAP Business Network security
- Only the System Administrator can manage, update and maintain multifactor authentication processes
- There are different levels of multifactor authentication that can be attached to specific users or all users of the SAP Business Network, they are:
  - **Time Allowed to skip multi-factor authentication attempts allowed** – the maximum number of days the user can skip the multifactor authentication setup, the default value is 5 days
  - **Number of invalid multi-factor authentication attempts allowed** – the maximum number of invalid multifactor authentication attempts that a user can make, the default is 5 attempts. After the number of invalid attempts specified in the field the user account is locked, only the System Administrator can unlock this account
  - **Retry period for locked out users** – After the number of minutes shown (default 120 minutes) the user account is automatically unlocked and can be reused, if it occurs a second time the default is 240 mins and the user is unlocked after that time. If the User gets locked a 3rd time the user account is locked and only the System Administrator can unlock the account
  - **Enable the Remember me option** – a user can select this option for multifactor authentication in the one-time password input screen, this opens a Remember Device for selection
  - **Remember device for** – specifies the maximum number of days the user's device and browser will be remembered, during which they will not be promoted for the multifactor authentication passcode during login, the default is 5 days

User Notifications of Multifactor Authentication Information

When this notification is sent to a User	Notification Text
When you have not set up multi-factor authentication even after you receive an email from your SAP Business Network administrator	Your action is required. This is a reminder to set up Multi-factor authentication which is due in 5 days. Multi-factor authentication is an additional layer of security to prevent unauthorized access to your account and protect the data. This does not affect your log in into SAP Ariba applications. Once you successfully log in with your credentials, you will be shown instructions to set up multi-factor authentication. It is highly recommended that you set up this feature immediately.
When you exhaust the limit set by your SAP Business Network administrator for invalid passcode entries	You have been locked out of your account for providing invalid passcode. Please wait while your account is reactivated. You may also reach out to your administrator and request your account to be unlocked.
When: Your SAP Business Network administrator has reset multi-factor authentication for your user account. You have requested a reset of multi-factor authentication for your user account.	Multi-factor authentication has been reset and a new security code has been generated for you. Once you successfully log in with your credentials, you will be shown instructions to set up multi-factor authentication. It is highly recommended that you set up this feature immediately

Enable Multifactor Authentication for Login - Users

Only the System Administrator can enable Multifactor Authentication requirements

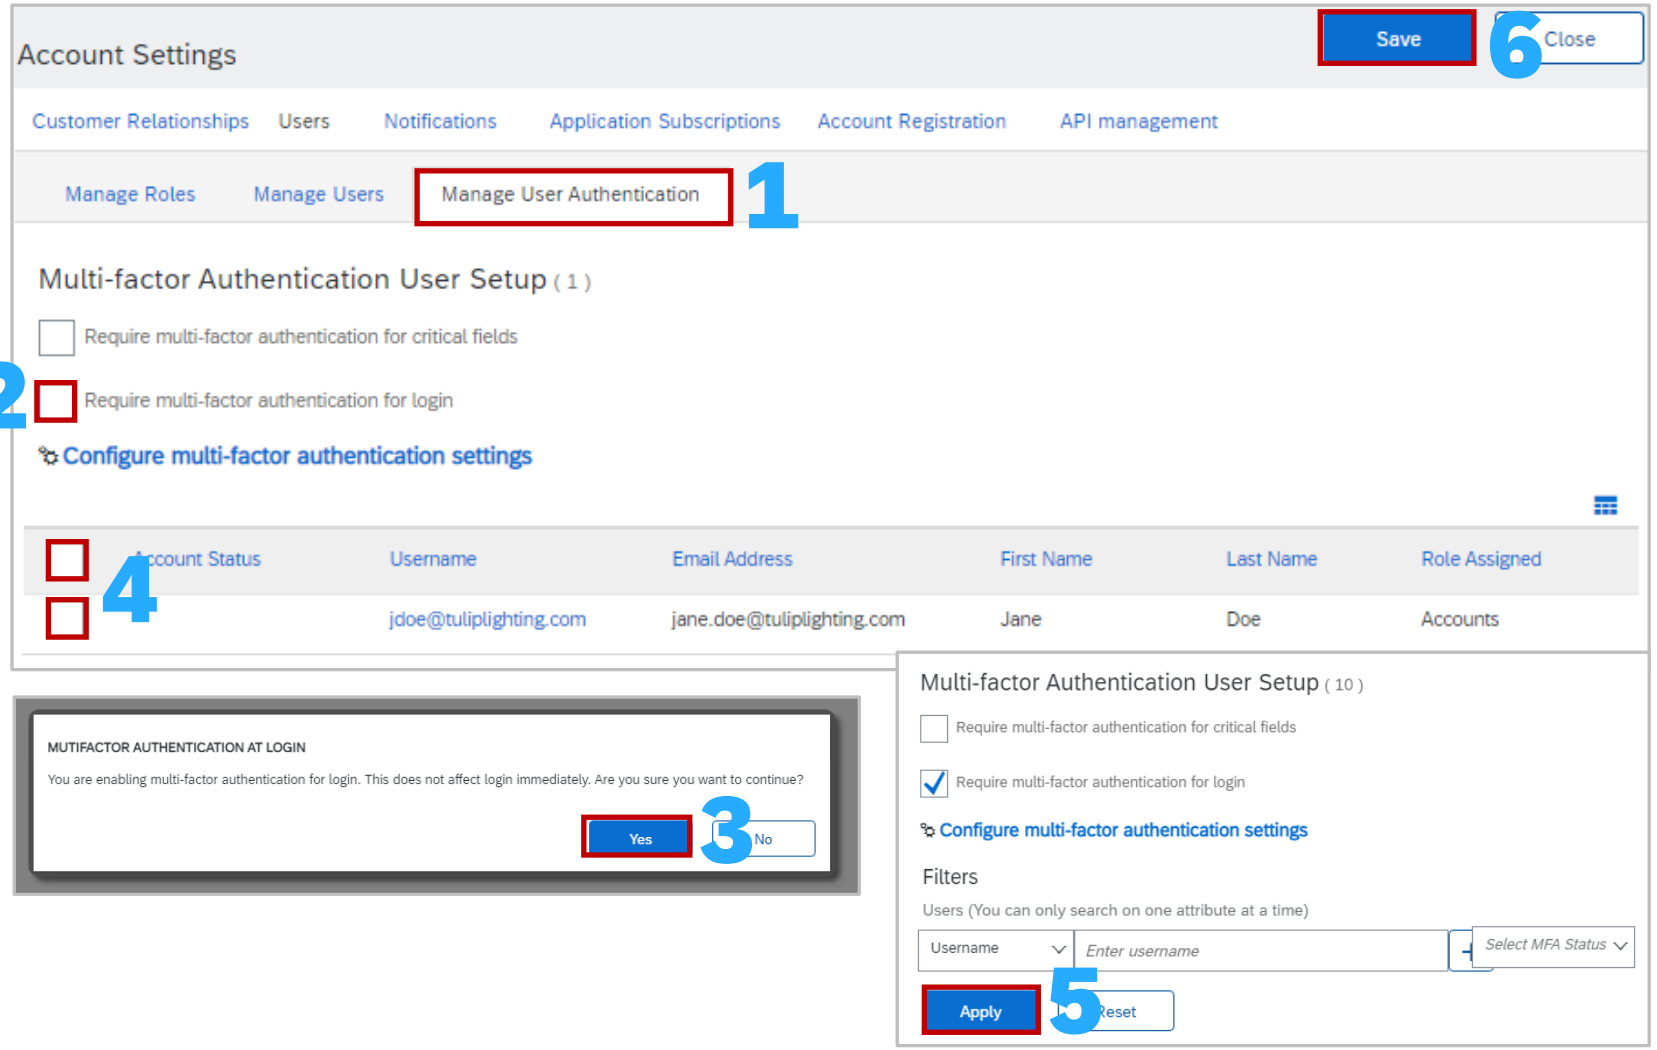
With Multifactor Authentication enabled for login, users are required to perform the two-step verification process to log in to the SAP Business Network

To enable multifactor authentication for login:

1. Select the **Manage User Authentication** tab
2. Select the box **Require multi-factor authentication for login**
3. Click on **Yes** in the dialogue box
4. Select the users by checking the boxes against their names from the table or the box in the blue ribbon as it will select ***ALL*** users
5. Click on **Apply**
6. Click on **Save**

Note: If you do not select specific Users none of the Users in your business will be enabled for multifactor authentication

To **Disable Multi-Factor Authentication**, select the box with a tick, a dialogue box will indicate you are disabling the multifactor authentication at login, click **Yes**



Users – Enable Multifactor Authentication for Critical Fields

Only the System Administrator can enable Multifactor Authentication requirements

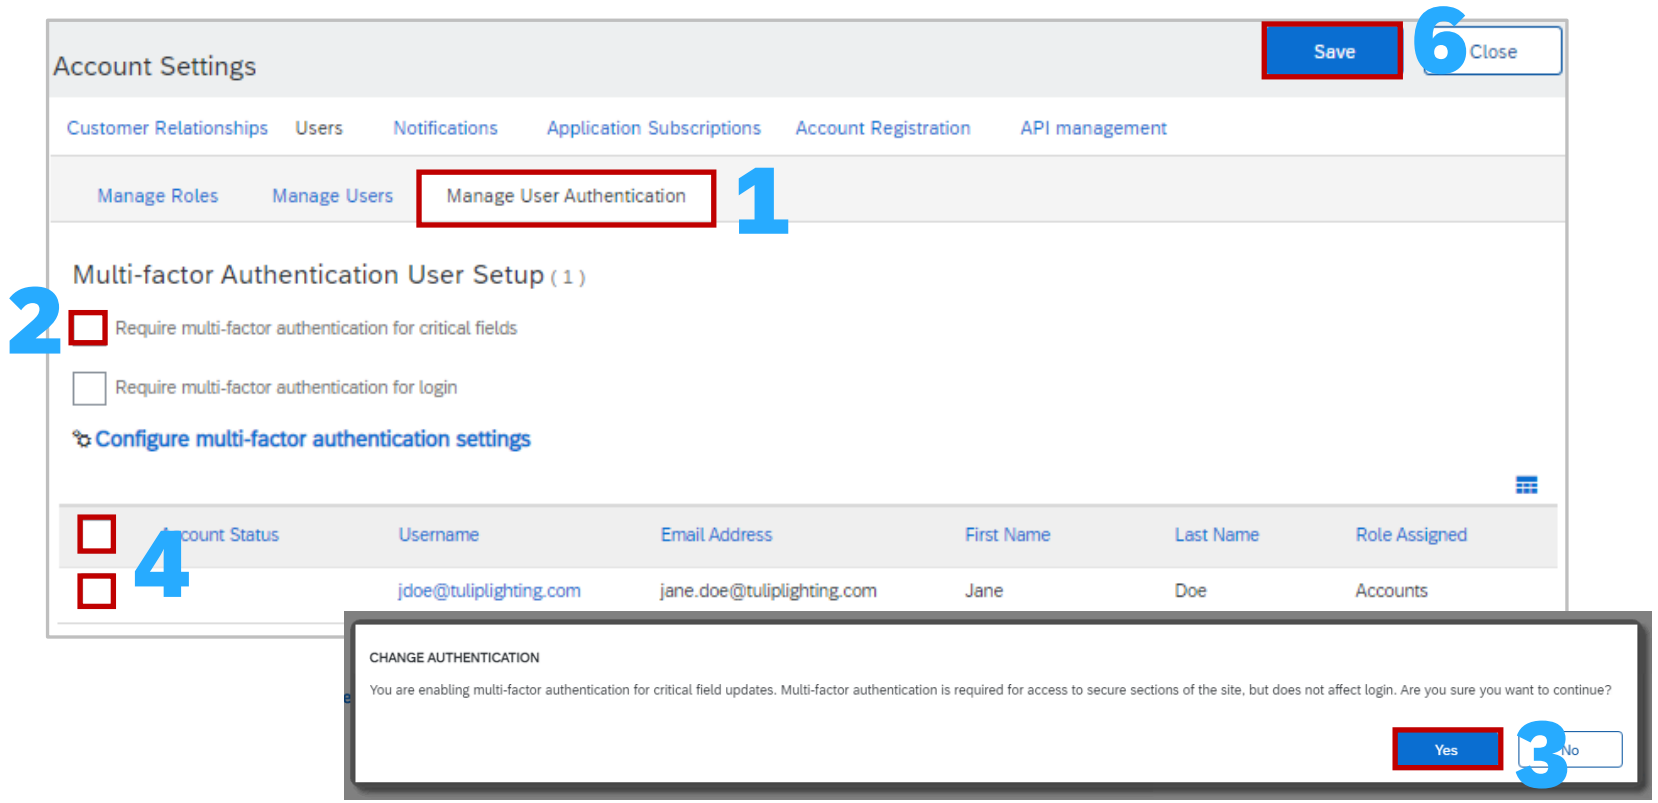
With Multifactor Authentication enabled for login, users are required to perform the two-step verification process to log in to the SAP Business Network

