## Introducing: SAP Business Network Supplier mobile release 7.0

### Challenge

In the 2105 release, the Ariba Network became part of the SAP Business Network. However, the supplier mobile app name is not aligned with this change.

### Meet that challenge with SAP Ariba

The SAP Ariba Supplier mobile app has been renamed, in line with the change of the Ariba Network becoming part of the SAP Business Network.

### Experience key benefits

- Continue using the mobile app to benefit from:
- Being more responsive to customer inquiries, orders, and leads.
  - Improving efficiency with the ability to review and send documents.
  - Increasing customer satisfaction with better response times and constant collaboration.

### Solution area

SAP Ariba Supplier mobile

### Implementation information

**iOS users** must download the **SAP Business Network Supplier** mobile app from the app store by March 30, 2022.

**Android users** will notice the change when updating to the latest version of the mobile app.

### Prerequisites and Restrictions

None

# Feature at a Glance

## Introducing: SAP Business Network Supplier mobile release 7.0

### Detailed feature information

The steps on this slide apply to **iOS users only**. Android users will notice the app name and icon changes automatically when they download the latest version of the mobile app.

SAP Ariba Supplier mobile app users must download the **SAP Business Network Supplier** mobile app from the app store to continue using the service. Once the **SAP Business Network Supplier** mobile app is downloaded, you can sign in with the same username and password. All features will remain the same. We recommend deleting the SAP Ariba Supplier mobile app to avoid confusion. *After March 30, 2022, the SAP Ariba Supplier mobile app will not be supported.*
