## Introducing: Prompts to set up early payment email notifications

### Customer challenges

Many suppliers are unaware of what's needed to take advantage of a buyer's early payment program.

Many suppliers can't find relevant improvement information. There is too much information to filter through in quarterly release readiness communication cycles.

People expect to have information about setup the instant they need it.

### Meet that challenge with

#### SAP Ariba

Ariba Network automatically prompts the supplier's Treasury agent to either...

- to provide missing early payment offer email notification set-up
- to adopt the daily email summary if the supplier received more than 5 offers received in last business day

...in early payment offer and confirmation pages.

### Experience key benefits

- People get information about the setup of the system when they need it.
- Simplification of supplier and user onboarding
- Reduction of onboarding and support costs
- Alignment to SAP intelligent enterprise vision. SAP's software should include intelligence to drive suppliers to self configure.