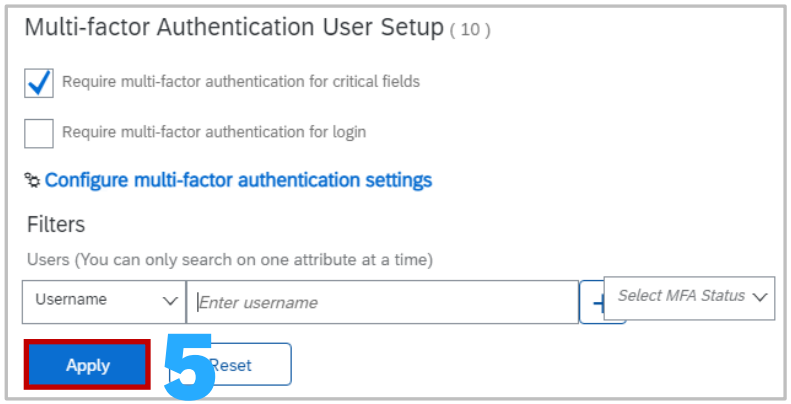
To enable multifactor authentication for login:

1. Select the **Manage User Authentication** tab
2. Select the box **Require multi-factor authentication for critical fields**
3. Click on **Yes** in the dialogue box
4. Select the users by checking the boxes against their names from the table or the box in the blue ribbon as it will select ***ALL*** users
5. Click on **Apply**
6. Click on **Save**

Note: If you do not select specific Users none of the Users in your business will be enabled for multifactor authentication

To **Disable Multi-Factor Authentication**, select the box with a tick, a dialogue box will indicate you are disabling the multifactor authentication at login, click **Yes**





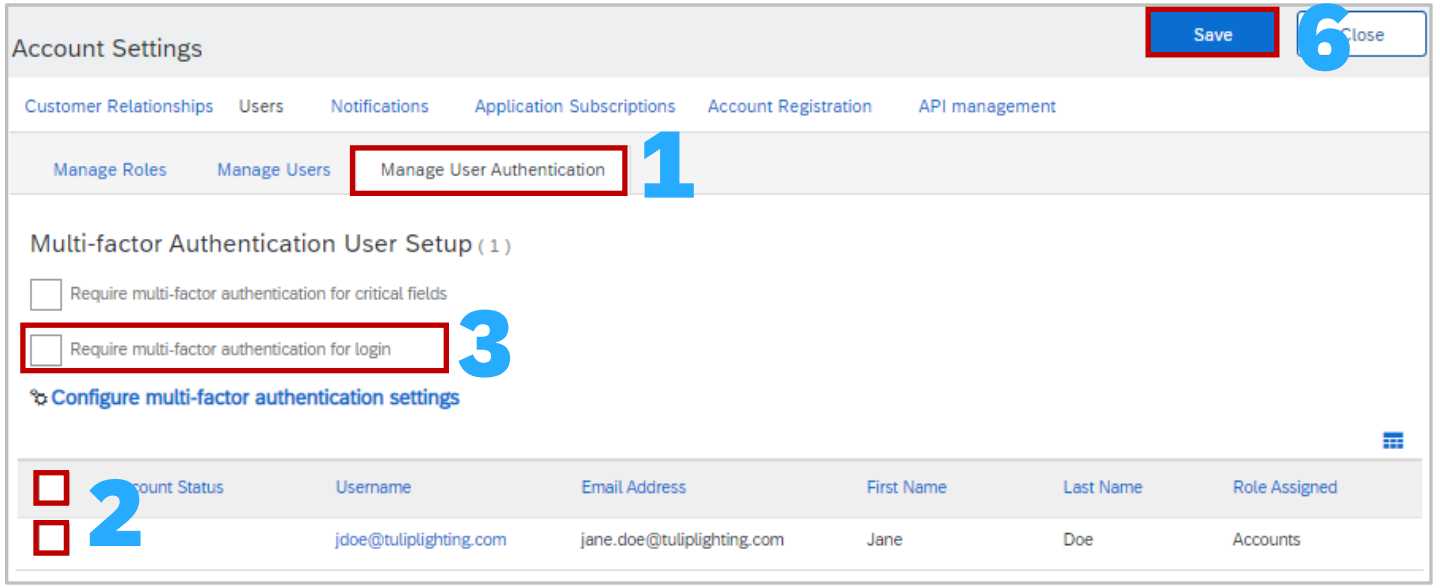
Users – Configure Multifactor Authentication Settings

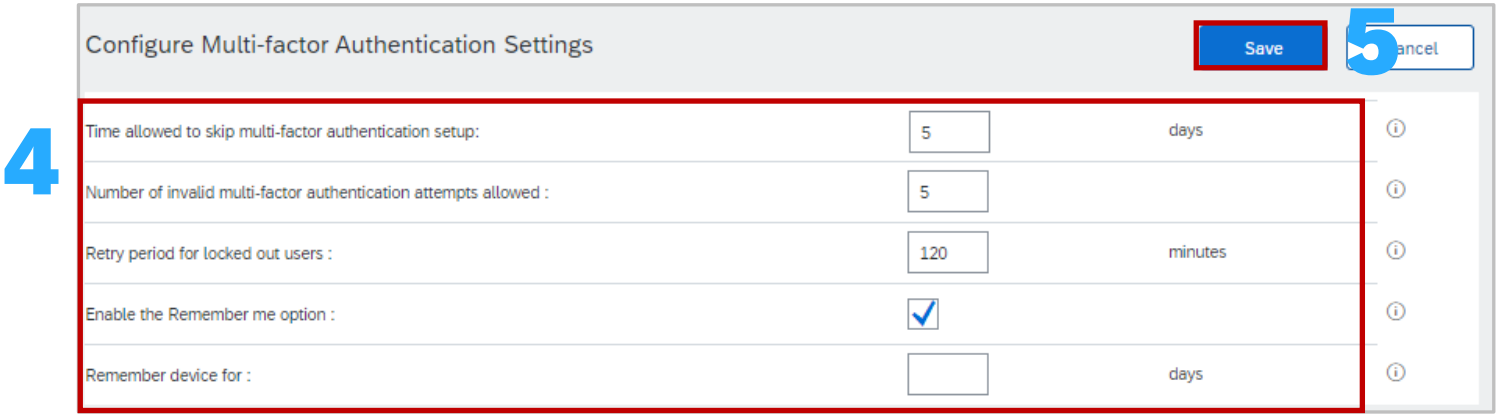
Multifactor Authentication settings can be configured to provide parameters for login functionality and other options supporting greater security

To configure multifactor authentication settings:

1. Click on **the Manage User Authentication tab**
2. Select the users by checking the boxes against their names from the table or the box in the blue ribbon as it will select ***ALL*** users
3. Click on Configure multi-factor authentication settings, the window opens
4. Select the required option/s and update (if required):
   - **Time Allowed to skip multi-factor authentication attempts allowed**
   - **Number of invalid multi-factor authentication attempts Retry period for locked out users**
   - **Enable the Remember me option**
   - **Remember device for**
5. After selecting and/or updating multifactor authentication information, click on **Save**
6. Click on **Save** to exit the screen

Note: Click on the ⓘ to get further information on what the field means





Test Accounts

Information

- Only the System Administrator can create the test account and use the Switch to Test ID selection, users must be added as users
- The same credentials cannot be used to access the Test and Production account
- For Suppliers that will be integrating, a Test Account will be needed to ensure documents are flowing correctly from your ordering system or ERP through Ariba and to your Buyer
- Roles, Users and Permissions must be created for users in the test environment as their production account will not give them access unless a specific test log in is created
- Your Test account should be configured to match your Production account. This will ensure the testing results are consistent with what will result in Production
- The Network will always display which mode you are logged into, (Production or Test). Your Test account ID has the suffix “-T” appended to your SAP Business Network ID (ANID)

Test Account Creation

The ***System Administrator*** is the only User with the Option to Switch to the Test Account

- The System Administrator will need to create Test Account User ID's before users can access Test.

To Create a **Test Account**:

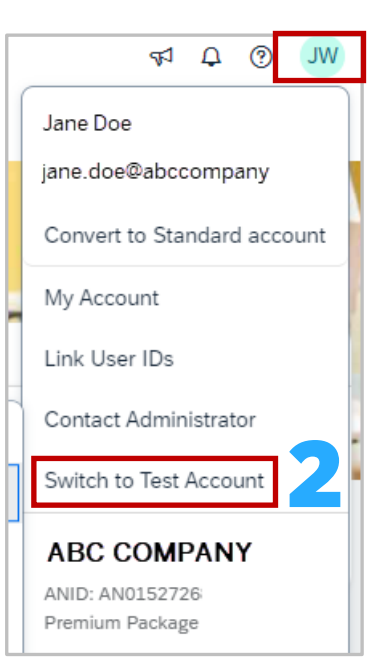
1. Click on your initials in the top right corner
2. Select **Switch to Test Account**
3. Click **OK** when the SAP Business Network displays a warning indicating You are about to switch to Test Mode.

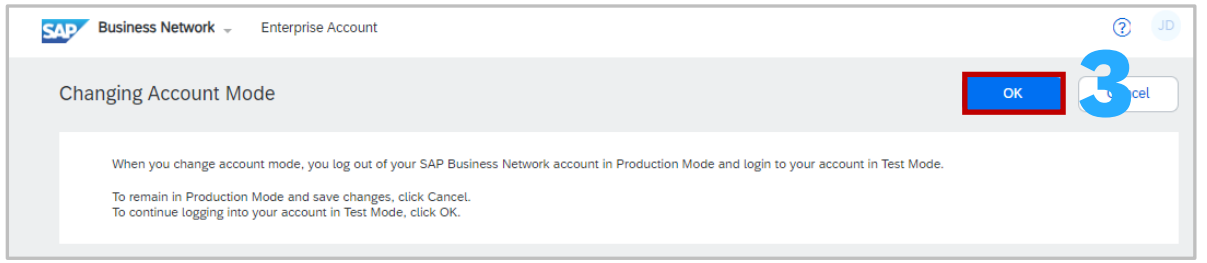
Note: A Test Admin Username will be autogenerated, the System Administrator can either use this or create a new one, it cannot be the same as the login for the Production Account

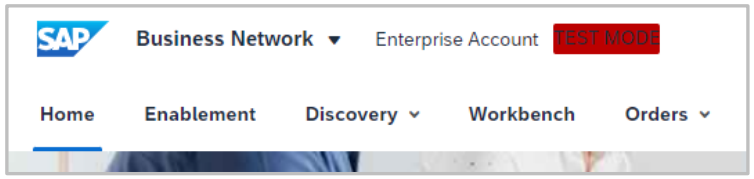
4. Create a **Username**
5. Create a **Password**
6. Re-enter the password into **Confirm Password**
7. Click **OK**

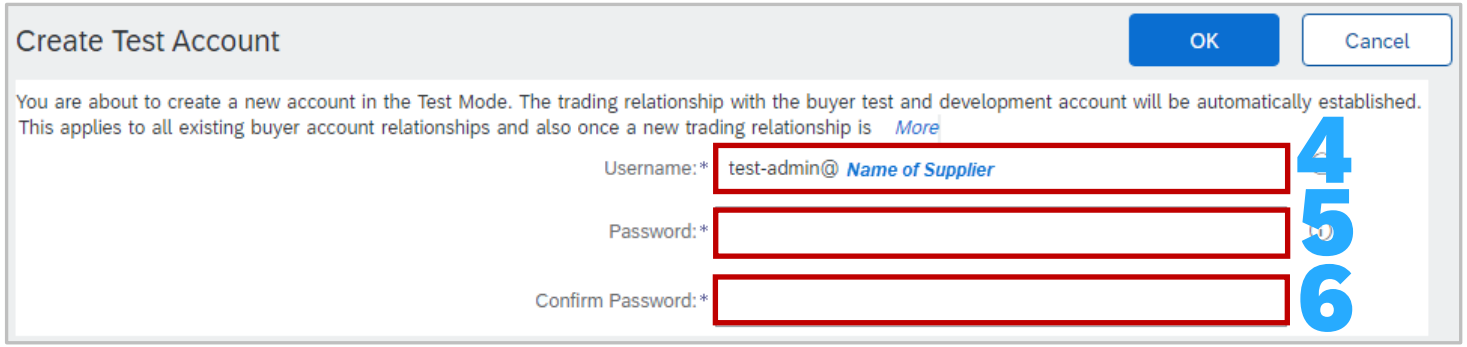
You will be transferred to your test account. Your Test account should be configured to match your Production account. This will ensure the testing results are consistent with what will result in Production.

