Feature at a Glance
Guided sourcing support for full sourcing projects

Patricia Linss, SAP Ariba
Target GA: November 2021

THE BEST RUN **SAP**

Feature at a Glance
Introducing: Guided sourcing support for full sourcing projects

Customer challenge

Sourcing events can derive as a result of an overall sourcing strategy initiative. Those initiatives mostly are governed by an overall project plan involving a core team and key stakeholders across the organization. Deliverables need to be captured, internal collaboration need to be facilitated as well as a governance structure such as phases, milestones and its tasks/deliverables.

Meet that challenge with
SAP Ariba

The full project functionality is available in SAP Ariba Sourcing and is now also available as part of the guided sourcing capability.

Running a full project in Ariba Sourcing facilitates operational efficiency by providing one single point of truth for sourcing initiatives which require project governance and internal collaboration across key stakeholders.

Experience key benefits

- Expand guided sourcing capabilities to full projects
- Increased adoption
- More compliance and visibility on processes
- Improve operational efficiency

SAP Ariba Sourcing

SAP Ariba Strategic Sourcing Suite

Implementation information

This feature is **automatically on** for all customers with the applicable solutions and is ready for immediate use

Prerequisites and Restrictions

- Realm needs to have guided sourcing enabled
- Necessary user permission: Category Buyer

Feature at a Glance
Introducing: **Guided sourcing** support for full sourcing projects

Detailed feature information

The full project functionality is available in SAP Ariba Sourcing and is now also available as part of the guided sourcing capability.

The full projects functionality facilitates the collaboration amongst internal stakeholders as part of a sourcing initiative which follows an overall project plan with phases, milestones and tasks which ultimately can translate into deliverables being part of the sourcing initiative. These can be documents and/or events.

A smart dynamic template appearance behavior upon project creation enabled through conditions in the template, drive operational efficiency. Users do not need to search for the appropriate project/document/event template, but will be guided by the solution by completing header field information.
