Introducing: Delivery Execution Data Analytics Story

Ease of implementation  Low touch / simple
Geographic relevance  Global

Customer challenge

Buyers need to understand the performance of their supplier using standardized industry metrics such as OTIF (On Time In Full delivery) and need to investigate current metrics results to identify areas of improvement and bottlenecks. However, it is extremely time consuming to collect all the data and calculate the key performance indicators.

Meet that challenge with SAP Ariba

This feature introduces the Delivery execution data analytics story. The delivery execution story presents a high-level overview of the performance of suppliers in terms of delivery of ordered goods measured against requested delivery dates and ordered quantities.

Experience key benefits

With out-of-the-box delivery performance calculation and Supplier monthly scorecards, the Business network will help buyers and their organizations improve the efficiency of their supply chain and build an excellence culture across their supplier base.

Being able to track the delivery execution metrics for specific suppliers as well as the general performance month over month will allow customers to have more informed discussions with their suppliers, identify the areas of improvement and track progress.

Solution area

SAP Ariba Supply Chain Collaboration

Implementation information

This feature is **automatically on** for all customers with the applicable solutions and is ready for immediate use.

Prerequisites and Restrictions

See Slide 3 for Prerequisites and Restrictions

Feature at a Glance

Introducing: **Delivery Execution Data Analytics Story**

Prerequisites

- A buyer administrator must activate the analytics functionality in your Ariba Network account.
- You must have the Analytics dashboard access role permission to access the Analytics dashboard that displays the stories.
- You must be enabled for SAP Ariba Supply Chain Collaboration.

Restrictions

This feature is not applicable to:

- Blanket purchase orders and scheduling agreements.
- Purchase order line items with multiple schedule lines.
- Service type purchase order line items.

Navigation

1. From the Home page, Navigate to Reports > Analytics

1

The screenshot shows the SAP Ariba Network Home page. The navigation menu at the top includes Home, Orders, Fulfillment, Quality, Invoices, Payments, Catalogs, Supplier Enablement, Administration, and More. A dropdown menu is open under 'Reports', with 'Analytics' highlighted. The main content area shows 'Enablement status for All waves' and 'Vendor counts' with four cards: 36 need attention, 0 to approve, 7 to enable, and 16 to activate. Below this is a 'Full enablement progress' section with a horizontal bar chart showing activity for Account, Catalog, Invoice, Purchase Order, Payment, and Discount Management.

2. Navigate to the Delivery Execution Story.

2

The screenshot shows the 'Delivery attainment' story in SAP Ariba Network. It features a 'Purchase orders overview' section with a table of filters and summary statistics. The summary statistics include: Purchase orders amount in EUR (€9,066,187.08), Purchase orders count (188), and Active suppliers (11). Below this are two charts: a donut chart for 'Purchase orders amount per Order Status' and a horizontal bar chart for 'Purchase orders amount per Supplier Name'.

Order Status	Percentage
New	71.20%
Rejected	9.00%
Partially Invoiced	8.86%
Confirmed	3.90%
Failed	3.40%
Shipped	1.88%
Invoiced	0.99%
Partially Shipped	0.55%
Partially Serviced	0.22%
Serviced	0.04%

Supplier Name	Amount (EUR)
Test Ariba Support Team IDC	8,596,560.49
TestReminder	363,850.55
MAPPING SPRL	99,192.32
IDC Tech Support - Supplier	2,663.83
IMPRO PLUMBING & ENGINEERING PT6	2,663.83

Feature at a Glance

Introducing: Delivery Execution Data Analytics Story

The story displays delivery execution metrics for your entire supply chain and at a supplier level for the previous month by default. You can also filter data by supplier and by month using the **Supplier Name** and **Requested delivery month** filters.