Test Mode will be displayed in Red at the top of the screen to identify you are working in a Test account









Auto-Invoice Against Goods Receipts (GRN)

Information

- The Automatic Invoice Creation process authorizes the Buyer to use the SAP Business Network functionality to create and submit invoices based on the receipts generated by the Buyer
- Each time the SAP Business Network receives a receipt that applies to a single order from the Buyer, the system will use the information from the receipt and the corresponding order to automatically create and submit an Invoice
- When using this process the information entered into the Purchase Order and then confirmed is the document that the invoice is created from
- Only Buyers who use Automatic Invoice Creation will have an Actions button available and Automatic Invoice Creation a selection
- When the Automatic Invoice Creation has been triggered the Response Status will be either Rejected (not active) or Accepted (active)
- A Supplier can change the response at any time however be aware that receipts prior to changing will be automatically created

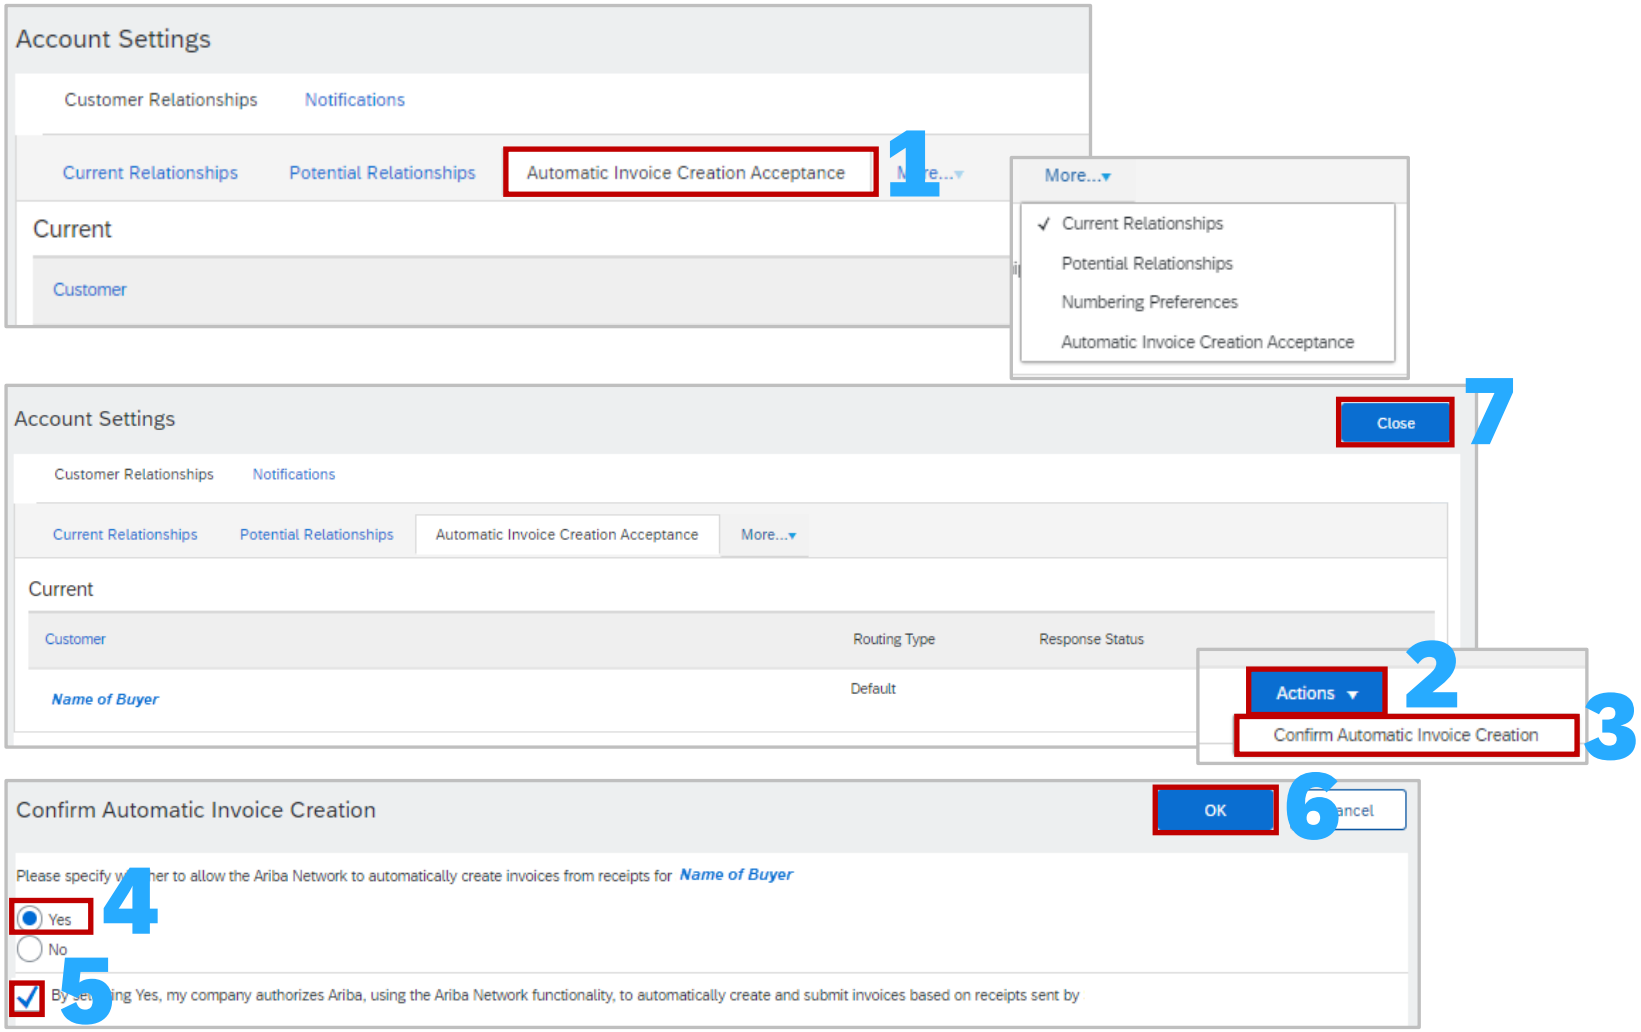
Activate Goods Receipt Notice (GRN) Process and Information

To request consent from your Buyer that they agree to participate in this process

Open the **Customer Relationships** screen

1. Click on the **Automatic Invoice Creation Acceptance** tab
   - **Note:** If the Automatic Invoice Creation tab is not displayed, click on More. If it is not available for selection it indicates this is not a process your Buyer/s use
2. Click on **Actions**
3. Select **Confirm Automatic Invoice Creation**
4. Click **Yes**
5. Agree to the terms and conditions by clicking in the box
6. Click **OK**
7. Click on **Close** to exit the screen

Note: To turn the Auto-invoice process off select No in step 3



Customer Relationships

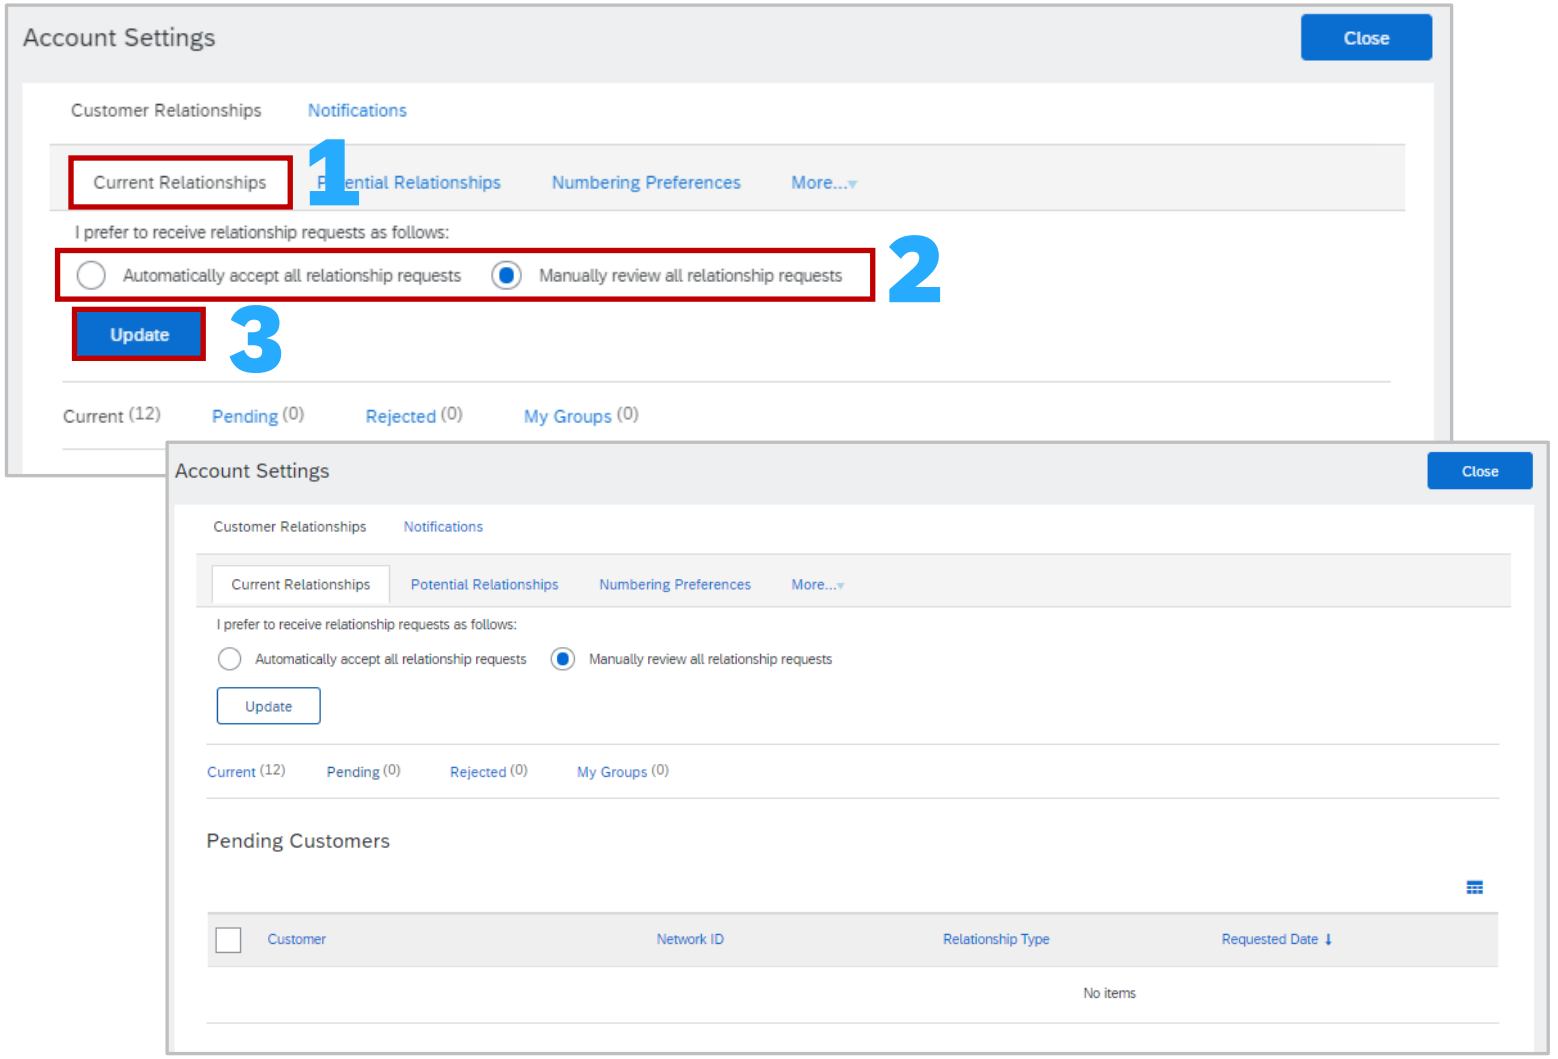
Manage Customer Relationships

Suppliers may receive requests from other businesses to create a relationship

To manage Customer Relationships:

Open the **Customer Relationships** screen

1. Select **Current Relationships**
2. Identify and select whether you with to accept new customer relationships either **Automatically** or **Manually**
3. Click **Update**



The Tabs indicate how many customers are:

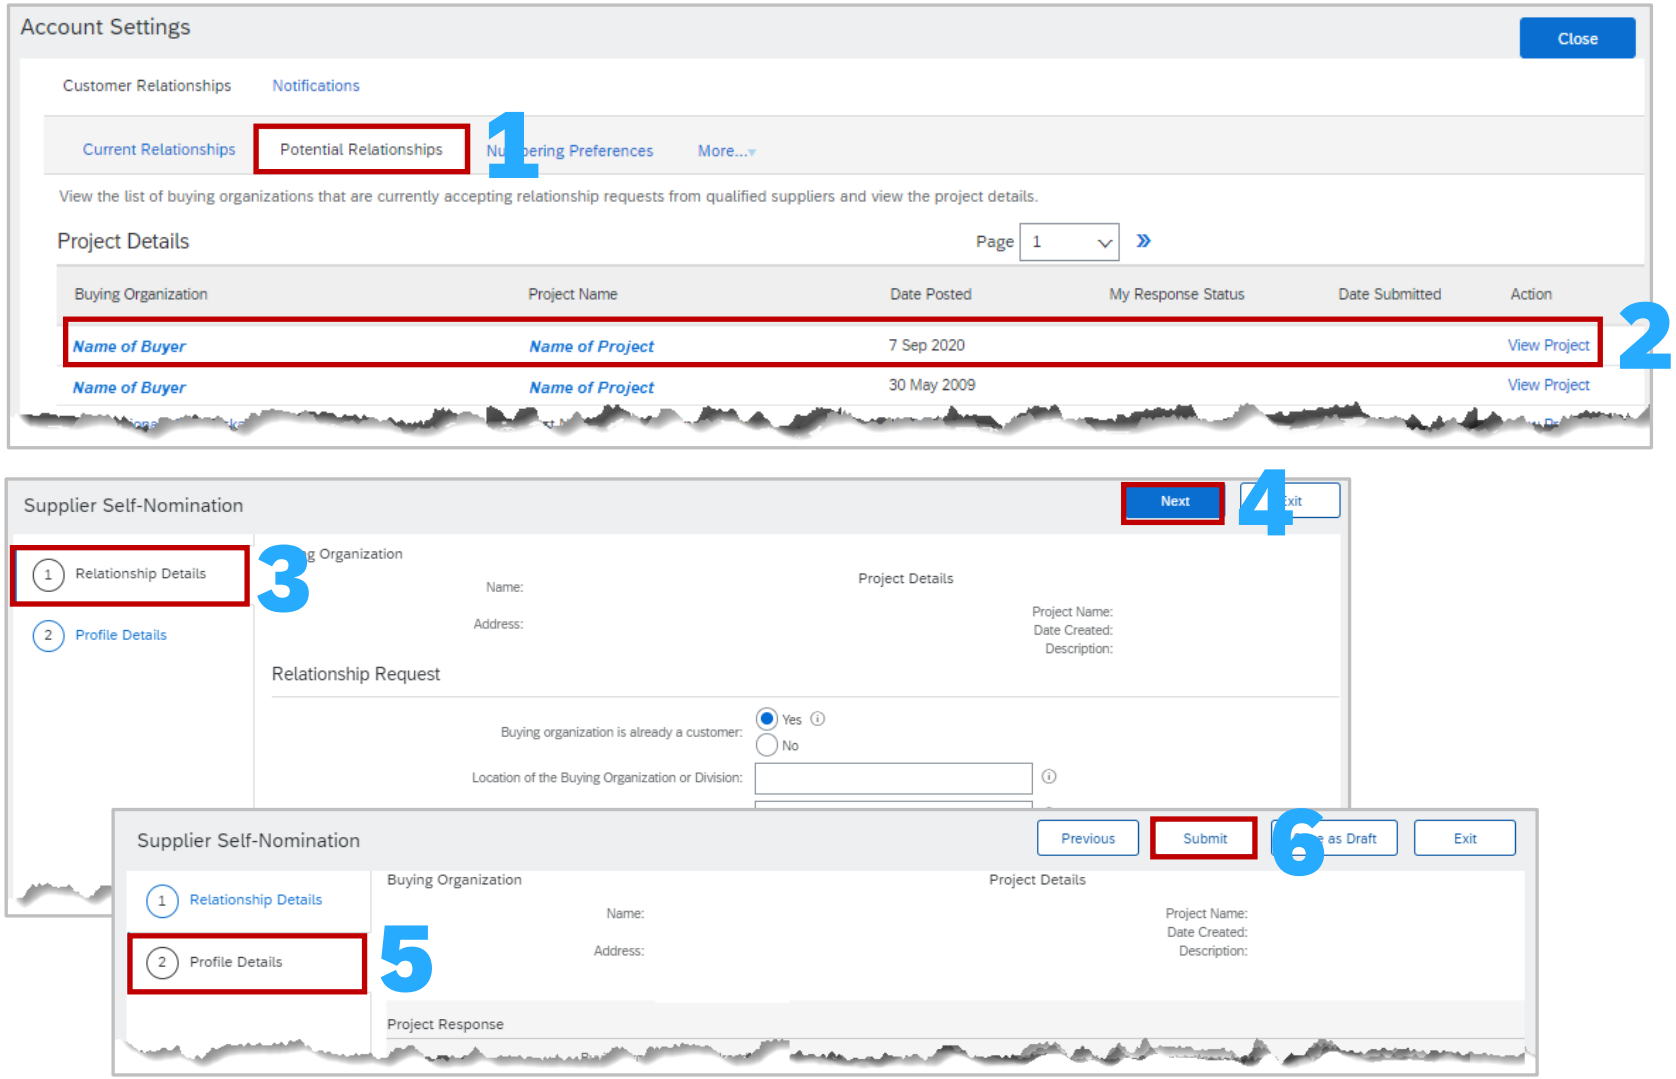
- Current
- Pending
- Rejected
- My Groups

Review, update and confirm customer relationships as required

Managing Potential Relationships

To Manage Potential Customer Relationships:

1. Select **Potential Relationships**
2. Click on **View Project** next to the relationship you wish to view
3. Review the information on the **Relationship Details Tab**, enter information into all fields with an asterisks
4. Click on **Next**
5. Review the information on the **Profile Details** tab
6. Click on **Submit**



Managing My Groups

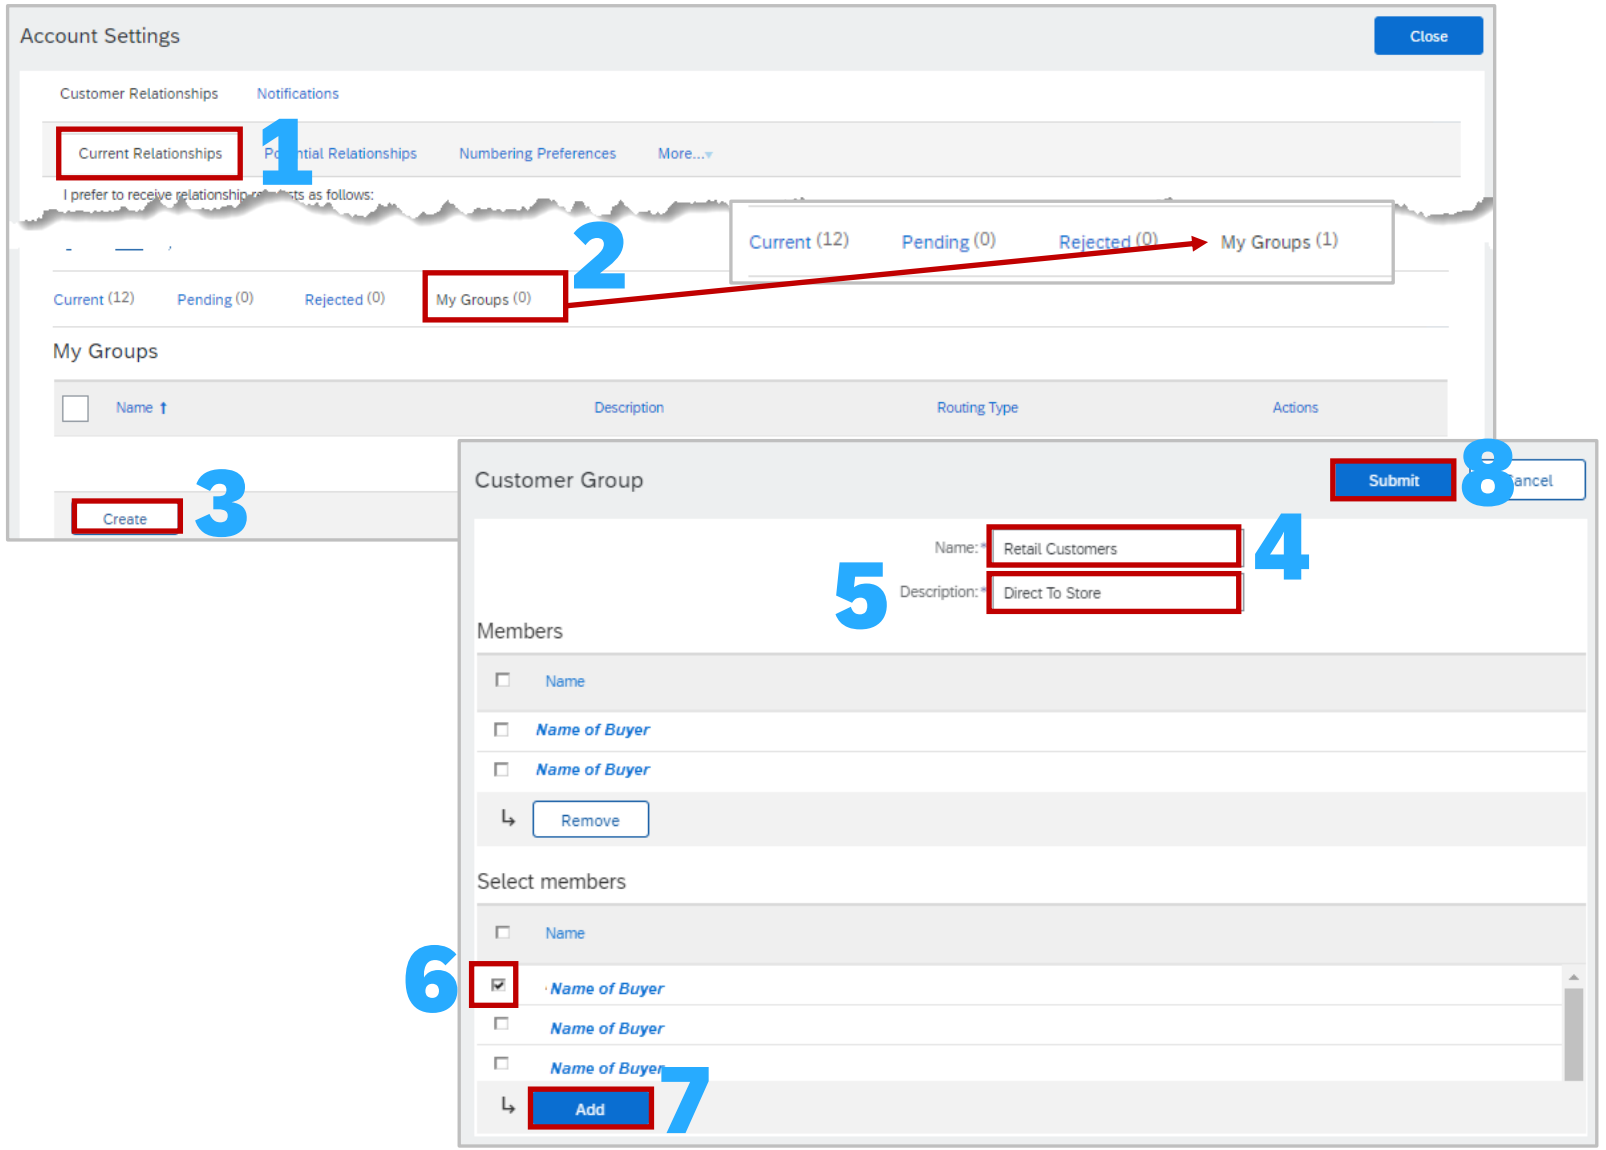
Suppliers can group their customers into defined groups

To do this:

Open the Customer Relationships screen

1. Select **Current Relationships**
2. Select the **My Groups** tab
3. Click **Create**
4. Enter the Name of the group you wish to create
5. Enter a Description of the group
6. Click in the box next to the Buyer/s you wish to add to this group
7. Click on Add, the names of the Buyers will appear under Members
8. Once all members have been added click on **Submit,** the name of the group is displayed

To create more groups, repeat this process



Archiving Invoicing

Invoice Archival Process

Configuring invoice Archiving allows you to specify the frequency, immediacy and delivery of zipped invoice archives

Suppliers can determine the frequency that invoices can be archived by choosing either Twice Daily, Daily, Weekly, Biweekly or Monthly

To do this:

Open the **Electronic Invoice Routing** screen

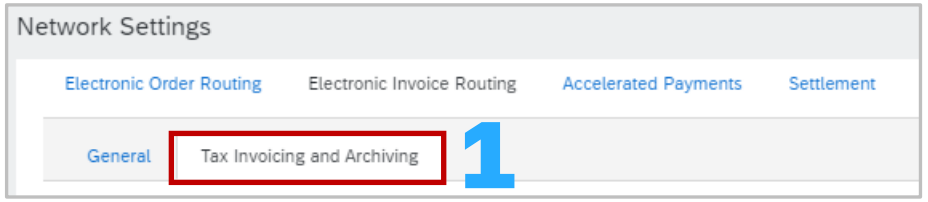
1. Select **Tax Invoicing and Archiving**
2. Scroll down to Invoice Archival, click on **Configure Invoice Archival**
3. Select the **Frequency**

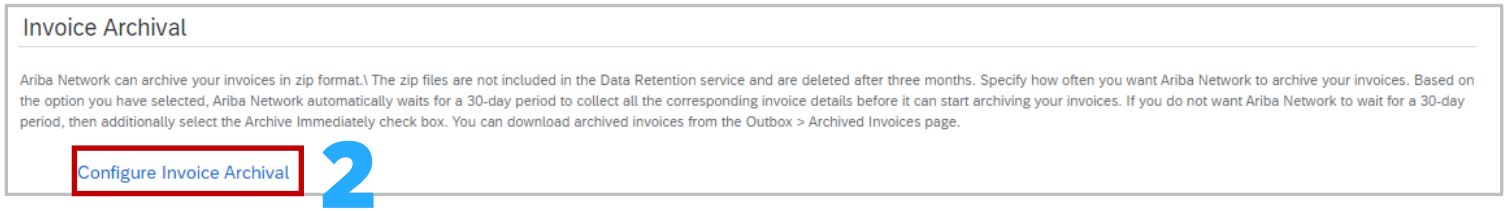
Note: Select Archive Immediately if required, after Archive Immediately starts you can either Stop it or Update the frequency as required

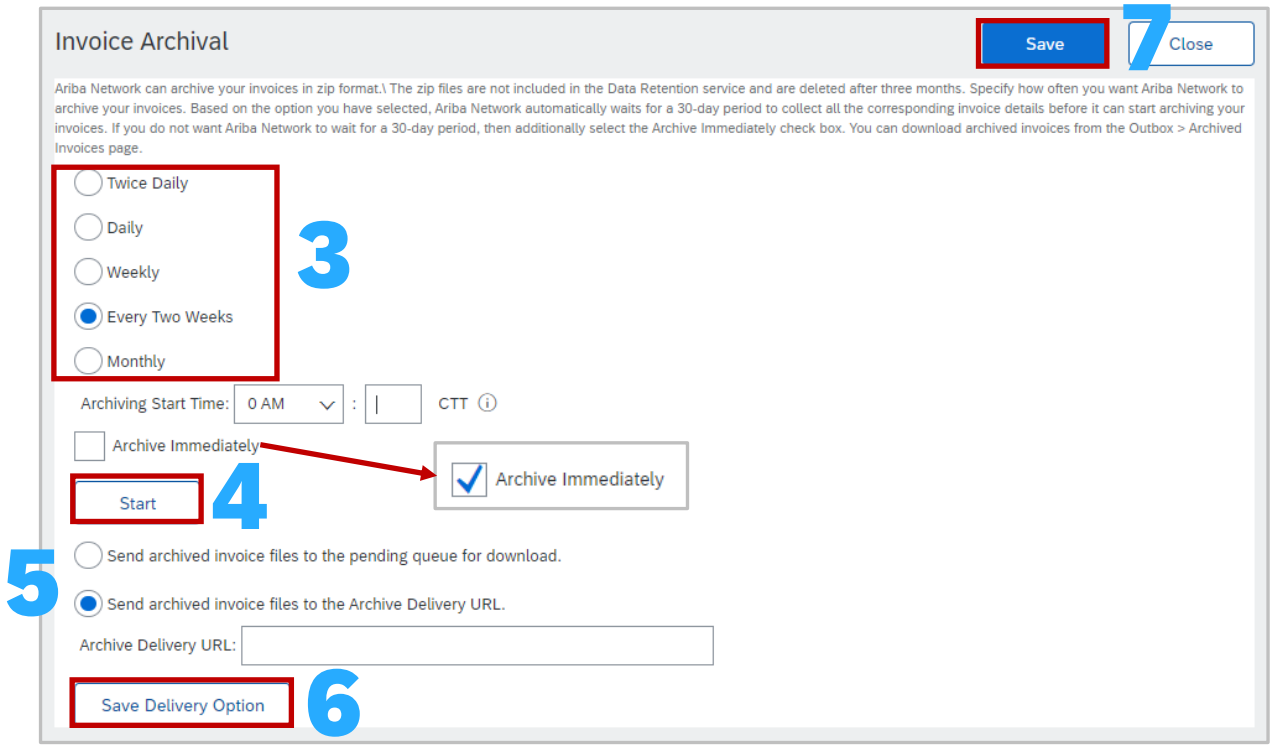
4. Click on **Start**
5. Determine the **Send Requirement**:
   - Click on **Send Archived invoice files to the pending queue for download**

   OR

   - Click on **Send archived invoice files to the Archive Delivery URL**, then enter the **Archive Delivery URL**
6. Click on **Save Delivery Option**
7. Click on **Save**



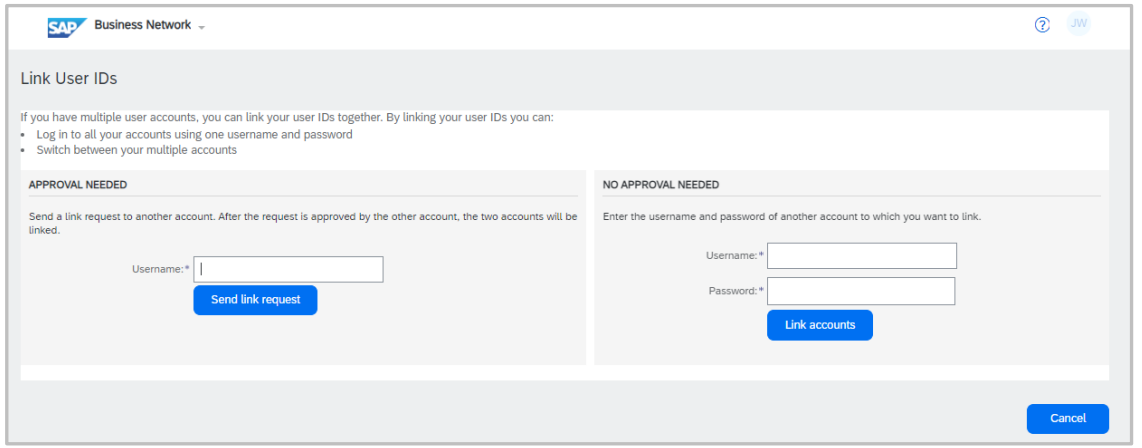




Linking User ID's

Information

- A production account User ID can not be connected with a Test Account User ID
- There is no option to un-link a linked user id, only the System Administrator can delete the User Name from the Manage Users section in the native account, however it will not be removed from the switch account section on the linked account
- All Users have link User IDs in their Account Settings by default
- There are two options:
  - Approval Needed
  - No Approval Needed
- You cannot link a test account to a Production Account



- When a user uses the **Approval Needed** option and sends a link request from the user account to the account administrator, the user will see whether the request is successful or not right away
- The account administrator will receive an email notification for the request to take action
- While the user's request is pending, they will be able to see the pending request in the supplier account and will have a chance to cancel the request if necessary
- The supplier account administrator will log in to the Ariba account, open Account Settings -> Link User IDs -> locate Received Link Requests -> click on the Actions dropdown to approve or decline the request
- When you use the **No Approval Needed** option, enter your user ID and password for another account, the linkage will occur momentarily

Linking User Id's

When you link user IDs from between two accounts, both will inherit already linked user IDs prior to this linkage

Once accounts are linked, you can log in to any one of them and switch to the other/s

Link User Id's to access more than one account without having to log out of one to log into another account you have credentials for

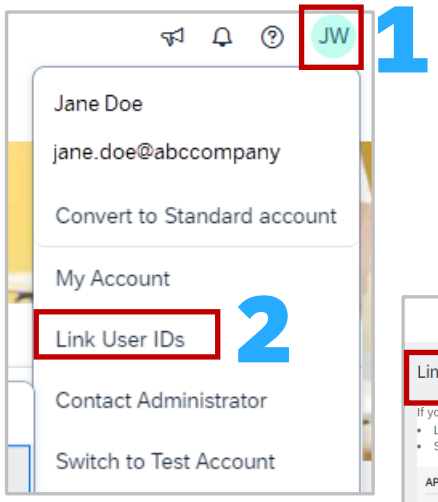
To do this:

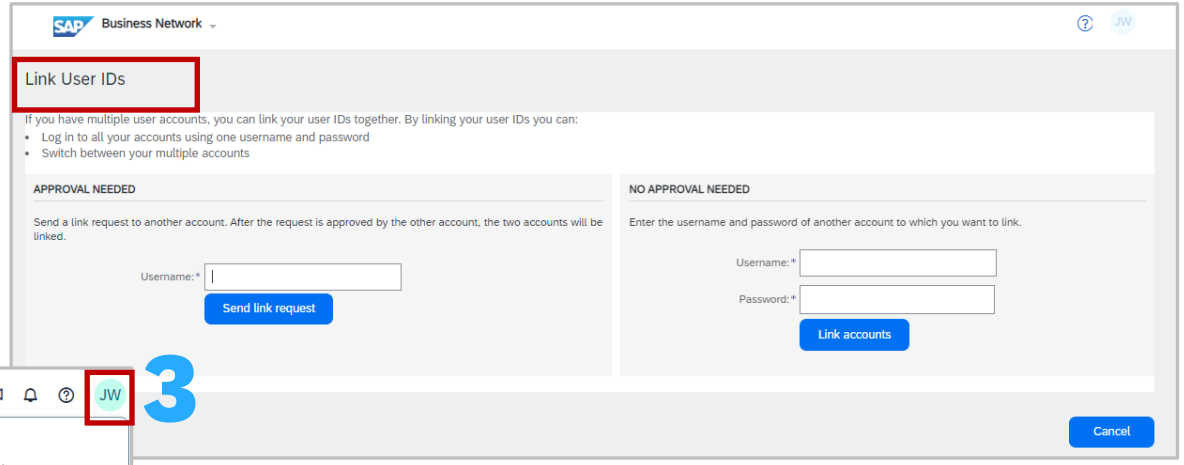
1. Sign in to the SAP Business Network and click on **the initials at the top of the screen**
2. Select **Link User ID's**

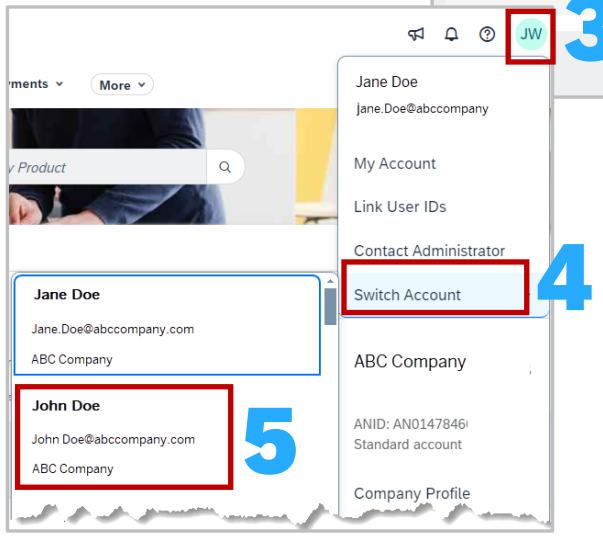
Note: There are two options for Link User ID's. **Approval Needed** is used when you don't have a specific login for another account **No Approval Needed** is when you have a log in for the other account.

To accessed linked accounts:

3. Click on your **Initials**
4. Select **Switch Account**
5. Select the Account to switch to in the drop down list







Setting Up an Account Hierarchy

Information

- An Account Hierarchy is used for multiple SAP Business Network accounts
- The Account Hierarchy Administration and Child Account Access permissions enable users to automatically sign on to a child account without having to enter a username and password
- Account Hierarchy and Link User IDs are two separate processes – Link User ID's can be actioned by all users, however only the System Administrator can define parent and child accounts
- Creating an Account Hierarchy makes it easier to manage by reducing the maintenance required to update duplicated accounts (where the profiles are synced)
- The Account Administrator has the permission's to create a hierarchy, however, users can send a request to the parent account administrator to approve the creation of a parent-child hierarchy. Send a request to the parent administrator and add a child account to the parent account on their own but a user cannot have any visibility to or awareness of their existing account hierarchy
- Account Hierarchy is a pre-requisite for a Multi-Org consolidation within a supplier account
- Multi-Org Consolidation is for Billing Purposes
- An Account Hierarchy is not available to create between production and test accounts

Administrator Parent Accounts

- The Administrator of the parent account can unlink accounts, unlink company profiles and sign onto child accounts and back to the parent account by default
- As the administrator of a parent account, you can automatically sign on to a child account
- You can create an account hierarchy between an Enterprise account (parent) and a Standard Account (child) and visa versa
- However, the parent account type is dominant when the account profiles are linked.
- The administrator of the parent account **CAN**:
  - Log in to the child account
  - Change the setting on the child account and complete the company profile
  - Publish catalogs
  - Check the status of any subscription or transaction fees
- The administrator of a parent account **CANNOT**:
  - View buyers on the Child account
  - Create any documents (PO confirmation, Ship Notices, Invoices)
  - Run Reports

Administrator Child Accounts

- Manage links to Child Accounts and sign on to Child Accounts to manage SAP Business Network processes
- The Account Hierarchy Administration permission allows users to manage links to child accounts and sign on to child accounts without a username and password
- The Child Account Access permission enables a user to sign on to child accounts
- The Account Hierarchy Administration permission allows a user to manage links to child accounts and sign on to child accounts without a username and password
- Other users can also sign on to child accounts, but require the Child Account Access permission to sign on to child accounts
- Administrators can control the visibility of accounts to potential business partners
- By default, both the parent and child accounts are visible to potential business partners when they perform a search for you on SAP URL Business Network using Allow buyer organizations to search this account setting. When this setting is enabled, business partners can search for both parent and child accounts on SAP URL Business Network. When this setting is unchecked, business partners can search and view only the parent accounts on SAP URL Business Network
- The administrator for a parent account can work with SAP Business Network Help Centre to manage services for child accounts.
- This includes subscribing to, updating, renewing, and cancelling services on behalf of the child accounts
- If an administrator chooses to align subscription terms for multiple child accounts, and one or more of the child accounts have already subscribed to services on their own, the SAP URL Business Network Customer Support team cancels the existing subscriptions and begins a new subscription on the date specified by the parent account administrator

Administrator Child Accounts cont.