The screenshot displays the SAP Ariba Network interface for the 'Delivery attainment' story. The main dashboard shows three key metrics for the supply chain: Perfect delivery % (76.19), On time delivery % (85.71), and In Full delivery % (90.48). Below these are counts for Perfect Deliveries (16), Evaluated deliveries (21), On Time deliveries (18), and Evaluated deliveries (21). A table at the bottom shows 'Supplier delivery attainment' for CMX Tech, Digi Emea, and LEA Corp.-TEST, with columns for Perfect %, On time %, In Full %, Total Items, and Evaluated deliveries.

Two callout boxes highlight the filter options:

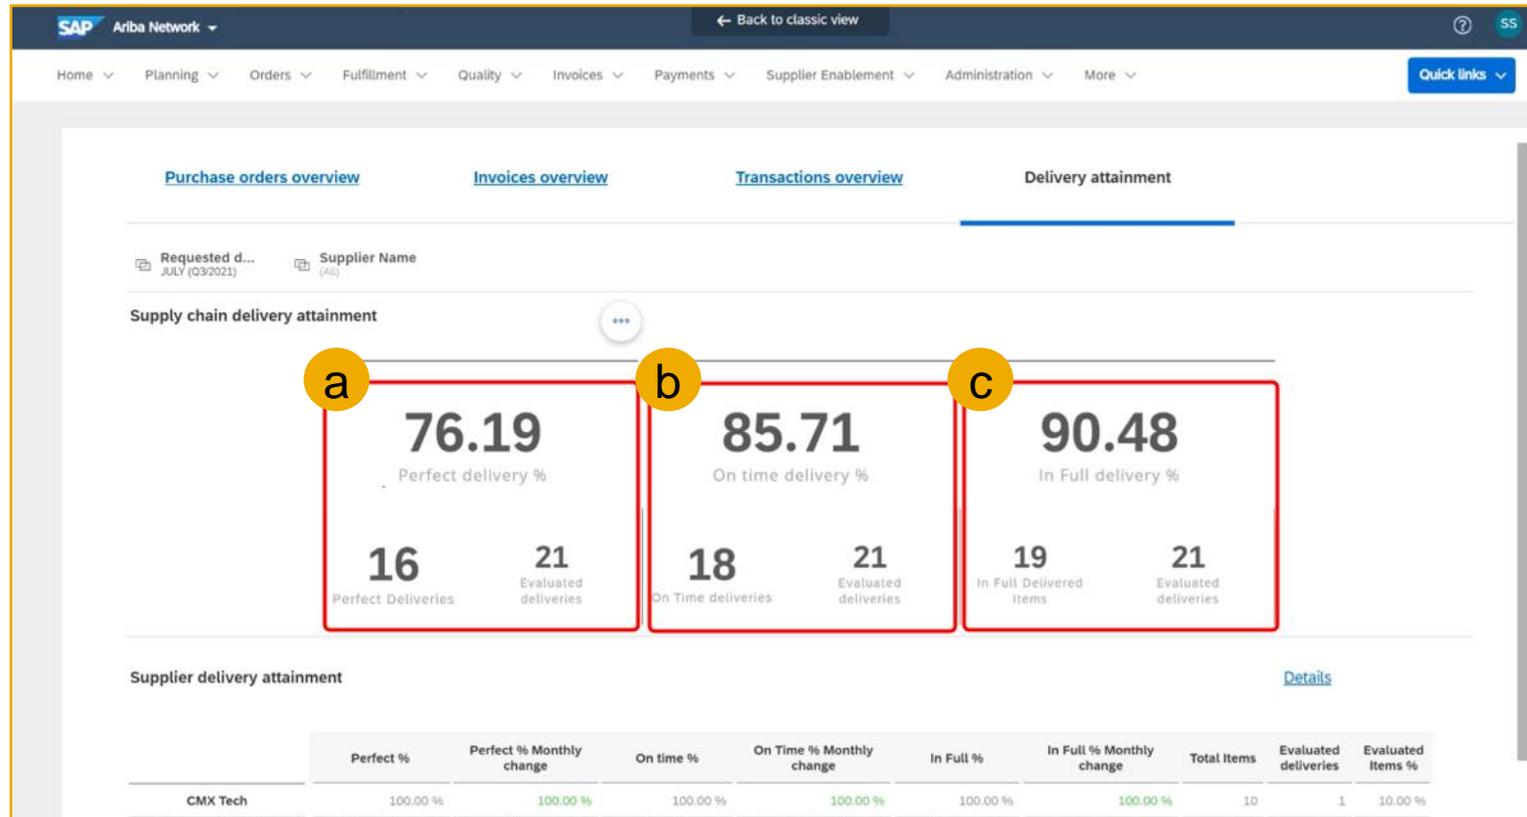

- Requested delivery month filter:** A dropdown menu showing options for All, SEPTEMBER (03/2021), AUGUST (03/2021) (selected), SEPTEMBER (03/2021) (202109), and JULY (03/2021).
- Supplier Name filter:** A dropdown menu with a search bar and a list of suppliers: All, Brittech Ltd, CMX Tech, CR- Info Tech Pty (Ltd) - TEST, Digi Emea, Elektro Alex - TEST, and Eurolabs Company. A 'Show Inactive Values' link is also visible.

Feature at a Glance

Introducing: Delivery Execution Data Analytics Story

There are three main key performance indicators in the delivery execution data analytics story. Dates and quantities in receipts are compared against requested delivery dates and quantities in purchase orders to assess delivery performance for the following key performance indicators:

a. **Perfect delivery %** is the percentage of deliveries that are considered both on time and in full.

b. **On time delivery %** is the percentage of deliveries whereby the receipt date is earlier than or the same as the requested delivery date.

c. **In full delivery %** is the percentage of deliveries whereby the requested quantity matches the received quantity.