- Manage links to Child Accounts and sign on to Child Accounts to manage SAP URL Business Network services
- The administrator of the Child account can unlink accounts by default
- A child account administrator cannot link or unlink account profiles whether the accounts are synchronized or unsynchronized
- If you choose to link company profiles while establishing a parent-child hierarchy:
  - The administrator of the Child account **CAN** log into the child account and take the following actions:
  - In the Account Hierarchy section
    - View parent account information
    - View parent account users name and username In the Settings
    - Change notifications in the Settings
    - Change electronic order routing and invoice routing
    - View buyers on the Child account
    - Create roles, users, and remittance info in the Settings In the Company Profile
    - Change or add certifications to the Company Profile
    - Add documents to the Additional Documents in the Company Profile
  - The administrator of the Child account **CAN NOT** take the following actions:
    - Change Basic, Business, and Marketing information and Contacts in the Company Profile because they are greyed out

Multi-Org Consolidation Information

- The SAP Business Network offers invoice consolidation and synchronization for customers with several accounts
- When the parent account administrator creates a parent-child hierarchy, it does NOT automatically translate into a consolidated billing
- After the administrator creates a hierarchy, they need to submit a Customer Support ticket to consolidate the billing. In other words, the parent account administrator needs to make sure they have set up a parent-child hierarchy before filing a Support ticket
- The accounts continue to transact as they are today in a multi-org but the billing will be consolidated onto one invoice while they are separated by child account/s and their relationships
- The parent account determines the fee currency
- The transaction currency is defined by the child account preferences/location
- Fees will be invoiced only to the parent account with the payment cycle synchronized for the entire group
- The parent account will receive one single invoice every three months for all customer relationships and for all linked accounts
- This consolidation is related only to invoices issued by SAP Business Network to the supplier, the business operations of each account are still independent
- A Multi-Org is **NOT**: -
  - A way to merge accounts
  - A way to get a discount on Transaction Fees

Setting Up an Account Hierarchy

Only the System Administrator and sub-users with the applicable permissions can access the Account Hierarchy process.

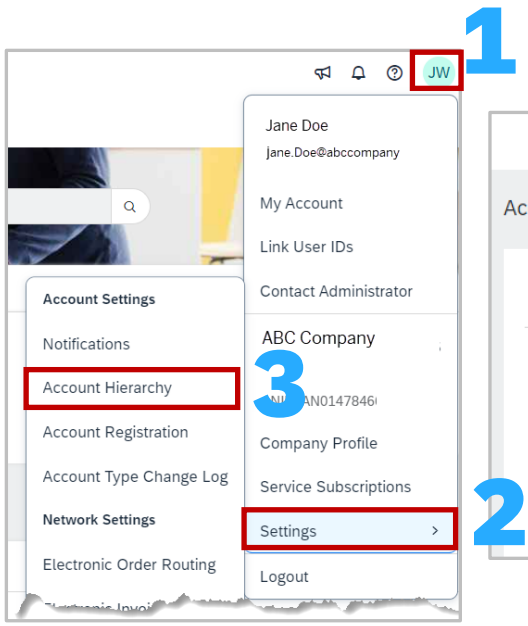
When linking accounts it must be a System Administration Account you cannot link sub-user account to an account Hierarchy, refer to Link Account process to access sub-accounts – Refer to Linking User IDs

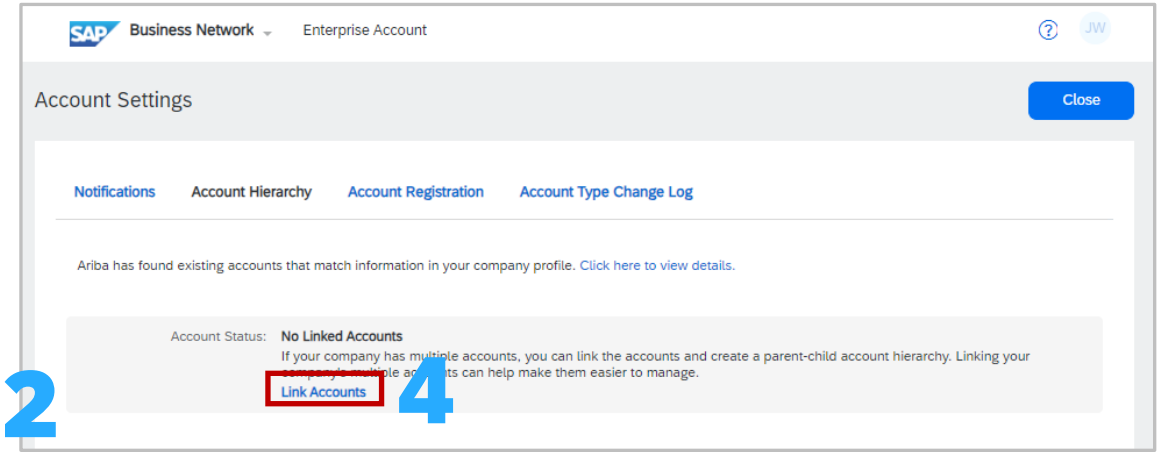
Sign in to the SAP Business Network:

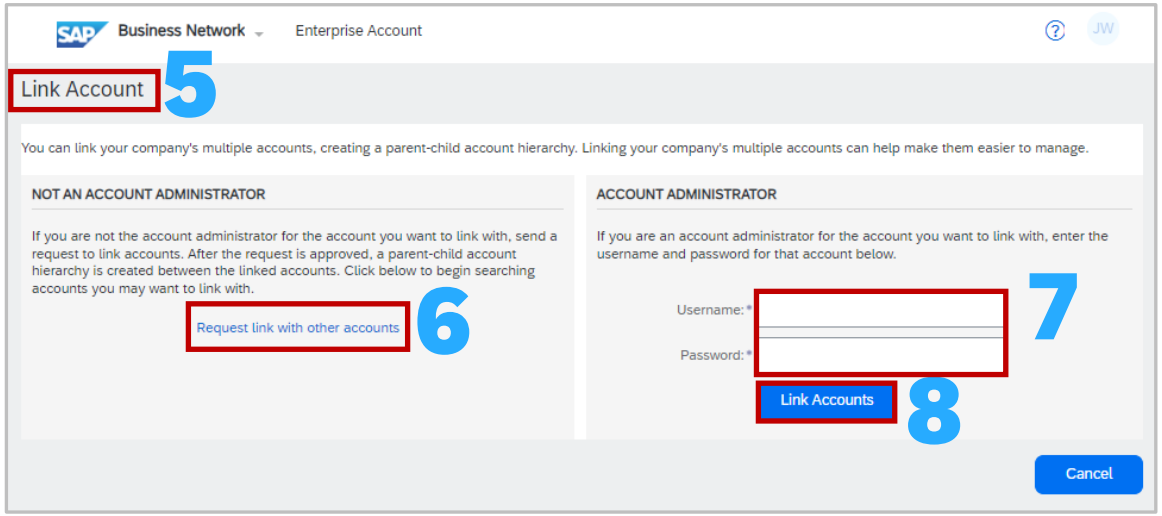
1. Click on the **initials** at the top of the page
2. Select **Settings**
3. Select **Account Hierarchy**

Note: You may get a system message identifying that there are other accounts that match your company profile, Refer to **Reviewing Existing Account**

4. Click on **Link Accounts**
5. The Link Account Screen is displayed you have two options:
6. If you are **not** the System Administrator of the account you wish to add to the Account Hierarchy, click on **Request link with Other Accounts**
7. If you **are** the System Administrator for the account you wish to link to, enter the Username of the other account and the Password for the other account, then click on Link Accounts
8. Click on **Link Accounts**, respond to system message







Reviewing Existing Accounts

From the Account Hierarchy Account Settings screen, all of the accounts are associated with the business information entered during the registration process.

The Actions column provides access to a particular account or information about the account such as the account is expired.

Display the Account Setting Screen

1. Select **Account Hierarchy**
2. Click on "**Click here to view details**"

The screen displays a list of the accounts

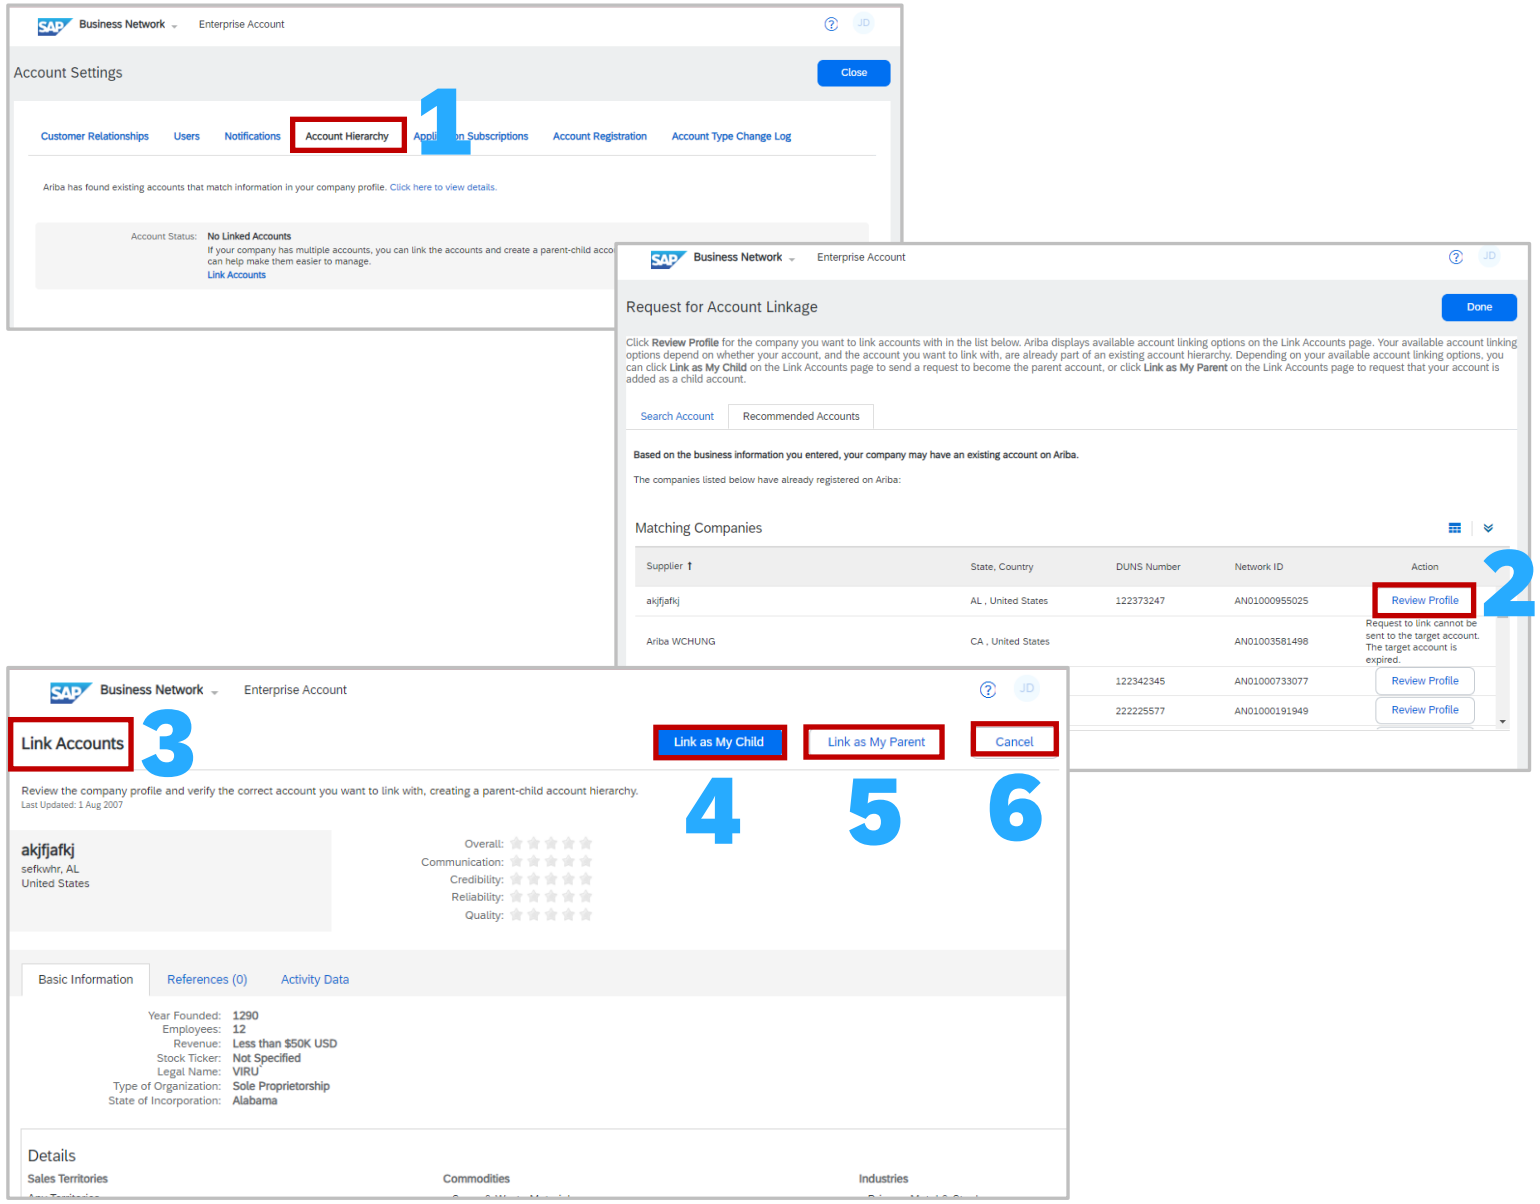
3. To review a profile, click on the **Review Profile** under the **Action** column

The Account information is displayed

4. If you wish to link this account as a **Child** click on **Link as My Child**
5. If you wish to link this account and make it a **Parent** Account, click on **Link as My Parent**
6. To exit click on **Cancel**

The screen displays the Request for Account Linkage

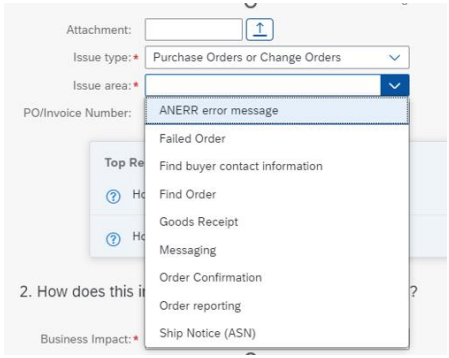
7. Continue to review as required

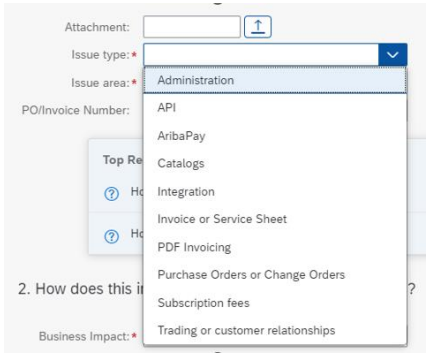


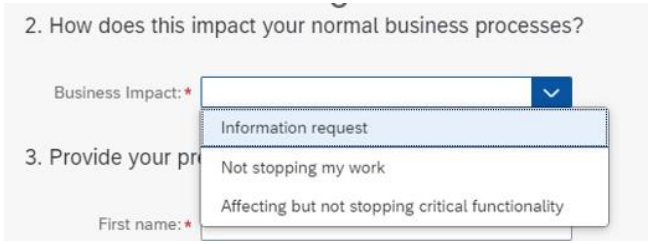
Logging a Support Request (SR)

Information

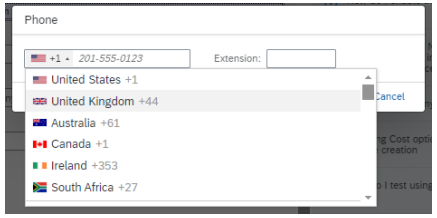
- Create a case when there is an issue that cannot be rectified
- Suppliers that use Supply Chain Collaboration processes such as scheduling, forecasting or quality (to name a few) should indicate that their issue is related to a Supply Chain Collaboration Account
- All fields with Asterisks must be completed and you will not be able to progress to the next step while there is a field not completed
- All Cases submitted will be displayed under the Contact Us tab in the SAP Help Center
- Suppliers do not need to Sign in to the SAP Business Network to access the SAP Help Center
- Ensure that the correct information is selected from drop-down list







- When entering the phone number select the Country code first

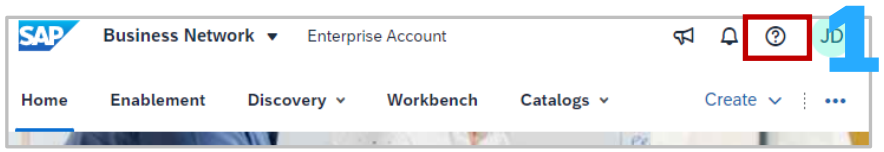


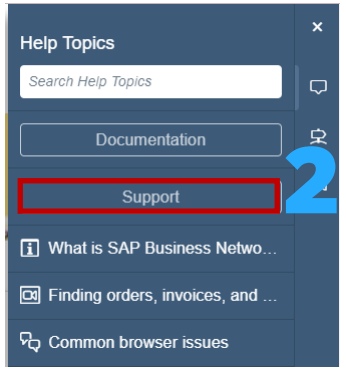
Create a Case

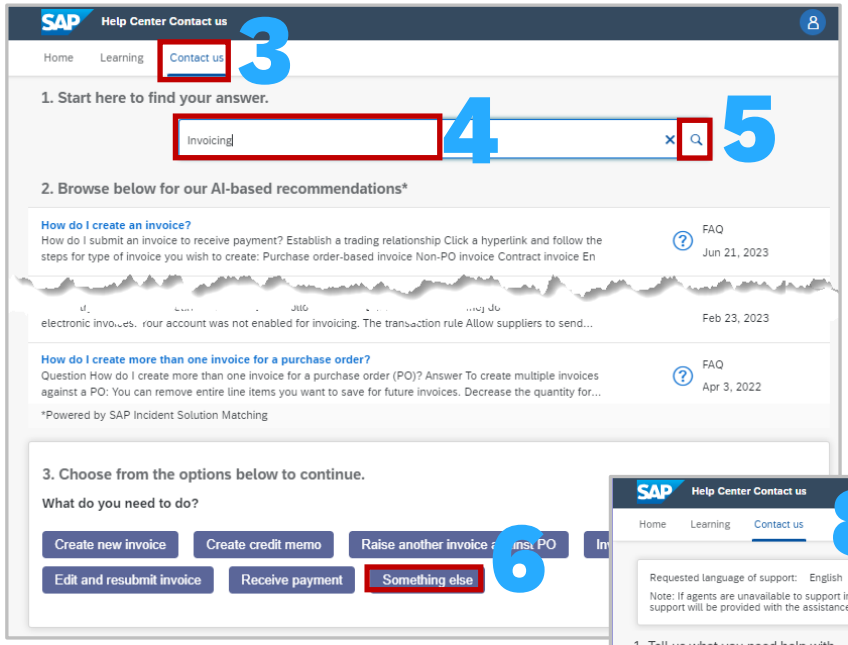
Create a case when you are unable to identify how to rectify an issue or query.

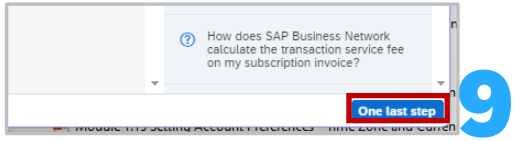
Sign into you SAP Business Network

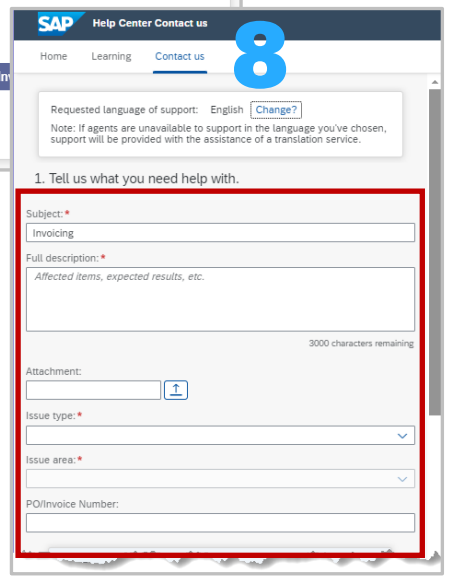
1. Click on the ⓘ
2. The Help Topics pane is shown, select **Support**
3. The Help Centre Home page is displayed, click on **Contact Us**
4. Enter what information you require
5. Click on 🔍
6. Identify if any of the AI information shown provides an answer, however, to create a case click on **Something Else**
7. Click on **Create a Case** (bottom right of the screen)
8. Complete all fields with Asterisks and select the correct information from the drop-down lists
9. then click on **One Last Step** (bottom right of the screen)
10. Select the radio button of the preferred contact option, then click on **Submit**