Feature at a Glance

Introducing: Delivery Execution Data Analytics Story

The story displays delivery execution metrics at supplier level as well. In this case you will be able to review the delivery execution metrics and additional information for each one of your suppliers. The suppliers are listed in decreasing order of perfect delivery %.

Supplier delivery attainment									
	d	e	f	g					h
	Perfect %	Perfect % Monthly change	On time %	On Time % Monthly change	In Full %	In Full % Monthly change	Total Items	Evaluated deliveries	Evaluated Items %
CMX Tech	100.00 %	100.00 %	100.00 %	100.00 %	100.00 %	100.00 %	10	1	10.00 %
Digi Emea	100.00 %	100.00 %	100.00 %	100.00 %	100.00 %	100.00 %	1	1	100.00 %
LEA Corp.-TEST	100.00 %	100.00 %	100.00 %	100.00 %	100.00 %	100.00 %	17	8	47.06 %
Maxprint	100.00 %	100.00 %	100.00 %	100.00 %	100.00 %	100.00 %	9	3	33.33 %
Eurolabs Company	60.00 %	60.00 %	80.00 %	80.00 %	80.00 %	80.00 %	14	5	35.71 %
Brittech Ltd	0.00 %	0.00 %	100.00 %	100.00 %	0.00 %	0.00 %	2	1	50.00 %
CR- Info Tech Pty (Ltd) - TEST	0.00 %	0.00 %	0.00 %	0.00 %	100.00 %	100.00 %	1	1	100.00 %
Fluying Dutchman Company	0.00 %	-	0.00 %	-	0.00 %	-	1	0	0.00 %

d. **Perfect %** is the percentage of deliveries that are considered both on time and in full.

e. **Perfect % Monthly change** is the difference between the current month perfect % value versus the previous month's value.

f. **On time %** is the percentage of deliveries whereby the receipt date is earlier than or the same as the requested delivery date.

g. **On time % Monthly change** is the difference between the current month on time % value versus the previous month's value.

h. **In full %** is the percentage of deliveries whereby the requested quantity matches the received quantity