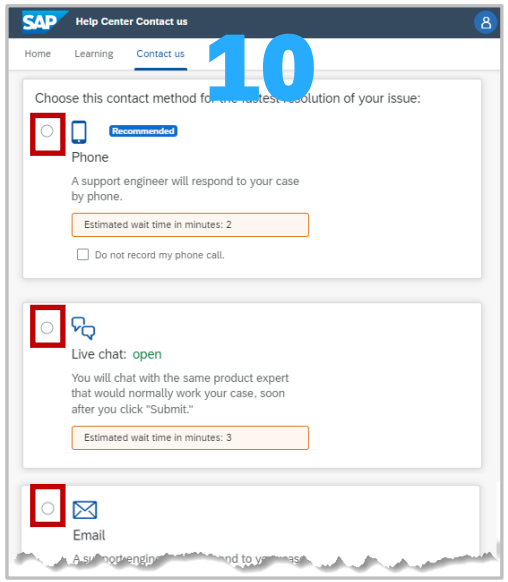












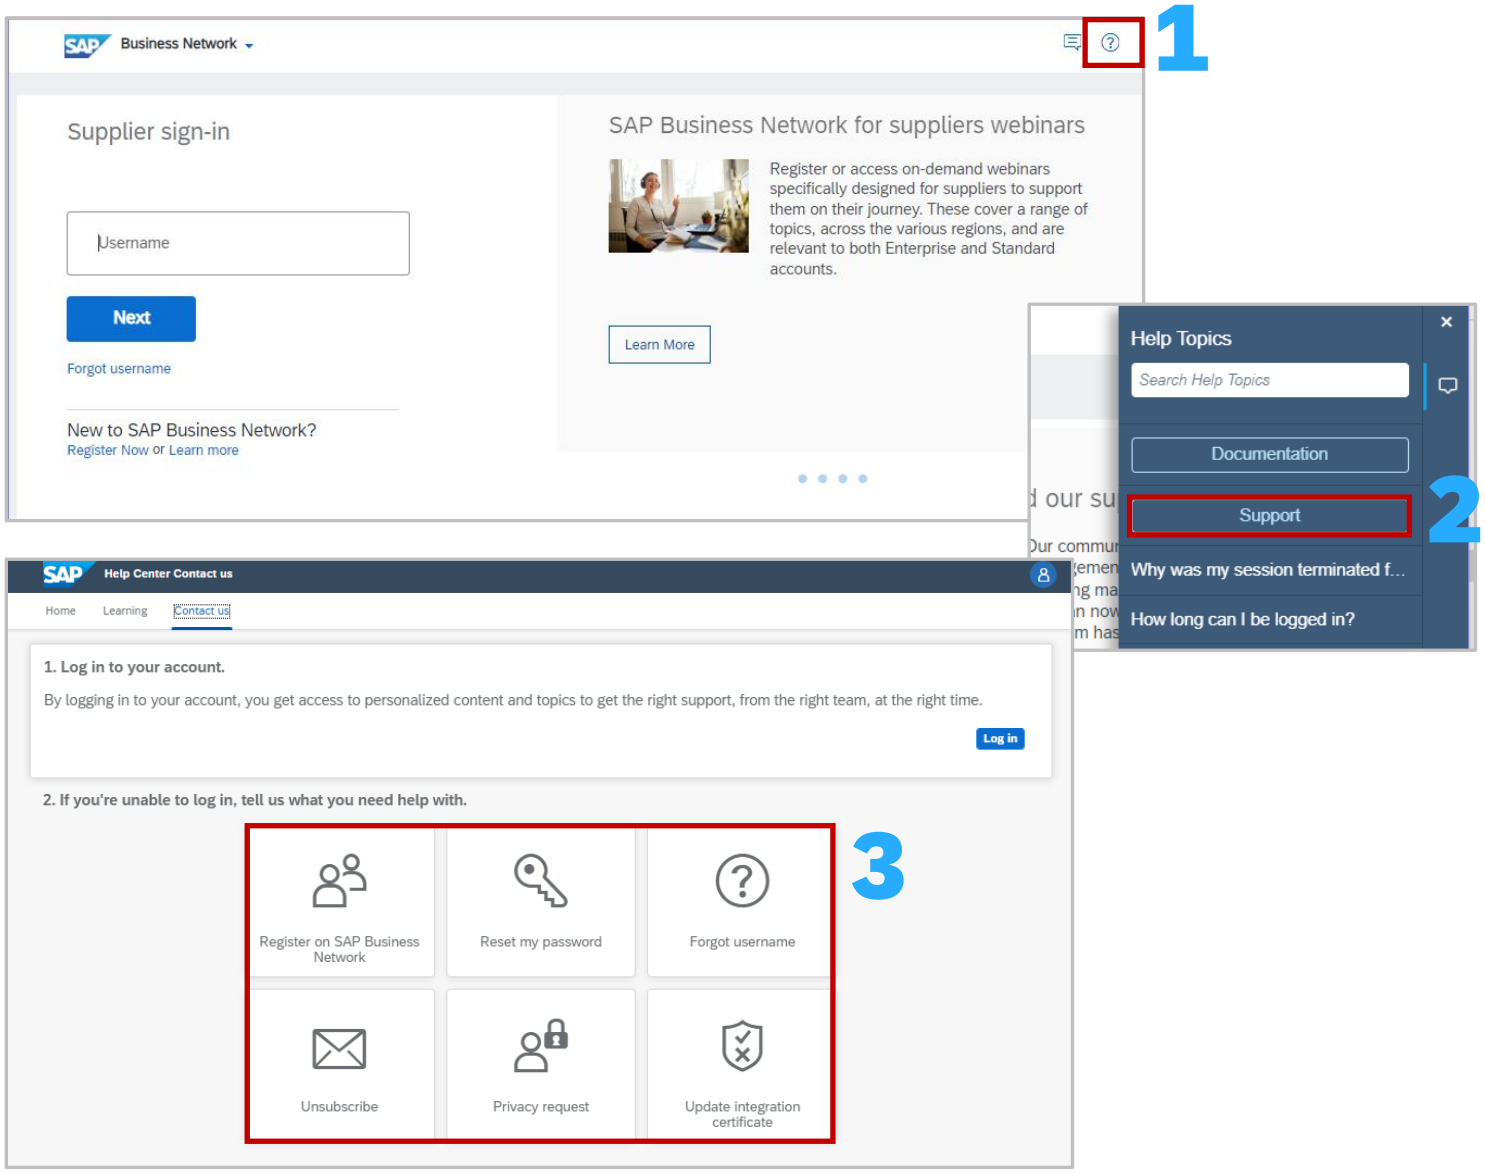
Create a Case without Signing in

Display the SAP Business Network Supplier Sign-In screen

1. Click on the **Question Mark**
2. Select **Support**
3. Select the option required

AI Options will be displayed, select the option that meets your needs, and use **Something Else** to generate other options

Note that anything with an Asterisks must be completed.



Permissions, Seller Dashboard, General Terms and Glossary

Account Permissions

- The below shows role permissions, their line of Business usage and a brief description (where available)
- The following table provides users with information about the tab, field or selection option:

Permissions	Area	Description/Use	Permissions	Area	Description/Use
API Development Access	*API / Integration*	Access to API development using the SAP URL Business Network developer portal	**Purchase Order Report Administration**	*Reporting*	Access to Reporting, Purchase Order and Order Summary report types
Account Hierarchy Administration	*Account Administration*	Manage your accounts to link and sign on to a child account	**Service Sheet Report Administration**	*Reporting*	Access to Reporting and Service Sheet Report types
Child Account Access	*Account Administration*	Sign on to access a child account	**Tax Book Report Administration**	*Reporting*	Access to Reporting, and Tax Book Report type
Order Assignment for Users with Limited Access	*Account Administration*	User can assign an order to a user with limited access to SAP Business Network Network	**Time Sheet Report Administration**	*Reporting*	Access to Reporting, and Time Sheet Report type
Contact Administration	*Account Administration*	Maintain information for account contact personnel	**Supplier Discount Management Program Administrator**	*Account Administration*	Access to discount program offers and the definition of early payment requests
Goods Receipt Report Administration	*Reporting*	Access to Reporting, and Goods Receipt report type	**Archive Access**	*Account Administration*	View and search archived items
Invoice Report Administration	*Reporting*	Access to Reporting, and Invoice Report type	**Customer Administration**	*Account Administration*	Manage customer relationships

Account Permissions cont.

Permissions	Area	Description/Use	Permissions	Area	Description/Use
Catalog Management	*Catalog*	Set up and manage catalog-related activities	**DPP_Audit_Logs_ View**		
Catalog Account Executive	*Catalog*	Access to manage price file upload and customer specific catalog upload	**Company Data Deletion Configuration**	*Account Administration*	Access to company data configuration
Catalog Content Manager	*Catalog*	Access to manage master content upload, price file upload and customer specific catalog upload	**DPP_Data_Deletio n_Access**		
Payment Profile	*Account Administration*	Configure your payment profile	**DPP_Delete_Users**		
cXML Configuration	*Account Administration*	Configure account for cXML transactions	**Transaction Data Export for Deleted Data**	*Account Administration*	Access for transaction data export for deleted data
Company Information	*API / Integration*	Review and update company profile information	**DPP_Download_A udit_Logs**		
PCard Configuration and Notifications	*Account Administration*	Configure PCard account and maintain notification email addresses	**DPP_PII_Data_Ret rieval**		
Transaction Configuration	*Account Administration*	Configure account for electronic transactions	**ID Registration Access**	*Account Administration*	Register unique identifiers, like email domains
Customer Relationships	*Account Administration*	View customer relationships	**Fulfillment Invitation Account Merge**	Account Administration	Allows the assigned user to transfer a fulfillment related invitation into his existing SAP Business Network Account

Account Permissions cont.

Permissions	Area	Description/Use	Permissions	Area	Description/Use
Cloud Integration Gateway Configuration	*API / Integration*	Create, modify, and maintain projects on the Ariba Integration Gateway	**Invoice Generation**	*Document Processing*	Generate invoices, as supported by customers (requires Inbox and Outbox Access)
Cloud Integration Gateway Access	*API / Integration*	View and search projects on the Ariba Integration Gateway	**Logistics Access**	*Document Processing*	Perform Logistics actions with limited access to transactions information
Planning Collaboration Visibility	*Account Administration*	Access to planning collaboration visibility	**Outbox Access**	*Document Processing*	View and search documents in Outbox and take actions based on your role
Create and manage postings on Ariba Discovery	*Discovery*	Create postings on Ariba Discovery	**Services Access**	*Document Processing*	Perform Services actions with limited access to transactions information
Respond to postings on Ariba Discovery	*Discovery*	Respond to postings on Ariba Discovery	**Timestamp verification**	*Document Processing*	Verify timestamp token on invoices
Contract Access	*Contracts*	View contracts and generate invoices, as supported by customers (requires Inbox Access)	**Payment Activities**	*Payments*	Manage your payment activities
Inbox and Order Access	*Document Processing*	View and search documents in Inbox and take actions based on your role	**Premium Membership and Services Management**	*Account Administration*	Manage your premium service subscriptions
Folio Management	*Document Processing*	Create, activate and delete folio ranges used for tax invoicing	**Proof Of Service Create Access**	*Document Processing*	Allows users to create a proof of service

Account Permissions cont.

Permissions	Area	Description/Use	Permissions	Area	Description/Use
Proof Of Service Create On Behalf Access	Document Processing	Allows user to create a proof of service on behalf of another user	Quality Review Creation	Quality Document Processing	Access to create quality review documents
Proof Of Service Report Access	Reporting	Allows user to create and run Proof Of Service reports	Receivables Upload	Quality Document Processing	Select receivables for auction
Proof Of Service Review Access	Document Processing	Allows users to review and assign a PO to a proof of service	Access Proposals and Contracts	Contracts	View your organization's Ariba Sourcing events and Ariba Contract Management contracts, documents, and tasks. This permission grants access to the Proposals and Contracts properties. Individual users must be approved by Ariba Sourcing buyers before they can view or participate in events or contract tasks
Quality Inspection Access	Quality Document Processing	Access to view quality inspection documents			
Quality Inspection Creation	Quality Document Processing	Access to create quality inspection documents	Credit Card Number Access	Supplier Treasury Agent	Manage the display of credit card numbers on purchase orders
Quality Inspection Signature	Quality Document Processing	Allows electronic signature of quality inspection results	Supplier Treasury Agent	Payments	View buyer-initiated early payment offers
Quality Notification Access	Quality Document Processing	Access to view quality notification documents	Time & Expense Sheet Management	Document Processing	Review and update Time and Expense sheets
Quality Notification Creation	Quality Document Processing	Access to create quality notification documents	Supply Chain Financing Provider Portal Access	Account Administration	Access to the Supply Chain Financing provider portal to trade eligible documents.
Quality Review Access	Quality Document Processing	Access to view quality review documents			

General Terms

Name of Item	Description/Use	Name of Item	Description/Use
ANID	The ANID is the SAP Business Network Network Identification number, this number is unique for each SAP Business Network Network whether a Buyer or Supplier Network	Credit Memo	A Credit Memo is a credit against a Purchase Order and at header level. For example use a Credit Memo when there has been an overcharge on shipping costs or the wrong Tax rate has been selected
ERS	Evaluated Recipient Settlement indicates that the Buyer will create the Invoice on behalf of the Supplier	Line Item Credit Memo	A Line Item Credit memo is a credit against an Invoice and is when a credit is required for damaged good or return of goods that where not fit for purpose
ERP	Enterprise Resource Planning is the integrated management of business processes such as Ordering and Invoicing	Rejected Invoice/ Edit & Resubmit	When an Invoice is rejected by the Buyer it will create a rejection, locate and open the Invoice and use Edit and Resubmit, correct the error based on the Buyer requirements and resubmit

SAP Business Network Sourcing	SAP Business Network Sourcing is used as part of Direct Materials sourcing, it is a solution for managing sourcing and suppliers across all spend categories	Documents	A Document is the information sent and received via the SAP Business Network Network
Active Buttons	Active Buttons are blue and can be selected to perform a task or process, greyed out buttons indicate that it is a process not used by a Buyer or requires another process to occur prior to activating	Fulfillment	The name of a tab that includes orders, order confirmations, ship notices, Services entry sheets, extended collaboration, product replenishment, drafts, extended collaboration and receipts
Order Confirmation	An Order Confirmation provides a Buyer with confirmation that good or services requested can be delivered or provided based on the information within the Purchase Orders	Opportunities	These represent collaboration requests
Ship Notice	A ship notice also known as an Advanced Ship Notice provides the Buyer with information about the goods arriving to their premises	Drafts	Documents can be saved as a draft for completion at a later point

Order Status Descriptions

Name of Item	Description/Use	Name of Item	Description/Use
New	Initial state. You have not updated the order status.	Partially Confirmed	The order is in progress and some of the ordered quantities have been confirmed
Changed	Your customer canceled or replaced the order by a sending a subsequent (changed) order.	Partially Shipped	If you partially confirmed an order and then you partially ship either the previously confirmed order line or a different order line, the purchase order status is set to **Partially Shipped.** You can still continue to confirm order line items regardless of the shipping status until you have confirmed all order lines.
Confirmed	You agreed to ship all line items and/or agree to the pricing, delivery of services and requirements listed in the Purchase Order	Partially Serviced	For service orders, you can continue to create service sheets for unplanned service lines up to their hidden maximum amounts (which might be larger than their subtotals) or planned service lines up to their subtotals. The service order status is set to **Partially Serviced** until all of the service lines are serviced
Confirmed with New Date	The order confirmation has a different **Start Date** or **End Date** than the order, but no other change	Partially Invoiced	Some of the ordered quantities have been invoiced
Confirmed with Changes	The order confirmation has a different **Expected Value** than the order, and also has a different **Start Date**, **End Date**, or both	Partially Rejected	Some or the ordered quantities have been rejected
Shipped	Final state. You shipped the entire order	Serviced	The order is fully serviced. You cannot create any more service sheets for any more service lines in the order
Invoiced	The order is fully invoiced. The **Amount Invoiced** column shows how much money you have invoiced or charged against the purchase order. For older purchase orders, displays **Yes** to indicating that you have submitted invoices	Received	Statuses for receipts that are sent by the buyer from their ERP system. The purchase order status is updated based on this information
Obsoleted	Purchase order that has been replaced by a subsequent (changed) order	Partially Received	Only some of the goods received have been receipted into the Buyers ordering system or ERP.
Cancelled	A cancelled Purchase Order means it can no longer be used, where a Buyer cancels a Purchase Order and then re-instates it the balance tracking will not carry forward	Returned	Specific to Supply Chain Customers using returns
Failed	experienced a problem routing the order to your account. You can resend failed orders.		

Routing Status
